We are quite unable to share the satisfaction which seems to be generally felt at the prospect of the French Assembly continuing M. Thiers's powers as Chief of the Executive for a definite period of two years. There is a natural impatience in France at the indefinite continuance of a Provisional Government, and abroad there is a like vague wish for the establishment of some form which can be called by a familiar name, and recognised as a regular Government. There is a sort of notion that France is without its proper equipment as a great nation unless some such form is settled upon, and everyone knows what its Government is. But the feeling is an unreasoning one, and the particular step proposed appears to us full of serious evils.

The error of impatience at existing arrangements is just this, that France is at present in a condition which requires some sort of Provisional Government, and that the attempt to get a definite form before the mind of the nation can be made up will do nothing but harm. There can hardly now be a settled opinion in France, commanding the assent of the great majority of the nation who are not partisans, as to the Government which should be set up. The Empire, which at least had the mass vote and physical force on its side while it lasted, has been utterly discredited, and certainly commands no such support as would enable it to be set up at once without a Civil War. The Monarchists again, though they happened, from a variety of accidents, to have a majority in the peace elections, have obviously a most disproportionate vote in the Assembly compared with their weight in the country, and could not venture on a monarchical experiment, even if they were sufficiently agreed among themselves respecting the sovereign and the vital points of the monarchical constitution. The Republicans are also divided among themselves, and though M. Gambetta says they have now a majority in the rural districts, as well as in the towns, that is an opinion to which his opponents would not readily assent, and which it would be most unsafe to act upon till there is a new election. In such a state of opinion therefore there is a real reason both for postponing a new election for sometime till the country has got habituated to free discussion, and for deferring till the new election any attempt at settling the form of government, or establishing any other arrangements but what will tide over the emergency. The indefiniteness of the present arrangements undoubtedly produces mischiefs, but they are as nothing compared with the evils and miseries which would result from the attempt to define and settle what there is no absolute need to touch at all. No doubt the prolongation of M. Thiers's powers would not settle much in itself, but the opposite motions to call him Chief of the Republic, and to omit the title, show what is in men's minds, and that any definition fixed upon will be resented by one or more of the numerous parties in France. It would be much better to continue the present informal Government, leaving all these difficult questions untouched. We are not sure too but what the present informal arrangement—Government by a single representative Chamber, or representative Government in its simplest form, divested of all name of Republic or Constitutional Monarchy—is not really the best chance which France has for the growth of some settled form without the shock of a revolution. The names of Republic, Monarchy, and Empire offend greatly, but there is no offence at a Government which has no name, and which furnishes the nation with some shadow of self-rule. It divides parties in France even less than a so-called Republic. In the state into which France has got it is rather a good thing that there is something to fall back upon by which Government can be carried on and which is not identified with any of the mutually irreconcilable parties. There would be less violence in the continual changes of the ordinary forms of Government if there was a constitutional understanding as to the ultimate authority of

a representative assembly, such as there is in some of the American States with respect to periodical conventions.

The provisional arrangement in France is thus one which should not be lightly disturbed, but the change proposed is itself a most mischievous one. It is in fact a proposal to introduce one of the greatest proved dangers to the harmonious working of any Government—the danger of disagreement between an irremovable Executive and an irremovable Legislature. M. Thiers is to be the Executive for two years, and he is to have beside him a Legislative Chamber which he cannot dissolve. As administration and legislation are inextricably associated, the Executive being imperfect unless it carries out the will of the Legislature in the spirit as well as in the letter, and not being properly responsible unless it has the power of amendment, it follows that every Government is defective unless there is some means of making the Legislature and Executive harmonise, and the defect will exist in the new arrangements in France. And the evil, as we have often shown, is most dangerous. It is not long since the Americans suffered from it in its intensity, when President Johnson set himself to thwart Congress, and Congress, besides passing Bills over his veto, resorted to the most extraordinary measures for enforcing its will by means of unwilling agents. Not very long ago too, between 1848 and 1851, France had experience of the very same evil in the discords between the President elected for a term of years, and the Assembly which was quite independent of him. Such an arrangement in France is the sure road to a *coup d' état*, either by the Executive or the Assembly, when a dead-lock has once arisen. Even in England we have a foreshadowing of what the evil may be in the disagreement between the Executive which the House of Commons appoints and a portion of the Legislature which is out of harmony with it. No more subtle device could be contrived for making representative Government impossible, and producing those political agitations which are so apt to rise in France to the revolutionary point.

Nor is there anything in the character of the Chief of the Executive chosen, or in the Assembly which is to be associated with him, to allay the apprehensions with which the experiment may be looked forward to. M. Thiers is just the man to disagree with the Chamber, and cause mischief in the country by the attempt to enforce his prejudices. The peculiar circumstances which have made him the inevitable ruler in France for the moment, his own ambition and self-confidence, his imperfect knowledge of the economic and social questions which count for so much in the business of modern government, his attachment to a few antiquated ideas in policy—are all so many reasons for his getting out of harmony with the nation sooner or later, and sooner rather than later. The same qualities will also lead him to carry things to an extreme point, and make mistakes which will lash the nation into fury. France has already had a taste of his temper in the attempt to force the adoption of his proposed 20 per cent. duty on raw materials, and similar attempts are sure to be made on behalf of notions which but for M. Thiers would hardly get a hearing at all. The Assembly again is by no means distinguished for any sort of good quality in a Legislature which would enable it to overawe the Executive by its authority. It is rather the sort of Assembly which a politician like M. Thiers, accustomed to manage assemblies, would despise. It does not represent the country with accuracy, it has no great weight of knowledge or experience, its majority is almost passionately attached to ideas, such as the establishment of a Monarchy, which it is quite unable to carry out. The Chief of the Executive will assuredly be tempted to stretch his power to the utmost, and make the Assembly, if possible, his slave. The Assembly, on the other hand, will be submissive and petulant by turns, always showing its inclination for something which it dares not attempt, and seeking to vindicate its power by occasional revolts. It is perhaps as unfit an Assembly as could be contrived for governing by means of a removable Chief of the Executive; but the possession of the power of removal would at least leave the legal authority at all times unquestionable, and render possible an apparent agreement between the Assembly and its Chief. By the proposed arrangement, the means for efficiently training it—the possession of great power and responsibility—will be destroyed, while it will retain sufficient power to make its action mischievous.

We deprecate very much then the proposed change in France. Apparently it will be carried out; but we are sure, if it is, that it will add one more to the ample illustrations which modern constitutional history furnishes of the mischief of divided authority in a State—of the absence of an ultimate authority which can at all times be appealed to. And France, as we have already stated, is the country above all others in which the experiment is likely to produce the maximum of injury.

THE NEW ISSUE OF MR BOUTWELL'S FUNDING LOAN.

A NEW attempt is being made this week to carry out in part Mr Boutwell's plans for converting the American debt at a lower rate of interest. It is now two years since the projects were first mooted, and it will be interesting to inquire why it is that the United States' Government has made such slow progress with the work, and what are now the prospects of ultimate conversion. When the projects were first talked of we pointed out the circumstances which made for and against Mr Boutwell, and intimated the opinion that though it was at that time impracticable, circumstances might soon change so as to permit the success of a proper scheme, though not to the extent which Mr Boutwell anticipated. In what way have the circumstances changed during the last two years?

It will be useful to explain first however what Mr Boutwell's ideas have been, and what relation the coming issue has to the original scheme. On the whole that scheme has not yet come near being reduced to practice. According to the Act of Congress passed July 14 last year, the Treasury were authorised to issue three classes of bonds for the conversion of the 5-20 debt:—

1st Class—$200,000,000 (say 40,000,000*l*), bearing 5 per cent. interest, irredeemable for ten years.
2nd Class—$300,000,000 (say 60,000,000*l*), bearing 4½ per cent. interest, irredeemable for fifteen years.
3rd Class—$1,000,000,000 (say 200,000,000*l*), bearing 4 per cent. interest, irredeemable for thirty years.

Mr Boutwell's notion apparently was that in consequence of the rapidity with which the Americans were paying off their debt investors would be glad of the opportunity of obtaining bonds, irredeemable for a definite period, at a lower rate of interest than they would otherwise accept. The risk of soon not getting American bonds at all might seem an inducement to them to be content meanwhile with a lower rate of interest. But this scheme has never really been tried, and the practical attempts have been confined to the issue of a portion of the 5 per cent. bonds, the authorised amount of which was increased by a supplementary Act of Congress, passed in January last, to 500,000,000 dols, or 100,000,000*l*. Of this sum 200,000,000 dols, or 40,000,000*l*, were offered for subscription last March, but only 75,000,000 dols, or 15,000,000*l*, were placed—and that in America. Of the remainder, 50,000,000 dols are reserved for the National Banks, leaving 75,000,000 dols, or 15,000,000*l*, which is the amount of the present issue. The remaining 300,000,000 dols are reserved for future disposal with the 4½ and 4 per cent. bonds. Mr Boutwell has thus only obtained a most partial success for his scheme. Instead of getting out his various classes of bonds, as orignally contemplated, he has been induced to increase the amount of his first class, bearing 5 per cent. interest, and after all is only just placing the balance of the original amount of that first class, leaving the larger portion of the increased amount to a future issue. Such is the history of Mr Boutwell's conversion scheme, and we have now to consider the present position with the prospect two years ago.

In the first place, the failure is not due to disappointment in any of the causes which were expected to make for Mr Boutwell. These were—the increasing wealth of America, and the amplitude of the security for the loan; the disappearance of various causes of American discredit, such as the loose talk about repudiation; the rapidity with which the Americans were paying off their debt; and the probable continuance of peace between America and the countries of Europe, especially England. We should rather be disposed now to insist more strongly on the support given by these circumstances to American credit than we did two years ago. As respects increase of wealth, there is no doubt that in spite of her tariff America has been adding to her resources by immigration, the natural growth of the home population, and the steady increase of machinery. The restoration of the cotton-growing industry of the South to its former magnitude is a final proof that the effects of the war have been covered up, and

that America is once more growing at something like its old rate. As regards the disappearance of discredit, the old talk about repudiation is almost wholly forgotten, though for the time it certainly did no small harm in this country to investments in the American debt. As regards the continuance of peace, not only is there room for the general confidence which we then expressed, based on the good sense of the two nations and the substratum of mutual good feeling between them, but the actual reference of the Alabama claims to arbitration, and the settlement of other pending difficulties, have gone far to make clear to both nations that there is really no chance of a disagreement which can lead to war. In all these points therefore American credit stands much higher than it did two years ago, and its ability to borrow at less than 6 per cent. interest, if other causes do not prevent, is increased.

The other cause which we mentioned—the rapidity with which the Americans are paying off their debt—deserves the fullest notice. We must still entertain our doubts whether the Americans have done wisely to pay off so much instead of seeking other means to improve their credit. We believe they would have gained more by first making their currency convertible, and abolishing their protective tariff. But it is nevertheless true that by paying off debt largely they gain something, and on this point the character which America had gained two years ago has been amply maintained. Altogether, the amount of debt paid off in the five years between the 1st of July, 1866, and the same date in 1871, was 481,205,000 dollars, or about 96,241,000*l*; and of this sum about 43,000,000*l* has been paid since May, 1869,—that is, during Mr Boutwell's administration. Notwithstanding very great reductions of taxation in the interval, such has been the elasticity of the revenue that a very high rate of repayment has been kept up. The effect on American credit of this and other causes is clearly displayed by the figures. The redemption of the 5-20's has hitherto been effected by purchases in the open market, but whereas in the autumn of 1869 they were about 11 or 12 per cent. under par, they have been gradually rising in value, and Mr Boutwell's purchases since May last have been at between 99·15 and 99·96 per cent. in gold. Practically Mr Boutwell now finds it most convenient instead of purchasing in the open market at par, or a little above it, to exercise his option of calling in the bonds under the original Act of issue. In the London market the price of the 5-20 bonds, as we have often had occasion to notice, has now for sometime been fractionally above par, though the likelihood of the power of redemption being exercised of course prevents them from rising any higher.

Nor have the circumstances which we pointed out as likely to make against Mr Boutwell in his experiment of conversion changed for the worse during the last two years. These were —the tariff, the depreciated paper currency, and the usually high rate of interest in America. If anything the tariff has since been slightly modified in a Free-trade direction, and the liklihood of its being farther modified is still more in American favour. The paper currency again has appreciated a good deal in value, increasing the chances of its being made convertible with the least amount of shock to American business. It is a great obstacle to American credit, hindering its trade, making foreigners afraid of being paid in paper, and compelling the American Government to obviate the obstacle if possible, as is done in the Acts authorising Mr Boutwell's scheme, by distinct pledges to pay principal and interest in gold. The necessity for such pledges is always injurious in a credit operation. Still America is better situated than she was two years ago, and the pledges will have more weight. The difficulty of a high rate of interest at home is a more permanent one; but every year increases the amount of foreign competition for American investments, even if the new outlets for capital in America itself are quite on a par with the home savings in years of great prosperity such as we have lately seen. The difficulty at any rate is far from being an increasing one, and is probably more than balanced by the gradual diminution of the American debt available for investment.

Why then has Mr Boutwell not succeeded? and what chance has he of succeeding now? As regards the former question, we think there are ample reasons for Mr Boutwell's want of success, notwithstanding the gradual improvement of all the conditions for a conversion scheme. He attempted too much in the first place, and offered no inducement for people to take his 4½ and 4 per cent. bonds. We doubted from the first whether he would succeed to the extent he contemplated, and we could hardly have imagined he would have proposed an issue of 4½ and 4 per cent. bonds, without any inducement but a promise not to redeem them for lengthened periods. This was discounting much too highly the gradual reduction in quantity of the American debt. If he wished to make sure of success, he should have tempted the public more, and been content with a less reduction of interest. But another cause of failure—the cause why the attempt to convert at 5 per cent. is only a partial success—has undoubtedly been the French war and its after effects. The war made money dear at once, and though it soon after became abundant and cheap, the apprehensiveness of dearer money, so long as the war lasted and so long as great French loans were impending, was incurable. The more permanent result of the war, so far as America is concerned, is unfavourable. It has given her a powerful competitor in the European markets. When French 3 per cent. Rentes were above 70, it seemed an anomaly that a great power like America, with equal or superior resources, undoubted credit, and a smaller aggregate of debt, should be unable to borrow at less than 6 per cent. But now French Rentes are at 55 or 56, and France has been glad to borrow at 6 per cent.—the new loan still standing at a price which would pay the investor 5½ per cent., besides the opportunity of capital improvement it offers him should French credit improve. The change in the position of France, which might otherwise have been a lender, has thus acted powerfully in an opposite direction to the causes which have gradually improved American credit. Even if Mr Boutwell's plans had been more wisely framed in detail than they are, it may be doubted whether America could have converted any large portion of its 6 per cent. into a 5 per cent. stock in the recent circumstances of the market. Without any special inducement, without framing the plan in such a way as to tempt the investor with the prospect of a gain in capital, such as he may obtain in French stocks, it was clearly impossible to do so.

It must be admitted, however, that the chances are once more in Mr Boutwell's favour, that he may succeed in completing the conversion of 40,000,000*l* 6 per cent. bonds into 5 per cent. bonds, and that a farther operation of the same sort may soon be possible. The diminution of the quantity of the American debt is certainly telling greatly on the market, and probably the most effect of the French competition has been felt,. There is some likelihood that France will endeavour to keep out of the money market as long as possible, so that she may issue the next large loan required at a lower rate. And if France can borrow once more at 5 per cent. or less, America will have a better chance than she has lately had, or has at present, of doing the same. There is no doubt too that apart from the circumstance of the higher rate of interest current in America, that country ought to borrow at a much cheaper rate than France. She has barely one-half the debt, a much smaller total burden of taxation, and greatly larger resources. Probably it will not be easy, for a good while at least, to convert any material amount of the debt into bonds bearing less than 5 per cent. interest, but the saving of 1 per cent. on the present annual interest should still be an object of importance to American Finance Ministers.

SANITARY LAW AND ITS ADMINISTRATION.

It is already obvious how useful a weapon Mr Gladstone has given into the hands of his enemies in the neglect which may fairly be laid to the charge of the Home Office this year. When the Tories can take breath after their denunciation of the Royal Warrant, the Berkshire *fiasco*, and the late naval disasters, they find a fresh excitement in assailing the Ministry who, busied with factious objects, have failed to provide securities for the life of the people. It is easy indeed to arraign Mr Bruce's apathy on this score during the past Session, and the charge is very difficult to answer. The abandonment of the Mines' Regulation Bills, the mutilation and practical extinction of the Metropolitan Water Bills, the adoption of a weak compromise with the anti-Jennerites on the question of vaccination, the continued powers of obstruction granted to local authorities in matters of sanitary improvement—these are a few of the sins of omission and commission which form the substance of much damaging Tory declamation. Doubtless this weapon, which Mr Disraeli has already wielded, will be freely used in every coming political contest. We observe that Mr Watney, who issued his address to the electors of

East Surrey on Thursday in the Conservative interest, places in the forefront of his political professions a record of his disappointed hope that "measures affecting the general well-"being and the sanitary condition of the people, which in my "opinion were urgently needed, would have been introduced "this Session, in preference to those dealing with further "changes in our political system." This is, for the moment, the cue of the Conservatives, and it is likely to serve their turn.

For in recent years there has been a great deal of just discontent floating in the public mind as to the measures taken for the preservation of national health. It is vaguely known by everyone that medical science has mastered, in regard to a large class of the most fatal diseases, the problem of prevention. The art of healing does not progress rapidly, but our knowledge shows how the necessity for healing may be obviated. That prevention is better than cure, that it is every way cheaper, that it saves not only valuable time but money, expenditure of strength, and waste of vital energy, are sufficiently plain conclusions. All that class of diseases called zymotic, which are supposed to be propagated by germs, and of which the most common are small-pox, scarlet fever, typhoid, relapsing, and other forms of fever, cholera, and diarrhœa, measles, whooping-cough, and diptheria may be termed preventible. We know at least what the conditions are under which these pestilences are propagated, and we know too that such conditions can always be mitigated, and generally removed altogether. Foul water, impregnated with sewage, is the most common, the most mischievous, and the easiest to remedy of all. Foul air, whether caused by a deficiency of ventilation, or by ineffective sewage arrangements, comes next on the list of causes. Then comes the neglect to destroy germs of contagion after an infectious disease has broken out, or to prevent its appearing in a contagious form by such means as vaccination. Medical science has furthermore taught us how all these causes can be removed, how water and air may be purified, how sewage may be deprived of its unwholesome volatile principles, how the germs of disease may be destroyed. In fact disinfection, though a complex and difficult operation to carry out thoroughly, has been brought in theory almost to perfection, and has been proved in several local instances to be a practical possibility.

But while science has been doing so much for us, what have our statesmen been doing? Nothing at all, it may be said, in the way of applying this mass of knowledge to the preservation of public health. In Mr Simon's admirable Report for the present year on Public Health, there is a striking summary of the evils which our neglect to avail ourselves of the resources demonstrably within our reach is inflicting. "There, is in the first place, the largeness of this continuing "waste of human life," involving not only a terrible amount of "needless animal suffering," but a diminution of the physical strength of the nation and therefore of its industrial activity—a generation of unhealthiness among the growing population that must tend to the deterioration of the race. Moreover, "this terrible continuing tax on human life and "welfare falls with immense over-proportion upon the most "helpless classes of the community," and so falling, obstructs disastrously the spread of education, civilisation, and morality. If all this be true, and that we are allowing it to continue, while we might change it all by a few acts of legislation, courage, and administrative vigour, a heavy responsibility rests on our Parliament and Government.

The one political party is no doubt just as much to blame for their neglect as the other. It is not since the last general election that we have discovered how to prevent the spread of disease by giving the people pure air and pure water, by destroying contagion in the germ, and stamping out small-pox by vaccination. But whoever may have been responsible in the past, it is quite certain where the present responsibility rests. It is for Mr Gladstone and his colleagues to consider what they can do, to determine resolutely what they will do, to reform the sanitary laws of the country next year. The people are getting sourly indignant at the recurrence of epidemics which we know, on the highest authority, to be preventible. Within the last three years the Metropolis has been visited with three of these scourges, each of which has swept away its thousands of victims. Scarlet fever, relapsing fever, and small-pox have in succession devastated the poorer quarters of London, and have not wholly spared the rich. And now we are threatened with another epidemic equally preventible, but by somewhat different methods. It is almost as well ascertained as any inductive conclusion in medical science, that cholera is a specific poison, and that it is introduced into the system chiefly, if not entirely, through the medium of polluted water. If impure water be drunk during hot weather, the system is prepared to receive the disease, but it is when the water is actually polluted with choleraic excretions that the contagion is certainly spread. The precautions then to be taken are twofold; the water supply must be purified as far as possible from taint of decaying organic matter—which cannot be done so long as Mr Bruce allows the water companies to remain all but irresponsible monopolies—and the excretions of cholera patients must be disinfected before being mixed with sewage or otherwise cast out. But if the pestilence comes upon us this autumn, we shall be taken unawares. It will be too late to purify our water supply, and we shall be without powers to enforce disinfection. The whole tragi-comedy of the small-pox epidemic will be enacted over again, if indeed in the absence of a really compulsory system of vaccination, isolation, and disinfection, we are not visited by a renewal of the small-pox epidemic simultaneously with an outbreak of cholera.

According to the Medical Officer of the Privy Council, one-third of the number of deaths annually occurring in England are due to preventible diseases. One hundred and twenty thousand human beings dying every year through the apathy of the Legislature and the weakness of the Executive, is a grave article of charge against our system of Parliamentary Government. And these deaths, be it remembered, represent a vastly greater mass of disease not ending fatally, but productive of temporary or lasting loss to individuals and to the State, causing permanent ill-health, deterioration of physical soundness, and reproduction of feeble or ill-formed families. These are surely consequences sufficiently disastrous to any State, sufficiently discreditable to the statesmanship that neglects them. The chief responsibility for such a waste of life and power must be laid on the system which gives the Executive Government no real regulative power over local authorities in matters of sanitary precaution. These latter bodies, with narrow views and petty aims, look in the main to the reduction of the rates as their peculiar function, and to entrust "the lives of the people" to their charge is mere folly. Nothing can be done until the recommendations of the Sanitary Commissioners are thoroughly carried out, until there is a Ministry of Health, with real controlling power over local bodies, chartered companies, and recalcitrant crotchetty individuals.

BUSINESS NOTES.

The New Spanish Finance Minister.—We are glad to see that the reports as to the unsound views of the new Finance Minister of Spain have produced a very prompt contradiction. It appears that the mistake respecting his views originated in the very imperfect reports of his speech which were published. So far from being in favour of taxing the coupons of the debt, he claims to be rather a purist in such matters, expressing himself conscious of the injury which Spain has done herself by repudiating, and stigmatising that course as dishonest. At the same time he hints at the possibility of advising a course which we fear will be only less mischievous than repudiation. If Spain cannot pay in full, he says, the plan to adopt should be the present payment of a part, say of 2 per cent., and the issue of acknowledgments for the remaining 1 per cent., to bear 3 per cent. interest, and as much being issued at the market price of Spanish stock for the day as will secure the creditor his full equivalent. This would certainly be better than repudiation, and the Minister also recommends it as a better plan than borrowing to pay the interest of past debt, which he considers an evil policy. But the evils of the proposed plan are also obvious. The creditor who gets a mere acknowledgment for 1 per cent. out of the 3 per cent. to which he is entitled, is sure to think himself wronged, even though the acknowledgment is issued in such a way that he can sell it for something like what is due to him. The process of sale will be troublesome, and the creditor may not get the exact sum he is entitled to. The practical difficulties in the issue of saleable acknowledgments when the sums of interest due to particular creditors

are small, would also be enormous. The proposal to issue acknowledgments for unpaid interest therefore has a taint of repudiation, and would be especially damaging to a country with the reputation of Spain. We do not see besides in what way the Minister's plan is any better than that of borrowing to pay the interest of debt. The only difference between it and a loan transaction is that, instead of going into the open market to borrow, he forces the creditors themselves to become lenders, the country being equally burdened by the procedure as if a fresh debt had been incurred. By adopting it Spanish credit would be as much injured as if there was a succession of new loans, and the Government would incur much of the odium of actual repudiation. It is a great deal gained however to have got a Spanish Minister who denounces repudiation, and is anxious to avoid the appearance of a perpetual borrower. There is some reason to hope that when such a Minister has to face realities, he will see the wisdom of meeting all obligations with perfect punctuality, and that the mischief of borrowing to pay the interest of past debt is itself a most powerful reason for carefully-studied taxes and economy in expenditure, by means of which only the mischief can properly be avoided.

THE ROUMANIAN DIFFICULTY.—We were by no means premature in objecting a fortnight since to the alleged policy of Count Bismarck to enforce on the Roumanian Government payment of the interest on the Roumanian State Railway bonds. As we pointed out, the adoption by any Government of the policy of compelling other Governments to pay their debts would be destructive to peace, and Count Bismarck by interfering in the present case has revived the Eastern question in a very unpleasant fashion. So obvious was it that the revival of this question would be the result as to make the conclusion unavoidable that Count Bismarck uses the claim only as a pretext, and really wishes to have the Eastern question raised for the sake of gaining some advantage for Germany. What that advantage will be is not apparent, as Germany, it might be thought, can hardly wish to have another difficulty on its hands with the French indemnity unpaid and the French, with the utmost unanimity proclaiming their desire for vengeance. It is just barely possible that Bismarck, forseeing another French war, in which Russia will be the ally of France, may wish to precipitate the crisis. In any case, the stirring up of the Eastern question at this moment is most alarming, and the business world may well await the issue with anxiety.

THE ENGLISH CUSTOMS AND FRENCH PROPERTY DURING THE WAR.—An interesting incident of the late war, which has not, we believe, been previously made public, and is at any rate not generally known, is described in the annual report of the Commissioners of Customs, which has just been published. It is there stated that articles French property in kind of various kinds which was brought to this country during the war and entered our ports of import and the quantities of securities and money which were deposited with London bankers, "very large quantities of plate, jewellery, "and other valuable goods have been brought to this country "for security under the baggage regulations, as private effects, "which do not appear in the returns." The Customs Department exempted the importers of these packages very liberal treatment, though it was necessary, especially in London, to relieve the Crown as far as possible from the responsibility of their safe custody, and insist upon the valuables being deposited in bond under the charge of the various warehouse-keepers. Still the requests to have these articles deposited in safety without payment of any duty, but merely for custody, and ultimately for re-exportation, were complied with as far as possible with perfect security to the revenue. It is stated that an accurate return with reference to each port is not easily given, as packages imported at the out-ports were subsequently removed to London, but it is believed that the numbers imported and deposited at each port were as follows —

	Packages.
Dover	35
(The great majority of packages imported were removed under seals of office to London, and are returned in the London list.)	
Newhaven	125
Southampton	174
Folkestone	35
Littlehampton	14
Liverpool	6
Outports, total	408
Brought forward	408
The number received into custody, as before stated, was in—	
London	236
Making a total of	644

The Commissioners add that no estimate can be made of the value of these packages, as frequently no examination was insisted upon, and many have been re-exported to France, while duty has been paid on the contents of some, and others still remain in the warehouses. Still the accommodation afforded to French proprietors must have been great; and the Commissioners believe "that though the majority of the "packages thus imported have fallen under the designation of "private effects, advantage has in some cases been taken of "our liberality to preserve from the chance of robbery and "destruction the trade stocks of French goldsmiths, silver-"smiths, and jewellers."

BUILDING SOCIETIES' CHEQUES.—We are glad to see from a question put to Mr Lowe this week by Mr W. H. Smith, and his reply to it, that the loose practice which has grown up of building societies drawing *unstamped* cheques on their bankers, is being resisted by the Inland Revenue Department, and that Mr Lowe will not sanction any postponement of its action till Michaelmas. The practice is one to which we called attention some time ago, and as there would in any case be no reason for the exemption which the building societies claim, the Inland Revenue Department has no option but to enforce its view of the law—that there is no exemption even now permitted. The real mischief is in there being any exemption at all of building societies' documents, and we hope the matter will not be allowed to rest till all these documents are made subject to stamp duty, like those of other people. The effect of the exemption is simply to pauperise to some extent classes which have no claim whatever to be free from the usual burdens of the State. No doubt the stamp duties on transfers of property are still too heavy, and they may be most felt by the classes who are the customers of building societies; but the way to get out of the difficulty is to modify the duty generally, and not make it so heavy that "ex-"emptions" have to be created.

STOLEN BANK OF ENGLAND NOTES.—Most people would regret to learn from the case of De Waal *v.* the Bank of England, that the robbery of Bank of England notes from Messrs Barnett and Hoare's clerk last year was a successful one for the thief, some of the notes having been changed by Mr De Waal, a money changer of Rotterdam, on the 6th of March last, without a suspicion on his part that they were stolen, so that he is able to recover the amount from the Bank. We suppose it is essential to the currency of a note to bearer that it should be payable to an innocent holder, even though he may have got it from a thief; but in a case like this involving a matter of 10,000*l*. and where Mr De Waal had actually cashed 2,800*l*. of notes, it seems most unfortunate that there is no means of earmarking such valuable property so as to make their exchange by a thief practically impossible. At present a money changer, if it cannot be proved that he actually had a notice of the theft of stolen notes before him, is quite free to change any notes that come to him, and the loser of the note must pay the holder, the real owner having to bear the loss. Would it not be possible to alter the law, say, to this effect, that a person who changed notes after the theft had been advertised in a certain way should be treated as having had notice? In cases of notes for small amounts the law could do no great mischief, and in large matters it would only compel those who had every facility for doing so to exercise proper vigilance. If it were made the law that everyone who took a bank note which had been advertised in the *London Gazette* as stolen, should have no claim for it, but the Bank should be authorised to pay the amount to the proved owners, we have no doubt that the money-changers of the continent and elsewhere would take pains to be informed what notes were stopped. In this way a great avenue to successful theft would be closed up and no impediment would be placed on lawful business. In the case of notes for large amounts certainly some such regulation should exist, and we should be spared the scandal of the Bank of England having to cash stolen notes after publicity had been given to the fact of the theft.

LAST YEAR'S DRAWBACK ON SUGAR.—The Commissionere of Customs state in their report above referred to, that the amount of drawback on stocks of sugar paid to refiners and dealers last year was—

	£
To refiners and dealers in London	13,922
— at the outports	46,510
Total	60,432

The examination of the various claims was exceedingly intricate and difficult, the qualities as well as quantities of stock on which drawback was claimed having to be ascertained. The amount ultimately allowed appears to be considerably less than the sum which the department thought to be at stake when the extension of the drawback to "dealers" was in question.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending Aug. 12 :—

	Receipts of Week Ending Aug. 12.
	£
Customs	249,000
Excise	277,000
Stamps	186,000
Taxes	6,000
Income tax	18.000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	13,682
Total	749,682

The total receipts of the previous week were 1,038,000*l*.

The Exchequer issues of the week on account of expenditure were 500,000*l*, viz. :—

	£
Interest of debt	nil.
Other charges on Consolidated fund	nil.
Supply services	500,000
Telegraph services	nil.
	500,000

During the week the cash balances have decreased in the Bank of England and increased in the Bank of Ireland as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Aug. 5	651,648	1,006,870	1.658,518
— Aug. 12	602,330	1,016,948	1,619,278
Increase	...	10,078	...
Decrease	49,318	...	39,240

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, August 17.

The return of the Bank of France for the week ending this day, the 17th, that of last week, and that of the 8th September, 1870, before the investment of Paris, are as follow :—

	Aug. 17, 1871.	Aug. 10, 1871.	Sept. 8, 1870.

A comparison of this week with last presents these results :—

	francs.
INCREASE.	
Coin and bullion	11,378,000
Bills discounted at Paris	3,116,000
Do branches	14,595,000
Treasury balance	21,940,000
Notes in circulation	3,579,000
DECREASE.	
Prolonged bills	26,663,000
Treasury bills	110,000
Deposits in branches	2,489,000
Do at Paris	69,746,000

The decrease in prolonged bills and in deposits, and the augmentation of discounts, are the chief points to be noted.

The Committee on the Budget of the Assembly at Versailles has, after a deliberation extending over several weeks, and after consulting the first authorities in the country on commercial and manufacturing questions, decided by 19 votes to 9 not to accept the proposition of the Government to establish import duty of 20 per cent. on the value of raw materials for textile industries. This is a great check and humiliation for M. Thiers and M. Pouyer-Quertier, who regarded that duty as one of the cardinal points of the financial scheme they have devised. The Committee has, however, consented to let such materials be taxed 3 per cent.; but it is hoped that on further consideration it will see that that impost, slight as it is, will be mischievous. The Committee has also declared in favour of an income tax,—another check to M. Thiers.

The National Assembly having, as you know, resolved to deal with the Government project of increasing old and imposing new taxes, not as a whole but in parts, has within the last few days disposed of the greater portion of that part which concerns registration duties, commercial bills, receipts, game licenses, fire and life assurances, foreign securities belonging to foreigners dying in France, &c. &c. With a few exceptions of detail it has adopted what the Government demanded. As to commercial bills, the Assembly resolved, purely and simply, to double the stamp duty they at present pay—that is, put it at 1 per 1,000f instead of ½. On this point M. André, the banker, demanded that bills drawn abroad and payable in France, or drawn in France and payable abroad, should continue to pay the old rate, for the reason that though the proposed augmentation would only amount to an "infinitesimal fraction" on each bill, a multitude of infinitesimal fractions were of great importance in commerce and banking, and might consequently check trade between France and foreign countries. As a set off to this he proposed to extend the tax to foreign bills drawn and payable in foreign countries, which, though passing from hand to hand in France, have heretofore been exempt. But on the first part of the proposition the Minister of Finance pointed out that if what M. André wished were granted, injustice would be done to French commerce, to the advantage of foreign—that, in fact, bills for goods bought in London or Liverpool would pay less than other bills for the same sort of merchandise purchased in France. With respect to bills from foreign countries on foreign countries the Minister accepted the taxing of them, though he was obliged to admit that there was extreme difficulty in getting at them. "They circulate," he said, "so rapidly and so lightly that one can scarcely touch them without making them fly away." He then related a fact well known in banking, but new to the public. In order to profit by the exemption from duty which foreign bills have enjoyed since 1850, houses in Paris have dated from Bale bills they draw on London, and from Carlsruhe, or any other town of Germany or of Belgium, the bills drawn on a foreign country. It is perfectly easy to create such bills in Paris, and to get them signed at Paris by a clerk who is supposed to reside at Bale, Carlsruhe, Brussels, &c. Thus such bills pay no duty, and they circulate in France by means of the ingenious mechanism of dating them abroad though in reality created at Paris.

"I do not say," he added, "that it is petty traders who perpetrate this sort of fraud; they cannot do it, but the great financial houses do, and so they escape paying stamp duties on large sums." He then made a statement which is really curious:—"I have had, unfortunately for my country, within the last few weeks to endorse bills for considerable and even colossal sums. They were drawn in a foreign country on a foreign country, or in France on a foreign country. But most of them had paid no stamp duty, and if the Minister of Finance would not have had to pay himself the fines they had incurred, he ought to have seized them in his own hands." The upshot was that the sort of bills referred to are henceforth to be taxed, provided only they can be reached.

On the Bourse transactions have not been very active, and the most noticeable feature in them is a new advance in the Fives:—

The Municipal Council of Paris has sanctioned the loan of 350 millions proposed by the Prefect, M. Leon Say. It has besides authorised, on his proposition, for 1870 and 1871 the creation of a floating debt of 60 millions, "a transitory financial measure." The Council has too declared that the contribution of 200 millions imposed on the city by the Prussians, and other outlays necessitated by the siege, ought to be paid by the State. Authorisation to raise the proposed loan must be demanded from the National Assembly, and it will be granted as a matter of course. There is much speculation as to the form and conditions in which the loan had best be offered to the public. A strong opinion prevails that the old form of small interest, with lottery prizes, ought to be adopted, that form being extremely popular among the French, and possessing the advantage of being cheaper to the city than any other.

Within the last few days the householders of Paris have received notifications of the new taxes they are required to pay. They expected an augmentation, but it is greater than they counted on, and is besides distributed in a manner which seems to them arbitrary, some of them paying, for example, on the rental tax an increase of 1 per cent., and others of 3 and even 5.

The financial situation of the city of Lyons is as embarrassed as that of the city of Paris. The Municipal Council has had to prepare a new Budget for 1871, in which, by order of the Government, it suppresses the taxes it imposed on houses, on the rent from them, and on trade licenses, amounting altogether to nearly 7 millions, and replaces them by the re-establishment of the octroi. In definitive, it puts down its expenses at 19,708,924f, and its receipts at 1,[illegible]f less. It has recently received from the Government about 4,000,000f from Treasury bills [illegible]f due for the abolition of bridge tolls, and is to have restored all the funds belonging to it in the Treasury. The Government informs it that "nothing more can be done by the State, and that it must trust to its own efforts to relieve the town from financial embarrassments." The Government moreover makes it suppress as illegal certain money payments it voted itself.

During the war considerable quantities of different sorts of goods, notably alimentary substances, were imported into France from Belgium without payment of Customs' duties, the Customs service being suspended. Since the establishment of peace the Customs have proceeded against the importers for the dues owing, and in some cases have seized goods remaining in their possession unsold. A deputation of Belgians who are interested in the matter are complaining of this treatment, and the Belgian Minister in Paris is supporting them.

The Germans since the 7th have completely organised the Customs on their new frontier, but have not suppressed that on the old one. It follows that if goods from France are taken into Alsace or Lorraine and afterwards into Germany they are made to pay twice over. But German goods, notwithstanding the maintenance of the old frontier line, have not to pay on passing it.

Something curious was expected from the examination of Jourde, the Finance Minister of the Commune, now on trial before a court-martial at Versailles, and from that of the witnesses against him. But nothing new has turned up. An attempt was made to show that he had embezzled 3,000,000f, but he demonstrated that an error in addition made that sum appear against him. In reality there is no proof that he committed the slightest misappropriation—a notable fact, considering that in the midst of immense confusion he had the handling of some 600,000f a day for nearly two months. He lived, it was proved, with extreme simplicity; his restaurant bill for nine weeks amounting only to 224f; his wife washing his linen, and his daughter going to a charity school. All this contrasts strangely with the splendour and the wealth of his predecessors in the Finance Ministry, especially those of the Empire. At first it was stated the man was a simple *ouvrier*, then that he was a wood dealer; in reality, he is a medical student who has not taken his doctor's degree. Altogether, he is a curious and interesting figure in the financial history of these troubled times in France. The Marquis de Plœuc, Sub-Governor of the Bank of France, had to testify that he was instrumental in making some of the levies on that establishment ordered by the Commune; but did not press hardly on him. The amount taken by the Commune from the Bank was 16,600,000f—of which 9,000,000f was levied on the city of Paris, the rest on the Bank. Considering that the Bank held in coin, notes, and securities the enormous sum of 3 *milliards* (120,000,000*l* sterling)—the amount is given by M. de Plœuc himself—the contribution imposed on it cannot—regard being had to the condition in which things were—be considered excessive; and doubtless the Bank will sooner or later be reimbursed by the State.

The Government is now exchanging definitive securities for the provisional scrip of the new 5 per cent. loan, and for that of the 250 millions loan contracted by the delegation of Tours, and negotiated at London.

The Savings' Bank of Paris has just published a report on the operations of 1870. At the beginning of the year there were 271,069 depositors, with 54,180,747f; at the end, 254,116 with 43,031,726f. The war caused in July, August, and September withdrawals to the amount of 11,000,000f (in one week they were 2,300,000f), and in consequence the Government was afterwards obliged to authorise reimbursements to be effected at only 53f in cash and the rest in Treasury bills.

A company was formed eighteen months ago to get up twelve ships, containing silver bullion of the value of 450,000,000f, that were sunk in Vigo Bay in 1702, but all its capital was consumed with no other result than the recovery of cannons, portions of the wrecks, and a few ingots. The public is now solicited to subscribe 2,000 shares of 500f for continuing the operation. The Spanish Government is to take 43½ per cent. of the value recovered.

The Compagnie Générale des Eaux of Paris made in 1870 net profits of 1,463,450f, after deduction of 132,000f for the reserve. They permit 18f per share to be paid, a dividend not much inferior to those of preceding years.

In the meeting of the Société Algerienne, the operations of 1870, though impeded by the war, were stated to have produced sufficient profits to permit the distribution of 6f 25c per share, equal to 5 per cent. on the paid-up capital, and to leave 292,299f to be carried forward.

The Docks et Entrepots of Marseilles only realised in 1870 profits of 155,027f, a sum so small that it was not thought worth while to divide it among the shareholders. In addition to the commercial depression caused by the war and by the political events at Marseilles, this company had last year to accept large reductions in its tariffs.

The Gas Company of Marseilles distributes 26f per share for 1870. Its net profits were 1,135,988f.

The report of the markets this week comprises two days instead of three, Tuesday being a holiday. The quotations given are per 50 kilogrammes, duty paid, when not otherwise stated:—

Cotton.—At *Havre*, New Orleans very ordinary, 106f; Oomrawuttee, good ordinary, 86f; ditto, fair, 82f 50c.

Sugar.—At *Marseilles*, Mauritius, 40f 50c, No. 12, in bond; Martinique, 37f.

Coffee.—At *Havre*, Haiti, 131f 50c and 129f; St Marc, 138f; Cape, 134f and 135f; Porto Rico, 150f; Rio, 130f to 132f 50c; and washed, 146f; Santos, 133f; Malabar, 92f 50c; Capetania, 130f. At *Marseilles*, Rio, 71f, in bond. At *Bordeaux*, Santiago, 110f to 118f; Winaad, 145f.

Cocoa.—At *Bordeaux*, Guayaquil, 70f.

Hides.—At *Havre*, La Plata dry ox and cow, 122f 50c to 128f; Valparaiso dry salted cow, 94f, and for delivery, 95f; Lima salted ox, 68f; Martinique salted, 62f 25c to 62f 25c.

Wool.—At *Havre*, Monte Video unwashed, 177f 50c to 210f; ditto cheepskin, 122f 50c the 100 kilogs.

COMMERCIAL AND MISCELLANEOUS NEWS.

An annual return shows that in the year ending 30th September 1870, there were 32,623 licences paid for by common brewers, the total licence duty paid being 388,389*l.* One licence was for brewing 550,000 to 600,000 barrels, one for 600,000 to 650,000, and one for 650,000 to 700,000 barrels, the duty paid in these three cases, with supplementary charge or deduction, being respectively 7,878*l*, 7,582*l*, 9,155*l*. There were in the United Kingdom in the year above-mentioned 98,652 licenced victuallers, 44,488 persons licensed to sell beer to be drunk on the premises, and 3,080 licensed to sell beer not to be drunk on the premises, making a total of 146,220: the last two classes being in England and Wales, and the victuallers 69,903 in England and Wales, 12,644 in Scotland, 16,105 in Ireland. In the same year 536,946 barrels of beer, of the declared value of 1,930,083*l*, were exported from the United Kingdom, 216,534 barrels to India, 95,398 to Australia, 27,088 to the British West Indies, 17,606 to the foreign West Indies, 24,300 to the United States, 14,074 to Brazil, 12,432 to China, 11,944 to Gibraltar, 10,985 to South Africa.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap. 32, for the week ending on Wednesday, the 16th day of August, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	39,654,615	Government debt	11,015,100

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house:—

	Week ending Aug. 16, 1871. £	Week ending Aug. 9, 1871. £	Week ending Aug. 17, 1870. £
Thursday	13,128,000	15,442,000	9,136,000
Friday	13,680,000	17,496,000	10,477,000
Saturday	15,381,000	14,063,000	13,087,000
Monday	13,076,000	...	10,819,000
Tuesday	13,635,000	17,989,000	22,500,000
Wednesday	36,130,000	14,685,000	12,502,000
Total	105,030,000	79,675,000	78,521,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, August 17th, 1871

The total since the 4th of January, 1871, is 2,817,415,000*l*, compared with 2,492,987,000*l* for the corresponding period last year, showing an increase of 324,428,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz.:—

At corresponding date with the present week.	Aug. 21, 1861.	Aug. 19, 1868.	Aug. 18, 1869.	Aug. 17, 1870.	Aug. 16, 1871.
Circulation, including bank post bills	£ 20,728,921	£ 24,756,090	£ 24,198,115	£ 24,343,380	£ 25,693,432

In 1861, no farther reduction of the Bank rate was announced this week, but money was still tending downwards. The United States had already begun to attempt the negotiation of large loans for carrying on the war, and was authorised to issue Treasury notes. There were still reports of danger to the cotton supplies, not only from the blockade by the North, but from the South forbidding the export.

In 1868, the 2 per cent. period continued. A protest against the Austrian resolution to tax the coupons of the debt had just been made on the Stock Exchange. The Regulation of Railways Act had just been passed, defining the form of railway companies' accounts, providing for the inspection of railways in certain cases, and also conferring general powers for the issue of "Preferred" and "Deferred" ordinary stock.

In 1869, the Bank rate was reduced from 3 to 2½ per cent. There was still a great accumulation of money in Lombard-street, in consequence of the recent savings of the country and the want of confidence which restricted the available channels for investment. Count von Beust and Count von Bismarck had just been engaged in acrimonious diplomatic correspondence in consequence of the attacks upon the former in the Prussian press.

In 1870, the Bank rate was reduced from 5½ to 4½, the supply of money having gone on increasing after the first pressure of the war, in consequence of the attraction of money to England for security. The Bank of France had suspended specie payments. The battle of Gravelotte had just occurred, and Marshal Bazaine, with his army, was shut up in Metz.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 5,901,263*l*; in 1868, an excess of 3,998,059*l*; in 1869, an excess of 4,806,067*l*; and in 1870, a deficiency of 444,030*l*. In 1871, there is an excess of 6,279,845*l*.

DISCOUNT AND MONEY MARKET.—There is no change in the state of the money market from what we reported last week. The facts still are the great accumulation of money, and the abundant supply of bills which keep the rates charged at a tolerably steady level, viz., 1⅞ for three months' Bank bills, and 1⅝ as the minimum for the very best short-dated paper. In the beginning of the week there was a fair demand on account of the Stock Exchange settlement, which was a very heavy one, but there was nothing approaching to pressure. The demand at the Bank has been moderately good, and the Bank account for the week shows no material falling off in the private securities.

Now that the large withdrawals of bullion, which we had to notice a week or two since, have terminated for the present, the continuous influx of bullion into the Bank of England, which has been a feature for many weeks, is again marked by an increase in the resources of the Bank. The stock of bullion has been increased during the week by 251,543*l*, and the reserve of notes by 598,190*l*. The private deposits have also increased 305,089*l*, while the private securities have decreased 88,587*l*, and the public securities 200,000*l*. These changes show the accumulation of resources in the Bank, and though there is still a good demand, the figures indicate no immediate approach of a rise in the value of money. The Bankers' Clearing-house return however continues to show a great addition to the amount of transactions

as compared with this period last year. This week there is again a very large increase, only partially due to the Stock Exchange settling day, and the magnitude of the settlement being itself caused by the large absorption of stock.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—3 months	.....	1⅝	per cent.
Do 4 months	.....	2	per cent.
Do 6 —	.....	2⅜ ½	per cent.
Trade bills—3 months	.....	1⅞ 2	per cent.
Do 4 months	.....	2¼	per cent.
Do 6 —	.....	2⅞ 3	per cent.

The allowances for money at the joint stock banks and discount houses are as follow :—

Joint Stock Banks at call	.....	1 per cent.
Discount houses at call	.....	1 per cent.
Do with seven days' notice	.....	1¼ per cent.
Do fourteen days'	.....	1¼ per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	6	5	6 7*	...
Vienna	5	5	5	5
Berlin	6	4	5½ 6	3½ ½
Frankfort	...	3½	5½ 7½	3½
Amsterdam	6	3	5 6	2¾ 3
Brussels	7	4	6 7	3½ ½
Hamburg	...	...	6	3
St Petersburg	8	6	8½	6

* Nominal.

The Stock Markets.—The feature of the week, as in the previous week, is the movement in English railway shares, which was indeed as strong at it has lately been in the early part of the week, and has again been resumed after some depression in the middle of the week. On the whole, notwithstanding the reaction natural after a great rise, prices have been strongly supported at the high level touched, though in one or two stocks, in which speculation was perhaps carried to an extreme, they have been easier. Foreign stocks however have not been quite so much neglected this week as they were previously, and there are signs that the rise which has been for some time anticipated in this market has begun—the contradiction of the reports about the alleged repudiating notions of the Spanish Finance Minister having been followed by a rapid rise of 1 per cent. in Spanish stocks. In other departments, however, there is the same continuous process of investment which we have noticed for some time back, and on all sides it is remarked that the magnitude of the recent settlements—and this week's is again a very large one—is caused by the absorption of stock for investment.

A good deal of curiosity has been felt with respect to the new arrangements for the issue of the Funding loan of the United States, of which we are enabled to give an account below. The general opinion is that the present is a more suitable time for a conversion scheme than when the attempt was last made, and there is more confidence in the result among those who have charge of the operation.

English Government Securities.—This department has continued one of the weakest in the market, but the continued fine weather, the flatness of the corn market, and the stoppage of the withdrawal of bullion which created an uneasy feeling, have made the tone slightly better, and there is even a slight advance in Consols for the week. Metropolitan 3½ Consolidated stock is still dealt in at 93, and has no doubt recently secured a much stronger position in the market, although it still appears to come short by comparison of what the security would justify.

Subjoined is a list of the highest and lowest prices of Consols every day :—

	Consols Money Lowest	Highest	Account Lowest	Highest	Exchequer Bills. Month and June.
Saturday	93¼	93¼	93⅛	93⅛	12s to 15s prm.
Monday	93⅛	93⅛	93⅛	93⅛	12s to 15s prm.
Tuesday	93⅛	93⅛	93⅛	93⅛	12s to 15s prm.
Wednesday	93⅛	93⅛	93⅛	93⅛	12s to 15s prm.
Thursday	93⅛	93⅛	93⅛	93⅛	12s to 15s prm.
Friday	93¼	93¼	93¼	93¼	12s to 15s prm.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Consols for money	93⅛	⅛	93⅛	⅛
Ditto September	93⅛	⅛	93⅛	⅛
Reduced 3 %	93⅛	⅛	93⅛	⅛
New 3 %	93⅛	⅛	93⅛	⅛
India stock, last dividend 7½ %	240	5	240	...
India Stock, 10½ % red. to 10 % Apr. 1874	200	5	200	...
Bank of England 7 % (last quarter 3½)	192½	193½	192½ 193½	...

Exchequer Bills.—12s to 17s prem.

Colonial Government Securities.—As we reported last week, these have been a good deal in demand for investment. The following shows the changes for the week :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Canada 6 %	107½ 8½	.....	108 9	+ ½
Ditto 5 %	101½ 2½	.....	101½ 2½	... ...

Nova Scotia 6 % Bonds, 1875	103½ 4½	.....	103½ 4½	... ...
Queensland Government 6 % Bonds, 1884-5	109½ 10	.....	109½ 10	... ...
Victoria 6 %	114 15	.....	114 15	... ...
Ditto New 5 %	104 5	.....	104 5	... ...

Foreign Government Securities.—As we have already stated, this week has witnessed a general revival in foreign stocks, which have been greatly neglected of late. The immediate occasion of an improved tone was the authorised contradiction on Monday of the report in circulation that opinions in favour of repudiation were held by the Spanish Finance Minister. Spanish immediately improved, and has advanced about ⅜ for the week. As will be seen however from our usual list of changes for the week, this movement in Spanish can only have been the *occasion* of the general change in the tone of the market, which has been for some time foreseen. In almost all the leading securities in the foreign department there has been a general advance, Egyptian, Brazilian, Russian, Peruvian, Portuguese, and Turkish, all showing an improvement. In most of these, especially Spanish, Turkish, and Egyptian, a strong account has been opened for the rise. Most of the new loans have also been good, French scrip in particular having advanced to 6½ 7 pm., a rise of 1¼ for the week. French stocks are generally better, and Rentes have advanced ⅛ on better prices from Paris. Italian have also advanced, besides maintaining the advance reported last week. To-day, though there has been little doing in consequence of the absence of the leading operators, the rise of the earlier part of the week has been well maintained, and the market closes firm. There is little expectation of any very great rise till after the holidays, but so general is the feeling that there must be an advance that even during the holidays there will doubtless be a good deal of buying.

A good deal of interest has been excited this week by the confirmation of the reports respecting the intervention of Count Bismarck on behalf of the German holders of the Roumanian State Railway bonds. We discuss the bearings of this intervention elsewhere, but one aspect of it incidentally causes a good deal of remark in the City. Count Bismarck's intention, to all appearance, is to associate Austria with Germany in compelling the Roumanian State to pay its alleged debts; but Austria, it is remarked, is the last State in the world which should be called in to coerce a defaulting debtor State. Austria herself was guilty three years ago of one of the worst acts of repudiation, and is still suffering the penalty of her misdeeds in her inability to raise a much-needed new loan on the Exchanges of Western Europe. She may well be called on to set her own house in order before she sets up as a censor of smaller States, and compels them to pay their debts. It is pointed out besides that the Austrian repudiation was in reality much worse than the Roumanian one. The debt was not denied; the creditors of Austria were simply informed that they would after a certain date be paid less interest than Austria had contracted to pay. The peculiarity of the Roumanian case is that the alleged debt *is* denied, on what we believe are insufficient grounds, but still on grounds which have some colour, and which at least excuse the resentment of the Roumanians. What they say is that the bonds which pretend to bind them to an absolute guarantee, were not authorised, that the agents had no power to issue them, and that there is an inconsistency between the terms of the bonds and the authority of their issue indorsed on the back. These are serious allegations, and though the Roumanians we hold, are out of Court, because the loans were publicly raised, and there was no public announcement on the part of Roumania of the want of authority now a leged, yet the repudiation is obviously not so impudent and utterly without pretext as it was in the case of Austria. For very shame therefore the Austrian Government might be expected to avoid the course which Bismarck is now urging upon it, though we fear that considerations like these will hardly enter at all into the discussion of her policy. The creditors of Austria however, when they have the opportunity should not fail to remind their debtor of the inconsistency of his conduct.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.

ENGLISH RAILWAYS. — In spite of the anticipations current last week that there would be a reaction just before the settlement, prices were, on the contrary, well sustained, and in almost all the leading stocks there was even a farther rise while the settlement was in progress. The continuance of fine weather, the exceedingly favourable traffics, and the extensive purchases for investment, encouraged speculators for the rise, and as the contangoes were very light, the expected reaction did not occur. Afterwards, when the settlement was concluded, there was a reaction incidental to the fresh rise which had taken place, but partly occasioned by a fall in Great Western, due to a disappointment in the traffic compared with the anticipations which had induced speculators to run the price up to 103. The stock has since gone down to 99⅛ 100, at which it closes to-night, but that figure nevertheless shows an important rise for the week. In all other respects the market has continued good all through the week, and closes firm this evening at the best point of the day.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	101½ 2		103⅛ 4	+ 2
Great Eastern	42½ ¼		43⅛ ⅞	+ 1⅛
Great Northern	135½ 6½		135⅛ 6½	... ...
Ditto A	152½ 3½		154⅛ 5⅛	+ 2⅛
Great Western	98⅛ ⅛		99⅛ 100	+ 1⅛

South-Eastern	90½ ½		93⅛ ⅛	+ 3⅛
Ditto Preferred	117 18		117 18	... ...
Ditto Deferred	63⅛ ⅛		66⅛ 7	+ 3⅛

The quotations for the leading debenture stocks compare as follows with last week :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Great Eastern A 5 %	114 16		114 16	... ...
Ditto 1867 Redeemable	114 16		114 16	... ...
Great Western 5 %	114 16		114 16	. ...
London and Brighton 4½ %	104 6		104 6	... ...
London, Chat., & Dover Arbitration 4½ %	97 8		98 100	+ 2
Metropolitan District 6 %	121 3		121 3	... ...

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Aug. 12 to 882,741*l*, being an increase of 84,822*l* on the corresponding week of last year. The aggregate receipts of the half-year to date are now 4,335,787*l*, being an increase of 310,985*l* on the corresponding period of last year. The principal increases for the week are—London and North-Western, 11,628*l*; Midland, 11,242*l*; North-Eastern, 11,099*l*; Lancashire and Yorkshire, 7,014*l*; Great Eastern, 6,833*l*; South-Eastern, 5,496*l*; and Brighton, 4,658*l*. The following shows the details of the increase in each case for the week and for the whole period :—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts. Amount.	Inc. or Dec. on Corresponding week in '70.	Aggregate Receipts of Half-year to date. Amount.	Inc. or Dec. on Corresponding per. in '70.
	£	£	£	£

The Mexican Railway fully-paid bonds close at 67 and 67½. The first drawings take place on 15th September next, and the bonds then drawn will be paid off at par on the following 1st of December.

It is stated that the Anglo-Austrian Bank is authorised by the Bank of Belgium to receive subscriptions for 400,000 variable railway certificates, created by the Bank of Belgium on their acquiring all the annuities due by the Belgian State to the Compagnie des Chemins de Fer des Bassins Houilliers du Hainault. These certificates, issued to the number of 1,600 for each kilometre, will receive half of the gross receipts over 18,000f per kilometre up to 34,000f. If, during five consecutive years, the gross receipts shall have attained 34,000f, the certificates will be converted into a 5f Belgian Rente. The Government has however reserved itself the right of fixing the Rente by increasing it yearly by 500f per kilometre. In this case the variable revenue will be replaced by a Rente regularly progressing up to the maximum of 8,000f per kilometre, viz., 5f per bond. The price of 2*l* 3s 6d per certificate.

AMERICAN SECURITIES.—The event of the week is the new issue of Mr Boutwell's Funding loan, the prospectus of which was circulated this afternoon. The amount issued is 75,000,000 dols, or about 15,000,000*l*, and it appears from the prospectus that while the total issued is 200,000,000 dols, 75,000,000 dols, or thereabouts, have been already placed in America, and 50,000,000 dols are reserved for the National Banks there, the remainder are now offered for subscription in this country. Besides this amount of 200,000,000 dols however, Mr Boutwell is authorised to issue 300,000,000 dols more of the 5 per cent. bonds; but he reserves them for future disposal along with his 4½ and 4 per cent. bonds. The terms of the present issue appear to be the same as those of the issue in March last—that is, a 5 per cent. loan at par, principal redeemable at par after 1st May. 1881, interest payable quarterly, and interest and principal both payable in gold, free from all United States' taxation. The prospectus however is rather more detailed than on the former occasion, the arrangements for the exchanging the new issue for 5-20

bonds and for cash payments being minutely described as follows :—

Applications for the above bonds, in exchange for existing Five-Twenty Bonds, will be effected on the following conditions in the accompanying Form A :—

Holders of Five-Twenty Bonds, bearing May and November interest Coupons, will retain the Coupon due 1st of November next, and will receive in exchange Bonds of the Five per Cent. Funded loan of equal amount, ex November Coupon.

Holders of Five-Twenty Bonds, bearing January and July interest Coupons, will be paid the interest from 1st July last to 1st November at Six per cent., or 2/ 0s 1od per Bond of Five Hundred dollars, and will receive in exchange Bonds of the Five per Cent. Funded loan of equal amount, ex November Coupon.

A deposit of 5 per cent will be required, which may be made in cash, or in any United States Government Security, which will be returned on effecting the exchange.

Applications for Bonds by cash payment will be received on following conditions in the accompanying form B :

Deposit on application 5 per cent., or	5	12 6	per Bond of 500 dols
Payment on 1st Dec. next, 95 per cent., or	95	15 0	—
	91	—	*102 7 6
Plus one month's interest at 5 per cent., being that accrued from 1st November to 1st December (to be paid in Sterling) =		0 8 8	—
Total cash		102 16 3	—

* Exchange to 6d per dollar

Such United States Government Bonds as shall have been notified for redemption, and matured United States Government Gold Coupons will be received as cash, dollar for dollar, except that the month's accrued interest must be paid in sterling, as above said. The deposit may be temporarily made in any United States Government Security.

Provisional Receipts (Scrip) will be given for the deposit. The Bonds of the Funded loan (which are issued in the United States) will be furnished in London at an early date against corresponding amount of Five-Twenty Bonds or payment in full. Cash payment in full may be made on 31st August only, under discount, at Bank of England rate.

Should the application for Bonds not be complied with, the deposit of the applicant will be returned forthwith.

Non-payment of the balance due will render the deposit liable to forfeiture.

The principal real novelty in the new prospectus appears to be the provision for registration. An officer of the United States Treasury, it is announced, will remain for some time in London to inscribe the Registered Bonds directly into the names of purchasers, and one advantage of registration will be that "United States Treasury cheques, for dividends thereon, will be sent from Washington to the registered address of the holder in any part of Europe, on the principle adopted by the Bank of England in paying the interest on British Consols." This last provision will no doubt be a great convenience to registered holders in Europe, and will make the alternative of registration for permanent investment more acceptable. The prospectus states that lists will be opened in London and in the principal cities on the continent next Tuesday, and will be closed on or before Thursday. Messrs Jay Cooke, McCulloch, and Co., are the agents, and are understood to be supported by a powerful combination. The feeling in the City is entirely favourable to the success of the experiment—Mr Boutwell being favoured by the notices he has given to pay off the outstanding issue of the 1862 and 1865 5-20's.

The changes for the week in American securities generally are in the upward direction—the only weakness being in the 1865 issue of 5-20's, which are to be paid off at par by means of the new Funding loan.

Joint Stock Banks.—A fair amount of activity has been displayed in the demand for Joint Stock Bank shares, and prices are better on the week, though the movements have not been very numerous. We note an advance of ¾ in Anglo-Egyptian and City; 1 in Land Mortgage of India (Debentures); ½ in British Columbia. The business of the Albion Bank has been transferred to, and will in future be carried on by, the London Joint Stock Bank. The undertaking was incorporated in the year 1864, having a paid-up capital of 57,000*l*.

The directors of the Merchant Banking Company have announced an interim dividend of 15s, being at the rate of 6 per cent per annum.

Telegraphs.—With the exception of a fall of 1 in the Indo-European, all movements in the quotations for telegraph shares have been of a favourable nature, notably a rise of 8 in Anglo-Mediterranean, and 2 in Anglo-American. British Australian have advanced ¾; British Indian Extension and Falmouth and Gibraltar, ⅜; British Indian Extension, China Submarine, Cuba, Reuter's, and French Cables, ¼; and Great Northern Extension, ½; Telegraph Construction shares close 1 higher on the week.

Mines.—The quotations for British mining shares have been subject to considerable fluctuation, although the actual business transacted has not been extensive. The closing prices of to-day, as compared with last week, show a decline of 5 in Devon Great Consols, 2½ in South Wheal Frances, 1 in Tin Croft and Wheal Mary Ann, ¼ in East Lovell and Great Wheal Vor. On the other hand, there is an advance of 5 in New Seton, 1 in Margaret and Van, and ¾ in East Caradon. In the foreign market, we note a decline of 3 in Eberhardts, and an improvement of ¼ in Colorado and Don Pedro and of ¼ in United Mexican on the week.

Miscellaneous.—There are few changes of importance to note in the miscellaneous market, but the dealings have been on a fair average scale. Crystal Palace ordinary stock has advanced 1, the preference 3, and the debentures are 1 higher. We also note an improvement of 5 in North British Australasian shares; ¼ in Anglo-Mexican Mint, London Financial, and British and Foreign Tramways. London General Omnibus stock shows a reaction of 2, while British Indian Tea shares are 1 lower. General Credit shares have been in good demand to-day, and close at a rise of ¾ on the week.

It is announced that the subscription list of the 10 per cent. preference shares of the Welsh Ironworks Company will be closed to-morrow for London, and on Monday for the country. The quotation is 3 to 3½ prem.

The directors of the Val de Travers Asphalte Paving Company (Limited) have convened a meeting for Monday next, in order to obtain the consent of the shareholders as to the disposal of the shares obtained from the various companies to which concessions have been granted.

The liquidators of the Joint Stock Discount Company (Limited) have issued a circular, stating that the Master of the Rolls has granted leave for the re-opening of the transfer books, in order that dealings may again take place in the shares of the company. It is proposed to register transfers of fully paid-up shares, taking as the starting-point the list of contributories settled by the Court. No transfer can be registered until all interest due on calls has been paid.

In the new undertakings, Hungarian Land Credit shares are quoted ¼ to 1, Anglo-Austrian Bitumen 2 to 2½, Anglo-Hungarian Bitumen 4½ to 5, Anglo-German Bitumen 1½ to 2, Belgian Dutch Paving 1¼ to ¾, Limmer Asphalte par to ¼, Edinburgh Tramways ¾ to 1¼, Val de Travers Asphalte 35 to 36, Neufchatel Bitumen 71 to 73, Nantyglo and Blaina Ironworks Preference 1 dis to par, Mexican Railway debentures 4 to 3 discount, and Native Guano shares 22 premium.

Bullion.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—The demand for all descriptions of gold has almost ceased, only 54,000*l* in sovereigns have been withdrawn from the Bank, whilst on the other hand bars to the value of 490,000*l* have been sent in. The arrivals during the week have been very large, comprising 540,720*l* per overland mail from Australia; 25,170*l* from the West Indies; and 17,100*l* from the Brazils and New York—making a total of 582,990*l*. The Peninsular and Oriental steamer leaving on the 19th instant will take about 20,000*l* to India.

Silver.—The demand during the past few days has been chiefly for Holland, and prices remain without alteration at 60½d to 60¾d per oz standard, buyers at the former, sellers at the latter rate. The amount to hand during the week is about 78,000*l* received chiefly by the American steamers. The Massilia has taken 5,000*l* to Bombay.

Mexican Dollars.—The new coinage are somewhat lower in price, as they are now only taken for refining purposes; they may be quoted to-day as 58½d per oz. The old coinage are without alteration in value, and are taken for China at 59¾d per oz. The total of the arrivals during the week is about 33,000*l*.

Exchange on India for Banks' drafts at 60 days' sight is 1s 10⅞d to 1s 11d per rupee. Applications for the India Council bills were received yesterday. The minimum, as before, was 1s 10⅞d. Tenders on Bombay and Calcutta at 1s 10⅞d will receive about 32 per cent.

Quotations for Bullion.—Gold—Bar gold, 77s 8½d to 77s 9d per oz std; ditto refinable, 77s 11d per oz std; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0⅝d to 5s 0¾d per oz std; ditto containing 5 grains gold, 5s 1¼d per oz std.; Mexican dollars, 4s 10½d to 4s 11½d per oz, last price.

The sum of 78,000*l* was sent into the Bank of England to-day, and 19,000*l* was withdrawn.

According to the *Gazette* return, the imports of the precious metals into the United Kingdom during the week ended August 16 were:—Gold, 649,617*l*; silver, 131,499*l*. The exports were:—Gold, 599,530*l*; silver, 112,712*l*.

West Ham Gas, general, Stratford.
Cornwall Railway, general, Falmouth,

SETTLING DAYS.

Ticket Days—Wednesday, August 30; Wednesday, Sept. 13, and Thursday, Sept. 28.
Settling Days—Thursday, August 31; Thursday, Sept. 14, and Friday, Sept. 29.

NOTICES AND REPORTS.

STOCKS.

Egyptian 7 per Cent. Loan, 1864.—Bonds representing 172,800*l* have been drawn for redemption at par on the 1st October.

New 6 per Cent. Argentine, 1871.—The first semi-annual drawing of the New 6 per Cent. Argentine, 1871, loan, is announced to take place on Tuesday next, the amount to be invested being 76,530*l*.

Russian Anglo-Dutch Loan, 1866.—Bonds representing 363,000 florins and 38,700*l* have been drawn for redemption on the 1st October.

RAILWAY COMPANIES.

Bristol and Exeter.—The revenue accounts to the 30th June last, contrasted with those of the same half of 1870:—

	1870. £		1871. £
Gross receipts	212,687		220,482
Working expenses	99,609		101,958
Net	113,078		118,524
Add previous balance	2,064		2,292
	115,142		120,816
Deduct preference charges	72,666		73,192
Available for dividend	42,476		47,624
—On the ordinary stock at the rate of 4 per cent. per annum	40,449	(4½ % p. a.)	45,505
Surplus	2,027		2,119

Capital Account.

	Expended. £	Received. £
To 31st December, 1870	4,945,970	4,937,827
During the half-year	61,793	66,605
Total, 30th June, 1871	5,007,763	5,004,432

The new joint station at Bristol is to be proceeded with at once.

Charkow-Krementschug 5 per Cent. Guaranteed.—The second drawing of bonds, representing 1,800*l*, has taken place.

Cockermouth, Keswick, and Penrith.—Half-year's revenue 16,591*l*, and working expenses 9,946*l*. The net balance available for dividend was 4,181*l*, out of which the directors recommended a dividend at the rate of 3 per cent. per annum, less income tax. The capital account showed that 339,884*l* had been expended, leaving a balance of 3,874*l*.

Cork and Bandon.—Six months' traffic revenue 15,018*l*, against 13,983*l*, showing an increase of 1,035*l*; and in the working expenses an increase of 535*l* was incurred in renewals. The balance available for dividends amounted to 12,346*l*. The ordinary distribution is at the rate of 3 per cent. per annum; balance, 6,834*l*. Capital expenditure, 344,017*l*.

Cornwall.—The funding of the debt would result in a saving of 2,000*l* a year for interest after the close of the current half-year. The capital account showed that 1,844,379*l* had been expended, leaving a balance of 14,133*l* against the account. The revenue account for the half-year showed that 53,464*l* had been received, and 28,085*l* expended, leaving a balance of 25,369*l*. The result of the half-year's working was that the Associated Companies had to provide 7,807*l* to cover guarantees.

Crystal Palace and South London.—The directors inform the shareholders that the Chatham and Dover Company have rendered their account of the working of the line for the six months ending the 31st December last, showing a balance in favour of this company of 1,784*l*. This amount is not, however, admitted to be correct. The account for the working for the past half-year has just been received, showing a balance of 2,619*l*. This account also is not admitted.

Devon and Somerset.—It is intended to apply to Parliament for powers to borrow 60,000*l* on debenture to complete the works, which are making good progress.

Dublin and Belfast Junction.—The receipts for the past half-year amounted to 41,233*l*, showing an increase of 1,752*l*. The total income from all sources amounted to 42,219*l*, and the expenditure to 18,458*l*, the interest on loans to 5,037*l*, and the rents to 1,000*l*, leaving a balance of 17,724*l*; to this was added 5,302*l* from the preceding half-year, making 23,026*l*. The directors recommend a dividend at the rate of 4½ per cent. per annum, amounting to 19,244*l*. Capital expenditure, 1,131,686*l*.

Dublin, Wicklow, and Wexford.—The half-year's traffic receipts amounted to 92,068*l*, against 87,408*l* in the corresponding half, showing an increase of 4,659*l*. The expenditure amounted to 42,931*l*, against 36,633*l* in the corresponding half, showing an increase of 6,298*l*. The available balance in the revenue account was 26,003*l*, and the directors recommended the payment of the full dividends on the preference shares, and a dividend at the rate of 2½ per cent. per annum on the original stock and shares, leaving 469*l*. The extension to Wexford had made steady progress.

East London.—The half-year's receipts were 2,642*l*, against 2,244*l* in the corresponding half-year. Negotiations are still going on respecting the line north of the Thames.

Gloucester and Dean Forest.—Dividend paid of 13s per share, free of income tax.

Great Northern and Western of Ireland Railway 4½ per Cent. Debenture Stock.—Messrs Dalley and Rhodes have announced that they are authorised to issue 100,000*l* of 4½ per cent. perpetual debenture stock. The whole is payable upon allotment.

Great Northern.—The following are the features of the past half-year's revenue account by contrast with those of last year:—

	1870. £		1871. £
Gross receipts	1,053,022		1,103,416
Working expenses	530,432		558,563
Net	522,590		544,853
Add previous balance	1,940		3,349
	524,530		548,202
Deduct preference charges	326,571		320,414
Available for dividend	198,449		227,788
—On the ordinary stock at the rate of 5 per cent. per annum	*194,595	(5¼ % p.a.)	*225,738
Surplus	4,191		2,050

* These sums include the dividends on the A stock at the rate of 4 per cent. per annum in the 1870 half-year, and at the rate of 5 per cent. per annum in 1871. The B stock dividends were at the rate of 6 per cent. in the instances.

Capital Account.

	Expended. £		Received. £
To the year December, 1870	19,244,395		19,067,319
During the half-year	284,590		170,650
Total, 30th June, 1871	19,528,985		19,238,969

Permission is obtained to borrow 270,000*l.* on mortgage or debenture stock during the current half-year. Acts have been obtained for the acquisition of various branches, and for the construction of the Bradford and Thornton Railway. A scheme has been prepared for the consolidation of the company's preference stocks.

East Coast.—An Act has been obtained to amalgamate this company with the London, Chatham, and Dover on the terms expressed in the agreement submitted for approval. Interest on debentures has been paid up to the 31st of December, 1870, and there is sufficient sum in Court to pay the amount due up to the 1st of July. The Chatham and Dover Company had rendered their account for the half-year ended December last, showing a balance of 12,402*l.*, which was not agreed to, and the accounts up to the 30th of June had only just been rendered.

Llynvi and Ogmore.—Gross receipts for the half-year 25,244*l.*, against 23,487*l.* The balance available for dividend was 7,146*l.*, against 6,632. This would admit of a dividend at the rate of 3 per cent. per annum on the Llynvi ordinary stock, leaving 88 capital expended, 719,723*l.*

London and North-Western.—Revenue accounts for the first half-year of 1870 and 1871 contrasted:—

	1870. £		1871. £
Gross receipts	3,443,804		3,603,524
Working expenses	1,581,586		1,631,484
Net	1,862,220		2,072,040
Previous surplus	6,153		10,911
	1,868,372		2,082,751
Preference charges	953,531		993,567
Available for dividend	914,841		1,072,984
—On the ordinary stock at the rate of 6 per cent. per annum	915,378	(6¼ % p.a.)	1,037,728
Surplus	34,163		35,156

Capital Account.

	Expended. £		Received. £

During the half-year	782,520		2,281,618
To June 30, 1871	54,940,927		56,943,481
Re amount in hand	1,002,555		
	55,943,481		

A large issue of 5 per cent. preference stock has been made, 4 per cent. debenture stock, to the amount of 866,492*l.*, has been issued during the half-year, while debentures bearing 4*l.* to 5 per cent. interest have been largely paid off. The "Additional Powers Bill" has been passed, with some alterations. The Blackpool and Lytham, and the North and South-Western Junction will be acquired jointly with other companies. Powers have been obtained for the construction of a new station at Birkenhead. The hotel at Lime-street, Liverpool, was opened in March. The estimated capital outlay during the current half-year is 1,020,000*l.*, including the contribution to the Metropolitan District line, and the cost of adding two sets of rails along portions of the main line.

Lynn and Hunstanton.—A dividend at the rate of 5¼ per cent. per annum has been announced; surplus, 50*l.*

Maryport and Carlisle.—The traffic for the half-year amounted to 56,573, and the expenditure to 29,278. The balance was 26,295, which added to 1,121*l.* from the preceding half-year enables the directors to recommend a dividend on the ordinary stock at the rate of 12½ per cent. per annum for the past half-year, and to carry over 2,101*l.*

Mid Wales.—The capital account showed that 1,074,324*l.* had been expended. The revenue account for the half-year ending the 30th June showed that 14,724*l.* had been received, and 11,522 expended, leaving a balance of 3,202*l.* To this was added 2,802 from the preceding half-year, making 6,004*l.* From this was deducted 4,920*l.* interest on debentures, leaving a balance of 1,174*l.*

North-Western.—"B" stock dividend 1¾ per cent. per annum.

Rhymney.—Half-year's receipts, 31,992*l.*, as compared with 33,310*l.* The balance of net revenue was 11,697*l.*, which would suffice to pay the dividends on the guaranteed and preferential stock and shares, leaving 460*l.* The traffic had been injuriously effected by the strike among the colliers, which still continued. The works on the Penalltau branch and on the Northern line were now completed, and would be inspected in a few days. The Cardiff and Caerphilly line was completed and opened.

Salisbury and Yeovil.—Gross revenue 35,903*l.*, showing an increase of 1,709*l.* The balance available for dividend amounted to 16,987*l.*, from which was deducted 6,188*l.* for dividends on the 5 per cent. preference capital, and the directors recommend that a dividend be declared at the rate of 6 per cent. per annum, leaving 998*l.*

South Devon.—The gross receipts for the half-year were 124,400*l.*, and for the corresponding half 116,817*l.*, showing an increase of 7,583*l.* The working expenses amounted to 53,714*l.* being 43·18 per cent., as compared with 52,921*l.*, or 45·30 per cent. The balance carried to net revenue account amounted to 70,685*l.*, and after making provisions for the preference and other charges the directors recommend a dividend on the ordinary stock at the rate of 2*l.* 15*s.* per cent. per annum, leaving a balance of 1,395*l.* The corresponding dividend was at the rate of 2*l.* per cent. per annum, carrying over 294*l.*

South Yorkshire.—The gross receipts from the railways and navigations for the half-year were 136,495*l.*, as compared with 129,653*l.* The rent from the Manchester, Sheffield, and Lincolnshire was 80,256*l.* for the past half-year, compared with 78,304*l.* The line from Rotherham to Mexborough, forming a new route between Sheffield and Rotherham and the north and east coast, via Doncaster, was opened for traffic on the 3rd April.

Swansea Vale.—Half-year's net revenue, including 153*l.* brought forward, 5,819*l.* Ordinary dividend notified at the rate of 3 per cent. per annum. Surplus, 379*l.* Capital expended, 359,994*l.*

Taff Vale.—The gross receipts for the half-year amounted to 200,661*l.*, against 210,259*l.* in the corresponding half of 1870, and the gross expenditure amounted to 100,189*l.*, against 103,664*l.* The total net revenue, including 5,728*l.* for sundries, amounted to 105,917*l.*, and in the corresponding period, including 3,671*l.* for sundries, to 110,266*l.*, showing a decrease of 4,349*l.* The interest charges amounted to 38,263*l.*, against 38,824*l.* The balance of net revenue enabled the directors to recommend a dividend at the rate of 10 per cent. per annum, less income-tax, leaving a balance of 4,828*l.* During June the revenue suffered greatly from a strike of the colliers in the Aberdare and Rhondda valleys. Capital expenditure, 1,787,561*l.*

Weymouth and Portland.—Half-year's dividend declared at the rate of 4½ per cent. per annum.

Whitehaven, Cleator, and Egremont.—Half-year's revenue receipts 31,673*l.* and expenditure 11,932*l.*, leaving a balance of 19,741*l.* The balance from the preceding half-year was 523*l.*, and after payment of interest charges there remained 16,702*l.*, and the directors recommend the payment of a dividend at the rate of 13 per cent. per annum on the ordinary stock, leaving 1,102*l.* Capital expenditure, 414,113*l.*

Worcester, Bromyard, and Leominster Railway—Issue of First Debenture Stock.—This line is in course of construction, and will extend 22¼ miles from the Great Western line at Worcester to the Shrewsbury and Hereford Railway at Leominster. The line will be worked by the Great Western, at 52½ per cent. gross receipts. Messrs. Field, Wood, and Haynes are offering 5 per cent. debenture stock for 48,000*l.*, at the price of par, payable by instalments until the 1st November. By special arrangement, the debenture stock is made a first charge upon the *gross receipts* of the first section of the line.

BANKS.

Albion.—The company's business has been transferred to the Joint Stock Bank.

Bank of Australasia.—A dividend of 4 per cent., making 9 per cent. for the year, free of income tax, has been declared.

Hong Kong and Shanghai Banking Corporation.—A telegram states that for the past half-year a dividend is proposed at the rate of 12 per cent. per annum, 100,000 dollars placed to the reserve fund, which will then amount to 900,000 dollars, and 30,000 dollars carried forward.

Land Mortgage Bank of India.—The report states it is necessary to provide the directors with additional means if they are to work the bank successfully. It is proposed, therefore, to issue short dated and other debentures, the former bearing interest at 6 per cent. A profit of 2,709*l.* has accrued upon the company's tea estates during the past year.

London, Hamburg, and Continental Exchange Bank, Limited.—A sixth dividend of 2*s.* 6*d.*, making 16*s.* in the pound paid to the creditors, has been paid by Messrs. Harding, Whinney, Gibbons, and Co.

[CONTINUED FROM PAGE 1009.]

ASSURANCE COMPANIES.

Agriculturalist Cattle Insurance.—It is notified that the balance of the debts and interest due to creditors (other than policy-holders) is now payable at the offices of Mr L. H. Evans, the official manager.

Eagle Insurance.—The premiums on new assurances during the past year amounted to 12,907*l*, of which sum 3,428*l* has been devoted to re-assurance; the interest from investments was 137,730*l*, and the claims, with additions, reached 313,112*l*, making the annual average for four years 304,512*l*.

Imperial Union Assurance.—In the life department, 612 new policies have been issued, assuring 141,790*l*, and producing a new premium income of 4,190*l*. In the accidental department, 721 new policies were issued, producing an annual income of 1,683*l*.

MISCELLANEOUS COMPANIES.

African Steamship—Issue of 5 per Cent. Debentures.—This company is issuing, by virtue of its supplemental charter, 5 per cent. debentures to the extent of 83,000*l*. They have 3, 5, or 7 years to run, and tenders are invited.

Ceylon Coffee Estates.—The directors invite subscription for 58,000*l* in 7 per cent. perpetual debentures.

Gloucester Waggon.—The report recommends the payment of a dividend of 4 per cent. for the past half-year, which, with 5 per cent. for the previous half-year, made 9 per cent. for the year. The reckless competition of other companies has had the effect of reducing manufacturing profits.

Great Western Colliery.—Dividend declared of 5 per cent., leaving 1,908*l* as balance to the next year.

London General Omnibus Company, Limited.—The directors recommend a dividend for the past half-year at the rate of 5 per cent. per annum.

Mersey Steel and Iron.—Dividend declared of 5s per share, free of income tax.

Montrotier Asphalte and Cement Concrete Paving, Limited.—Capital, 120,000*l*, in 10*l* shares. For the sum of 80,000*l* (74,000*l* in shares, and 6,000*l* in cash) the purchase of an asphalte mine in Haut Savoie, France, and of Blue Lias lime and cement stone quarries and factory at Lyme Regis, Dorsetshire, will be made. The cement and concrete is stated to be suitable for making the substratum of roadways, and, combining the two businesses, it is anticipated that savings will be effected.

River Steamer, Limited.—First dividend to the creditors 10s per share.

United Service, Limited.—Second dividend to the creditors 2s in the pound.

Val de Travers Asphalte Paving.—The board having disposed of concessions to the "Manchester," the "Scotch," and the "Irish" Val de Travers Paving Companies have come into possession of 83,000*l*, in fully paid-up shares of those undertakings; out of which it is proposed to divide 10,000 shares of 5*l* each, fully paid, or 50,000*l* as profit.

MINING COMPANIES.

Cape Copper.—The report remarks that Ookiep promises to confirm the sanguine expectations which have been formed of it. Spectakel has not yet realised anticipations, but good hopes are still entertained of its again proving a very profitable mine. Springbok seems not unlikely again to resume its former position. The trial mines have not yet developed any important features.

Eclipse Gold Mining Company.—The directors have made a call of 1s per share, payable on the 18th September.

Silver Plume Mining, Limited.—Capital, 10,000*l*, in 1*l* shares. The mines are situated on Republican Mountain, in Colerado territory, United States. The price to be paid for the property is 33,000*l*, viz., 5,000*l* in cash, 25,000*l* out of the net profits, and 3,000*l* in fully paid-up shares.

Sweetland Creek Gold.—Quarterly dividend, 4s per share.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There has been continued dulness in the grain trade consequent upon the brilliant harvest weather, and prices have again tended downwards. As compared with last week wheat is 1s per quarter cheaper for both English and foreign qualities, a slight reaction having taken place to-day. Oats have sold more freely at the late decline; but in other cereals much inactivity has prevailed. Flour has sold on easier terms. This week's imports of foreign and colonial produce into London have amounted to 23,980 qrs of wheat, 3,820 barley, 51,440 oats, 3,990 maize, 1,500 beans, 800 peas, 6,400 sacks of flour.

At Liverpool and Wakefield this morning there was little inquiry for wheat, but factors held rather strongly.

The Liverpool cotton market opened very dull on Friday last, and continued so with irregular prices until Wednesday, when a steadier feeling set in. The market has since been strong, and quotations at the close are the same as on Friday last. The total sales for the week are 64,660 bales, of which the trade have taken 49,660 bales, speculators and exporters 15,000 bales. The imports are 7,287 bales, the actual exports 5,257 bales, and to-day's stock is 596,200 bales. To-day the market closes strong. Sales, 15,000 bales; prices rather against buyers.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended August 17, 1871:—

	Imported.	Exported.
American.....bales	1,755	1,289
Brazilian	764	84
East Indian	1,786	10,088
Egyptian	558	143
Miscellaneous	4,153	9
Total	9,016	11,613

At New York on the 17th current middling Upland cotton was quoted at 18½ cents per lb. Telegrams from Bombay to the 14th report the cotton market dull at 208 rupees for fair Dhollerah.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, July 18:—Telegraphic advices to hand from Liverpool throughout the past week, although indicating a sensitive and somewhat variable market from day to day, have reported on the whole little alteration in prices. For a day or two after last mail left, the demand for cotton for export, to the continent chiefly, continued very brisk, and prices

further advanced from 2 rs to 5 rs per candy, as much as 237 rs having been touched for good Dhollerah. Since then, home telegrams have read less favourably however, and as shippers are in consequence less disposed to operate, prices have receded to about the level of last mail's quotations. The week's transactions reach a total of rather more than 3,000 candies, of which Barsee and Dhollerah descriptions form the bulk. Arrivals of cotton from the districts have now almost ceased; and as shipments during the months of June and July have been much larger than usual, owing partly to the encouraging advices from Liverpool and partly to the unusually fine weather we have had, our available stock is reduced to an exceptionally low ebb, say 60,000 bales of all sorts, against an average of 1,20,000 to 1,50,000 at this season. Taking the weekly consumption of our local spinning and weaving companies at 1,500 bales a week, there can thus be very little business done for export during the next three or four months, and prices must be expected to rule very high compared with Liverpool quotations. This state of things has been found very favourable for a return to the Sutta, or time bargain contracts, and large speculative transactions have latterly been entered into in the bazaar at 232 rs to 235 rs per candy for Dhollerah, the next settlement being on 1st August. The weather during the past week has been rather more seasonable, and accounts from the cotton-growing districts, we are glad to say, are generally favourable. The total fall of rain to date is still considerably short of the average, but the deficiency may yet be made up without entailing anything beyond perhaps a later season than usual for picking. From Tinnevelly we have a telegram dated 15th which quotes 7 1/2d, c. and f.

Export of Cotton from Bombay to July 17.

	1871.		1870.
London ..... bales	18,291	.....	1,570
Liverpool	5,89,759	.....	7,01,009
Total, Great Britain	6,08,150	.....	7,02,579
Channel for orders	44,886	.....	10,379
Continent	2,34,437	.....	1,26,118
China	41,947	.....	37,145
Grand total	9,29,414	.....	8,76,221

Actual exports since last mail left, 7,942 bales.

The colonial produce markets have shown firmness, and a fair business has been done in sugar and coffee at steady currencies. The deficiency in the stock of sugar as compared with last year is now about 50,000 tons—166,820, against 216,980—while the stock of coffee is 20,300 tons, against 21,800 last year. Cocoa has ruled steady, and there has been more demand for rice afloat.

Annexed is Messrs Laurence Brothers' leather circular:—This month there are very important changes to note in the value of many tanned articles, upon which lately a considerable rise in value has taken place. To render the tanning trade more profitable, prices of leather must still increase, and hides remain at present quotations, or advancement occur on manufactured goods commensurate with that going on for those in the green state. Extreme scarcity in certain tannages and varieties of leather in this market has produced keen competition for consignments, and from the number of buyers always seeking fresh arrivals, it may be fairly argued London just now is perhaps the best place to send to. The supply of hides this year is supposed by some to have fallen short of that during a similar period in 1870: such, however, is probably not the case, for although in South American a deficiency occurs of about 1,300, and in Cape (say) 250, still nearly 10,000 more Australian have come to hand, as well as large quantities of French and other continental hides. Market hides have been in about the usual supply considering the season of the year, and prices are higher. At the last public auction of foreign raw goods, salted Cape and Australian hides were freely disposed of, a further advance on our last month's quotations being noticeable. A few damaged River Plate brought 6½d to 6¾d, and of 2,075 salted French hides offered, about 1,690 realised following rates:—Heavy, 5¼d to 6½d; kips, 7¼d; and skins, 8d to 9¼d per lb. 14,500 dry Cape hides also went at high values. East Indian kips met fair inquiry, although late rates were barely obtainable for common descriptions. The demand for Australian leather was very animated, and exhibited improvement on previous prices. Mimosa bark was not particularly active, about half the quantity brought forward finding buyers. Transactions which occurred in Dutch hides could have been considerably augmented were supplies to come forward with greater freedom; Danish and Swedish seldom arrive now, although a large trade might be done in them. Continental calf skins remain in request.

The annexed is dated New York, August 4:—The volume of the general distributive trade is about a fair average for this period of the year, while the export trade in the principal staples, except cotton, is above the average. The outward movement of wheat and corn to Europe is especially brisk, the weekly shipments for some time past having averaged upwards of a million bushels. This heavy movement of cereals, together with the shipments of petroleum, lard, cheese, bacon, tobacco, naval stores, &c., has absorbed the great bulk of the available off-shore tonnage, and enhanced the rates of freight from fifty to seventy-five per cent. over those current during the early part of the summer. The shipments of specie thus far during the year have been unusually large, but with the present healthy condition of our export trade in products, and the probable early revival of cotton shipments on a large scale, the treasure movement to Europe, during the remainder of the year, is likely to be very moderate, particularly as the transatlantic money market continues remarkably easy, and American bonds, national and corporate, are increasing in favour among European capitalists. The grain crops of the country, except Indian corn, have been secured, and if the yield of wheat is not so large as in some previous years, it is certainly ample enough to leave, with the remnant of the old crop, nearly or quite an average surplus for exportation. Of Indian corn, the crop will unquestionably be the largest ever yet hoarded by kind Providence. The minor cereal and root crops, too, are abundant, while the cotton crop has improved considerably during the past month. Thus, with peace and plenty, an easy money market and steady gold during the autumn months all but assured, the essential elements of a good fall trade is not wanting. The supply of currency continues so far in excess of the wants of current trade, that the rates remain 3 to 4 per cent. on call, and 5 to 7 per cent. discount of short prime mercantile paper. There is very little variation in the rates of foreign exchange, though at the close the market is a little weak. As regards the leading domestic staples, prices are for the most part weak and lower. Cotton, breadstuffs, petroleum, and provisions are generally lower. Pork is now lower than it has been in twenty years, and yet speculators are shy of it, owing to the prospect of another crop. The dry goods and hardware trades are opening unpropitiously.

THE COTTON TRADE.

LIVERPOOL.—August 17.

The cotton market opened very quietly this week, and prices declined ⅛d per lb. Yesterday the demand increased, and to-day the business has been extensive, the trade being the principal buyers, and the quotations of last week are in most instances resumed. For Sea Island there has been a good inquiry at full rates. American was freely offered in the early part of the week, and gave way fully ⅛d per lb; subsequently, with a large business, prices have recovered the quotations of last Thursday. New York advices to the 17th instant quote middling Upland 18½ cents, costing to sell in Liverpool 9½d per lb, by steamer. Brazil has been in moderate demand, at a partial decline of ⅛d per lb. Egyptian continues heavy of sale, and prices have been irregular at a decline of ⅛d to ¼d per lb. East Indian continues to be very freely offered, and the medium and lower qualities have partially declined ⅛d per lb; the better sorts are unchanged.

In cotton "to arrive" the transactions have been considerable during the last two days, and after a decline of ⅛d to ¼d, prices have fully regained the quotations of last Thursday. The latest quotations are—American, basis of middling, from any port, September delivery, not below low middling 8⅞d; October-November shipment, new crop, not below good ordinary, 9d; Mobile, September delivery, not below good ordinary, 8 1/16d; October delivery, not below strict ordinary, 9d; New Orleans, ship named, not below low middling, 9⅛d; not below good ordinary, September delivery, 9⅛d; Texas, September delivery, not below strict ordinary, 9d; not below good ordinary, October delivery, 9⅛d; September delivery, 9⅛d; bales, September delivery, 8¾d, 8⅞d; not below good ordinary, September delivery, 8⅞d; low middling, Texas, not below fully ordinary, September delivery, 8⅛d; Maceio, fair, mutual allowances, ship named, 8⅛d; Broach, good fair, machine ginned, ship named, 7⅞d; June sailing, 8d; Dhollerah, fair new merchants, July sailing, 7⅛d; July shipment, 7⅛d per lb.

The sales of the week, including forwarded, amount to 64,660 bales, of which 9,170 are on speculation, and 5,830 declared for export, leaving 49,660 bales to the trade.

August 18.—The sales to-day will probably amount to about 15,000 bales, with a strong market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	708,180
An increase of quantity taken for consumption of	400,750
An increase of actual exports of	306 980
An increase of stock of	67.270

In speculation there is an increase of 183,160 bales. The imports this week have amounted to 7,287 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to August 11) is 57,000 bales, against 34,000 bales at the corresponding period last year. The actual exports have been 5,257 bales this week.

LONDON.—August 17.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

Our market remained very dull during the early part of the week, and prices receded about ⅛d per lb, but to-day a much better demand has prevailed, and the decline has generally been recovered for cotton on the spot; for arrival, ⅛d per lb advance is obtainable on last week's rates.

NEW YORK.—August 4.

For several days past the market for goods on the spot has been in a dull and generally uninteresting condition, with values favouring buyers to a greater or less extent on nearly all grades. Holders have apparently become fully satisfied from the tenor of the advices from the South that it is pretty nearly time to sell out, and though of course taking advantage of everything to enable them to insist upon extreme figures, such as the firmer Liverpool advices, &c., seldom hesitated to part with supplies on any full bid, and the

quantity and assortment available were at all times equal to the outlet. Exporters have been particularly indifferent operators, partly owing to an absence of freight room, but as much as anything to an absence of anything really encouraging in their private advices abroad, though now and then fair purchases from lots in transit have been possible. Spinners bought to some extent and kept the high grades from declining quite so rapidly as common sorts, but most operations for consumption were of a cautious nature and based closely on actual wants. To-day the business has been moderate. Spinners have made rather more inquiries, but they are hardly ready to accept holders' views. The offerings are fair but are not pressed. We quote as follows:—

	Upland and Florida.	Alabama.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary.....per lb	15 @ ...	15½ @ ...	15½ @ ...	15½ @ ...
Good ordinary	16½ ...	17 ...	17½ ...	17½ ...
Low middling	18½ ...	18½ ...	18½ ...	19 ...
Middling	19½ ...	19½ ...	20½ ...	20½ ...
Good middling	21 ...	21½ ...	21½ ...	21½ ...

For forward delivery the business has been very moderate. There are no new influences bearing on the market, and as all operators work quick turns, they could not accomplish much, as neither side would make the necessary concessions.

The following shows the receipts, exports, and stocks at the principal cotton ports since the commencement of the cotton year:—Receipts at cotton ports since Sept. 1, 1870:—New Orleans, 1,453,794 bales; Mobile, 398,723; Charleston, 346,396; Savannah, 724,909; Memphis, 321,332; Galveston, 397,360; Wilmington, 91,567; Norfolk, 338,744; other ports, 12,000—total, 3,975,325 bales. Foreign exports at Southern ports and New York:—New Orleans, 1,273,464 bales; Mobile, 285,641; Charleston, 172,720; Savannah, 463,491; Galveston, 209,841; New York, 646,987; other ports, 47,342—total, 3,095,201 bales. Stocks at principal ports:—New Orleans, 44,902 bales; Mobile, 7,922; Charleston, 3,361; Savannah, 5,000; Galveston, 11,836; Norfolk, 278; New York, 68,500; Boston, 6,000—total, 142,849 bales.

New York, Aug. 11.—According to Messrs Moffat, Davidis, and Co.'s report, the week's receipts of cotton at all ports have been 9,000 bales, and since the 1st September 3,258,000 bales. Shipments to England, 5,000 bales; total since the 1st September, 3,114,000 bales. Stock at all ports, 137,000 bales. Middling Upland, 8¾d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS

Manchester, August 17.—There is no improvement to report either in the demand or value of yarns and goods. The inquiry in all branches has been very moderate, and the actual business of the week has been as meagre as any for some months past. Prices are weak and continue to droop, though slowly, and buyers show much caution in operating, as the tendency is towards a lower value of the raw staple owing to the improved condition of the growing crop in America. In yarns, both for export and the home trade, there have been few inquiries, and generally for small quantities. India mule and China water twist have been quite neglected. Cloth has also been inactive, and prices are more irregular. Shirtings are difficult to sell, even at a concession of 1½d per piece from current quotations. Light goods are steady, and generally under contract. Heavy goods, particularly T-cloths and long cloths, continue neglected, and stocks are accumulating.

Messrs Alex. Collie and Co. received the following telegram from Manchester:—Some of the pressing sellers sold early in the week at low rates. To-day the market is steadier, and prices are slightly against buyers.

Bradford.—The extreme rates of most wool-staplers tend to a great extent to subdue the activity which has recently prevailed, though occasionally good transactions are effected even at the high rates sought. Staplers are not eager to sell, but quite otherwise. The demand still runs on prime wethers and good hogs. Spinners are generally well stocked, and the limited supplies in the country are very firmly held. Noils and brokes are in good request, at firm rates. In the yarn-market there is a general inquiry in both single, two-fold, and genappe yarns, but operations are greatly restricted by the very high quotations. The piece market is moderately active, and prices are firm.

Leeds.—The market has shown no change in the state and prospects of the woollen trade. The few manufacturers who brought any goods into the cloth-halls were soon relieved of them by eager buyers. Both the home and the foreign demand keep very buoyant, and prices are very firm. Employment is very good throughout the district.

Rochdale.—The flannel market was quiet, principally for the reason that stocks present no opportunities to buyers. Manufacturers are busy in orders. The wool market is animated, and there is an extensive run upon the best qualities. The trade doing in Yorkshire woollens is good, but rather inclined to a falling off, as prices are hardening still more.

Nottingham—The lace trade has been scarcely so active. Still, business is in a healthy state, and there is quite an average amount doing for the time of year, the present being usually a quiet season. Raw silk is firm at full prices. The hosiery trade remains in much the same condition as last week. Hosiery yarns are unaltered in value.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, August 4.

The market for western and State flour continues dull. There were but few buyers present, and business for both local wants and exports was light, and limited almost exclusively to retail lots. The market to sell lower. The retail trade was at about steady prices. The outside for southern extra, excepting fancy, $7.50. Round lots of State brought $5.35, delivered; superfines, $5, and $5.50 about the extreme price attained for round hoop Ohio seconds. Minnesota dull. Low grade southern sold as low as $5.50. Rye flour dull. Sour, No. 2 and superfine, unsettled and irregular. The general market was void of animation, and all grades, except fancy, lower. There was a small trade in St Louis, and a moderate business in Minnesota, Iowa, and winter western. In anticipation of light receipts of wheat holders demanded an advance at the opening of 'Change, which, with the continued scarcity of vessels business was checked. Sales since last report, 82,100 bushels at $1.25 for soft spring; $1.30 for prime No. 2 spring, with extra prime quoted at about $1.32; $1.34 to $1.35 for No. 1 spring; $1.27 for soft No. 1 Duluth spring; $1.28 for mixed red and white winter western; $1.25 for inferior red winter; $1.35 to $1.38 for fair to good winter red; $1.43 to $1.45 for fancy amber Indiana in car lots; $1.40 delivered for car loads of amber Ohio. The market closed quiet, more sellers than buyers. The corn market was firm early in the day, which checked business. Sales, 144,000 bushels, at 65c in store for western mixed; 65½c for ditto out to-day; 65½c to 66c for western mixed, closing at 65½c dull; 66½c to 67c for western high mixed to nearly yellow. Oats were firmer with a moderate trade, mostly car lots. Sales, 34,000 bushels, at 53c to 56c for western new; 59½c to 63c for white Ohio new; 65½c to 68½c for old white Ohio; 60c for old Ohio mixed in store; 62c were bid for part of a boat-load of choice old western white. The market closed dull.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

Mark Lane, Friday Evening.

Under the influence of brilliant harvest weather, the wheat trade has ruled very dull since we last wrote, and the quotations have tended in favour of buyers. Considerable progress has been made with the English harvest, and cutting has already commenced in some parts of Scotland and Ireland. So far, the crop has been secured in excellent condition, but it is not to be expected that the yield will prove a full average. On the other hand, the season has proved very favourable for the development of the barley crop, which is decidedly over the average of years. All roots have prospered well, and there is a good prospect of abundant feed for live stock throughout the ensuing winter. With regard to the wheat trade at Mark lane, millers have restricted their operations within the narrowest limits, and the actual quantity of produce that has changed hands has accordingly been very small. Samples of new produce have come to hand, and the quality and condition have on the whole been good. The weights have varied from 61 lbs to 65 lbs, and the prices realised have been 56s to 58s for red, and 58s to 60s for white, per quarter. Both English and foreign produce may be quoted 1s to 2s per quarter cheaper on the week, though a slight reaction was apparent to-day. Should the weather continue fine a further fall may be expected; flour has tended downwards in sympathy with the wheat trade.

All spring corn has been dull of sale. Oats have changed hands at the late decline, while maize has again given way slightly. Beans and peas are 1s to 2s per quarter cheaper on the week. Other corn is nominal in value.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 17 grain and seed-laden vessels have arrived at ports-of-call, viz,, 10 wheat, 2 maize, 1 barley, 1 barley and maize, 1 maize and millet-seed, 1 linseed, 1 valonea. The floating grain trade has been very quiet in tone. Wheat slow sale at reduced prices. Maize also in little demand, and prices tending downwards. Barley good. Danubian is nominally quoted 27s per 400 lbs. Rye quiet, and prices favouring buyers. The reported sales are as follows:—Wheat—15 arrived cargoes: Berdianski, 47s to 46s 6d; Marianopoli, 48s 6d; Ghirka, from Taganrog, 45s; Ghirka from Nicolaieff, 46s 6d; Bessarabian, 46s 6d; soft Eupatoria, 45s; Moldavian, 49s 4½d; Salonica, 41s; Wallachian, 40s 6d; Serbian Ghirka, 40s 7½d; No. 1 spring, from New York, 52s; Sandomirca, 51s 6d; palish, 50s 6d per 480 lbs. To be shipped, 20,000 qrs New York or Montreal: No. 1 spring, 50s 6d; red winter, 52s and 52s 6d. Maize—7 arrived cargoes: Odessa, 29s 6d; old and new mixed Roumanian, 30s 6d; Wallachian, 27s 3d; Ibrail, 26s; mixed, from New York, 30s 6d to 30s 7½d per 480 lbs. On passage, 2 cargoes Odessa, 30s per 492 lbs; Galatz, 30s 6d per 480 lbs. Barley and Maize—1 arrived cargo from Kustendge: barley, 24s 6d per 400 lbs; and maize, 25s 6d per 480 lbs. Rye—1 arrived cargo Azow Taganrog, 30s 6d per 480 lbs. Linseed on the spot scarce, and steady to arrive. Arrived, 1 cargo Azow, 59s 6d per 424 lbs, A.T. Arrived in London, 100 tons Calcutta, at 63s. COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has not been any alteration in the market this week. Transactions in West India are of moderate extent, viz., 2,043 casks to yesterday. Barbadoes by auction part sold at 29s to 34s 6d per cwt. No change can be quoted in other kinds. A few parcels of low brown have sold during the week, including Jaggery and unclayed Manila. Middling to good grainy qualities are in demand, and rather scarce. There has been a steady demand for refined goods by the home trade. Stocks of sugar in the kingdom according to the latest returns showed a considerable decrease compared with the previous season. The home deliveries at this port have already increased to the extent of 20,000 tons, and the stock is 30,000 tons less than at the corresponding date of last year.

Mauritius.—400 bags fine crystallised, 5s 8d duty, have sold privately at 36s 9d.

Madras.—1,500 bags Jaggery are reported at 20s for old import.

Bengal.—450 bags were chiefly taken in.

Penang.—1,120 baskets low brown sold at 22s 3d.

Natal.—590 bags sold at 23s to 27s 6d for brown sorts.

Manila.—2,600 bags unclayed at 21s 6d.

Other Foreign.—235 casks Honduras by auction were sold at 27s 6d to 31s for brown and grey. 1,552 bags beet were bought in above the value. Privately 300 bags Guatimala have sold at 33s 6d to 35s.

Floating Cargoes.—One of 600 tons Java sold for the United Kingdom, No. 11½ to 12, at 30s per cwt.

Refined.—There was rather more business done yesterday. Common to fair titlers 40s to 41s 6d per cwt.

MOLASSES.—About 550 puncheons West India have sold at 10s 6d to 12s 6d per cwt.

RUM.—There is a steady demand, and prices have been firmer for common kinds: Berbice, 1s 9d; Leewards, 1s 7d to 1s 8½d proof. A few sales of Jamaica are reported at 3s 3d to 3s 10d per gallon. No further sales reported in Mauritius.

COFFEE.—The continental markets are firm, and the Dutch sale this week having gone at 1 to 2 cents over valuations the improved demand last quoted has rather increased. Native Ceylon coffee is held for higher prices. 1,426 bags by auction were bought in above the value. Privately 57s has been paid for very good ordinary. 3,000 casks 784 barrels and bags plantation went at rather higher prices: low middling to good middling, 64s to 73s; good to fine colory, 74s to 83s; grey, 60s to 73s for low middling to bold. 1,360 cases 50 casks 4,446 bags East India all sold: Mysore, palish to fine bold, 80s to 96s; Wynaad and Neilghery, pale and grey to middling colory, 62s to 72s 6d; good to fine bold, 73s to 85s; Coorg, 66s; native kinds, 56s 6d to 61s. 1,054 bags Manila: pale, 58s; fine bold Java kind, 73s 6d; low brown, 54s. 216 bags Singapore, sea damaged, 56s 6d. 165 bales, &c., Mocha, part sold at 93s to 95s 6d for mixed long berry. 62 casks 144 barrels Jamaica were disposed of at 55s to 75s for ordinary pale to middling dull colory. 691 bags Guatimala, 57s 6d to 63s 6d. 365 bags Bahia were bought in. Privately several sales of Rio are reported at 54s to 57s. A floating cargo has sold at 54s per cwt for a near port. At the sale of the Netherlands Trading Company on Wednesday good ordinary Jamaica was quoted about 36 cents. There were 2,760 tons landed here last week and 1,240 tons delivered, consequently the stock has increased to 20,330 tons, or only 1,510 tons less than at the same date in 1870. The deliveries are steady. 7,480 tons more have been exported than to same date last year.

TEA.—There are farther arrivals of new season's congou. The importers have been pressing sales, and a considerable quantity by auction sold without reserve, occasionally at lower prices. 16,868 packages were offered from Tuesday to yesterday, when 14,607 packages sold without reserve at some further decline upon new season's black leaf congou. The ranges of prices were 1s 5½d to 1s 7½d, and for inferior grades as low as 1s 0¾d to 1s 1d per lb. New season's Ping Luey greens sold pretty steadily; Gunpowder, 2s 11d to 3s 8d; young Hyson, 2s 5d per lb. Old Moyune greens did not quite maintain their former value. Other sales are declared for to-day and on Monday next.

COCOA.—Fine qualities of Trinidad do not find buyers on former

terms. Guayaquil has been disposed of privately at 49s to 52s. At the public sales on Wednesday, current qualities of Trinidad went rather dearer, and 965 bags chiefly found buyers: grey and middling mixed, 58s to 60s 6d; good, 71s 6d to 85s. 261 bags Grenada part sold at steady rates, from 52s to 58s; a few lots superior at 60s 6d to 70s. 803 bags foreign were bought in, including Cuba at 65s, Surinam at 65s to 68s.

Rice.—There have been eleven floating cargoes sold during the week upon various terms and partly for the continent at steady prices, including four Necrancie Arracan, at 9s 3d to 9s 11¼d; four Rangoon at 9s 6d to 9s 10½d; two Moulmein at 10s and 10s 1½d, and one Bassein at 9s 4½d. About 6,000 bags Bengal on the spot at 9s 10½d to 11s 3d; Cargo, 9s 6d; Ballam, 9s 10½d to 10s; Madras, 9s 6d to 9s 7½d. 800 bags from Madras by auction sold at 9s 9½d to 9s per cwt.

Imports and Deliveries of Rice to Aug. 12, with Stocks on hand.

	1871.	1870.	1869.	1868.
Imports ... tons	1,000 ...	5,000 ...	5,000 ...	4,000

Stock ...	24,000 ...	20,000 ...	18,000 ...	15,000

Sago.—305 bags small grain sold at 15s to 16s per cwt for common dingy quality.

Pearl Tapioca.—207 bags were bought in at 21s to 22s per cwt.

Black Pepper.—The demand continues rather active, and prices have advanced fully ½d. Several sales have been made at: Singapore 6d to 6¼d; Penang 5¾d to 6d; and Tranq. at 6d. 1,491 bags Singapore by auction part sold at 6¼d for garbled. 402 bags brownish Batavia realized 6d; and 288 bags Penang part sold at 6¾d per lb for good to fine.

White Pepper.—The stock has again decreased and is much smaller than usual. Holders expecting further advance since the quotations have been raised. 57 bags dull Penang sold by auction at 10d. 16 bags Singapore were taken in, 10½d per lb being bid and refused. The last sale previously was at 10d per lb.

Clove Spices.—The next quarterly consumption sales are fixed for the 20th instant. About 2,000 bales expected to be offered. The week's sale bags both sold and bought-in at 1¼d to 3d. 1,424 bags Zanzibar cloves were taken in above the value for good quality. A small pile of low sold at 1¾d to 2d. 12 cases Java realized 7d to 7¾d per lb. 200 bales mostly very, from Calcutta, 42s. 11 cases cassia lignea were taken in at 7½ per cwt. 250 bags pimento were mostly bought in, the market being quiet. Nutmegs and mace firm at the late advance. 738 cases Canton ginger sold at steady prices. Part ungarbled, sound, small, and middling, 40s to 42s; good middling to good fine, 60s to 81s; one lot fine, 100s; mostly 41s to 55s. 182 barrels Jamaica sold steadily: low and ordinary, 42s to 49s; good ordinary to bold, 54s to 81s; and one cask very fine 100s per cwt.

Saffron.—The market is very firm, and there are limited supplies offered from Calcutta. 100 bales have sold to arrive at 28s 6d to 28s 9d, usual terms. On the spot, extremely dear, at 29s per cwt.

Imports and Deliveries of Saffron to Aug. 12, with Stocks on hand.

	1871.	1870.	1869.	1868.
Imported ... bales	7,750 ...	7,000 ...	6,000 ...	4,000

Stock ...	900 ...	2,000 ...	4,000 ...	5,000

Imported last week 1,000.

Dyeing and Drugging Goods.—Business has been done in Bengal Turmeric at 11s 6d. A portion of 3,661 bags by auction sold at that price. Some parcels are reported for arrival at 10s to 10s 1½d, mostly the former being rather lower than before. No change in catch, and the market remains rather quiet. 41 bales Bengal safflower were bought in and there is very little business passing by private contract. Sales of gamboge have been made at 10s 4½d to 10s 6d per cwt on the spot, and the market is firm.

Shellac.—198 cases sold at last week's prices. Second orange, 6l 15s to 6l 17s 6d; garnet, 6l 15s to 6l per cwt.

Metals.—There has not been any activity in these markets, but prices have experienced little alteration. Foreign tin has continued speculative. Straits selling as low as 124l cash. Yesterday holders were less disposed to sell, and 126l 10s was the nearest value. English is rather lower, although prices have not been officially reduced. The market for Scotch pig has fluctuated. At one time during the week 60s 3d to 60s cash was paid. It subsequently fell to 60s 1½d, with a good business, and closes quiet at 61s 9d to 62s. Rods are very firm at quoted prices. Quicksilver has advanced to 9l 10s per bottle. Lead is rather more in demand. Copper does not quite support its previous value. Chili bars 4s. 6d. 67l 10s to 68l 10s. Other kinds are nominally unchanged. Siberian spelter has sold at 18l 5s ex ship, but is to-day somewhat lowered. Sheet zinc by auction sold at 22l to 22l 2s 6d per ton for Belgian rolled.

Hemp.—At the public sales of Manila, the sound portion of 3,872 bales was taken in at prices varying from 40l to 41l for ordinary to good. The sea-damaged portion sold at 37l 10s to 38l 10s. Permanent, two to good shipping has been disposed of at 44l to 46l 10s. Sisal leaves Sunn partly lower buyers at 24l 10s. Petersburg clean, 32l per ton.

Jute.—A moderate extent of business has been done, chiefly to arrive, at about former rates and the market is less depressed than last week. Wines an extensive heavy quantity was offered by auction. Both pure and mixed have been rather quiet in Dundee.

Linseed.—The market remains quiet. Calcutta, 62s 6d to 63s. July to August has sold on the 61. Bombay quoted 63s 6d. A large Black Sea, of the coast, 59s 6d. Azov autumn shipment, 57s to 57s 6d per quarter.

Tallow.—Sales of common kinds of candy have been effected at further advanced rates. Mangalore and Candle, 46l to 46l 10s. Composite sold to 52l. Sperm is dull. Cocoanut has sold at 44l per ton. Common kinds are neglected. Palm sold, 32l per ton. Linseed oil is steady at 30l 10s to 31l 10s on the spot. Rape oil was at one time dull, but is now firmer for English brown, viz. 41l 10s to 42l 10s, and is more part to the end of the year. There has been a general demand for cocoanut, Ceylon 33l to 34l 10s; buyers for arrival at 32l ton. Cotton seeds, and prices run out of proportion. Palm without change. Fine Lagos, 37l to 37l 10s per ton.

Turpentine.—American, 37s 6d per cwt, and the market quiet.

Petroleum quiet. American refined, 1s 5¾d to 1s 5¾d. Sales for delivery at 1s 5¼d to 1s 5¾d per gallon.

Tallow.—The usual weekly supply of about 1,800 to 2,000 casks Australian will be brought to auction this day, and foreign remains quiet. Prices of the latter have not varied at all. Petersburg now, 44s; October to December, 43s 3d per cwt.

POSTSCRIPT. Friday Evening.

Sugar.—The market closes with at further change, and is rather quiet. 133 casks West Indian sold to-day, making 2,476 casks for the week. Barbadoes by auction, part sold on former terms. 7,309 bags Java were taken in at 21s 6d for low brown. 700 bags brown Mauritius were taken in also. 450 bags Bengal, at 32s to 34s, for grey Gurpaus. 128 bags fine white Penang sold at 36s. Privately a parcel of garnyard Manila at 29s 6d. A floating cargo of West India for the United Kingdom, at 26s 3d per cwt.

Coffee.—891 casks 153 barrels and bags plantation Ceylon sold at full prices. 312 casks 5,355 bags East India part sold at the previous value. Native kinds of the latter were chiefly bought in at advanced rates. 249 packages Mocha were taken in.

Rice.—A floating cargo of Bassein has sold at 9s 4½d, ex ship, for London.

Black Pepper continues active. Singapore and Penang on the spot at previous rates. The former to arrive at 5¾d to 6d, and 6¾d per lb Singapore.

Saltpetre is in better demand, and a steady business, of which particulars do not transpire.

Shellac.—Of 357 chests about 260 sold at full rates, including fine orange at 7l 7s 6d; native ditto, 6l 12s 6d per cwt.

Safflower.—76 bales Bengal, part sold at 7l to 10l 17s 6d per cwt.

Oil.—86 casks Ceylon cocoa-nut were bought in. 312 casks Sydney taken in at 37s to 39s, and low quality sold at 31s to 35s per cwt.

Tallow.—Petersburg unaltered. 1,803 casks Australian by auction sold at 37s 6d to 42s 6d beef, and 43s to 44s per cwt mutton, being rather cheaper in some instances.

ADDITIONAL NOTICES.

English Wool.—The upward tendency still continues.

Colonial Wool.—Market very firm; holders generally disinclined to sell.

Flax.—Some sales of Egyptian, but good qualities very scarce.

Hemp.—Russian quiet. Manila very firm but little offering; a considerable business done this week both on the spot and to arrive.

Silk.—Market very flat, scarcely any sales; but prices maintained for China silk

Tobacco.—We have another very quiet week to report in the market for North American tobacco. Scarcely a transaction has been entered into, and there has also been an absence of the usual small purchasers in the market. Prices for all descriptions are unchanged; holders are firm for good to fine classes. In substitutes and segar tobacco there has been a moderate business done.

Leather.—There was again a very moderate supply of leather at Leadenhall, and the tendency to advanced rates for English sole leather continued. Light butts are still the most wanted, but nearly all weights have commanded an advance of ½d per lb. Good English shoulders, common dressing hides, light shaved hides, calf skins, and horse hides also find ready buyers at full rates.

Metals.—Dulness continues to prevail in the metal market. Copper is very quiet, but holders do not give way in price. Spelter is very dull. Tin partakes of the general quietness, and quotations are very irregular. Tin plates are still in good demand.

METROPOLITAN CATTLE MARKET.

Monday, August 14.—The total imports of foreign stock into London last week amounted to 19,269 head. In the corresponding week in 1870, we received 12,075, in 1869, 19,679; in 1868, 14,308; and in 1867, 12,940 head.

There has been a very short supply of English stock on sale here to-day, but the arrivals from abroad have been very liberal. Really prime steers have been scarce and dear. Only 6 head have come to hand from Aberdeen, and they have been disposed of at fully 6s per 8 lbs. Shorthorns and other Long breeds have experienced a fair inquiry, the top price being 5s 10d to 6s per 8 lbs. Foreign stock has sold At 5s 2d to 5s 6d per 8 lbs. About an average supply of sheep was in the pens. Although not active, the trade was steady on the whole, and the best Downs and mid-reds were disposed of at 6s 8d to 6s 10d per 8 lbs. Lambs have changed hands quietly at from 6s 6d to 8s per 8 lbs. Calves and pigs met a slow sale on former terms.

HOP MARKET.

BOROUGH, Friday, Aug. 18.—Business in this market has been transacted to a limited extent, but prices have remained firm. The bine has shown no materal improvement. Mid and East Kents, 60s to 147s; Weald of Kent, 60s to 105s; Sussex, 60s to 100s; Farnham and country, 90s to 120s; and olds, 20s to 30s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Aug. 18.—The supply of potatoes has been only moderate. The trade has been quiet, but firm. Regents, 70s to 85s; Kidneys, 60s to 75s; and Shaws, 40s to 55s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, August 18.—There has again been a very fair amount of business done this week at exceedingly firm rates, whilst public sales of several thousand bales, chiefly from Mediterranean ports, will be held here on the 23rd and 24th instant.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Aug. 18.—This market was well attended to-day, and millers took fine qualities of red wheat to a fair extent, at an advance of 1d per cental over last Tuesday's rates. Other descriptions made full prices. Flour was unchanged. Indian corn was in good demand at a reduction of 3d per quarter. Saidi beans, 32s to 32s 6d; mixed beans, 31s 6d to 31s 9d; peas, 40s; oats, 3s 6d to 3s. Round cut oatmeal, 29s to 29s 6d; fine cut oatmeal, 30s to 30s 6d. Indian corn, 30s 3d.

WAKEFIELD, Friday, Aug. 18.—At this market to-day, owing to the unsettled weather, old wheat is held firmly for last Friday's prices, but millers buy sparingly. Few parcels of new wheat are on offer, and those ready for prompt delivery meet a fair sale at relatively high prices. Another report says it requires something far stronger than wet, or the reported deficient yield, to excite buyers. The market is firm.

The Gazette.

TUESDAY, August 15.

BANKRUPTS.

Alfred Mills, Southampton street, Pentonville, telescope maker.
Thomas Francis Richards, Falcon court, Fleet street, solicitor.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—
"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

JOSEPH GILLOTT'S STEEL PENS.

SOLD BY ALL DEALERS THROUGHOUT THE WORLD.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER

TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often hurtful in its effects, is here avoided, a soft bandage being worn round the body, while the requisite resisting power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and closeness that it cannot be detected, and may be worn during sleep. A descriptive circular may be had, and the Truss (which cannot fail to fit) forwarded by post, on the circumference of the body two inches below the hips being sent to the Manufacturer.

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s 21s, 26s 6d, and 31s 6d postage, 1s. Double ditto, 31s 6d, 42s, and 52s 6d; postage, 1s 8d. Umbilical ditto, 42s and 52s 6d; postage 1s 10d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS &c

They are porous, light in texture and inexpensive and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, 10s, and 16s each; postage, 6d.
WHITE, MANUFACTURER, 228 Piccadilly, London.

BANK OF BOMBAY.

IN LIQUIDATION.

Notice is hereby given, that an Extraordinary General Meeting of the Proprietors of the Bank of Bombay (in Liquidation) will be held at the Offices of the New Bank of Bombay (Limited), in Elphinstone Circle, Bombay, on Monday, the second day of October, one thousand eight hundred and seventy-one, at Three o'clock in the afternoon, for the following purposes:—

First. To consider and determine as to the propriety of forthwith completing the Liquidation of the Bank, and distributing the surplus assets thereof, and dissolving the Bank according to the provisions of Section XCV. (subsections 10 and 11) of Act XIX. of 1857, of the Legislative Council of India.

Second. To consider and determine on the course to be adopted in order to provide for the debts and liabilities of the Bank now still outstanding, the nominal amount of which is Rupees two hundred and six thousand five hundred and forty, Annas ten, and Pies nine, according to the particulars stated below, out of which sum of Rupees two hundred and six thousand five hundred and forty, Annas ten, and Pies nine, it is, however, estimated that not more than Rupees fifty-one thousand six hundred and thirty-five will be established as payable.

Third.—To consider and decide as to the adoption of a scheme, whereby, in order to facilitate the dissolution of the Bank and to provide for the said outstanding debts and liabilities, it is proposed that the sum of Rupees sixty-one thousand six hundred and thirty-five shall be placed in the hands of two or more Trustees, to be nominated or approved of by the proprietors at the meeting, Rupees fifty-one thousand six hundred and thirty-five thereof being contributed by the Bank, and Rupees ten thousand, the remainder thereof, being contributed by Mr William Rodgie (the Liquidator of the Bank) upon trust, that the said Trustees shall out of the said sum of Rupees sixty-one thousand six hundred and thirty-five pay all claims in respect of the said outstanding debts and liabilities of the Bank which shall be satisfactorily established before the thirteenth January, one thousand eight hundred and seventy-four; and that the said Trustees shall after the said day stand possessed of the balance of the said sum of Rupees sixty-one thousand six hundred and thirty-five then remaining in their hands (if any) in trust for the said Mr William Rodgie, subject to any claim in respect of the said debts and liabilities which shall have been made before that time, and that the said Mr William Rodgie shall enter into covenants with the Bank and the Trustees for the payment by him of all claims in respect of the said outstanding debts and liabilities of the Bank which the sum of Rupees sixty-one thousand six hundred and thirty-five proved to be placed in the hands of the Trustees shall not be sufficient to pay, and also for the indemnification by him of the Bank and the proprietors and the Trustees from all responsibility in respect of the said outstanding debts and liabilities of the Bank. Copies of the Deed by which it is proposed to carry the above scheme into execution (in case the same shall be approved by the proprietors) may be seen at the Office of Messrs Rudnick, Hore and Langley, Solicitors to the Bank, at Apollo street Bombay and at the Offices of L. M. Hore, Esquire, 82 Lincoln's Inn fields, London.

Schedule of outstanding debts and liabilities on twenty-third June, one thousand eight hundred and seventy-one:—

OXYGENATED WATER HOLDS IN

Solution pure Oxygen Gas, the vital element that sustains life. It is a decided tonic and alterative Draught, and from its special action on food during the process of digestion and assimilation is peculiarly suitable for Invalids. Price 4s per dozen half pints.

Laboratory, 26 Long Acre, and all Druggists.

HOLLOWAY'S PILLS.—

Want of Life—Derangement of the liver is one of the most efficient causes of dangerous diseases, and the most powerful of those fascinating tasteless which are worse than death itself. A few doses of these pills purify the blood, restore its impelling low spirits, and repel the over-whelming malaise so distressing to experience that improves atmosphere over indulgence, or extraordinary excitement. The most effectual consolation may be obtained from Holloway's pills, which will regulate the disordered action, however, to increase the energies of the intestinal digestive and restore the failing powers. By scrupulously observing the instructions for taking these pills, and obediently putting them in practice, the most despondent will soon feel confident of a perfect recovery.

SECRETARY—Charles Eley, Esq.

OFFICES—5 Westminster chambers, Victoria street, Westminster, S.W.

ABRIDGED PROSPECTUS.

"The West Surrey Water Act, 1869," secures to the Incorporated Company the exclusive right of supplying the populous and increasing districts of Chertsey, Walton-on-Thames, Hersham, Oatlands Park, Weybridge, Cobham, Byfleet, and Shepperton, with water.

The objects of the undertaking may be briefly stated as follows, viz.:—

To supply the district with water taken from the river Thames near Walton bridge, where it will be passed through filter beds, pumped into the mains, and conveyed to a reservoir to be constructed on St George's Hill, near Oatlands Park, an altitude of upwards of 200 feet above the level of the river.

To give a constant supply, the works being so arranged that the service pipes and use can will always be charged, the reservoir supplying the service pipes when the pumps are not at work.

A provisional agreement has been entered into with the well-known firm of Messrs Dewrea and Simpson to execute these works for the sum of £24,250, and the land required can be obtained upon favourable terms.

The district contains houses of an annual value exceeding £70,000 constantly being increased by building operations; there are in addition, railway stations, breweries, and other large consumers, all of which will become customers with great advantage to themselves and profit to the Company.

One-half of the authorised share capital has already been subscribed, the remainder, £12,500, is now offered to the public.

The dividends paid by existing Water Companies afford the best evidence of the remunerative return which may be realised upon capital invested in such undertakings, and few have been started with better prospects of success than this one. The following is the present market price of the shares of some of the leading Water Companies (ex dividend), which has just been paid:—

	£		£

SECRETARY—Mr Joseph W. Marshall.

OFFICES—17 Gracechurch street, London, E.C.

PARTICULARS OF ISSUE.

The Directors of the Welsh Ironworks Company (Limited) are prepared to receive applications for 1,500 Perpetual 10 per Cent. Preference Shares of £50 each, which are entitled to dividend in preference and priority to any dividend on the ordinary share capital of the Company, with a further right to participate in the surplus profits, after 10 per cent. per annum has been paid on the ordinary shares capital.

The price of issue of the preference shares—now offered for subscription—is par, namely, £50 for each preference share, payable at the dates before mentioned, or, at the option of the subscribers, the whole amount may be paid up on allotment.

Until the preference shares are fully paid up, dividend will accrue on each instalment from the date of payment of the same; or if they are fully paid up on allotment, the preferential dividend at 10 per cent. per annum will accrue on the full £50, payable half-yearly out of the profits, which, as hereinafter shown, are estimated equal to £48,000 per annum, or about 39 per cent. on the entire capital.

The above 1,500 preference shares constitute the whole of the preference share capital of the Company, and no dividend can be paid on the ordinary share capital until 10 per cent. has, in each year, been duly paid upon the preference shares. When the ordinary shares have received 10 per cent., all surplus profits will be divisible rateable between the preference and ordinary shareholders.

Scrip certificates will be issued on allotment, exchangeable for share certificates when fully paid up.

The allotment of the preference shares will take place in the following order:—

First. To persons who desire to pay up in full on allotment for investment.

Second. The applications of persons who desire to pay up by instalments will be next considered.

Should the whole amount of the preference shares be applied for by persons desiring to pay up in full on allotment, no issue will be made to applicants wishing to pay up by instalments.

If no allotment be made the deposit will be returned in full, forthwith, without deduction.

The reports on the properties of the Company, the agreements for purchase, and also the articles of association, can be seen at the Offices of the Solicitors.

Applications must be made in the annexed form, and be accompanied by a remittance of £5 for each preference share applied for, which may be forwarded to either of the Bankers of the Company, or to the Secretary at the Company's Offices.

Offices—17 Gracechurch street, E.C.,
London, 5th August, 1871.

1. The Company is formed to acquire, under leases and agreements, to carry on and develop, the following important and well-known Ironworks and Hematite Iron Ore Mines, and the other privileges stated, namely:—

1. The Aberdare Smelting Furnaces and Iron Works situate near Aberdare, South Wales, formerly carried on by Mr Francis Crawshay, the eminent ironmaster.
2. The right of working the native ironstone on the Bute estate, comprising over 4,000 acres.
3. The Pawton Hematite Iron Mines, formerly worked and the ore smelted by the Blaina Ironworks.
4. The Brixham Hematite Iron Ore Mine.
5. The Smallacombe Hematite Iron Ore Mine.
6. The Laiock Hematite Iron Ore Mine.
7. The Coal for the use of the Ironworks and the native Ironstone is to be supplied to the works under an agreement entered into at 6d per ton only above the actual cost price.
8. Agreements already entered into with two Iron Ore Companies for the supply to the Ironworks of Hematite Iron Ore.

2. An agreement has been entered into, dated the third day of August, 1871, under which the mines and works are obtained in consideration of an allotment of the ordinary shares of the Company, and the payment of fifty thousand pounds in money, the remaining capital of £25,000 being considered more than ample for the business purposes of the Company.

3. Considering these favourable features, the great and improving prospects of the iron trade, and that the total estimated profits amount to about £48,000, being £32,000 from the pig and manufactured iron, and £16,000 from the iron ore, a sum equal to 39 per cent. on the entire capital, the preference shares, which would but absorb an annual fixed sum of £7,500, may be regarded as a safe and desirable investment. They will, as before stated, participate in all divisions of profits rateably with the ordinary shares, after payment, first of 10 per cent. on the preference shares, and second, of that amount on the ordinary shares.

4. Prospectuses and forms of application for shares may be obtained on application to the Bankers, Solicitors, or Secretary, at the Company's Offices.

London, August 5th, 1871.

FORM OF APPLICATION.
(To be returned by the Bankers.)
To the Directors of the Welsh Ironworks Company (Limited).

Gentlemen,—Having paid to your credit at your Bankers the sum of pounds, being £5 per share on my application for preference shares of £50 each, bearing 10 per cent. preferential dividend, of the Welsh Ironworks Company (Limited), I request you to allot to me that or any less number of the said preference shares, and I hereby agree to accept the same, and to pay the balance in respect of such preference shares in the terms of the prospectus, dated the 5th day of August, 1871.

Name (in full).....
Address.....
Profession (if any) .....
Date .....1871.
Signature .....

(Addition to be signed by Applicant desiring to pay up all the Instalments on Allotment.)

I desire to pay up my subscription in full on Allotment, thereby entitling me to Priority in the Allotment.
Signature .....

WORCESTER, BROMYARD, AND LEOMINSTER RAILWAY COMPANY.

To be worked under Agreement by the Great Western Railway Company.

Issue of £48,000 Five per Cent. First Debenture Stock, being a First Charge upon the Gross Receipts of the First Section of the Line.

DIRECTORS.

CHAIRMAN—John Wheeley Lea, Worcester.
Edward Bickerton Evans, Whitbourne Hall, Deputy-Chairman.
Francis L. Bodenham, Hereford.
William Finney, 3 Lancaster street, Hyde park.
Thomas Rowley Hill, Worcester.
Alexander Clunes Sherriff, M.P., Perdiswell Hall, Worcester.
Josiah Stallard, Worcester.

The Worcester, Bromyard, and Leominster line is divided into three sections:—

1st. Bransford, near Worcester, on the Great Western Railway, to Yearsett.
2nd. Yearsett to Bromyard.
3rd. Bromyard to Leominster, forming there a junction with the Leominster and Kington Railway.

By an agreement dated 12th November, 1870, between the Worcester, Bromyard, and Leominster Railway Company and the Great Western Railway Company, the latter Company undertakes to work the line in perpetuity, finding rolling-stock, and keeping the line in complete repair, for a charge of 52½ per cent. of the gross earnings.

The agreement, however, specially provides that the interest on the Debenture Stock now issued shall be a charge, not on the net earnings, as is usually the case, but a "first charge on the gross tolls, fares, rates, and charges" of the first section.

The Worcester, Bromyard, and Leominster Railway, passing through a rich agricultural and mineral district, and being advantageously placed between two great lines in full operation, will necessarily command a large traffic. The average earnings of the English lines for the week ending 8th July last were £66 per mile; but, owing to the unusually advantageous conditions of the working agreement concluded with the Great Western Railway Company, a gross receipt of only £7 per mile per week will suffice to pay the interest on the Debenture Stock now offered for subscription.

London, August 9, 1871.

Messrs FIELD, WOOD, and HAYNES are authorised by the Directors of the Worcester, Bromyard, and Leominster Railway Company to receive APPLICATIONS for the sum of £48,000 FIRST DEBENTURE STOCK, bearing Interest at 5 per Cent., payable half-yearly on 1st January and 1st July.

The payments to be made as follows, viz:—

£10 on Application.
15 on Allotment.
25 on 1st October, 1871.
50 on 1st November, 1871.

£100

Discount at the rate of 4 per cent. per annum will be allowed on all amounts paid in anticipation of the payments above fixed.

Interest will run on the whole amount of £100 stock from 1st July last.

Provisional certificates of payment will be issued in exchange for the Bankers' receipts, to be substituted, when fully paid up, for debenture stock certificates of the Company, free of all stamp duty.

In making the allotment, preference will be given to applicants paying up in full.

Application must be accompanied by a deposit of £10 per cent. on the amount applied for, which must be paid to Messrs Glyn, Mills, Currie, and Co., 67 Lombard street.

Prospectuses and forms of application may be obtained from Messrs Field, Wood, and Haynes, Stockbrokers, 9 Warnford court, London, E.C., or from the Secretary of the Company.

DINNEFORD'S FLUID MAGNESIA.—The medical profession for [illegible] years have approved of this pure solution of Magnesia as the best remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as the best mild aperient for delicate constitutions, especially adapted for ladies, clergymen, and infants.

DINNEFORD and CO., Chemists, 172 New Bond-street, London and of all other chemists throughout the world.

75,000,000 DOLLARS UNITED STATES GOVERNMENT FIVE PER CENT. FUNDED LOAN.

IN BONDS ISSUED AND PAYABLE, PRINCIPAL AND INTEREST, IN THE UNITED STATES OF AMERICA.

Principal redeemable at par, after 1st May, 1881, in United States Gold Coin; Interest payable Quarterly, in United States Gold Coin, and both Principal and Interest exempt from taxation whether under Federal, State, Municipal, or Local Authority,

AS AUTHORISED BY ACTS OF CONGRESS, APPROVED JULY 14TH, 1870, AND JANUARY 20TH, 1871.

The Proceeds of this operation are to be applied to the Redemption and Cancellation of United States Five-Twenty Bonds, as provided in said Acts.

Messrs JAY COOKE, McCULLOCH, and Co. are prepared to receive offers, either in exchange, for Five-Twenty Bonds, at present in circulation, or for cash, on account of the above said $75,000,000 Five per Cent. Bonds of the existing Funded Loan of the United States.

The amount of Bonds of the 5 per Cent. Funded Loan, authorised by Congress, is $500,000,000.

Of this amount—

$75,000,000, or thereabouts, have been already placed in America,
$50,000,000 are reserved for the National Banks there,
$75,000,000 are now offered,
and the remaining $300,000,000, together with the Bonds bearing 4½ per cent. and 4 per cent. interest, are reserved by the Secretary of the Treasury for future disposal.

Total $500,000,000

The Bonds, to bearer, with Coupons attached, are in denominations of $50, $100, $500, and $1,000. The Registered Bonds are in like amounts, with the addition of denominations of $5,000 and $10,000. Interest, payable quarterly, will commence from 1st November next, the first interest payment being February 1st, 1872.

The Bonds may, at the option of the holder, be registered, and the United States Treasury Cheques, for dividends thereon, will be sent from Washington to the registered address of the holder in any part of Europe, on the principle adopted by the Bank of England in paying the interest on British Consols. For the convenience of applicants an Officer of the United States Treasury will remain for some time in London, and will inscribe the Registered Bonds directly into the names of purchasers.

Applications for the above Bonds, *in exchange for existing Five-Twenty Bonds*, will be effected on the following conditions in the accompanying Form A.

Holders of Five-Twenty Bonds, bearing May and November interest Coupons, will retain the Coupon due 1st November next, and will receive in exchange Bonds of the Five per Cent. Funded Loan of equal amount, ex November Coupon.

Holders of Five-Twenty Bonds, bearing January and July interest Coupons, will be paid the interest from 1st July last to 1st November, at Six per cent., or £2 0s 10d per Bond of Five Hundred dollars, and will receive in exchange Bonds of the Five per Cent. Funded Loan of equal amount, ex November Coupon.

A *deposit* of 5 per cent. will be required, which may be made in cash, or in any United States Government Security, which will be returned on effecting the exchange.

Applications for *Bonds by cash payment* will be received on following conditions in the accompanying Form B:—

			£ s d	
Deposit on application	5 per cent., or		5 12 6	per Bond of $500.
Payment on 1st Dec. next,	86	—	96 15 0	—
	91	—	*102 7 6	
Plus one month's interest at 5 per cent., being that accrued from 1st November to 1st December (to be paid in Sterling) =			0 8 8	—
Total Cash			102 16 2	—

* Exchange 4s 6d per dollar.

Such United States Government Bonds as shall have been notified for redemption, and matured United States Government Gold Coupons, will be received as cash, dollar for dollar, except that the month's accrued interest must be paid in Sterling as above said. The *deposit* may be temporarily made in any United States Government Security.

Provisional Receipts (Scrip) will be given for the Deposit. The Bonds of the Funded Loan (which are issued in the United States), will be furnished in London at an early date against corresponding amount of Five-Twenty Bonds or payment in full. Cash payment in full may be made on 31st August only, under discount, at Bank of England rate.

Should the application for Bonds not be complied with, the deposit of the applicant will be returned forthwith.

Non-payment of the balance due will render the deposit liable to forfeiture.

Lists will be opened in London, and in the principal Cities on the Continent, on Tuesday, the 22nd inst., and will be closed on or before Thursday, the 24th inst.

Applications will be received in London on the accompanying forms, which may be obtained at the Banking-house of Messrs Jay Cooke, McCulloch, and Co.

A Bond and the Acts of Congress above referred to may be inspected at the Office of Messrs W. and H. P. Sharp, 92 Gresham House, Old Broad street, London.

41 Lombard street, London, August 19th, 1871.

FORM A. No.———

Advertisements for the next Number, to be published on September 30, must be sent to insure insertion on or before September 28.

OFFICE—340 Strand.

THE TEACHINGS OF THE LAST SESSION NOT ON PARTY BUT ON BUSINESS.

Everyone admits that the last Session did not produce the fruits expected from it. At the beginning it was said that "just as in the two past Sessions great things had been done for Ireland, so now in this Session great things would be done for England and something would be done for Scotland." But it cannot be said that this hope has been confirmed. We do not say that nothing has been done; it would be most untrue to say so. Still not nearly so much has been done as was expected; and as is natural, much personal discussion has arisen. Some blame the Government, some the Opposition, some the proposers of the Ballot Bill, some the opponents of the Army Bill. But we do not propose to engage in this controversy, which is tedious and complex, and of which the world has had enough. We wish, if we can, to set down some few lessons which concern the *business* of the country, and the means of transacting it, which may be more or less accepted by moderate members of both political parties, and by those who take either side in the personal discussions, so long as they take it fairly.

First. The rules of the House of Commons must be modified so as to permit more business to be transacted, and to allow of what is transacted being done better and more carefully. The mode in which the smaller Bills have this year been passed through Parliament—the haste with which they were often run through—the chance, it often was, whether great mistakes were made or not—was scandalous. The "Estimates" were even worse treated: millions of money were voted at a period of the year, at a time of night, and in a degree of temperature when criticism was impossible, and when the House was too tired to transact well even the most unimportant business. No one can have any confidence in any of the minor work done this year. For years perhaps the Judges may sneer and wonder at the want of necessary clauses in some Acts of Parliament, and at the gross inconsistency in the clauses of others. If great blunders have not been made it must be by miracle, for the way in which legislation was obliged to be done if it was to be done at all was almost sure to manufacture blunders. And the quantity of work not done is as immense as the quality of that done is dubious. Rules of business which do not prevent this state of things plainly need revision.

A priori indeed it is likely that the rules of the House of Commons should need change. They have been substantially unaltered for many years, and during those years the work of the Commons has enormously augmented, and their position in the Constitution has vitally changed. The outline of those rules was sketched when the House of Commons met but seldom, when little business came before it, when it was a secondary power in the country, when its principal function were to check and to advise the Crown. But now the House of Commons interferes in everything, decides everything, rules everything. It appoints the Cabinet, which is our real executive power; it removes that Cabinet when it thinks fit. Like all unchecked sovereign bodies, it grows more and more absolute every year. Nothing can be done without its leave—still less can anything be done which it forbids. On two accounts therefore the rules of the Commons ought to be changed. First, because the rules fit to transact a little work occasionally are presumably not those best suited to transact regularly a great deal of work; and secondly, because the kind of work has changed. When the primary function of the Commons was to state grievances and correct administration, single, impulsive, adventurous members were those most likely to be characteristically useful. The mass of ordinary, sensible men might be too timid for such work. But now that the regular function of Parliament is to transact regular business, the utility of the two classes of members is reversed. The quiet, transacting man is now more likely to be of use than the eager, objecting man. In old times it was primarily expedient to multiply the rights of vehement minorities, for

these were the people most fit to arouse the country and check the Crown; but now it is primarily expedient to multiply the rights of the steady majority, for it is that majority which in the main governs us and transacts our business. The power of the minority should not be wholly destroyed, because it is still sometimes useful, but it should be limited; but the coercive authority of the majority should be much increased, because it is now principally important.

The change in the structure of Parliament makes this change in its rules even more necessary. After the Reform Act of 1832 it were found necessary to deprive private members of what was then their most effective weapon. In the old Parliament Sir Francis Burdett, or any other member, could on any evening present a petition, make a speech, raise a debate, and occupy the whole night. And when the members for popular constituencies were a small and feeble minority, it was probably wise to strengthen their faculty of interruption at every risk. But after 1832, when the power of the people became greater and the work grew greater too, the right of private members to derange all business at pleasure was soon perceived to be now as mischievous as it had before been useful. It was abolished, and though fifty years ago it was the most effectual of popular rights, only antiquarians now remember anything about it. Still less after the Act of 1867 is it necessary to strengthen the hands of popular representatives against a majority not appointed by the people; on the contrary, it is the majority which now represents the people, and therefore, though the minority has the right to be heard (and the greatest care should be taken that it may be effectually heard), it has no right to rule, and those practices of Parliament are bad which enable it to rule.

But—secondly,—the amendment of the rules of Parliament is only one of the improvements which will render the action of Parliament easier and more productive. We must provide not only that the wheels of the mill should work well, but that only good things should be put into the mill. And for that purpose the first condition is that, as a rule (and exceptional circumstances apart), only one first-class measure of contentious politics should be introduced in each Session by the Government. In each of the last two years that rule has been infringed by the Government. We do not say or imply that they have done wrong—it would be inconsistent with the purpose of this article to discuss whether they have been right or wrong. But unquestionably the effect has been that all minor measures—all measures beyond the region of party politics—are to a most unusual extent suspended. We could crowd a very long sentence with the list of measures begun but discontinued, and there are measures which the Government are known to have much at heart, but which they have never had a chance of beginning at all. There is only at the disposal of the conductors of public business a certain limited capacity of labour, a certain limited time, a certain limited earnestness. Only a certain amount of work can be obtained from Parliament. What is added to one kind of work is taken from another. If you wish, or if you are obliged, to augment in any Session the party-work of Parliament, infallibly you will diminish the non-party work. In general, we venture to say that one great political measure is as much as Parliament can effectually pass—perhaps as much as the country can attend to. To attempt more is to cause a vexatious but most important arrear of minor work.

Thirdly. Not only must a Government not attempt too much first-class and political work in any Session, but they should carefully limit and define the secondary and non-political work which each year they will undertake. And this is more difficult than is commonly understood. Not only is there rivalry between various sections of the nation, each wishing for a Bill on its own subject and not caring in the least about other subjects, but there is a rivalry—at least a friendly competition—among Cabinet Ministers themselves. Each wishes (as we have heard it said) for a good *innings* for himself, and is apt to covet the time given to the Bills of a colleague, who is perhaps a rival too. Accordingly it is not easy for a Cabinet or for a Premier to adjust the precedence among so many claims. If six Ministers each want the reins of Parliament, it is not easy to settle which of the six shall or shall not be refused. But there is unhappily a most easy course, which is very dangerous. The Cabinet may decide to bring in all the Bills, and to let the public and the House of Commons see which they think most important, and which they would prefer to pass, and the almost inevitable consequence is that few or any will pass. All the omnibuses (to use Mr Bright's metaphor) will be jammed at Temple Bar. Several subjects will have been half discussed; on several the public will have formed an incipient judgment, but on no one will there have been a conclusive discussion; on none will public opinion be really mature; on none can we act with an assurance that we are doing our best, and that we shall not need to legislate again on the subject till a new experience has accumulated, or till circumstances change. And till that settled decision has been formed it is dangerous to legislate at all, for else we shall need an almost annual series of amending Acts, which blot the Statute Book, and injure all concerned.

Lastly, it is a great misfortune that we should have two Houses of Parliament as now, and yet only be able to begin measures in one of them. If the two Houses worked as they ought to work many Bills might be first introduced in the Upper House, and after good discussion they might go down to the Lower revised and perfected. But as the relations between the two Houses now stand, for the most part nothing is gained by introducing a really important Bill first into the Lords. The Commons look with much suspicion on the Lords' amendments. The Government thinks probably that they are mistakes, and that its own unamended Bill was better. Those amendments are mostly struck out, and the Bill returned to the Lords, who having before taken much pains to alter it naturally think it was best as they altered it. In the end the Bill falls through, and has to be again begun in the Commons next year, or when opportunity serves it better. This is not the fault either of any Minister or of either House; it is the fault of the Constitution, which has coupled together two opposing Houses, the stronger of which has to speak first, or else there is little chance of the two agreeing to anything interesting.

These four things lie, we are persuaded, at the root of the present bad state of public business, and it is mainly by attending to them and improving them that in the long run the essential state of that business can be permanently made better.

THE RECENT RAILWAY REPORTS.

Some weeks since, at the close of the railway half-year, we pointed out various reasons for expecting a remarkable addition to the dividends of the leading lines as compared with the corresponding half-year of 1870. Not only had the traffic increased at a somewhat higher rate than in the previous half-year, which had nevertheless proved exceedingly profitable, but the increase being to a very considerable extent in passengers was likely to prove more beneficial to shareholders than an increase confined to goods. Most of the lines were likewise gaining by the gradual substitution of debenture stocks for their terminable loans at a lower rate of interest. The very fact too that railway business had been improving for some time was sure to make the latest increase the most profitable. The difficulties of adverse times had left numerous arrears to clear off, absorbing a large part of the earlier improvements; but as the period of prosperity continues, the increase to the business becomes more and more a pure gain. The reports of most of the principal companies have now been issued, and they amply confirm our anticipations.

To show this, we subjoin a series of tables analysing the figures of twelve companies, including all the principal ones which have reported, excepting the South-Eastern, which has changed the date of making up its accounts.* Very little need be said by way of explanation.

The net result, as shown by our last table, comes to this—that the amount divided among the ordinary shareholders of the companies referred to for the first half year of 1871 is an increase upon the corresponding half-year of 1870 at the rate of 13s 2d per cent. per annum. Altogether the

* Since the above was written the Great Western report has appeared.

ordinary capital in these twelve companies amounts to about 122,000,000*l*, having increased by less than 2,000,000*l* in the twelvemonth; but whereas the amount divided for the first half of 1870 was 2,861,000*l* it has now been 3,288,000*l*—an increase of 427,000*l*, or about 14·9 per cent. on the amount formerly paid. Thus while the average dividend for the first half of 1870 was at the rate of 4*l* 13*s* per cent. per annum, it is now at the rate of 5*l* 8*s* 2*d* per cent. This is very nearly an increase at the rate of ½ per cent. per annum on the average, and must be considered very striking when the immense mass of the property affected is considered. The increase is at a much greater rate than in the preceding half-year, as the following comparison will show* :—

	Amount Divided. £	£
2nd half-year 1870	[illegible]	
— 1869	2,861,000	
Increase		300,000
	£	
1st half-year, 1871	3,288,000	
— 1870	2,861,000	
Increase		427,000
Excess of increase in last over increase in preceding half-year		127,000

Thus although the first half of the year is one of smaller business than the second, yet the addition to the profit of the business in the first half of 1871 is greater than the addition **in the second half of 1870. The difference is very nearly** equal to ¼ per cent., the increase in the second half of 1870 **having only been 8s 7d per cent., whereas it is now 13s 2d.**

These figures amply prove, we think, that the profit of railway business has been increasing during the last twelvemonth at an accelerating rate, that in some way or other the expectation of a very profitable half-year has been made good. It will be interesting therefore to trace out the improvement, and show how it has been made.

1. There is no doubt that the mere increase of traffic at an accelerating rate accounts for a great deal. The two half-years compare as follows :—

	Amount. £		%
Increase of traffic in first half-year of 1871, compared with corresponding half-year of 1870	912,000	.....	6·8
Increase in second half-year of 1870, compared with corresponding half-year of 1869	736,000	.....	5·3
Excess of increase in 1871 half-year	176,000	.....	1·5

As it is the last additions to business which tell in the way of profit, this additional 176,000*l* of gross traffic accounts for a large part of the additional 127,000*l* of net profit as compared with the increase in the previous half-year.

We need not explain minutely, as we have often done so before, how it is that differences of one or two per cent. on the traffic have so great an effect on the profits; but the figures in the tables, it will be observed, supply fresh illustrations of the principle. As was the case in the second half of 1870 the working expenses and the preference charges have both increased at a less rate than the gross traffic, and the consequence is a greater proportionate increase of the amount available for dividend. The figures before us show that—

Gross traffic increased	6·8 per cent.
Working expenses	5·0 per cent.
Preference and debenture charges	2·8 per cent.
Amount divided	14·9 per cent.

—the addition to the amount divided moreover,—viz., 127,000*l*—being very nearly half the increase of gross traffic, which is 912,000*l*. There could not be a better illustration of the conditions under which the ordinary shareholder benefits so largely by the increase of the business done.

2. The most important point however is the question whether anything in the nature of the increase of traffic has to do with the accelerated rate of profit, and on that point too our figures, we hope, throw some light. If the tables are examined closely, it will be seen that the companies which have added most to the gross traffic have not gained proportionately in the shape of dividend. If they had done so, we should have expected the companies whose gross traffic increased at the rate of 8 or 9 per cent. and upwards, to have obtained double or treble the additional profit of companies which have added less to their traffic than the average of 6 per cent. But this is far from being the case. A company like the Great Northern, which has only added 3½ per cent. to its gross traffic, gains nearly as much as the London and North-Western, which has added 7 per cent. The reason partly lies in the difference of the proportion of ordinary capital to the business done, but this cannot be the whole explanation, as some companies, like the London and South-Western, which have a large proportion of capital, are among those which have gained most, notwithstanding the relatively small increase of their gross traffic. A farther analysis shows in fact that it is the increase of passenger traffic which is exceptionally productive, and that the net profit is unequally distributed according as the bulk of the increased business is in passengers, or the reverse. From Table II. it will be seen that there are five companies, of whose increased business more than half is in passengers, and we find that in fact they have the largest proportion of net profit compared with the increase of traffic. The figures are :—

	Total Increase of Traffic. £	Passenger Increase. Amount. £	% of Gross Traffic.	Total Increase of Dividend. Amount. £	% of Gross Traffic.
Great Northern	37,000	21,000	57·0	33,000	89·5
London and South-Western	55,000	35,000	64·6	30,000	54·5
Brighton	37,000	25,000	67·6	51,000	138·0
London, Chatham, & Dover	6,000	6,000	100·0	6,000	100·0
Metropolitan	10,000	8,000	80·0	10,000	100·0
	145,000	105,000	72·5	129,000	89·0

Thus the passenger increase in these cases amounts to about 72 per cent. of the total increase of traffic, whereas on the average, as will be seen from the table, it amounts to only 23 per cent.; and at the same time it is found that whereas the average increase of dividend is about 47 per cent. of the gross traffic, in these cases it is 89 per cent. Even if we allow for special causes, such as the diminution of compensations in the case of the Brighton line, the proportion of the dividend to the gross traffic would still be far in excess of the average. The coincidence therefore between a great increase of passenger traffic and the dividend earned cannot be wholly accidental. There is no other way of accounting for the phenomenon that the lines whose business in the gross has increased least have nevertheless profited most. The addition has been almost all pure profit.

Will the conditions of profit which have been exhibited last half-year continue? If they will, it is evident that the passenger lines, which have been lately in the shade compared with the great goods lines, must speedily come to the front, as they have in fact begun to do. On the whole, we think there is reason for anticipating that we have not seen the end of the movement. The few weeks that have elapsed since the close of the half-year show, if anything, a still quicker rate of progress—Brighton traffic, for instance, having increased between 8 and 9 per cent., instead of about 6 per cent. in the half-year we have been discussing; but the increase we have analysed is satisfactory enough without any addition. And the broad ground for anticipating its longer continuance is simply this—that the increase of goods traffic itself shows no sign of relaxation. Such an increase argues a continuous growth of the business of the country, and of an exceedingly profitable business. The country must be considerably richer than it was a year ago, and will be richer six months hence than it is now. This is the plain reason for expecting the present advance in railway property to continue, and not least in those lines which mostly depend on passengers. Intending investors however should watch the traffics carefully, to see how the current of business is going, and how far the expectation of a growing passenger traffic is fulfilled.

* For the preceding half-year's figures see *Economist* of Feb 25, 1871.

RAILWAY TRAFFICS AND DIVIDENDS 1st Half Year of 1871, compared with 1st Half-Year of 1870.

* Deficiency

† Estimate. The accounts have been so altered that only an estimate can be given of amount divisible in 1870.

THE MEETING AT GASTEIN.

The importance of the meeting of the two Emperors at Gastein seems to us to consist in this, that the worst and most dangerous rumours about it, rumours possibly without the slightest justification, might be true. It is reported—we are not just now examining into the probable truth of the reports—that the Emperors of Germany and Austria are meeting in order that they may settle some common plan of action with regard to the affairs of Roumania—that is, really with regard to action to be apprehended from Russia in alliance with France, and the report is of itself sufficient to throw the whole world into suspense. It is not an irrational report. It is quite possible, it is indeed very probable, that the four individuals usually named—that is, the two Emperors and their two Chancellors—may think an alliance between Czar Alexander and M. Thiers imminent, and it is absolutely certain that if they did so think they could and would wrap the world in flames. There does not exist any power of any kind which could stop those four persons—Prince Bismarck, Count Beust, M. Thiers, and Prince Gortschakoff—from commencing, without any especial trouble to themselves, a course of action which would bring on inevitably a general European war—perhaps the greatest calamity under which the world could suffer. Suppose the Russian Czar to say what the Russian papers under the censorship are saying, that German policy strangles Russia, prevents her development, and must be resisted. German policy does not hurt Russia in any way, does not even threaten her so long as she remains within her own frontiers; but it is quite true that it does prevent her emerging from them, and may therefore seriously irritate both her people and her Court. They may choose to express that irritation, and guard against that imaginary hurt by expressions of dissatisfaction, which would at once be received in France as expressions of hostility, and would undoubtedly excite under recent circumstances a keen wish to give that hostility encouragement. Under such circumstances it is most natural that Germany should look round for allies, most natural that she should turn to a semi-German power like Austria for alliance, most natural of all that with victory fresh upon her, with her Treasury full to bursting, and with her armies still on foot, she should wish her policy to be bold. A "bold" policy under such conditions means war on a scale never yet seen, and yet a "bold" policy is not only possible but is more probable than a weak one, or one which would result only in diplomatic action. A man who has won a great suit, and has had all his expenses, incidental as well as legal, fully paid up, is very likely indeed to think that another suit would produce more than a quantity of lawyers' letters. He is all the more likely to think so if he thinks the suit certain to come on at some time or other, as it is most probable, or at all events exceedingly probable, that Prince Bismarck does think. It is not likely that the Russian Government, however much influenced—and it is greatly influenced—by the personal regard existing between Czar and Kaiser, really approves the completeness of the German victory. The majority of the English people do not approve it, and the English people have nothing like the interest of the Russian people in the matter—have indeed, while the fleet is in good order, scarcely any direct interest in the matter. It is not improbable therefore that the Russian Government is willing to think over a French alliance, and that Prince Bismarck, aware of that fact, as he is aware of most things which occur or exist in Europe, except perhaps the most sedulously-concealed fact in European politics, the fighting strength of Great Britain, is intent on action which may precipitate the struggle. He has on the boards a question which would serve as a pretext,—namely, the Roumanian debt,—and it is not quite so bad a one as it looks.

It is not generally received that the idea on which Great Britain has always acted in matters of foreign State debts is absolutely "sound." It is undoubtedly most just and expedient. It is most just that as money is lent to foreign Governments by individuals and not by the State, individuals and not the State should recover it. To employ the power of the State is to tax uninterested persons in order to improve the position of the interested. It is expedient that occasions of international quarrel should be limited as far as posible, and should not be allowed to arise when the expenses of procedure must so far exceed the expenses to be recovered by the proceeding. At the same time we are bound to acknowledge that we can imagine a very different morality, and a policy based on other ideas, to be in the ascendant. We do use State power, and expend State money, to arrest a clerk who has embezzled and fled to another country, and we do it to prevent future embezzlements, which would otherwise endanger the security of trade. A great act of repudiation by a solvent State—and by a solvent State we mean a State which if it laid on taxes equal to 7s 6d in the pound of its whole earnings could fully discharge them, that being our own taxation in our worst period—is an act of embezzlement by a trustee, and we know of no moral reason which should prevent its punishment. A war to compel Roumania to pay her debts, however frightful or injurious it might be, would not be necessarily immoral; and if

Prince Bismarck thought a European war advisable, we think the pretext better than a hundred others upon which war has been waged. We do not think he thinks such a war advisable. It is nearly inconceivable that he can desire to call the masses of his master's people, but just recovered from a war in which they have suffered heavily although they have been victorious, to yet another campaign; but it is a terrible reflection that if he desires that, and if the Emperor of Austria is not unwilling, there is no power in Europe which can throw obstacles in his way. The war, whatever its end, would commence, and it is the fact of war quite as much as any result of war which is injurious to the prosperity of mankind.

There is no point upon which the restrictions on individual will which we call constitutional laws break down so utterly as upon this one of war. Almost any Executive person in any country can force on war if he pleases. In the United States the power of declaring war is shared by the President with the elected Senate; but he can order the American troops to perform acts which when once performed leave the Senate no alternatives except submission to his policy, or peaceful acquiescence in invasion. In England the purse belongs to Parliament; but Parliament, while removing any Ministry which declared war without a pretext, would infallibly carry that war on. In Germany the theory is that mobilisation could not be decreed in a cause heartily disliked by the people; but if to-morrow the order were issued to march to Warsaw or Bucharest, in a fortnight masses of troops would be marching on Bucharest or Warsaw. There might be subsequent discontent, but there would be immediate war. France is a Republic, but if M. Thiers on Monday issued, as he legally can issue, an order to attack Rheims, war would be as inevitable as if the whole people had voted for it by plebiscite. The truth is, that under the modern system the machine is almost too perfectly constructed. Any child entrusted with the key can turn on the motive power and set the force going, and then there is no escape from the responsibilities incurred. Six men at the utmost are possessed, *de jure* and *de facto*, of the legal right of moving the European armies, and that right once exercised they must be moved to victory. It is scarcely too much to say that if four of them—the four who met at Gastein—settled any policy, however unpleasing to the remainder of Europe, the remainder of Europe would either have to submit, or to commence a war which might last a generation. No genuine body of representatives from any country would have to be consulted. No previous discussion would be imperative. Bodies of troops would move, and the consequences of their movement could no more be averted or even considered than the consequences of flinging a lucifer match into a gunpowder magazine.

We no not pretend to desire or even to suggest any remedy for this state of affairs—a state which interferes with all the natural operations of European society; but we think it should make men hesitate in their criticisms on the weakness and slowness of Parliamentary Government, which with all its faults exempts us from these sudden and needless risks. A Minister under that Government could plunge us into a war not accepted by the people; but no Minister would voluntarily do it, for two widely different reasons. A Parliamentary Minister must go to war for one or two reasons; either because he thought it would improve his own position, or because he deemed that it would benefit his country. Clearly no unpopular war could benefit his own position. And clearly also no unpopular, we may say even no sudden, war could benefit his country, inasmuch as no war waged against the will of Parliament, or without an extent of preparation which under a Parliamentary Government requires time, could end in anything but defeat. Government by public meeting is necessarily slow government, and therefore government by men disinclined to sudden enterprises, as well as to those far-reaching alliances and schemes of policy which a meeting like that of Gastein is intended to arrange. Very likely they will not be arranged. The contracting parties will have immense difficulties in trusting one another. But still it is not a pleasant reflection, more especially for fundholders, that if the four gentlemen who met at those baths think war expedient, war is as certain as if it were declared. Lord Granville makes blunders sometimes, but he makes blunders because of a political system which does not allow us to think that if he happens to visit Paris half a million lives and the savings of five years will probably be placed in jeopardy.

BUSINESS NOTES.

The American Loan.—As we led our readers to expect last week, the issue of the American Conversion loan of 15,000,000*l* at 5 per cent. has been successful. Subscriptions have come in heavily from all parts of the continent, but the applications have also been numerous from England, and the loan is at least fully subscribed. The amount is also understood to have been mainly subscribed in cash, and not by the exchange of bonds. It may be considered as quite settled therefore that the United States can borrow large sums at 5 per cent., and the likelihood of converting the entire 6 per cent. debt at least at 5 per cent. is now a very strong one,—the great reduction of the quantity of the Five-Twenties which has been effected by this operation making future operations more easy. The interruption to the rise of American credit, caused by the French war, has thus been very brief. The operation however is not only of interest with special reference to America, but as furnishing a corroboration of the opinion we expressed a few weeks ago as to the gradual enhancement in value of all foreign securities. The accumulation of money for investment and the distrust of new channels are now such that all established securities are more and more keenly competed for. As a consequence investors are fain to be content with less and less rates of interest. America, as the leading foreign State which borrows in our markets, feels the improvement most conspicuously, the special causes of her good credit in the rapid reduction of her debt and the increasing security of peace naturally intensifying the effect. There is no doubt however that the ability of America to borrow cheaply is only an index of what foreign States in general will be able to do. In the absence of any new cause of disturbance to the peace of Europe, almost every description of foreign bond—including not a few, we fear, which no permanent investor should ever touch, but which they will persist in taking up—is likely to rise rather rapidly in value. There have been many symptoms of the change during the last month, but the success of the American loan is as yet the most important indication.

British Merchant Shipping.—The Board of Trade returns relating to shipping, which have just been issued, continue the story of the prosperity of this branch of industry which was told by the similar returns issued last year. It appears that the total shipping with cargoes entered and cleared at ports of the United Kingdom in 1869 increased as follows, compared with 1868, and that the increase was almost wholly in British shipping:—

	1869. tons.		1868. tons.		Increase. tons.
Total shipping	30,403,684	...	29,324,676	...	1,079,008
British shipping	21,357,939	...	20,474,621	...	881,318

Thus the total increase was 1,079,008 tons, of which the British share was 881,318 tons, or 82 per cent.—the proportion of British tonnage to the entire tonnage being only 70 per cent. The increase of British tonnage has thus been much greater than the average rate. The increase appears to be wholly accounted for by the increase of English steam tonnage. The comparison on this point is:—

	1869. tons.		1868. tons.		Increase. tons.
Total steam shipping ...	14,085,054	...	12,674,557	...	1,410,497
British steam shipping...	12,227,965	...	10,892,205	...	1,335,760

Thus the total increase is 1,410,497 tons, of which the British share is 1,335,760 tons, or 95 per cent.—the proportion of British steam tonnage to the entire tonnage being only 87 per cent. Here again the increase of British tonnage has been much greater than the average rate, although it is already by far the largest part of the whole tonnage. These are very significant figures, compared with the talk which was so current until the discussions of last year about the decay of English shipping, and they simply confirm and complete the statistics by which public opinion was then set right. The substitution of screw steamers for sailing ships, in connection with our trade system, has for a time at least strengthened the supremacy of the English commercial marine.

THE BANKERS' CLEARING-HOUSE RETURNS.—A fortnight since we called attention to the very remarkable increase of the returns of the Bankers' Clearing-house since the 30th of June—the average improvement, as compared with the same period of last year, excluding the Stock Exchange settling days, being 23 per cent. The returns subsequently published show the same remarkable progress, and the return of the present week is not the least striking. There is no settling day included, but the total of the week is nevertheless 90,069,000*l*, against 60,345,000*l* for the corresponging week of last year—an increase of about 30,000,000*l*, or 50 per cent. By this time last year of course the war had begun to have some effect on business, but the effect was not very marked. In any case, there was no such falling off as to account for so large an increase as 50 per cent. now.

STRIKES.—It is a symptom of a prosperous period that we should hear of so many strikes—in the North of England, in Yorkshire, in South Wales, and in other localities as well. The workmen are not only obtaining high wages, but they feel they can put an extreme pressure upon their employers, and are using their power to the utmost. But there are one or two features of the strikes which must excite some alarm as to the future of the industry which they affect. It is stated especially that the practice of "arbitration," which had made so much progress in the iron trade, has at last broken down. It answered when it was an agency for securing to the men their demands, but now that they have become more exacting, and the arbitrators are not so much in their favour, they are disposed to disregard the decisions come to, and trust rather to their own compulsory powers. A state of things has arisen in fact in which they believe they can fight the masters without assistance, and they accordingly laugh at the machinery of arbitration. The result is one which we should have anticipated from the ignorance and jealousy which necessarily prevail among masses of workmen, who can have no exact knowledge of the conditions of profit in a business, and cannot distinguish between the fines which an employer will pay rather than break his contracts, and the rate of wages he can afford if the business is to continue. Great industries are thus liable to continual interruption from the action of ill-informed combinations, and even if the workmen's claims are satisfied for the moment, wages are raised to a most unstable level, which the first breath of adversity will break down, causing fresh misery and heart-burning in the process. The highness of the rate of wages, moreover, is an element in precipitating the close of the prosperous period. Another unsatisfactory feature of the strikes is the increasing activity of the international associations, which seek to prevent the importation of foreign workmen to supply the places of the strikers. The area of unions is being in fact extended till the combination embraces an entire trade, whose members dictate whether the trade shall be carried on or not, not without endless suffering to themselves in ascertaining the conditions from which they cannot escape. England gains so far by the general equalisation of wages which the extension of the area of combination involves; but the equalisation was coming fast enough by the operation of natural causes, and its premature arrival is made costly by the loss of numerical strength implied in the withdrawal of our attractions for immigrants from abroad. The workmen do not see that they have a real interest in the extension of their industry in England, and that they may as well equalise wages by letting foreign workmen come here as by engaging them all in a single Trades' Union. They will probably not be wakened from their dream till they find their wages where they were, and foreign competition more vigorous than ever. Meanwhile the interruption of these strikes to business is very serious. The Great Western R ilway, it is calculated, loses 2,000*l* or 3,000*l* or more per week of traffic by the South Wales strike, and other leading railways suffer in a similar manner. The loss is widely felt, and besides the severe local suffering, which is the worst evil, operates as a check to the general progress of the country.

THE INSURANCE OF THE CAMBRIA.—It is not surprising that the underwriters in the case of the Cambria—Morrison *v.* Universal Marine Insurance Company—which was tried at the Liverpool assizes last week, should have resisted the claim, nor that the jury should have separated without coming to a verdict. The defence was that the insurance had been procured by means of fraud and concealment of material facts, but it could not be considered that these charges had been made out. The insurance was on a voyage from Bahia to South-West Pass, one of the mouths of the Mississippi, for orders, thence to a port in the Gulf of Mexico to load, and thence to Liverpool—the voyage commencing on the 18th of September. In October the plaintiff began to get uneasy about his ship, and on the 8th wrote to London to get it insured, giving all the information in his possession, and expressing his uneasiness. The 8th was on Saturday, and when the plaintiff reached home on that day he was shown the copy of a Liverpool paper containing an ambiguous notice of the "Cambria (quere Callao, quere from "New Orleans) aground North Breaker," and he hastened to town on Monday to communicate the information to his London brokers. A similar notice had appeared in Lloyd's list, where the name Cambria was subsequently altered to Cameo. In these circumstances the plaintiff succeeded in effecting some of his proposals of insurance. It was admitted that had these been all the facts the underwriters would have paid without a word, but the defence was mainly grounded on the assertion that the plaintiff on the 7th of October knew that the ship had been lost—a telegram having passed through the Liverpool Post Office to him to that effect. The plaintiff denied having received such a telegram, and it appeared that the telegram in question was sent out at half-past five on the 7th, but the message boy could not specially recollect its delivery, while the address was not precise. In the end the jury, as we have said, separated without coming to a verdict, a result which is hardly surprising when so much of the evidence was obscure. Might not all questions have been avoided, however, by the underwriters exempting from their risks the chance that the particular report before them applied to the Cambria? An extreme risk such as the plaintiff put before them should clearly have been limited to purely unknown contingencies, the doubt which had arisen as to whether the ship was actually reported lost justifying the exclusion of that particular accident from the policy should the reports turn out to be true.

REGISTRATION OF TELEGRAMS.—The case of the insurance of the Cambria, to which we have referred above, where so much turned on the defect of evidence as to the delivery of a Post Office telegram, has naturally occasioned suggestions of the expediency of introducing registered telegrams. In the case referred to, if a registered telegram had been delivered, and a receipt taken, it would have been known by independent evidence whether an all-important message had arrived at its destination. One difficulty there was a doubt about the address; but the receipt would have established whether in point of fact the right party had got it. There are endless other cases of course where it would be equally important to establish delivery of a message, which can only be done by registration, and a receipt from the party to which it is addressed. The expediency of the proposal is self-evident, and the precedent established in the case of letters cuts away the ground of any opposition which the department may take. We should not suppose however that Mr Scudamore will oppose, notwithstanding his objection to distinctions of priority between messages according to the rate of payment. Here there will be no priority, but additional security, costing the department extra trouble, for which it will have extra pay. Possibly there may be objections of detail, as the department is at present oppressed with business, but the main difficulty, as we understand, is in the deficiency of wires; and as the registration of messages, whatever it does, will not sensibly increase the quantity of message matter to be transmitted, it is not easily conceivable what objections of detail there can be to the immediate introduction of the system. As the telegraphic messages, for which registration would be required, are more important than letters, that is an additional reason for pressing the question with some earnestness on the attention of the department.

THE BOARD OF TRADE RETURNS.—The question which Mr Graves put to the Board of Trade just before the close of Parliament was a very necessary one, and will probably be of some service in stopping the error in the Board of Trade Returns to which he referred. What he suggested was that "large quantities of manufactured goods intended for China

"and other Eastern markets left London every month for "transhipment at Marseilles, and that such goods appeared "in the official returns as exported to France." It is plain that nothing can be more misleading than statistics of trade based upon data which are affected by any material error of this kind. Merchants at large will be misinformed as to the extent and nature of our trade both with France and the East, and not only will the trade use of the figures be injured, but statistical inferences of all kinds as to the state of the country and its commercial development will be erroneous. The mistake is exactly similar to the mischievous error, according to which exports to the East were classed among exports to Egypt, and should be remedied as promptly as possible. Mr Peel promises that it will be corrected at the end of the present year, and it ought not to be difficult of correction. There could be no difficulty in inviting merchants to state not only the port of immediate destination, but the ultimate destination of the goods, which is the important trade fact for the trade. It would also serve a useful purpose to specify the route of the goods, and as the information will necessarily be in the hands of the Customs authorities, we hope they will publish it. It would not be difficult to do so as respects the aggregate merchandise, and one or two of the principal articles, such as the cotton and woollen manufactures. We hope Mr Graves, having called attention to the subject, will not suffer the department to go to sleep upon it.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1871, and Aug. 19, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1871-72.	Total Exchequer Receipts To Aug. 19, 1871.		Same time last year.	
	£	£	£	£	£
Balances on 1st April, 1871:—					
Bank of England	...	5,678,915		7,631,761	
Bank of Ireland	...	1,344,520		973,887	
			7,023,435		8,605,648

The following are the Receipts on account of Revenue during the week ending Aug. 19 :—

	Receipts of Week Ending Aug. 19.
	£
Customs	485,000
Excise	2[illegible],000
Stamps	202,000
Taxes	12,000
Income Tax	4[illegible],000
Post Office	60,000
Telegraph	nil.
Crown lands	nil.
Miscellaneous	1[illegible],267
Total	1,129,267

The total receipts of the previous week were 749,682*l.*

The Exchequer issues of the week on account of expenditure were 690,000*l.*, viz. :—

	£
Interest of debt	nil.
Other charges on Consolidated fund	nil.
Supply services	690,000
Telegraph services	nil.
	690,000

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Aug. 12	6[illegible],530	1,01[illegible]	1,61[illegible]
— Aug. 19	710,770	1,129,[illegible]	1,84[illegible]
Increase	114,[illegible]	112,352	22[illegible]

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, August 24.

The return of the Bank of France for the week ending this day, the 24th, that of last week, and that of the 8th September, 1870, before the investment of Paris, are as follow :—

	Aug. 24, 1871.	Aug. 17, 1871.	Sept. 8, 1870.

A comparison of this week with last presents these results:—

	francs.
INCREASE.	
Treasury balance	9,289,663
Deposits at Paris	24,435,472
Coin and bullion	13,520,544
Bills discounted at Paris	13,451,545
DECREASE.	
Deposits in branches	3,004,742
Prolonged bills	15,285,537
Notes in circulation	22,958,160
Discounts in branches	21,855,394
Treasury bills	100,000

The taking up of prolonged bills has been less active this week than last. The item of discounts is not satisfactory, an augmentation at Paris being more than counter-balanced by a decline in the branches.

The National Assembly has within the past few weeks made progress in the adoption of the Governmental scheme of taxation. It has decided that on assurances against fire "8 per cent. of the amount of premiums, or in mutual companies 8 per cent. of the profits or contributions, shall be paid." Some deputies contended that the capital assured ought to be taxed, not the annual sum paid by assurers; and they gave examples to prove that if this were not done gross injustice would be committed, inasmuch as properties of equal value were assured at widely different rates—in some cases at 25f, in others at 1,000f, according to the risks they presented. But the Minister of Finance affirmed that taxation of premiums would produce 9,500,000f, and that of capital only 7,000,000f and that allegation was regarded as an unanswerable argument against the taxing of capital. The Assembly has also decided that what are called "verbal leases," in other words, simple lettings of houses and lands superior to 100f per annum, shall be taxed as well as written leases. It was pointed out, however, that the imposition of a tax on such lettings would present great practical inconvenience and be very costly, there being in Paris alone 500,000 such. The Assembly has also dealt with another matter. In order to escape paying registration duties it has for many years been the practice to inscribe in deeds of sale a smaller sum than that really intended to be paid, the parties making a private arrangement with respect to the surplus. To put an end to this fraud, which causes a large loss to the Treasury, the Government proposed to enact that the buyer should only be bound to pay the sum written down. But it was pointed out that this would be giving a premium to dishonesty, and the Chamber resolved that frauds should be punished by a fine of a fourth of the sum disguised. The proposition to put a tax of 10c on receipts of all kinds and on cheques was also adopted. With respect to cheques, Baron de Soubeyran, of the Credit Foncier, objected to the taxation of them, for the reason that the Law of 1865, which regulated the introduction and employment of them in France (in the preparation of which he had a large part) declared that they should be exempt from all taxes for ten years; and he contended that for the sake of the 300,000f or 400,000f they might be expected to produce, it was not well to break from a legal obligation. But he was overruled. The Assembly has also adopted the increase of postage demanded by the Government: it is from 20c to 25c in the country, from 10c to 15c in towns, and is at different rates for registered letters, samples, books, paper, prospectuses, &c. In the discussion of the postage question, M. Wolowski drew attention to the success which has attended in England and Germany the introduction of post cards, circulating at a low rate, and he proposed to adopt such cards in France, at the price of 10c. In his speech he expressed grave doubts of the wisdom of augmenting the postage, reminding the Assembly that in matters of finance one and one do not always make two, and he expressed his conviction that his cards would not only be useful to the public but productive for the Treasury. His observations were received with marked favour, and the Assembly accepted his motion, but the Director-General of the Post-office having expressed the fear that the adoption of cards would counterbalance the augmentation of receipts expected from the increase of postage, the proposition was sent to a Committee for examination, and it is to be considered anew.

In the Assembly yesterday a point of great interest was raised, and it produced an important declaration from the Minister of Finance. The point was the propriety of taxing dividends on Government stock—not directly, but on sales or transfers, and the Minister's declaration was this:—"I beg of you to be convinced that the Government never had the intention of touching the *rente*, of imposing on it any tax whatever, of charging in any respect the obligations it has contracted towards the holders of its stock, whether they have held it for years or for six weeks only. The Government will take from them nothing of what it has promised; before all things, it will respect conscientiously the contract into which it has entered with them, and has no intention of imposing on them charges which they never expected. It is determined to respect the contracts for loans, and be assured it will honestly keep its promises and engagements."

The news from Versailles is that the desirability, not to say the necessity, of establishing an income tax becomes more apparent every day to the majority of the members of the Assembly; and that consequently there is a probability that the project of M. Casimer Perier, which has already been sanctioned by a Committee, will be adopted. We learn also that the Minister of Finance, by way of compromise, has consented to a duty of 20f the 100 kilogs (8/ the ton) on paper for newspapers, instead of 30f he wanted to impose: the said duty replacing the stamp duty, which he also wanted. We are further informed from Versailles that various other taxes are spoken of, among them one for augmenting railway tariffs. An increase for passengers is perhaps to be feared, but if one be imposed on goods, general condemnation will be manifested. There has long been an outcry from the seaports, the agricultural districts, and the manufacturing towns, that the rates now existing are a serious impediment to commerse and industry; and within the last few days the Government has received a representation from the manufacturers in the north, that in consequence of them the greater part of the wool, petroleum, and coffee consumed in their region is bought at Antwerp, not in French ports, and they add that they are beginning to get cotton also from Belgium.

Almost every day statements are made on the Bourse, and reported in the newspapers, about the payments the Government is making, or attempting to make, to Prussia on account of the indemnity; but they obtain no official confirmation. Among other things it has been said that it has paid, or is on the point of paying, 250,000,000f by means of bills on London. It is indebted to Switzerland as well as Prussia, and has paid it six millions out of ten due. The money is owing for approvisioning the French army that sought refuge in Switzerland. The remainder of the sum will be paid by instalments by the end of November.

The report spread at London that the great railway companies are to raise 200 millions for the Government cannot be correct. These companies have borrowed and are constantly borrowing for themselves, and to enable them to get money the Government guarantees a certain rate of interest. Its credit therefore is better than theirs.

Although the Ministry of Finance announced officially that it was ready to give definitive securities in exchange for the scrip of the 5 per cent. and the Morgan loans, there is, in point of fact, difficulty and delay in getting the exchange effected, and this causes loud complaints among holders. As regards the Morgan loan in particular, persons who subscribed in the country are required to make their exchanges there, though they are now residing in Paris.

As the Government has now formally recognised the London loan of 1870 (the Morgan) it is to be presumed that it will soon be admitted to official quotation at the Bourse. It is already quoted at Lyons, Bordeaux, and Marseilles. At its present price it gives a revenue superior to the Fives and the Threes.

The refusal of the Law Courts in Germany to recognise as binding on foreigners the delays granted in France for the payment of commercial bills has been imitated by the Court of Genoa. This last fact has created some sensation in the South of France, and the Society for the Development and Defence of Commerce of Marseilles has petitioned the Bank of France "to refuse to discount or receive any bill bearing the signature of a foreign house which has declined to pay a bill because it was only protested according to the laws in vigour"—*id est*, to the said delays. The Bank has consented.

Although a regular Government has been established for months, and though postal and railway communications have long been complete, the Ministry of Commerce has not yet resumed the publication of the monthly returns of imports, exports, and navigation prepared by the Board of Customs. What excuse there can be for this delay no one seems to know, but what is certain is that the absence of the information these documents contain presents at this moment considerable inconvenience. The publication of the returns of 1870, interrupted by the war, has not even been completed, and yet subscribers paid for them in advance.

The Lloyd Rouennais has protested to the Government against the establishment of 3 per cent. duty on raw materials, without drawback, which has been proposed as a substitute for that of 20. The 3 per cent., it says, would be injurious to the export trade. Coming from the town of M. Pouyer-Quertier, the demonstration is significant.

The following are the quotations of the Bourse:—

The Credit Lyonnais has received subscriptions for the United States 5 per cent. loan of 75,000,000 dollars.

The annual meeting of the Credit Mobilier is fixed for the 18th September.

The quotations of the markets of the last three days, per 50 kilogs, duty paid, are as follows :—

COTTON.—At *Havre*, sales have been limited, and prices have declined. New Orleans on sample was yesterday taken at 92f, and Oomrawuttee fair 83f.

COFFEE.—At *Havre*, Capitania 132f, Cape 135f, Cape (in bond) 67f 50c, Guatimala 140f, Haiti 134f, Jamaica 144f, Rio 132f. and (in bond) 82f. At *Bordeaux*, Winaad 147f 50c, Rio (not washed) 70f, Costa Rica 142f 50c, Guatimala 142f. At *Marseilles*, Rio 70f 50c.

HIDES.—At *Havre*, Monte Video salted saladeros ox 78f and 76f, Lima salted ox and cow 68f, Rio Janeiro salted 65f 50c.

WOOL.—At *Havre*, Buenos Ayres (unwashed) 135f and 170f the 100 kilogs, ditto (washed) 375f, Monte Video (unwashed) 135f to 215f, washed 375f, La Plata lambskin 210f.

COMMERCIAL AND MISCELLANEOUS NEWS.

The *Madrid Gazette* of the 9th inst. contains an *exposé* submitted by the Minister of Finance to the King, together with several decrees for the reduction of expenditure in pursuance of the resolution passed by the Cortes that it should be brought down to 24,000,000*l.* in the new Budget to be presented in October. The expenditure in the Budget 1870-71, just expired, was 29,400,000*l.*, while in the one presented by Senor Moret for 1871-72, it was reduced to 25,160,000*l.*, not so much from economies as by the transfer of items which formerly were given under the head of expenditure into another category, owing to arrangements effected with various bodies. Senor Moret has proposed the conversion into Three per Cent. Stock of several debts now bearing 6 per cent., and of others having sinking fund assignments under terms almost agreed upon with the holders, and he expected to rescind the contract with the Bank of Paris, by which not only great savings were to be effected, but valuable guarantees of immediate use would be returned to the Government, while, finally, he proposed new taxes and sources of revenue so as to place himself in a position to accept the maximum of 24,000,000*l.* fixed by the Cortes for the new Budget. Upon his retirement the Government now in power likewise accepted this engagement, although the Cortes separated without having discussed any of the proposed measures, and had contented themselves with providing means to cover the former deficits of Budgets and other engagements of the Treasury, by voting authority to raise 6,000,000*l.* by the negotiation of Three per Cent. Internal and External Stock (which, as the Minister observes, will entail an increase of interest of 660,000*l.*), and 12,000,000*l.* in Treasury Bonds, thus rendering it necessary that, to bring the expenses down to 24,000,000*l.*, reductions should be made in the Budget 1870-71 of 165,000,000 pesetas—6,600,000*l.* The Minister describes the savings effected by the reorganisation of several departments and other means, which, according to the Ministerial journals, will amount to 2,000,000*l.*, while on the meeting of the Cortes additional ones will be proposed, which cannot be carried without their sanction. The Government, it is added, are engaged in the negotiation of a temporary loan of 4,000,000*l.* on Treasury Bonds, or Three per Cent. Interior for six months, at the rate of 10 per cent. per annum and a commission. Meanwhile, the issue of the Three per Cent. will be arranged either at once or shortly after the meeting of the Cortes.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the second week of August, 1871, and of the corresponding week in 1870 :—

	Paupers				
	Indoor.	Outdoor.		Total.	Corresponding Total in 1870.
	Adults and Children.	Adults.	Children under 16.	2d week August, 1871.	
West district	4,810	8,625	4,500	17,935	17,108
North district	6,792	[illegible]	7,254	24,324	25,162
Central district	2,559	6,491	4,295	17,345	19,240
East district	6,479	9,216	7,995	23,690	27,560
South district	8,923	15,697	13,060	37,680*	36,111
Total of the Metropolis	32,563	60,232	36,636	119,431	127,221

* No return received, last week's number assumed.

Total Pauperism of Metropolis—Proportion in 1871, 1.35; in 1870, [illegible]

The Bill introduced by Mr Sheridan for the protection of the goods of lodgers has been read a third time in the Lords. It provides that lodgers' goods, upon being seized for rent by the superior landlord, cannot be taken if the lodger has paid his rent and claims them as his own, according to a form prescribed for that purpose. The measure is calculated to improve the value of house property of all descriptions, and especially in the City, where persons frequently hesitate to take and furnish offices expensively unless the lessee of the building happens to be a man of known means.

Thursday	16,063,000	13,128,000	10,020,000
Friday	16,755,000	13,680,000	10,417,000
Saturday	14,586,000	15,481,000	10,569,000
Monday	13,462,000	13,076,000	8,630,000
Tuesday	14,854,000	15,625,000	9,754,000
Wednesday	14,470,000	36,139,000	11,155,000
Total	90,069,000	105,030,000	60,545,000

JOHN G. PEACOCK, Deputy Inspector.

Bankers' Clearing-house, August 24th, 1871

The total since the 4th of January, 1871, is 2,907,484,000*l.*, compared with 2,553,332,000*l.* for the corresponding period last year, showing an increase of 354,152,000*l.*

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during

a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding dates with the present week.	Aug. 28, 1861.	Aug. 26, 1868.	Aug 25, 1869.	Aug. 24, 1870.	Aug. 23, 1871.
Circulation, including bank post bills	£ 20,423,146	£ 24,458,583	£ 23,753,872	£ 24,146,041	£ 25,502,782

Clearing-house returns	...	55,369,000	56,400,000	60,345,000	90,089,000

In 1861, the Bank rate was reduced to 4 per cent. from 4½ per cent., to which it had been reduced only a short time previously. The cause of the abundance of money was still the restriction of trade consequent on the American war. The American Government was beginning to borrow largely.

In 1868, the 2 per cent. period continued. The preparations for the new elections, chiefly on the question of the Irish Church Disestablishment, were being vigorously prosecuted.

In 1869, there was a great accumulation of money, and the rates in the open market were drooping. The Albert Insurance Company had just been put into liquidation, with about 1,500,000*l* of liabilities, and an estimated deficiency of 1,000,000*l*.

In 1870, the Bank rate was reduced from 4½ to 4 per cent., the tendency of money to accumulate in Lombard street becoming very marked after the first panic at the outbreak of the war. The movements which preceded the catastrophe of Sedan were now in progress, and it had just been reported that MacMahon, instead of falling back on Paris, would try to relieve the garrison shut up in Metz.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 4,627,004*l*; in 1868, an excess of 4,241,752*l*; in 1869, an excess of 4,901,633*l*; and in 1870, an excess of 79,709*l*. In 1871, there is an excess of 5,822,304*l*.

Discount and Money Market.—The market has again continued easy, owing to the great superabundance of money, but there is also a large supply of bills, and a large business is being done. Although there is little nominal change in the rates quoted, it is noticed that there is a little hardening in the terms asked, especially for long-dated paper, and as compared with last week there is even a fractional increase in the rates charged for long-dated trade bills. Four months' bills are quoted 2¼ 2½, instead of 2¼; and six months' are at 2⅝ 3, instead of 2½ 3. The signs are in fact increasing that we have seen the lowest point in the money market, and that we shall now have a gradual rise in the value of money. Among other causes which are talked of as influencing the market are apprehensions as to the deficiency of the harvest, increased this week by a few days' rain, and the belief that there is still a good deal of German money in London, which may be withdrawn at any moment, while the import of bullion barely keeps pace with the export. The actual demand in the market however is quite sufficient to account for the change in tone, though the slight anxiety manifested in some quarters to make provision for the future, to which the demand is partly due, may of course be due to speculative apprehensions.

At the Bank the demand during the week was very slack, but to-day there is more activity in sympathy with the improved tone outside. The changes in the Bank account of the week show an almost stationary state of business—bullion having only increased 22,232*l* for the week; the private securities having decreased 368,082*l*, but the Government securities having increased 300,000*l*; and the private deposits having decreased 825,623*l*, but the public deposits have increased 397,262*l*. The circulation has also diminished 190,650*l*, and the reserve increased 161,483*l*. Substantially, the position of the Bank as respects reserve and liabilities is unchanged, but the general belief is that it is not likely now to increase in strength, owing to the tendency of our bullion to go away. From the Bank of France return, which we publish elsewhere, it appears that the stock of bullion in that establishment has increased 540,000*l* for the week. Otherwise there are no material changes to notice.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 and 3 months	1¾	per cent.
Do 4 months	2	per cent.
Do 6 —	2⅜ ½	per cent.
Trade bills—2 and 3 months	2	per cent.
Do 4 months	2¼ ½	per cent.
Do 6 —	2¾ 3	per cent.

The allowances for money at the joint stock banks and discount houses are as follow :—

Joint Stock Banks at call	1	per cent.
Discount houses at call	1	per cent.
Do with seven days' notice	1¼	per cent.
Do fourteen days'	1¼	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	6	5	6	5
Vienna	5	5	5	5
Berlin	6	4	5½	3½
Frankfort	...	3½	5	3½
Amsterdam	6	3	6	2¾
Brussels	7	4	6 7	3¼ ½
Hamburg	...	...	4	2¾ 3
St Petersburg	8	6	8½	6

The Stock Markets.—The week has been one of almost general dulness on the Stock Exchange, the leading cause being the weakness in English railways, which have experienced a strong reaction after the recent rise, the weak tendency as usual being exaggerated by the bears making heavy sales in the more speculative stocks. The bad weather of the week has also been made an excuse for taking a gloomy view of the prospects of the leading home securities and for apprehensions of dearer money, which would increase the difficulties of carrying over. English securities have likewise been flat, the main causes to which their recent weakness has been ascribed, such as the apprehension of an outflow of bullion and of a greatly deficient harvest, having been more powerful this week than ever. In general the tone of almost all the markets has been dull, though there have been important exceptions in railways, miscellaneous, American, and even in some foreign securities, in consequence of the large supply of money seeking investment, and the favourable view taken of particular securities. The market has been better, and closes better, to-day than it has been during the week, and the reaction downwards has apparently come to an end.

English Government Securities.—As there is no material change in this department, we have only to refer our readers to the usual tables, showing the highest and lowest prices of Consols each day, and the closing prices of the principal stocks last Friday and to-day. As in other departments, the market closes firm, a fresh change in the weather having occurred opportunely to allay apprehensions about the harvest.

Subjoined is a list of the highest and lowest prices of Consols every day :—

	CONSOLS. Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	93⅛	93⅜	93⅛	93⅜	12s to 18s pm
Monday	93⅛	93⅜	93⅛	93⅜	12s to 17s pm
Tuesday	93⅛	93⅜	93⅛	93⅜	12s to 17s pm
Wednesday	93⅛	93⅜	93⅛	93⅜	12s to 17s pm
Thursday	93⅛	93⅜	93⅛	93⅜	12s to 17s pm
Friday	93⅜	93⅜	93⅜	93⅜	10s to 15s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.

Ditto New 5 %	104 5	104 5	... ...

FOREIGN GOVERNMENT SECURITIES.—As we have stated, this department has been weak, chiefly in sympathy with the dulness in English railways, but the undercurrent has been good, in consequence of the continual process of investment which is going forward. French stocks are almost all fractionally better for the week, and this is the case with other descriptions, as will be seen from our subjoined list, notwithstanding the dull tone of the week. In Spanish however, there has been a great deal of fluctuation, in consequence of contradictory announcements about the intentions of the Spanish Finance Minister. Early in the week the rumour was that the Minister would carry out his opinion in favour of paying two-thirds of the interest and giving acknowledgments of indebtedness for the remainder, and this report sent the stocks down. Afterwards, the contradiction of the report made the stocks "good," only however for renewed dulness to set in when a new loan of 20,000,000*l* nominal, about 6,000,000*l* effective, was announced, to be issued at 31. On balance for the week Spanish have fallen, though there is a strong opinion in the market that they, as well as the new issue, will very speedily be better. To-day the markets have generally been good, and the tendency is firm at the close.

The telegraphic report respecting the new Spanish loan states that it will be issued almost immediately, and from the arrangements made it appears that the Minister anticipates an immediate subscription in full, without the necessity of long-deferred instalments.

It was stated on Monday that the French Government had made arrangements with the Banque de Paris and other financial institutions in Paris for the payment of 10,000,000*l* sterling of the German indemnity by means of three months' bills upon London, in advance of the instalments upon the last loan. It was stated however on the following day that the Germans make difficulties about accepting the bills, and that the arrangements may fall through—the German occupation of the Paris forts being consequently continued. A corresponding statement made on Monday however, to the effect that the French railway companies have agreed to provide 8,000,000*l* in consideration of their being allowed an additional centime per kilometre on the passenger traffic, has not been contradicted in the City, though it is exceedingly improbable.

The closing quotations of French securities are—3 per cent. Rentes 55 ⅞ ¼; Morgan loan, 98 ⅛ 99 ⅛; and New loan 6 ⅛ ⅜ prem.

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
[illegible]	[illegible]	[illegible]	[illegible]

ENGLISH RAILWAYS.—As we have already stated, the weakness in this department was so extended as to affect the stock markets generally, and it appears to have been mainly caused by the heavy sales to realise, natural after the great advance which had taken place, aggravated by the usual exaggeration of the bears. As usual too the most was made of any unfavourable circumstances which turned up, and these were—the break in the weather, which induced some fear of a deficient harvest, and that the present prosperity of the trade of the country would not continue; and also the publication of less satisfactory traffics in the southern lines, where the greatest speculation had lately been. The traffics, we believe, are not really unsatisfactory, the lines in question still exhibiting a remarkable progress; and the subsequently published returns have on the whole been very favourable, the average increase of the week being high, and being singularly profitable from the larger portion of it being passenger traffic. The very most has therefore been made of the unfavourable incidents of the week. To-day the weakness manifested has almost quite disappeared, the continuous purchases of investors and the favourable prospects of the leading lines making the long continuance of a bear account all but impossible. The market has also been favourably affected to-day by the publication of the Great Western report, which exhibits a remarkable period of prosperity, notwithstanding the coal competition and the strikes in South Wales, which have been great drawbacks to the business and profits of the company. The principal announcement and report now expected are those of the Caledonian Company in which there is a great deal of speculation. This evening the market closes firm, and it is believed there will soon be another general advance when it is perceived that the average increase of traffic is maintained.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	104½ 4	104½ 5½	+ 1½
Great Eastern	40¾ ½	40 ½	− ½
Great Northern	134½ 6½	134½ 6½	... ...

Metropolitan Debent. 6 %	123 4	123 4	... ...

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Aug. 19 to 816,000*l*, being an increase of 61,135*l* on the corresponding week of last year. The aggregate for the half-year to date is now 5,181,702*l*, being an increase of 372,120*l* on the corresponding week of last year. The principal increases for the week are—London and North-Western, 10,279*l*; North-Eastern, 9,657*l*; Lancashire and Yorkshire, 7,263*l*; North British, 5,086*l*; and Caledonian, 4,104*l*. The following shows the details of the increase in each case for the week and for the whole period:—

Great Western of Canada	19⅜ ½	19⅜ ½	... ...
Madras 5 %	106¾ 7⅛	106¾ 7⅛	... ...

AMERICAN SECURITIES.—The new Funding loan has been fully subscribed for, and the applications, though not large on the average, have been of a good character. Very few exchanges have been made of old bonds. The transactions in the scrip have not been numerous, but the quotation to-day closed at par to ¼ premium. Five-Twenties of the 1862 issue have been flat, owing to the prospect of approaching redemption; otherwise there is no movement of importance in the market, and the fluctuations on the week are as follows:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	93 3/16 ⅝	93 3/16 3/16	— ¼
Ditto 1865 Issue	93 ¼	93 ¼	... ...
Ditto 1867 Issue	93⅛ ¼	92 7/16 9/16	— 1 1/16

Panama General Mortgage 7 % Bonds, 1897	75 8	75 8	... ...
Pennsylvania Gen. Mort. 6 % Bonds, 1910	94⅛ 5½	95 ⅛	+ ⅛
Virginia 6 % Bonds	53 5	53 5	... ...

JOINT-STOCK BANKS.—There have been numerous purchases in this department, and prices are higher on the average. London and Westminster have been in demand, and close at an advance of 1½ on the week. Ionian show a rise of 3; Union, 2; Hong Kong and Shanghai, 1½; British Columbia and Colonial, 1; Anglo-Austrian, London and County, London Joint Stock, and Oriental, ½. We note however a decline of ½ in City, 1 in Land Mortgage of India Debentures, and ⅝ in Metropolitan.

"Rumour attributes," says the *Levant Herald*, "to Messrs Zarifi, Caraphanos, and Dr Edwards, a project for the formation of a joint stock bank in Paris, with a capital of 25,000,000 francs, and with a special view to financial operations in Turkey. The undertaking is to be called the Crédit Européen."

TELEGRAPHS.—The movements in this department, though not generally important, have been in the downward direction. A comparison of the quotations with those current last week shows the following fluctuations:—A decline of 3 in Anglo-Mediterranean, ¼ in British Indian Extension and British Indian Submarine; ⅛ in China Submarine, Falmouth and Gibraltar, and Great Northern Extension. Anglo-American have risen 3; British Australian and Panama ¼; and Indo-European 1. Telegraph Construction shares closed with dulness, at a fall of ½; Silver's India Rubber and Hooper's Telegraph Works are 1½ and ⅝ lower respectively.

MINES.—There has been much flatness in the mining share market, and the movements have mostly been of an unfavourable character. In British mines we note a decline of 5 in New Seton; 2½ in South Wheal Frances and Wheal Seton; 1½ in East Lovell; 1 in East Bassett and Great Wheal Vor, and ½ in Marke Valley and Mwyndy Iron Ore on the week. The principal feature in the foreign market is the continued pressure of Eberhardts for sale, which close at a decline of 7 on the week, the price having been as low as 29 to-day. Cape Copper are ½ and Colorado Terrible ¼ lower.

MISCELLANEOUS.—The chief feature in this department is the demand which has arisen for Sewage Companies' shares, in consequence of the report of the discovery of a chemical process likely to enhance the value of this class of property. Phosphate Sewage shares are quoted at 9 to 10 prem., and Native Guano, with 5*l* paid, at 42 to 45. As a consequence of this movement, International Financial shares have been in request, as it is understood that that institution is largely interested in this description of property. The shares of the Bituminous Rock Companies have been firmly held; otherwise the general tone of the market has been flat. We note the following changes for the week:—A rise of 2 in Bolckow Vaughan, Darjeeling, North-British Australasian, and Royal Mail Steam; 5 in Scottish Australian Investment, 1 in Foreign and Colonial Government Trust (6 per Cents.), ¼ in Madras Irrigation. On the other hand, there is a decline of 5 in London General Omnibus; 1 in Company of African Merchants, Crystal Palace Preference, North Metropolitan Tramways, Roumanian Iron Bridges Annuities, and Peel River Land. London Tramways shares are ½ lower.

Several leading firms, resident both in London and on the continent, have combined for the purpose of forming a society for the introduction of foreign loans, and similar large transactions. The Syndicate Union (Limited) has been formed with a capital of 2,200,000*l*, of which 1,000,000*l* have been privately subscribed by the firms in question. The Union is decidedly a strong one, but there are some most influential names conspicuous by their absence, and it may be doubted whether Syndicates, however well adapted for a temporary service, can ever, owing to the opposing interests concerned, become permanent institutions.

A prospectus is issued this evening of the issue of 58,000*l* 7 per cent. debenture stock of the Ceylon Coffee Estates Company (Limited). The capital of the company is 120,000*l*, of which 60,000*l* have been issued in shares, fully paid; and the prospectus states that the company possesses estates which cost 105,000*l*, including expenditure on the growing crops. The estates, it is also stated, are in good working order, and show a good profit.

A prospectus has appeared of the New Albert Life Assurance, with a capital of 500,000*l*, in one pound shares. This is a scheme for the reconstruction of the old company. It is proposed that holders of policies in the old company should exchange into the new on the following terms:—A holder of a policy of one thousand pounds to accept a policy of eight hundred and fifty pounds in the new company, with a debenture of hundred and fifty pounds.

In the new undertakings, Val de Travers Asphalte shares are 40½ to 1½, and Neuchatel Bitumen, 74 to 76 per share; Anglo-Austrian Bitumen, 2½ to 3½; Anglo-Hungarian Bitumen, 6¾ to 7¼; Anglo-German Bitumen, 3½ to 4; Belgian-Dutch Paving, 2¼ to 2¾; Montrotier Asphalte, 3½ to 4½; Hungarian Land Credit, ¾ to 1 premium; Mexican Railway debentures, 4½ to 3½ discount; Nantyglo Ironworks, 5 to 3 discount; and Russian Copper Company, 1½ to 0½ discount. Limmer Asphalte are quoted 3¼ to 3½; Edinburgh Tramway, ⅞ to 1⅛ premium; Native Guano, 41 to 42; and Phosphate Sewage, 7½ to 8½ premium.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold remains very quiet; there is no continental demand whatever, and nearly all arrivals are sent into the Bank, about 132,000*l* having been thus disposed of since the 17th inst. The arrivals during the week comprise—40,060*l* per Agnes Muir, from New Zealand; 55,000*l* per Caduceus, from New Zealand; 4,300*l* per Cœlœno, from New Zealand; 37,000*l* from New York—total, 136,360*l*. The Candia has taken 49,580*l* to the East, and sovereigns to the value of 119,000*l* have been withdrawn from the Bank, also for the East.

Silver is without alteration in price, and the demand is only for Holland. The imports have been small, comprising only about 30,000*l* received from New York.

Mexican Dollars.—The old coinage is taken for China, and remains without alteration in price at 59¾d per oz. The new coinage, at 58½d per oz, is only taken for refining purposes. The arrivals consist of about 35,000*l* received from New York; and the Candia has taken 40,500*l* to the East.

Exchange on India for Banks' drafts at 60 days' sight is 1s 11d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 8½d to 79s 9d per oz std; refinable, 77s 11d per oz std; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0⅝d to 5s 0¾d per oz std; ditto containing 5

grains gold, 5s 1½d to 5s 1¾d per oz std; Mexican dollars, 4s 10½d to 4s 11½d per oz. last price.

The bullion operations of the Bank of England to-day consisted of the withdrawal of 9,000*l* for India, and the influx of 3,000*l*.

According to the *Gazette* return the import of the precious metals during the week ended August 23 were: Gold, 120,970*l*; silver, 135,791*l*. The exports were:—Gold, 109,377*l*; silver, 202,900*l*.

MEETINGS OF COMPANIES NEXT WEEK.

Monday, August 28.

North and South-Western Junction Railway, general, Euston Station.

Tuesday, August 29.

Barry Port and Gwendreath Railway, general, 80 Coleman street.
Dublin and Meath Railway, general, 6 Victoria street.
Egyptian Commercial Trading, special, City Terminus Hotel.
General Steam Navigation, general, 71 Lombard street.
Llanelly Railway, general, 6 Victoria street.
London, Tilbury, and Southend Railway, general, Fenchurch street.
Navan and Kingscourt Railway, general, 6 Victoria street.

Wednesday, August 30.

Great Western Railway general, Paddington.
Bristol and Exeter Railway, general, Bristol.
Rhymney Iron, general, 26 Martin's lane.
Tower Railway, general.
Severn Valley Railway, general, Paddington.

Thursday, August 31.

Bristol and North Somerset Railway, general, Inns of Court Hotel.
Cameron Railway, general, Crewe.
Fishguard and Llanwrda Railway, general, 14 St George's street.
Portpatrick Railway, general, 14 St George's street.
Sittingbourne and Sheerness Railway, 31 Lincoln's Inn.

SETTLING DAYS.

Ticket Days—Wednesday, August 30; Wednesday, Sept. 13, and Thursday, Sept. 28.

Settling Days—Thursday, August 31; Thursday, Sept. 14, and Friday, Sept. 29.

NOTICES AND REPORTS.

STOCKS.

Argentine 6 per Cent. Public Works Loan, 1871.—Bonds representing 76,500*l* have been drawn for redemption on the 1st September.

RAILWAY COMPANIES.

Blyth and Tyne.—The net revenue for the half-year, including 1,715*l* from the previous account, was 24,892*l*, out of which the directors recommend the payment of a dividend at the rate of 10*l* per cent.

Buffalo and Lake Huron—A distribution of 1s 6d per share, free of income tax, is announced, leaving 1,423*l*.

Cockermouth, Keswick, and Penrith.—At the meeting a dividend at the rate of 3 per cent. per annum was declared.

Furness.—The capital account showed that 3,150,729*l* had been expended, leaving a balance against the account of 56,493*l*. The revenue account for the half-year ending the 30th of June last showed that 174,928*l* had been received, and 74,735*l* expended, leaving a balance of 100,193*l*. A dividend was declared at the rate of 10 per cent. per annum, leaving a balance of 5,530*l*. Contracts have been entered into for the construction of the tidal basin, which will form the entrance to the proposed new dock, and for the branch line from Arnside to Hincaster. The Barrow loop line from Salthouse Junction to the Hawcoat branch has also been commenced.

Great Western.—A dividend for the first half of the year, at the rate of 4½ per cent. per annum, has been notified, as compared with 3 per cent. at this time last year, carrying forward about 15,000*l*.

Great Western and Brentford.—The adopted report explained the injurious effects of the strike in South Wales on the coal traffic, and stated that the net revenue, after providing for interest, was 2,833*l*, to which was added 23*l*, making 2,856*l*, and recommended a dividend at the rate of 2½ per cent. per annum on the ordinary shares, carrying forward 50*l*.

Isle of Wight.—The half-year's gross earnings, 9,338*l*, showed an increase of 1,141*l*, and the working expenses, 7,440*l*, showed an increase of 1,121*l*. The balance was 1,898*l*, applicable to rent charges and interest.

London, Tilbury, and Southend.—The half-year's revenue was 29,967*l*, and the expenses 21,925*l*, leaving a balance of 8,042*l*. Compared with the account of the corresponding half of last year, there was an increase of 1,786*l*, in the receipts, and 1,219*l* in the expenses. The additional receipts provided by the North London and Great Eastern were 11,969*l*.

Maryport and Carlisle.—At the meeting a dividend at the rate of 12½ per cent. per annum was declared.

North and South-Western Junction.—The Bill for leasing the line to the London and North-Western, the Midland, and the North London Companies had passed both Houses of Parliament and received the Royal assent. The lease took effect from the 1st of January last. The directors recommended the declaration of a dividend for the past half-year at the rate of 6 per cent. per annum, leaving a balance of 804*l* for the liquidation.

Stratford-upon-Avon.—The receipts for the past half-year amounted to 5,646*l*, against 5,115*l*. After payment of all expenses and interest there remained a balance of 2,266*l*, out of which the directors recommended a dividend of 12s per share, being at the rate of 6 per cent. per annum, as against a dividend of 5 per cent.

Waterford and Limerick.—The traffic receipts amounted for the past half-year to 46,648*l*, and for the corresponding half to 43,336*l*, showing an increase of 3,312*l*. The working expenses, including 1,600*l* improvement of permanent way, stood at 48·27 per cent., against 49·23 per cent. After paying interest there remained an available balance of 19,901*l*, out of which the directors proposed to pay the usual preference dividends, and at the rate of 2½ per cent. per annum on the ordinary capital, leaving 500*l* for reserve, and 1,211*l* for the next account. The capital account showed that 1,352,842*l* had been expended.

West Cornwall.—Under a recent Act the associated companies are to allocate to this company 486,000*l* of the joint rent-charge stock, and the West Cornwall Company is to be dissolved. The revenue account shows a disposable balance of 6,988*l*, of which 975*l* is required for the preference dividend. The directors recommend a dividend on the original stock at the rate of 2*l* 10s per cent. per annum, which leaves 1,677*l*.

BANKS.

Land Mortgage Bank of India.—A call of 1*l* per share has been made payable in two instalments.

Merchant Banking.—An interim dividend of 15s per share (6 per cent.) per annum has been declared.

MISCELLANEOUS COMPANIES.

Belgian Variable Annuities.—The Bank of Belgium and their agents, the Anglo-Austrian Bank, are issuing 400,000 dividend certificates at the price of 55*f* (2*l* 3s 6d) each, authorised by the State for the prosecution of new railways. 1,600 certificates are issued for every kilometre of line brought into operation, and after deducting 18,000*f* per kil. for the expenses of the State in working the line, one-half the surplus will belong to the annuitants. It is estimated that in a few years 5*f* per certificate will be earned, and that then the Belgian Government will exercise their option of converting each certificate into a 5*f* rente.

[CONTINUED FROM PAGE 1037.]

Bolckow, Vaughan, and Co.—A dividend at the rate of 10 per cent. per annum is announced.

Brazilian Street Railway.—Interim dividend declared at the rate of 10 per cent. per annum.

Crown Preserved Coal.—Half-year's dividend 4s per share.

Imperial Gas.—After declaring the usual maximum dividends there is a surplus of 1,326*l*. New works are being pushed forward, and the price of gas has been reduced to 3s 8d per 1,000 feet.

Import Fish and Oyster, Limited.—Capital, 20,000*l*, in 5*l* shares. It is proposed to import foreign fish into the English market, more especially oysters, from Canada and the United States. There they are stated to be cheap and plentiful and of fine flavour, and that they can be easily brought over here and fattened in our oyster beds in a few weeks.

London General Omnibus.—The directors propose to declare a dividend at the rate of 5 per cent. per annum, free of income tax, which will take 15,366*l*, leaving to be carried forward 3,218*l*.

Mediterranean and Extension Telegraph.—At the meeting, an ordinary dividend at the rate of 3 per cent. per annum, free of income tax, was declared.

Mutual Tontine (Westminster Chambers).—Half-year's interim dividend declared at the rate of 3½ per cent. per annum.

Submarine Telegraph.—Dividend declared at the rate of 15 per cent. per annum, free of income tax. The French messages have increased lately.

Val de Travers Asphalte Paving.—At the meeting it was decided to divide as profit amongst the proprietors shares in the Manchester, Scotch, and Irish Val de Travers Companies to the amount of 50,000*l*, and to subscribe for 5,850 shares in those undertakings at the price of 5*l* per share, or par.

MINING COMPANIES.

Mwyndy Iron Ore.—Dividend 1s 6d per share, free of income tax.

Schooner Pond Coal, Limited.—Capital, 50,000*l*, in 10*l* shares, of which one-half has been privately subscribed. The object is to purchase and work two coal areas close to the Glasgow and Cape Breton (Nova Scotia) Railway. The purchase price is 30,000*l*, of which 10,000*l* is in shares.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

The Royal Mail Steam Packet Company having made arrangements for their steamers on the branch line between Colon and Santa Martha to call regularly at Savanilla, in the United States of Columbia, until further notice, a mail for Savanilla will be made up on the morning of the 2nd of September, and thenceforward on the 2nd of each month. Correspondence for Savanilla will be liable to the following rates of postage, which must in all cases be paid in advance, viz.:—Letters, 1s per half-oz. Newspapers—Not exceeding 4 ozs each, 1d; every additional 4 ozs, 1d. Book packets and patterns—Not exceeding 1 oz, 1d; above 1 oz and not exceeding 2 ozs, 2d; above 2 ozs and not exceeding 4 ozs, 3d; each additional 4 ozs, 3d.

The next mails for Australia will be despatched from London as follows:—via Southampton, on the morning of Saturday, the 2nd September; via Brindisi, on the evening of Friday, the 8th September. New Zealand, via San Francisco, on the evening of Thursday, the 24th August.

CORN IMPORTED AND EXPORTED.

The following is an account showing the quantities of the several kinds of Corn and Meal imported into each division of the United Kingdom; and the quantities of British and foreign Corn and Meal, of the same kinds, exported from the United Kingdom, in the week ended August 19, 1871:—

	Quantities Imported into—				Quantities Exported from United Kingdom.		
	England	Scotland	Ireland.	The United Kingdom	British.	Colonial and Foreign.	Total Exported.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The accounts from the agricultural districts being of a less satisfactory nature than hitherto, there has been more firmness in the corn trade, and factors were enabled to demand 1s per quarter more money for fine qualities, notwithstanding the arrival of a large number of cargoes off coast. French buyers have appeared in the market. Flour is firm in value, but oats, beans, and peas are cheaper. Maize and barley sold at late rates. This week's imports of foreign and colonial produce into London have amounted to 45,210 qrs of wheat, 7,580 barley, 80,170 oats, 550 beans, 11,610 maize, 2,880 sacks and 6,220 barrels of flour.

At Liverpool and Wakefield this morning wheat met a fair sale at an advance of 1s per quarter.

The Liverpool cotton market opened very firm on Friday last, but on Monday became quiet, and continued so until Wednesday, when a better tone prevailed. There has since been a very large business done, and at the close prices shows an

advance of ¼d to $\frac{1}{16}$d per lb for American descriptions, and East Indian are occasionally ¼d per lb dearer since last Friday. The total sales for the week are 102,010 bales, of which the trade have taken 64,190 bales; speculators and exporters, 37,820 bales. The imports are 77,177 bales; the actual exports, 5,260 bales; and to-day's stock is 603,960 bales. To-day the market closes firm; sales, 18,000 bales, without change in prices.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended August 24, 1871:—

	Imported.		Exported.
American.....bales	14,980	.....	740
Brazilian	16,633	.....	1,337
East Indian	62,486	.....	5,614
Egyptian	962	.....	236
Miscellaneous	1,492	.....	214
Total.....	93,553	.....	8,141

At New York on August 24, middling Upland cotton was quoted at 19½c per lb. At Bombay on the 21st inst. the market was firm at 211e for fair Dhollerah. The shipments for the week have amounted to 13,875 bales.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, July 25:—For some days after last mail left, telegrams to hand from Liverpool reported a quiet cotton market, the quotation for fair Dollerah being 7¼d on the 17th, and 7¼d on the 18th instant. Later advices are, however, more encouraging again, Reuter's message of the 22nd, which reached us yester-day, quoting 7¼d with a very firm market, the day's sales having reached a total of 18,000 bales. In the market here, the feeling from day to day has been simply a reflex of the tone of the Liverpool advices, and although prices were reduced from 2 rs to 3 rs per candy during the early part of the week when telegrams read unfavourably, they have recovered the decline within the past day or two, closing firm at about the level of last mail's quotations. The week's business has been very unimportant, say 1,700 candies in all, purchases being confined almost exclusively to Barsee, Julgaum, Khandeish, and other low Oomrawuttee descriptions, of which our available stock is now mainly comprised. There are a few small parcels of good Akote, Hingunhaut, and Kirklee cotton, but the quantity is so very trifling that holders are able to stand out for extreme rates. Of Dhollerah offering a passable selection there is scarcely any to be had. In the "time bargain" business there has been a lull during the greater part of the week, but the better accounts now reaching us from Liverpool will probably give a fresh impetus to speculation. We have again to report more seasonable weather, although we are still considerably short of our average rainfall. Sowing is however reported to be going on favourably throughout all the districts, and so far there is no serious cause for alarm. No particulars have yet reached us relative to the area of land being planted with cotton, but all our advices point to fully as large a crop being sown as last year. From Tinnevelly we have a telegram dated 22nd instant, quoting 7$\frac{1}{16}$d, e. and f.

Actual exports since last mail left, 22,63[illegible] bales.

Mr Rivett Carnac, the Cotton Commissioner for the Central Provinces, has forwarded us the following telegram, dated Nagpore, July 20, from which it will be seen that the prospects of the Berar crop have much improved:—Reports from Wurdah Valley and East Berar are favourable. In West Berar sufficient rain has fallen during the week. Mr Dunlop reports —"Prospects are now better, the young crops look well; they have got a fair though late start."

The Imperial Ottoman Bank have furnished the following report, dated Alexandria, August 11:—The discouraging Liverpool advices have produced a decline of about ¼d per lb in cotton. Sellers will not listen to offers at any lower rates, and a great deal of cotton has consequently been taken off the market. Contracts have also declined, and just touched equal to 9¼d per lb for fair, November delivery. At present the quotation is about 9½d, and very few sellers. Business on the spot and for forward delivery has been very moderate throughout the week. Barely fair, 8¾d to 8¾d per lb, f.o.b.; fair, 8¾d to 9d, ditto; fully fair, 9¼d, ditto, good fair, 9½d to 9¾d, ditto; fair with staple, 9¾d to 10¼d, ditto. Shipments from July 30 to August 10—England, 1,615 bales; Italy, 15 bales; Austria, 90 bales—total, 1,720 bales.

There has been more inquiry for sugar this week, and prices are the turn higher. The deficiency in the stocks in the United Kingdom, as compared with last year, is now 56,000 tons, the figures being 160,730, against 217,020 tons. Coffee has been in active demand, and values have risen 1s per cwt on the week. Rice afloat has sold freely; but there is no change to note in cocoa. The tea auctions have gone off somewhat flatly.

The following report, dated July 22, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—Broken weather and reduced receipts of produce in Colombo, have had their effects on the clearances of the fortnight, which show a still further decline in our principal staple. The distribution of coffee shipments are given as under:—

Plantation Coffee.

	1871. cwts.		1870. cwts.
To Great Britain.....	669,355	.....	760,096
Foreign ports.....	39,233	.....	45,599
Australia and India ...	13,533	.....	12,637
	722,121	.....	818,332

Native Coffee.

	1871. cwts.		1870. cwts.
To Great Britain	85,891	.....	64,045
Foreign ports.....	27,545	.....	41,952
Australia and India ...	3,243	.....	2,304
	116,679	.....	108,301

The improvement in the position of coffee has been well maintained since we last wrote. The transactions of the fortnight have amounted to about 60,000 bushels parchment coffee, mostly of high growth, which have taken place at 12s; the latter figure growers are now unwilling to accept, some holding out for 12s 6d to 12s 9d. Native coffee is scarcely to be had, even at the enhanced quotation of 48s for "picked and dried for shipment."

Annexed is Messrs William Moran and Co's indigo report, dated Calcutta, July 21, 1871:—There is no very material change to notice in the prospects of the indigo crop, which are, however, if anything rather less favourable. The season has nearly closed in Eastern Bengal, and the out-turn will probably fall rather short of that of last year. There is no improvement in the advices from Kishnaghur and Jessore, where the plant continues to give a wretched yield, and we fear fine weather for the future can do but little to repair the injury done by the severity of the rains. Burdwan is also doing badly. From Malda, Moorshedabad, Bhagulpore, and Purneah, the advices, on the whole, continue pretty fair, although there is room for improvement in the yield from the plant, and there are some complaints of too much rain and pressure from the rivers, more especially in the last-named district. From Tirhoot and Chuprah, our accounts vary a good deal; in some parts the yield from the plant has increased, while in others there has been too much rain, and a consequent reduction in produce. Chumparum continues to do well, and with fine weather and good second cuttings should make a very fine season. In some of the Benares and North-Western Provinces, the fall of rain has lately been excessive; a good deal of late sown plant has been submerged, and the necessary weeding has also been retarded. The Khoontee crop is still said to be looking green and healthy, but has had quite as much rain as is good for it.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on July 14, thus refer to the Cape wool trade:—The arrivals of wool have been less even than in the previous fortnight, owing to heavy rains, which have delayed the few waggons which are on the road. Rates of carriage from the country towns are declining, and many country dealers who have held back their produce for lower rates will soon be able to forward. Scoured wools, both Uitenhage and country scoured, sell immediately on arrival at fully former rates. The few arrivals of fleecewashed have been sold at about our former quotations, but we believe that with larger supplies, prices would decline. For long-stapled grease wools 7¼d to 7¾d has been paid to complete shipments. Washing wools are in great request, but the supply is very small. Grease—Full-grown, superior, 6¼d to 7d, fine, light, for scouring, 5¾d to 6d, heavy and inferior, 5d to 5¼d. Fleecewashed—Superior, clean, 10d to 10¼d, good average, 8¾d to 9¼d, inferior and seedy, 7¼d to 8¼d. Snow-white—Prime Uitenhage scoured, 17d to 18d, second quality ditto, 15¼d to 16¼d, superior country scoured, machine washed, 15¼d to 16¼d; superior country scoured, 15d to 15¼d; inferior to good country scoured, 13d to 14¼d.

The annexed is dated New York, August 11:—The prospects for a good business season are decidedly auspicious. Some departments of the home trade are thus early beginning to show signs of activity, albeit there is still a large absenteeism from the ranks of our active business men. Prices of nearly all the staple commodities, both of native and foreign production, are so remarkably cheap as to inspire confidence in buyers, and this fact is of sufficient importance in itself to impart a healthy impetus to trade, without fostering a spirit of pernicious speculation, from which there is just now a remarkable absence. But, aside from the important feature of

low prices, the country has been blessed with a good harvest, an easy money market throughout the autumn months is reasonably certain, and what is perhaps of paramount importance, the world at large is at peace, with no prospect of the recurrence of any political element calculated to interrupt the even current of the affairs of our own or foreign nations. And, besides, the credit of our Government has become so enhanced, the condition of our foreign trade has so improved, and the drift of the surplus capital of Europe is so unmistakably in the direction of our shores for investment, that a continued low ruling of gold is almost a foregone conclusion. Here, then, it must be admitted, is a substantial basis for a good, if not an unusually active, fall trade. During the period under review there has been no variation from the extreme low rates for money long current, while the gold premium is unsettled and exchange lower.

THE COTTON TRADE.

The cotton market opened this week with a good demand, but on Monday and Tuesday was quiet, and prices were slightly in favour of buyers. Yesterday the business increased, and to-day has been very large, with an advance in most descriptions. For Sea Island the demand has only been moderate, without change in prices in the medium and better grades; some sales of common have been made at lower and irregular prices. American was firm in the early part of the week, but on Monday and Tuesday was dull and irregular. Yesterday and to-day, with an active demand, prices have advanced, and are now ¼d to ¼d higher than last Thursday. New York advices to the 24th instant quote middling Upland 19⅛ cents, costing to sell in Liverpool 9 1/16d per lb by steamer. Brazil was in limited request at the opening, but in active demand at the close of the week, quotations showing an advance of ⅛d per lb. Egyptian was pressed for sale in the early part of the week, when lower prices were accepted; the improvement in the general market has since caused holders to assume a firmer tone, and the quotations of last week are resumed. East Indian continues to be freely offered, without change in price in the lower qualities; but the medium and better sorts are attracting more attention from buyers, and close rather dearer.

In cotton to arrive and for future delivery prices gave way in the beginning of the week, but the transactions have since been extensive, and quotations have risen about ⅛d per lb upon the rates of last week. The latest quotations are—American, basis of middling, Texas, nearly due, 9⅛d; from New Orleans, not below good ordinary, September delivery, 9⅛d; October, 9 7/16d; from any port, new crop, not below good ordinary, October delivery, 9⅛d; October-November shipment, 9⅛d; Mobile, September delivery, not below good ordinary, 9⅛d; not below strict ordinary, 9⅛d; low middling, Texas, at sea, 9⅛d; good ordinary, Texas, at sea, 8⅝d; ordinary, from any port, steamer named, 7⅝d; Bahia, basis of fair, mutual allowances, ship named, 8⅜d; Maranham, basis of fair, mutual allowances, ship named, 9d; Broach, good fair, machine-ginned, at sea, 8 1/16d; Dhollerah, fair new merchants, June sailing, 7 3/16d; Oomrawuttee, fair new merchants, ship named, 7⅛d per lb.

The sales of the week, including forwarded, amount to 102,010 bales, of which 27,320 are on speculation, and 10,500 declared for export, leaving 64,190 bales to the trade.

25th August.—The sales to-day will probably amount to about 15,000 bales, with a steady market.

524310	603960	1677760	2073940

The above figures show:—

	bales.
An increase of import compared with the same date last year of	728.070
An increase of quantity taken for consumption of	416.180
An increase of actual exports of	289.070
An increase of stock of	76.650

In speculation there is an increase of 206,150 bales. The imports this week have amounted to 77,177 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to August 18) is 56,000 bales, against 50,000 bales at the corresponding period last year. The actual exports have been 5,262 bales this week.

LONDON.—August 24.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

The market was very quiet until Wednesday, when an active demand arose, which has since increased; prices for arrival, as compared with those of last week, show an advance of ⅛d to ¼d per lb, but on the spot there is no material change.

NEW YORK.—AUGUST 11.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Aug. 11. From the figures thus obtained it appears that the total receipts for the seven days have reached 9,454 bales, against 10,472 bales last week, 10,900 bales the previous week, and 10,661 bales three weeks since, making the total receipts since Sept. 1, 1870, 3,988,324 bales, against 2,880,079 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 1,090,145 bales. The exports for the week ending this evening reach a total of 4,727 bales, of which 4,727 were to Great Britain, none to France, and none to rest of the continent, while the stocks as made up this evening are now 167,005 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night —

Week ending Aug 11	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.

Total	4727	...	4727	7104	167005	94702
Total since Sept. 1	3822361	787715	4610076	2160733	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 4,382 bales, while the stocks to-night are 72,303 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Aug. 4, the latest mail dates. We do not include our telegrams to-night, as we cannot ensure the accuracy or obtain the detail necessary by telegraph :—

The market for raw cotton has continued a little more lifeless, the course of a business generally throughout the week being rather dull. Prices, however, have not varied much, closing to-night as for the previous Friday. Orleans and Uplands are unchanged, quoted 16½ for middlings and 16¾ for low middlings, both for Orleans and Uplands. The sales of the week have been 2,000 bales, and delivered 2,000 bales, leaving stock on hand to-night 167,005 bales, against 94,702 bales last year. The receipts have been

Early in the week they showed signs of giving way, and a few pressing sellers sold rather freely. During the last two days, owing to a stronger and more active cotton market, producers are firmer in their demands, but as buyers see no cause for this they keep aloof, hence no increase of business has occurred. The home trade continues quiet, but with a better prospect for cloth, as the stocks are light, but buyers will soon have to supply themselves for next season's demand. Shipping yarns are quiet, but steady. Cloth for India and China is difficult to move in quantities. The upward movement in cotton, caused solely, we suppose, by the decreased stock in Liverpool, has rather curtailed business here within narrower limits than before. Though the stock of cotton is decreasing for the present, larger imports will soon take place to augment it, and as spinners are unusually large holders, their wants will be easily supplied for some time to come.

Messrs Alexander Collie and Co. received the following telegram from Manchester yesterday:—Owing to the advance in cotton producers are demanding an advance of three halfpence to threepence per piece since Tuesday, which is decidedly checking business.

BRADFORD.—The demand for wool is less active than it was a short time ago. The transactions are comparatively few and small, and the upward tendency of prices is, at any rate, arrested, if there is not even a softening tendency in some cases under exceptional circumstances. Good wethers and hogs are still chiefly in demand. Noils and brokes meet with a ready sale at firm prices. There is less business doing in the yarn and the piece markets.

LEEDS.—The woollen market has been fully attended, the merchants, however, much outnumbering the manufacturers. The latter can more profitably employ their time at home, while so many unfinished orders remain on hand, and the season is fast approaching its waning point. Large quantities of the heavier class continue to be taken for export. The all-wool superfine trade keeps brisk, notwithstanding the high price of the raw material.

ROCHDALE.—In the flannel market there was less eagerness among purchasers. Manufacturers have resolutely set their faces against prolonging present prices, and demonstrate plainly enough that the highest of the rates yet paid are sadly out of proportion with the present price of the raw material. Useful wools are reported scarce, and buyers are always met with higher prices than the last they had paid.

BELFAST.—Flax—Some samples of new crop offered in our markets; these, however, were limited; quality generally was good, and fair prices were realised. Yarns—Business transacted was to an increased extent. Linens, brown, handloom—Demand fair for heavy linens and cloth for dyeing and hollands. Stocks not extensive. Prices unaltered. Powerloom—Demand active for roughs of approved manufacture; manufacturers are well supplied with forward orders, and rates rule very firm. Inferior makes not much inquired for, and prices of same are rather irregular.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, AUGUST 11.

The markets for flour and grain have been less active during the past week, and prices have shown much irregularity. The receipts of flour have been liberal, and the pressure has shown a steady increase, under which prices of all grades have again given way 10c to 20c per barrel. This decline, however, with a better supply of freight room for foreign markets, and an advance in wheat, has led to a largely increased demand for all grades under $5.50, and these at the close show some reaction. The quantity taken for export has been larger than for several weeks past, and stocks are without further increase. The medium grades are held with rather more confidence, for at the present prices of wheat these flours cannot be manufactured at a profit. To-day low grades of extras were rather firmer, at inside prices; but the higher grades were weak and unsettled. Wheat has arrived much less freely, and notwithstanding the comparatively liberal receipts of new winter at Toledo and St Louis, the aggregate receipts at the Western markets show a considerable falling off from last year. The scarcity of sound wheat at this market has compelled buyers to pay a slight advance, but the market has shown little buoyancy, although favoured at the close by some depression in ocean freights. A few boat-loads of prime spring have been sold at $1.30 to $1.32 for No. 2, and $1.34 to $1.35 for No. 1, with new red and amber winter ranging from $1.34 to $1.40; old amber, $1.44 to $1.48; and new white, $1.43 to $1.50. To-day the scarcity continued, and private advices from Liverpool were better. No. 2 spring sold at $1.34, and new red and amber winter, $1.39 to $1.44. Corn has arrived less freely at the West as well as at this market, and holders have shown much strength, storing freely when their views have not been met. The home market has been good, but in the absence of a full supply of freight room the export movement has been only moderate. To-day, with an advance in Liverpool, the market was firm and active, at 66c to 66½c for mixed. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The changeable weather of the past week, coupled with the shortness of supplies sent forward by farmers, has had a hardening influence on the corn trade, and contrary to general expectation prices have had an upward tendency. Opinions vary considerably with regard to the actual yield of the wheat crop, but there is reason to believe that the general good condition in which the wheats have so far been secured and the fact that the weight per bushel is above the average, will compensate for any deficiency in bulk. Probably it will be found that the deficiency is of no serious importance. The samples of new English exhibited here have not been numerous, but the weights have run up as high as 65 lbs. The prices realised have been equal to those current last week. To-day there was rather more inquiry for foreign, and Russian and American sorts commanded 1s per quarter over the rates current last week. Flour has moved in sympathy with the wheat market, and the quotations have been firmly maintained.

Spring corn generally has been quiet. Barley has proved a large crop, and there now appears to be less reason to complain of the quality, some excellent samples having come to hand. Much depends upon the character of the weather for the next

week or so for this and other crops. With liberal supplies on offer, Russian and Swedish oats have ruled lower in value; while maize, beans, and peas are also cheaper.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 120 grain and seed-laden vessels have arrived at ports-of-call, viz.:—35 wheat, 26 maize, 7 barley, 7 rye, 7 beans, 1 millet-seed, 5 linseed, 5 rapeseed, 2 cotton-seed, 4 valonea, and 1 palm-nut kernels. The floating grain trade has been fairly active for fine cargoes, which are scarce. Business has been checked by the fact of a large number of cargoes arrived this week being out of condition. Wheat—Imperfect cargoes have been difficult to sell, but good cargoes have been in demand, and risen 2s to 2s 6d on the week. Maize—Fine cargoes 6d to 1s dearer; inferior slow sale at irregular prices. Barley—Good cargoes are nominally worth 27s 6d to 28s per 400 lbs. Rye—Good cargoes are nominally quoted 31s 6d to 32s per 480 lbs. The reported sales are as follows:—Wheat—13 arrived cargoes, Marianopoli, 49s and 49s 3d; Ghirka Odessa, 47s; Nicopol Ghirka, 46s 9d; winter, from Taganrog, 46s 6d; hard, from Taganrog, 44s and 44s 3d; New Coast Ghirka, from Taganrog, 49s per 492 lbs; No 1 spring, from New York, 51s 9d to 53s; Chilian, from Tome, 57s 6d per 492 lbs. To be shipped, 2 cargoes No 1 spring, from New York, 49s; and No 2 spring, from Montreal, 48s 6d per 480 lbs. Maize—15 arrived cargoes: Galatz, 29s 9d and 31s; old and new Foxanian, 31s 6d per 492 lbs, Bulgarian, 28s 9d; Ibrail, 25s 9d; Danubian, 26s and 26s 9d; Wallachian, 27s 3d to 28s; mixed, from Baltimore, 30s 6d; and high mixed, from Montreal, 31s per 480 lbs; new Bulgarian and Danubian, from Ibrail, 26s 3d per 480 lbs; on passage, 1 cargo Odessa, 30s per 492 lbs. Barley and wheat, arrived 1 cargo from Enos—Barley, 27s 3d per 400 lbs; wheat, 41s per 480 lbs. Linseed in fair demand at about last week's prices—2 arrived cargoes Azow, 59s, and Odessa, 57s 7½d per 424 lbs; arrived in London 100 tons East India, from Calcutta, 62s 6d per 410 lbs, A.T. On passage, 650 tons ditto at 60s 7½d to 60s 9d. Shipping, 1 cargo Azow, at 57s per 424 lbs, A.T. Rapeseed steady at last week's rates—Arrived in London, 300 tons ordinary brown Calcutta, 65s 3d; on passage, 250 tons ditto, 65s 3d and 65s 6d, shipped or to be shipped, 300 tons ditto, 64s 9d, and 4,000 to 5,000 cultivated Danubian, 65s per 424 lbs, A.T. Cottonseed, quiet. The only sale is a cargo Egypt, August shipment, at 9l 2s.

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—There has been rather more steadiness in the market during the present week, but the demand is by no means active. The refiners have taken full supplies of West India, and several floating cargoes have also sold. On the spot the sales to yesterday reach 2,649 casks. Barbadoes by auction went at 29s 6d to 32s 6d, and grainy ditto at 34s 6d to 35s 6d. Crystallised Jamaica and Demerara have sold at prices which could not be obtained last week, and refining kinds are now firmer. Manila meets with more inquiry, several parcels, chiefly the lower qualities, finding buyers. Refined is without improvement. Imports of cane sugar have been rather liberal, but stocks in all the ports are smaller than usual. The landings last week were 2,600 tons, and the deliveries 4,430 tons, nearly all for home consumption, leaving the stock at the close 73,400 tons, against 105,800 tons in 1870, and 83,530 tons in 1869 at the same period.

Mauritius.—About 2,500 bags sold privately, including grainy yellow at 36s 6d; soft brown and yellow, 25s to 31s. 1,120 bags by auction sold at 25s to 29s for soft brown, and 30s to 32s for grey and yellow.

Manila.—About 20,000 bags have changed hands. Low brown, 23s; Taal and Zebu, 21s to 26s; clayed, 24s to 26s per cwt.

Egyptian.—209 bags soft qualities were withdrawn.

Java.—1,750 bags low brown have sold at 22s.

Cuba.—157 boxes, part sold at 35s for dry grainy.

Floating Cargoes.—Three of West India sold for the United Kingdom at 25s 3d to 25s 7½d; one at 24s 6d to 26s; one Porto Rico at 27s 9d; one of Havana, No. 11 to 11½, at 29s 3d per cwt.

Refined.—The market has been steady, with a moderate business doing in dry goods from about 40s to 42s 6d upwards for titlers. Other kinds of refiners produce remains quiet.

MOLASSES.—About 250 puncheons West India have sold during the week. Dominica, 11s 6d; Antigua, 12s 6d to 13s per cwt.

COFFEE.—The market has been very active, with higher prices, and the demand from the continent is still good. About 3,000 bags native Ceylon have changed hands by private contract at 57s to 58s, for good ordinary to rather bold quality. Business is also reported for arrival, the prices not given. The sound portion of 1,575 bags by auction sold at 57s to 58s; superior quality and bold, 59s to 60s 6d. 15 casks, 58s 6d. 2,888 casks 1,200 barrels and bags plantation sorts went with spirit at about 2s recovery on last week's quotations: grey, 63s to 73s; colory, low middling dull to middling, 65s to 74s; good middling to fine bold, 75s to 89s. 344 packages Mocha were chiefly taken in; a portion selling at 84s to 90s for low ungarbled and mixed quality. 1,353 cases 78 bags East India, consisting of Wynaad and Coorg, sold steadily at 62s to 75s 6d. 58 cases Natal were chiefly taken in. 16 bags sold at 60s 6d. 635 bags Costa Rica at 58s to 61s 6d. 482 bags Guatimala at 59s to 61s. 374 bags Rio were bought in. Several parcels of native East India sold to arrive, including Cochin at 59s 6d to 60s. A floating cargo of good firsts Rio for the Mediterranean at 54s 6d; one of Santos, at about 58s 6d per cwt for a near port. The stock has further increased to 21,710 tons, against 21,960 tons last year, but in 1869 it was 24,400 tons. Landed last week 2,510 tons, delivered 1,730 tons, against 950 tons in the previous season.

RUM.—The business this week has been chiefly in Jamaica, and the business reported is at 3s 7d to 4s 4d per gallon. There seems less inquiry and several arrivals have taken place. Demarara and all common kinds remain as before. Mauritius quoted 1s 4d to 1s 4½d per proof gallon, according to quality.

COCOA.—Several parcels of Guayaquil have changed hands at firmer prices, from 50s to 52s, and superior quality at 57s. The market generally is steady. Of 479 bags Trinidad by auction on Wednesday, a portion sold at 64s to 90s for common to good quality. The fine descriptions were bought in. 36 bags Granada part sold at 58s per cwt.

TEA.—There have been further public sales of tea without reserve, at which lower prices occasionally ruled. 15,084 packages brought forward to yesterday sold, including a common new season's black leaf congou, at 11d to 11¼d; other grades 1s 4d to 1s 8½d. Scented capers again declined, the range of prices being 11d to 1s 0½d per lb. The Abbotsford, from Foo Chow, has arrived with new season's Kaisow congou, and the prices hitherto ranged from 1s 4d to 2s 4d per lb. At the sales of Indian tea there was more demand for good qualities, all inferior and weak being dull. Privately, a steady business, and the finest grades show 2d per lb recovery on the recent very depressed quotations.

RICE.—Numerous floating cargoes have again sold, including six of Rangoon at 2s 3d to 2s 3½d for the continent; one off the coast at

9s 7½d, one at 10s 3d, landed terms. Two Necrancie Arracan for the continent at and about 9s 3d; one Moulmein at 10s, ex ship, for London. 600 tons Raree and Bengal at 9s to 9s 6d, according to terms. 1,364 bags Bengal by auction were bought in.

IMPORTS and DELIVERIES of RICE to Aug. 19, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ..... tons	42600	32830	53710	40250
Deliveries	72 50	44000	40870	34530
Stock	23930	38590	45520	22300

SAGO.—Increased supplies have resulted in a decline of 3d to 6d upon small grain, at which 3,326 bags partly sold: common to good, 15s to 16s 6d; a few lots low, 14s 6d. Of 462 boxes, a few lots realised 17s 6d. 275 bags bold brownish part sold at 17s per cwt.

TAPIOCA.—1,803 bags Penang were taken in. 596 bags good Singapore sold at 2¼d to 2⅜d per lb.

BLACK PEPPER.—Several sales have been made at a further slight advance. Penang, 6d to 6⅛d; Singapore, 6d to 6¼d. To arrive, 5⅞d to 6d, and 9 1/16d to 6⅛d paid respectively. At auction, 475 bags Singapore sold at 6d to 6⅛d; a few lots 6¼d for grey to good. 80 bags Trang at 6⅛d to 6¼d per lb.

WHITE PEPPER.—325 bags partly met with buyers at 10d to 10⅛d for Singapore, including slight sea-damaged.

OTHER SPICES.—At the public sales on Wednesday 41 cases brown Penang nutmegs were chiefly taken in above the value. A few lots sold at a further advance, viz., 2s 9d for 107's. 10 casks small limed from Amsterdam sold, prices not given. 2 cases good Penang mace realised the high price of 4s 3d. 40 bags Amboyna cloves sold at 4¼d. 52 bags Zanzibar at 3d. 220 bags fair quality cinnamon chips at 4¼d per lb. The cinnamon sales on Monday will contain about 2,300 bales. 31 barrels Jamaica ginger sold steadily at about former rates: low to good, 45s to 76s. 134 cases Cochin went steadily: rough, 40s to 45s; part scraped, 56s to 73s. 562 bags African sea damaged, &c., 28s to 32s. 200 cases cassia vera from Singapore in small bundles part sold at 73s per cwt.

SALTPETRE.—Transactions have been upon rather a limited scale during the week, and amount to about 700 bags on the spot. Refraction 7⅓, 27s 6d; 5, 28s, short prompt. No further business reported for arrival.

IMPORTS and DELIVERIES of SALTPETRE to Aug. 19, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported ..... tons	7910	7050	7480	4310
Total delivered	7430	10060	6150	6640
Stock	2870	1820	5520	5800

Deliveries last week 258 tons.

COCHINEAL.—Reports of the Teneriffe crop having suffered injury has stimulated the demand, and business is reported privately at full prices to 1d advance. This improvement was maintained at the sales on Wednesday. 887 bags Teneriffe chiefly sold: silver, 2s 4d to 2s 7d; black, 2s 4d to 3s 9d. 201 bags Honduras: silver, 2s 4d to 2s 9d; black, 2s 9d to 2s 11d. 25 bags Mexican: silver, 2s 3s to 2s 5d; black, 2s 4d to 2s 6d per lb. The stock of Teneriffe is 7,130 serons, against 6,860 and 3,990 serons, &c., in the two preceding years at the same date. There have been delivered 19,210, 12,306, and 14,020 serons, &c., respectively to present date.

OTHER DRYSALTERY GOODS.—At the public sales 1,987 packages cubes gambier part sold at 20s 6d to 21s for good. Block is firm at 16s 3d to 16s 6d. 150 tons sold to arrive at 15s 10½d to 16s, ex ship. 1,300 boxes cutch were taken in at 22s for good. Sales privately have been limited. 1,000 bags Bengal turmeric were bought in at 20s. Orchella weed was taken in at 30s to 60s. 342 bales Persian and Egyptian safflower withdrawn. Business has been done in Bengal by private contract.

SHELLAC is steady, and 565 chests by auction partly sold: garnet, 115s to 117s 6d; fine orange, 140s to 147s 6d; one lot, 130s; button, 120s to 150s per cwt.

METALS.—The markets remain rather quiet, excepting for iron which is still in good demand. Rails fully support the prices quoted, there being a ready business for exportation, which is likely to extend to the continent. Other sorts of manufactured are unchanged In Scotch pig the operations have been upon a large scale up to 63s 6d cash. No sales reported in spelter, and prices are nominally the same as before. English tin offers upon reduced terms. Foreign has been depressed, but now shows some recovery. Straits, after receding to 130*l*, became firmer, and sold yesterday at 131*l* to 132*l*. Tin plates are in good demand. Lead has been steady. The market for copper is rather weaker. Chili, &c., 66*l* 10s to 67*l* 10s; Walaroo, 76*l* per ton. English can be obtained below fixed quotations.

HEMP.—There have not been any public sales, but a parcel fair roping, disposed of by private contract, realised full rates. Some business has been done at and about 46*l* per ton. At auction yesterday 135 tons Russian went at 30*l* 10s to 30*l* 15s for clean Petersburg, and 32*l* 15s per ton for Rhine.

JUTE.—Business in Dundee is quiet both for jute and yarns, with prices rather tending downward. Transactions in this market have been unimportant, and 3,118 bales by auction on Wednesday partly sold at about last week's rates. Low, 18*l* to 19*l*; middling to fine, 21*l* to 26*l* 10s. A parcel of common quality was reported afloat sold yesterday at 19*l* per ton.

LINSEED.—A moderate extent of business has been done. Calcutta at 62s 6d to 63s ex ship, summer and autumn shipments, 60s 3d to 60s 9d. A cargo of Odessa off the coast at 57s 7½d per quarter.

OIL.—Olive is firmer, owing to reports of the injury to the olive crops. Business is chiefly restricted to the lower qualities, Mogadore selling at 48*l* 10s. The markets for common fish are depressed, owing to advices of an abundant take at Davis' Straits. Pale seal nominal at 33*l*. Sperm dull. Colonial, 81*l* per tun. Palm quiet at 37*l* for Lagos, and inferior sorts in proportion. Cochin cocoa-nut continues scarce. Ceylon dull at 38*l* to 39*l*, and 5s less has been accepted for arrival. Linseed is steady at 32*l* 10s to 32*l* 15s on the spot; 32*l* demanded to the end of the year. English brown rape steady at 41*l* 15s to 42*l* per ton, on the spot and to the end of the year. Refined as before.

PETROLEUM is in better demand. American refined, 1s 5¾d to 1s 6d per gallon.

TURPENTINE.—American spirits, after declining to 36s, recovered to 36s 3d to 37s per cwt.

TALLOW.—Prices of foreign remain unaltered as for some weeks past, and the market is steady. This morning's quotations are as follow:—Petersburg on the spot, 44s; October to December, 45s; December only, 45s 3d to 45s 6d per cwt. The sales of Australian declared for to-day amount to barely 1,000 casks.

PARTICULARS OF TALLOW—Monday, Aug. 21. 1871.

	1868. casks.	1869. casks.	1870. casks.	1871. casks.
Stock this day	21.937	22,100	31,695	23.508

Price of town	45s 9d	46s 6d	44s 3d	45s 0d

HIDES.—The sales of East India on Thursday went at full prices to a slight advance for kips. Tanned hides and buffalo ditto went at steady prices. Total quantity offered, 282,284 hides, of which 190,250 sold.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is firmer, and importers demanding rather higher rates. Sales of West India to-day 480 casks. For the week 2,522 casks. Barbadoes by auction was chiefly taken in. Privately 21,000 bags Manila sold: clayed, 24s to 26s 6d; Zebu, 22s 6d to 23s. A floating cargo of Bahia in bags at 22s for the United Kingdom.

COFFEE.—8,234 bags Costa Rica sold at full market rates. Pale to colory, 62s to 78s 6d; a few lots fine, 80s 6d. 362 casks 25 barrels 243 bags plantation and 500 bags native Ceylon, sold at previous advanced rates, and 379 cases 1,477 bags East India at steady prices. 158 packages Mocha were bought in.

BLACK PEPPER is held for a further advance.

SALTPETRE.—50 tons Bengal in course of landing sold at 28s per cwt, usual terms.

CUTCH.—862 boxes fine Pegue were taken in at 22s per cwt.

METALS.—The chief feature to-day was a decline upon Scotch pig iron to 63s per ton cash.

TALLOW.—Foreign unchanged. At auction 976 casks Australian mostly sold at previous rates: mutton, 42s 6d to 43s 9d; beef, 41s to 41s 9d; mixed melting, 41s 6d to 42s 6d; and inferior, 36s 6d to 38s 6d per cwt.

ADDITIONAL NOTICES.

DRY FRUIT.—The first cargo has arrived this week and further parcels are expected on Monday. Prices opened at from 32s to 38s, and sales were effected at a fair rate, although the quality proved scarcely so satisfactory as buyers had hoped for. Better descriptions are expected by later arrivals. New Valencias were on the market on the 22nd inst., and quality and condition both gave satisfaction, notwithstanding the evident appearance of hurried packing. The whole of the first shipment was readily cleared up, at prices ranging from 32s to 37s; a small portion of exceptionally fine fruit fetching even more. The second cargo is in the river to-day, and will be placed on the market and probably cleared to-morrow.

ENGLISH WOOL.—Market very firm.

COLONIAL WOOL.—The market remains very firm; good demand.

FLAX.—Market steady.

HEMP.—Market for Russian very dull. Manila firm, and a large business done for forward delivery.

SILK.—Market weak, and little doing.

SEEDS.—The seed trade rules rather inactive, owing to the uncertainty prevailing as to the yield of seeds. Thrashings are not satisfactory, and it remains yet to be seen whether the seed crops are not over estimated, and quotations were better than expected.

TOBACCO.—The market for North American tobacco continues very quiet, and in Kentucky there has been comparatively nothing doing, whilst for Virginia of old import there has been more inquiry; but the stock in first hand is so very small that the operations of buyers have consequently been very limited. In other growths, such as substitutes and segar tobaccos, there has been a fair business done.

LEATHER.—The demand for leather has been good throughout the past week, and although there was not a large attendance of buyers at Leadenhall on Tuesday, the supply of fresh leather was unusually small, and the stocks have been still further reduced. The demand was especially good for light crops, good English butts of all weights, foreign butts, good English shoulders, dressing hides, shaved hides, calf skins, and horse hides. Prices still show an upward tendency, particularly of English and foreign butts, and common dressing hides.

METALS.—The week has been quiet. Copper dull of sale, and the few transactions reported have been at slightly reduced rates. Iron continues to hold a firm course. Tin has fluctuated, but has rallied from the lowest point. Spelter is rather neglected. Lead is firm, as also are tin plates.

METROPOLITAN CATTLE MARKET.

MONDAY, Aug. 21.—The total imports of foreign stock into London last week amounted to 17,244 head. In the corresponding week in 1870, we received 11,940; in 1869, 12,570; in 1868, 7,958; and in 1867, 8,163 head.

Less firmness has been noticed in the cattle trade to-day. The supplies of stock have been larger, and the quotations have been barely maintained. A large number of foreigners has come to hand, and some well-conditioned animals have been noticed in the supply. The best breeds have made from 5s 2d to 5s 6d per 8 lbs. From our own grazing districts the receipts have been on a fair average scale. Only three Aberdeen beasts have been offered, and they have been disposed of at 6s per 8 lbs. The best shorthorns have made 5s 8d to 5s 10d per 8 lbs. There has been a good show of sheep in the pens, including a large number of foreign. The trade has been quiet. The best Down

have occasionally made 6s 10d, but 6s 6d to 6s 8d per 8lbs has been the general top quotation. The supply of lambs has been moderate. The demand has been quiet, but prices have ruled firm, at from 6s 6d to 8s per 8lbs. Large supplies of calves have been on sale. With a slow trade, prices have had a drooping tendency. Pigs have been dull on former terms.

SUPPLIES ON SALE.

	August 22. 1870.	August 21. 1871.
Beasts	3,240	4,580
Sheep and lambs	24,320	24,020

Lamb, 7s to 7s 4d

HOP MARKET.

Boroughs, Friday, Aug. 25.—Although the hine has derived much benefit from the recent favourable weather, the crop will be smaller than for many years past. The market has been inactive, but for all classes of hops extreme prices have been realized.—Mid and East Kent 9l. to 14l.; Sussex, 6l. to 10l.; Farnham and country, 9l. to 12l.; Surrey, 6l. to 10l.; ords, 2l. to 3l.

POTATO MARKETS.

Borough and Spitalfields, Friday, Aug. 25.—The supplies of potatoes have been limited. The quality has been good, but prices have been steady.—Regents, 60s to 80s; Scotts, 40s to 60s; Kidneys, 80s to 120s.

LIVERPOOL MARKETS.

WOOL.

[illegible]

Friday, Aug. 25.—Fine wool sales were held here on Wednesday and Thursday last, with about 10,000 bales, of which about 7,000 bales were Port[illegible] and other Mediterranean wools, the remainder consisting of Peru, Natal, Portugal, Spanish, &c. The attendance was fair, but the demand was equal to about an average of the previous three of weeks, and a large proportion of Tuesday, &c., had consequently to be withdrawn; other sales went at about late rates.

CORN.

[illegible]

Friday, Aug. 25.—There has been a fair attendance at this market to-day. Wheat closed with a quiet appearance, at an advance of 2d to 3d per quarter on Tuesday's rates. Flour, 6d to 1s higher; beans, 6d; and maize, 2d higher; barley, 2d to 3d; malt, 3d to 6d; peas, 2d to 3d higher. Oats, 2d to 3d low; oatmeal, round, 20s to 23s 6d; long, 20s 6d to 24s; Indian corn, 29s 9d. The tone of the market was steady.

WORKSOP, Friday, Aug. 25.—At this market to-day new wheat came to hand sparingly, and met a ready sale at high prices. Old wheat was in demand, with a moderate demand for fine fresh parcels. Another extensive sale.—The supply was fair, and fine old red or white wheat was in better than on last Friday. A few samples of new wheat were shown, but the quality was only moderate.

The Gazette.

TUESDAY, August 22.

BANKRUPTS.

Harriet Davis, Priory Park road, Kilburn.

Henry Dewes Palmer, Clonmore road, Peckham rye, clerk in the Civil Service.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Baryotes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK'S, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For parish schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents are warned that their children are saturating from the carelessness with which they have suffered to exist. The reason is evident—the brush extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—Public Health, September 14, 1870.

BANK OF BOMBAY.

IN LIQUIDATION.

Notice is hereby given, that an Extraordinary General Meeting of the Proprietors of the Bank of Bombay (in Liquidation), will be held at the Offices of the New Bank of Bombay (Limited), in Elphinstone Circle, Bombay, on Monday, the second day of October, one thousand eight hundred and seventy-one, at Three o'clock in the afternoon, for the following purposes:—

First.—To consider and determine as to the propriety of forthwith completing the Liquidation of the Bank, and distributing the surplus assets thereof, and dissolving the Bank according to the provisions of Section XCV. (sub-sections 10 and 11) of Act XIX. of 1857, of the Legislative Council of India.

Second.—To consider and determine on the course to be adopted in order to provide for the debts and liabilities of the Bank now still outstanding, the nominal amount of which is Rupees two hundred and six thousand five hundred and forty, Annas ten, and Pies nine, according to the particulars stated below, out of which sum of Rupees two hundred and six thousand five hundred and forty, Annas ten, and Pies nine, it is, however, estimated that not more than Rupees fifty-one thousand six hundred and thirty-five will be established as payable.

Third.—To consider and decide as to the adoption of a scheme, whereby, in order to facilitate the dissolution of the Bank and to provide for the said outstanding debts and liabilities, it is proposed that the sum of Rupees sixty-one thousand six hundred and thirty-five shall be placed in the hands of two or more Trustees, to be nominated or approved of by the proprietors at the meeting, Rupees fifty-one thousand six hundred and thirty-five thereof being contributed by the Bank, and Rupees ten thousand, the remainder thereof, being contributed by Mr William Rodgie (the Liquidator of the Bank) upon trust; that the said Trustees shall out of the said sum of Rupees sixty-one thousand six hundred and thirty-five pay all claims in respect of the said outstanding debts and liabilities of the Bank which shall be satisfactorily established before the thirteenth January, one thousand eight hundred and seventy-four; and that the said Trustees shall after the said day stand possessed of the balance of the said sum of Rupees sixty-one thousand six hundred and thirty-five then remaining in their hands (if any) in trust for the said Mr William Rodgie, subject to any claim in respect of the said debts and liabilities which shall have been made before that time; and that the said Mr William Rodgie shall enter into covenants with the Bank and the Trustees for the payment by him of all claims in respect of the said outstanding debts and liabilities of the Bank which the sum of Rupees sixty-one thousand six hundred and thirty-five proposed to be placed in the hands of the Trustees shall not be sufficient to pay, and also for the indemnification by him of the Bank and the proprietors and the Trustees from all responsibility in respect of the said outstanding debts and liabilities of the Bank. Copies of the Deed by which it is proposed to carry the above scheme into execution in case the same shall be approved by the proprietors may be seen at the Office of Messrs Rimington, Hore, and Langley, Solicitors to the Bank, at Apollo street, Bombay, and at the Offices of E. M. Hore, Esquire, 52 Lincoln's inn fields, London.

Schedule of outstanding debts and liabilities on twenty-third June, one thousand eight hundred and seventy-one:—

MOSCOW DISCOUNT BANK,

MOSCOW.

Authorised Capital ..... 10,000,000 Silver Roubles

Paid-up Capital ..... 2,000,000 — —

Established January, 1870, under the auspices of the following gentlemen, who form the present Board of Directors, and will remain in office for three years:—

CHAIRMAN—M. Wogau, Esq. (Messrs Wogau and Co.)

S. Sasikoff, Esq.	A. Spiridonoff, Esq.
J. Zenker, Esq. (Messrs Zenker and Co.)	L. Knoop, Esq.
P. Botkin, Esq. (Messrs P. Botkin's Sons.)	A. Abrikossoff, Esq.
A. Schilling, Esq.	C. Catoire, Esq. (Messrs Vve. A. Catoire & Fils.)
C. Soldatenkoff, Esq.	C. Pepoff, Esq.
R. Spies, Esq. (Messrs Stucken and Spies.)	P. Pierling, Esq.
	J. Stschukin, Esq.
	K. Gericke, Esq

The Bank grants Drafts and Letters of Credit, payable in all Russian and Foreign towns.

Advances made against the Deposit of Stocks, Shares, and other Securities bearing interest, and on bullion and merchandise.

The purchase, sale, and safe custody of Stocks, Shares, and Securities undertaken.

Deposits received, to be drawn against or repayable at agreed periods.

Interest will be allowed:—

At 3½ per cent. per annum on sums at call.

5 — — subject to six months notice of withdrawal.

6 — — subject to twelve months' notice of withdrawal.

RAILWAYS OF THE SOUTH OF AUSTRIA AND UPPER ITALY.

REPORT presented by the Board of Directors at a GENERAL MEETING, Ordinary and Extraordinary, of the Shareholders, held at Paris, on the 12th July, 1871, BARON ALPHONSE DE ROTHSCHILD in the Chair.

GENTLEMEN.—It is unnecessary to enter into any explanation of the causes which have twice compelled us to postpone your meeting; they are too notorious and too painful to call for any apology for delay.

You are aware that, owing to the insufficient number of shares deposited, you were unable last year to deliberate on the matters which were submitted to you as an extraordinary meeting. This deliberation will therefore be resumed this year, at the same time that you will have, as an ordinary general meeting, to approve, if found correct, the accounts that will be laid before you; to fix the amount of the dividend, and to ratify either the election or the re-election of the different directors. In our report we shall follow the same order as usual.

CHAPTER I.

Works and Expenses of First Establishment.

The seven groups into which the whole of the concessions made to the Company are divided, represented, according to our last year's report, a total length of 4,173 kilometres, of which were worked 3,898 kilometres; to be constructed, 275 kilometres.

Owing to a rectification made in the length of the Villach-Franzensfeste line, and the addition to our network of the Busseleno to Bardonnèche line, the state of the whole network is at present (July 12) modified as follows:—

	kilometres.
Total length	4,221
Of which are worked	3,898
In course of construction	323

	Working. kilom.		Unfinished. kilom.		Total. kilom.
1st group—Trieste line and branches...	1,021	...	263	...	1,284

6th group—Central Italian lines	294	...	...	...	294
7th group—Piedmontese lines.....	707	...	49	...	756
	3,898	..	323	...	4,221

§ 1

South Austrian Network. Length of the Network, 2,237 kilometres, viz.—

1. Lines originally conceded, 4,974 kilometres working; 2. Lines, the eventual concession of which was regulated by the Convention of 27th July, 1869, 263 unfinished—total, 2,237 kilometres.

Vienna lines.—The works for enlarging the passengers' station at Vienna have been regularly continued in accordance with the programme adopted two years ago. The covered hall is finished; the new buildings on the arrival side have been finished and are now used; those on the departure side will probably be ready for use at the end of this year: these reconstructions on the site of a station where the traffic is very considerable are subject, either owing to the exigencies of the service or with a view to economy of expenditure, to very strict conditions, which render it impossible to hurry on their execution. The consequence is that, as stated in your previous report, the transformation cannot be completed till some time in the year 1873.

The plan adopted some years back for the goods station at Vienna will be completely carried out in the course of the present season. The ground so judiciously purchased by the Company in 1869 will allow of successfully making, without any great outlay, such additions to this station as the progress of the traffic may render necessary.

The refitting of the passengers' rooms at the Gratz station has commenced, and the new station will be ready for use towards the close of 1872, when the line from Gratz to Raab will probably be opened, and the passenger service of that line will most likely be effected in our station.

We have submitted to the Government for the erection of the Trieste station a new project, which presents, both as regards the interests of the Company and those of trade and of the town of Trieste, very considerable advantages as compared with previous plans. This project, received with favour by the Commission of inquiry assembled at Trieste on the 16th of March last, has been definitively approved by the Ministry, and we hope to be able soon to commence the execution of this important work.

With the exception of the Vienna station, the works executed in 1870 on the Vienna-Trieste line and its branches, and on the Croatian and Corinthian lines, are of very little importance; they consist of alterations made in a few small stations, and of the construction of sidings and a few warehouses.

The rolling-mill at Gratz, the results of which, both as to the quality of its produce and their cost price, continue to be very satisfactory, turned out in 1870:—

	tons.
Common iron rails.....	13,869
Steel rails	2,975
Various articles	455
Total	17,299

As we stated last year, the production of the rolling-mills exceeded for the moment the requirements of the Company; we had therefore accepted a first order, for a third party, of 11,000 tons. This has been executed, and we have accepted for 1871 another order for 5,060 tons.

We have completed our manufactory of Bessemer steel by the erection of a furnace on the "Martin" system, which enables us to utilise all the scraps of steel rails, and also to increase our production of the said rails, which are being successively substituted, with the best results, for iron rails on all the sections presenting steep gradients.

Hungarian Lines.—The works executed in 1870 consist in laying down several sidings, in the erection of a small number of accessory buildings, and especially of sheds for storing corn.

Tyrolese Lines.—The unusual severity of the past winter has caused very trifling interruptions, and, after an experience of four years, it is now certain that the Brenner line has nothing to fear from snowdrifts and avalanches.

We cannot say as much for the inundations, which during the first years inevitably cause damage on lines passing through mountainous regions. Hitherto the Brenner line had escaped this influence, but quite recently a sudden flood has occasioned, in the part lying between Innsbruck and the Col, some rather serious damage, so as to interrupt communication for several days. The effects of this freshet, which made great ravages in the whole valley, and even at Innsbruck, have proved the necessity of executing, on several points, works of consolidation, similar to those effected on the southern section of the line after the inundation of 1868.

The works executed on the Tyrolese lines in 1870 are limited to a few alterations and additions in the stations, rendered necessary by the increase of the traffic.

The expenditure in 1870 on the lines of the South Austrian network, as originally conceded, amount to 6,829,798f 21c; the previous outlay was 386,447,157f 53c—total expenditure to 31st Dec., 1870, was 393,276,955f 74c.

Lines eventually conceded by the Convention of 27th July, 1869.
(263 kilometres in course of construction).

Villach-Franzensfest and St Peter-Fiume Lines.—The construction of these two lines has been pushed on actively, and advances regularly, so that we may rely on their being completed within the limits of time and expenditure originally proposed.

To secure in good time the realisation of the resources necessary, we appropriated in November last a second portion of the special loan to these two lines. The amount of this loan has been successively placed at our disposal at different dates, the last of which was the 1st July instant, so that four-fifths of the capital intended for the execution of these lines is now realised.

The expenditure in 1870 on the lines composing this section amounts to the sum of 29,018,561f 15c, previous outlay, 6,054,293f 53c—total to December, 1870, 35,072,854f 68c.

Port of Trieste.—The construction of the port of Trieste is actively advancing, the works of the embankment in the offing have proceeded with all regularity, the mole is already above water for a length of 300 metres, and the submerged portion is making incessant progress. The nature of the soil on which the foundations of the first mole rest having caused a perceptible sinking, the additions of further materials was suspended until the subsidence should cease—this appears to be the case at pre-

sent. The execution of the second mole advances rapidly—part of it is already above water; the construction of the third mole has been commenced, and we have good reason to feel assured that, thanks to the experience acquired, the accidents which hindered the works at first will not recur.

§ II.

Italian Network. Length of the Network, 2,832 kilometres, viz. :—1. Lines belonging to the Company (working, 1,924 kilometres; under construction, 60 kilometres), 1,984 kilometres; 2. Lines belong to private companies and worked by the Company, 848 kilometres—total, 2,832 kilometres.

Venetian Lines.—The works for the construction of the maritime station at Venice, which the Company is executing on the account of the Government, in virtue of the Convention of 4th October, 1868, have been carried on with all the rapidity allowed by the special conditions of the works and the exceptional severity of the past winter. We have good ground to hope that they will be completed by the time appointed.

The masonry work of the bridge over the Grand Canal, which is to connect the maritime station with *terra firma*, were finished at the opening of the present year, and the metal bed, already prepared, has been laid down.

By the terms of the Convention above-mentioned, the reimbursement by the Government of the expenditure for these works is to be made by instalments spread over a number of years. The first two, amounting together to 800,000f in round numbers, have been regularly paid when due.

The modifications in the workshops at Verona, and the enlargement of the station at Mestre, rendered necessary by the increase of the traffic, were completed in 1870.

Lombard and Central Italian Lines.—The works of the definitive bridge on which the Bologna and Venice line crosses the Po at Pontelagoscura have been continued without interruption. Three piles out of five and one of the abutments have been terminated, and the iron bed, the total length of which is 427 metres, is laid for a length of 214 metres.

The expenditure down to 31st December, 1870, amounted to 902,981f 21c.

The works for repairing the damage done by the floods of 1868 in Central Italy, between Poretta and Pracchia, were strengthened and completed in 1870, in consequence of another overflow of the Reno. The outlay for these works, which will be finished in 1871, amounts to the sum of 410,137f, which have been provisionally covered, as well as that of 1,717,406f 93c expended in 1869, to the first establishment account, until the definitive application, at present submitted for the approbation of the Government, shall have been settled.

The constantly-increasing traffic at the Bologna station has rendered indispensable certain additions to the lines and buildings, and even to the workshops, which could not possibly be deferred. They will be continued in 1871.

Piedmontese Lines.—The expenditure on account of the primitive network of Piedmont has been applied principally to the following works :—

1. The erection at the Turin station of a new workshop for making 40 locomotives, limited to 20 at present, which works will be continued in 1871.

2. The completion of the new station at Coni, and of the Novara market.

3. The radical reform in the system of coupling, and in the beds of certain bridges on the Turin and Ticino line.

4. The continuation of the renewal of the line between Turin and Genoa, on which 106 kilometres of rails have been replaced, which raises to 274 kilometres the length of single way totally renewed on this line.

5. The renewal of 18 kilometres of the Alexandria-Arona, Alexandria-Placentia, and Turin-Ticino lines.

Milan to Vigevana Line.—The Company completely terminated in 1870 the definitive stations it had undertaken to erect, as well as the works for the defence of the Ticino bridge.

The total expense, reckoned at 650,000f, will be reimbursed with interest at 8 per cent., by a deduction from the first dividends distributed to the shareholders, in accordance with the Convention concluded with the company that ceded the line.

Lines included in the Convention of the 24th January, 1869, with the Italian Government, approved by the Law of 28th August, 1870.

The Convention of 4th January, 1869, which has had to undergo certain changes, which we shall explain and discuss in another chapter, was finally approved by the Italian Parliament, and homologated on the 28th August, 1870. The expenses of establishment or of repairs are as follows :—

Tuscan Lines.—The new buildings for the separate service of the Company at the Florence station were finished in February, 1870, and immediately opened to the public. It was found necessary to modify and increase the number of the lines in the station itself, in order to satisfy the requirements of the traffic.

The bridge over the Ombrone at Nievole, between Pistoja and Pisa, has been rebuilt; a new metal bay, 30 metres in the opening, has been substituted for the provisional wooden bridge previously existing.

The way has been entirely renewed for a length of 6 kilometres between Florence and Massa.

We may here remark that, in accordance with the terms of the Convention of the 4th January, 1869, the Company, in taking possession of the Tuscan lines, had contracted the engagement to advance to the Government a sum of 45 millions in four successive instalments.

The first three instalments, forming a total of 33 millions, were duly paid into the Italian Treasury; the last instalment will fall due on the 31st December, 1871.

The other outlay for first establishment, which the Company has engaged to make on the Tuscan lines, is for the purchase of the rolling-stock necessary for successively commencing to work each section of this network, and for the improvement of certain works of art, and of the more important stations.

For these purposes we have expended, down to 31st December, 1870, 8,000,000f.

In the four or five years that follow, until the opening of the last section of the lines conceded to our Company by the Convention of 4th January, 1869, there remains to be expended about 10,000,000f.

All this expenditure is to be reimbursed to the Company by the Government, out of its share of the proceeds of the working, with interest at 8 per cent. per annum.

The Government is actively proceeding with the execution of the three breaks which still exist in the Tuscan lines between Florence and Nice.

The section from Savona to the French frontier, which is of great interest for us, will be opened for circulation in the last quarter of the present year for a length of 116 kilometres.

The tunnel under the city of Genoa, which is to join the two short lines already worked from Genoa to Savona, and from Genoa to Sestri-Levante, is terminated in small sections, and will very shortly be opened to the public.

As for the last section, between Sestri-Levante and Spezzia, which will complete the system of communication between the French and the Italian networks, it cannot be finished owing to the present difficulties it presents for some few years to come.

The works of the line from Savona to Brà, of which we were to undertake the working on conditions analogous to those under which we engaged to work the Tuscan network, but without having, on this account, any advance to make, are rapidly progressing, and will probably be terminated in the course of 1872.

Bussoleno and Bardonneche Line.—This line, which branches off from the Turin and Susa line, runs to the entrance of the tunnel of Mont Cenis, and directly connects the Italian network with the French.

In virtue of the Convention of 4th January, 1869, our Company resumed on the 1st of November the direction and management of the works of this line, which had been continued by the Government on the bases already stipulated by the Upper Italy in 1869. These works have since been carried on with the utmost activity, notwithstanding the severity of the season. At the stations of Bussoleno and Salbertrand they have already begun the buildings in which the trains are to be composed and decomposed in order to pass over the steep gradients which occur in this part of the line. The tunnel of Mont Cenis, that great work so courageously undertaken and so skilfully conducted, will be completed in the course of this month, so that the line may soon be open to the public as far as Modane.

This commercial route, so important for the intercourse between Italy and Austria on the one hand, France, Belgium, and England on the other, will therefore be opened immediately. Its influence on our traffic cannot fail to make itself felt, and the returns of our network must ere long be considerably increased.

Redemption of the Shares of the Turin and Susa Line still remaining in circulation.

By the terms of the original Concession of the Turin and Susa line, the Sardinian Government reserved to itself the right of redeeming this Concession when the Mont Cenis tunnel should be opened, by buying in the shares at the par of 500f.

Of the 13,000 shares forming the social capital of the Turin and Susa line, 9,085 belonged to the Victor Emmanuel Company.

The Italian Government having redeemed the concession of the Victor Emmanuel in 1863, these shares became the property of the State, until, in 1864, they were ceded to our Company along with the lines forming the Piedmontese network.

As to the remaining 3,945 shares which are in the hands of private holders, the Government purely and simply transferred to our Company the right of redemption which it had originally reserved.

The unredeemed shares of the Susa line have yielded ever since 1865 a yearly interest of more than 7½ per cent., the opening of the section from Bussoleno to Bardonneche prolonging the Susa line to the Mont Cenis tunnel, and making that line the principal means of communication between France and Italy, will certainly add considerably to the value of those shares.

In this state of things, we could not hesitate to take advantage of the right of redemption conferred on us by the Convention of 1864, and we have officially informed the holders of the unredeemed shares of this our decision.

A sum of 1,957,500f will be necessary for this operation, which is to be effected towards the close of 1871.

	f	c
The expenditure incurred in 1870 on the lines of the Italian network belonging to the Company amounts to ...	28,503,709	76
Including 1,471,256f 25c for works executed on the Busseleno and Bardonnesche line, which, according to the Convention of 4th January, 1869, makes part of the Piedmontese network, as above explained.		
The previous expenditure was ...	304,108,121	29
Total to 31st December, 1870 ...	332,611,826	5

As to the expenditure made on the lines belonging to private companies and worked by the Company, it amounts to 5,231,239f 18c, and applies exclusively to the Montferrat lines, of which we shall presently speak.

Law of 28th August, 1870, approving the Convention of 4th January, 1869.

In preceding general meetings we have often had to speak of negotiations with the Italian Government extending over several years.

The questions that we had to treat have been successively solved, either by arbitration or by the passing of the law of the 28th August, 1870, which sanctioned the Convention of 4th January, 1869.

We gave you a detailed statement of these different questions in the general meeting of the 28th April, 1869. It will now suffice to lay before you the principal results, in order that you may duly appreciate their importance and their consequences.

We may here state that two arbitral awards, given in December, 1867, decided in our favour the questions relative to the Cuneo bonds, and to the proceeds of the lines from Novara to Gozzano and from Bra to Alexandria.

The first of these awards exempted us from a burden which would have amounted every year, till 1916, to 490,488f 50c, and from 1868 till 1968, to 258,744f 37c.

The second relieves us not to include in the returns covered by the guarantee of 38 millions, specially affected to the Piedmont network, a yearly sum of about 850,000f.

The modifications in the terms of our contracts relative to the guarantees are definitively settled by the Law of 28th August, 1870, in the sense indicated by the Convention of 4th January, 1869, with certain restrictions which do not materially affect their advantages. Thus the reimbursement of the guarantees will commence in 20 years; if before that date the average gross yearly returns of the whole network have not attained 44,000f per kilometre, which was the limit fixed by the Convention of the 4th of January, this reimbursement will be effected by taking no longer the half but the three-fourths of the excess over the gross returns realised in the 20th year.

As regards the income tax, our position for the ensuing twenty years is regulated very nearly on the conditions we submitted to the general meeting of 28th April, 1869; that is to say, we are to pay during these twenty years the same sum that we paid in 1867 for the tax on personal property.

As to the land tax, we stand on the same footing as all other landowners; but there is no probability that this tax, already so heavy, will be increased in any great degree.

The Convention of 4th January, 1869, altogether relieved us from any increase of the tax on personality, until the gross annual proceeds of all our lines shall average 44,000f per kilometre.

The Law of 28th August has slightly modified this state of things. The definitive term of 20 years has been substituted for the same uncertain limit of a gross income of 44,000f; but all the sums that we should have had to pay during these twenty years in addition to the land tax liquidated and paid in 1867, either by an augmentation of the quota of taxes, or by the substitution of taxes equal in amount, will have to be carried to account and be reimbursed to the Government from and after the 21st year, by means of a deduction of three-fourths of the excess of the gross returns of the 21st year over those of the 20th, as already stated.

There is no reason for us to trouble ourselves at present about an eventuality still so distant; what is certain is that the principal advantages of the Convention of 4th January, 1869, though somewhat diminished, are definitively secured to us. These advantages are:—

The postponement for twenty years of the reimbursement of the guarantees, the said reimbursement having to be effected without interest by means of the three-fourths of the excess of the gross returns of the 21st year over those of the 20th.

The postponement till the same date of the application to our Company of the common law relative to the tax on personality, and of the reimbursement of the taxes not paid during that same period of twenty years, these new charges having to be covered by the same fractions of the excess of the gross returns.

The prolongation of all our concessions, which are extended to 99 years, counted from the 1st of January, 1870, being coterminous with the concessions enjoyed by our Company on its Austrian network. This prolongation, indispensable as regards the issues we have still to make, will considerably lighten for the years next ensuing the burden caused by the paying off of the new bonds.

The part of the Convention which relates to the concession of the Busseleno and Bardonneche line, including the Mont Cenis tunnel, has undergone no modification, and the result is that the guarantee of the Piedmontese network is definitively increased by two millions, the proportional application of which will take place from the day when the section from Mont Cenis to Modane shall be open to the public, which, according to all appearances, will be in September next.

As to the leasing of the Tuscan lines, the Government has reserved the faculty of annulling the contract ten years after the completion of the whole line—that is, in 13 or 14 years. It is doubtful that the advantages to be derived from this reservation will induce the Government to exercise its right.

§ III.

Plant and Rolling-Stock.

Our rolling-stock, including the orders given in 1870, consisted on the 31st December last of—1,109 locomotives, 2,788 passenger carriages, 19,471 goods waggons and trucks, with vessels on Italian seas and lakes, comprising ten steamers and three lighters.

We have likewise ordered, in Austria or in Italy, to be delivered as early as possible, in view of the opening of the Villach-Franzensfeste line, of the lines from Savone to the French frontier, and that of Mont Cenis, as well as in prevision of the increase of traffic—55 locomotives, 150 passenger carriages, and 800 goods waggons.

Our workshops at Warburg and Vienna have continued during the year 1870 the construction of passenger carriages and goods waggons at a very reasonable cost price.

	f	c
The outlay in 1870 for work and material was ...	10,357,960	44

CHAPTER II.

Financial Situation.

§ V.

The resources realised by the Company, down to the 31st December, 1870, amounted to a total of 1,321,522,831f 22c, composed as follows:—

	f	c
(a) 750,000 shares at 500f ...	375,000,000	0
(b) Divers loans—		
1. Sale of 2,574,079 three per cent. bonds (obligations), at long date ...	633,897,414	20
2. Sale of 150,000 five per cent. bonds (obligations) at long date ...	64,074,671	62
3. Sale of 600,000 bonds (bons) at short date ...	248,550,745	40
	1,321,522,831	22
Less 90,000 bonds (bons) reimbursed in 1869 and 1870 ...	45,000,000	0
Remains ...	1,276,522,831	22
Expenditure made or authorised... ...	1,351,429,340	65
Exceeding the resources by ...	74,906,509	43

The deficit is covered by temporary loans, amounting to 60 millions, and for the surplus by the special reserve, and by the balance of the working account. On the 1st January, 1870, the

deficit was only 29 millions, and, according to the terms of our last report, to provide for that sum, as well as for the expenditure of the year, the sum to be realised in the course of 1870 was, at the date of the general meeting, 58 millions, the realisation of which would have presented no difficulty if the general prosperity had been maintained.

The serious events that occurred during the second half of the year led to a complete cessation in the sale of bonds, and brought about the situation in which we found ourselves at the commencement of the present year, and which was of a nature to excite the most serious uneasiness. There was no time for hesitation, and the Board of Directors exercising the powers originally conferred on it in 1866, and which had been reserved by the general meeting in 1870, was resolved to take advantage of the first opportunity that might present itself to terminate the difficulty. Different combinations had been studied and even prepared when the suspension of arms, which led to the peace, intervened. It was then easy to foresee that a treaty of peace, whatever might be the terms of it, would have the immediate or ultimate consequence of a very considerable issue of *rente*, in presence of which the Company would meet with some obstacles in raising its own loan; it was therefore necessary to take advantage of the interval which immediately followed the conclusion of peace to negotiate the loan, and in accordance with that idea the Board of Directors concluded the operation of which we have now to give you an account.

The necessity for the immediate negotiation of a loan being once admitted, there would have been a great inconvenience in limiting ourselves to a sum inferior to the requirements of the Company amply sufficient for a period during which the influence of the present crisis on the French market might be felt, and nothing would have been more dangerous than to make repeated appeals to credit in rapid succession. It was therefore necessary to fix the amount of the loan so as to meet all the requirements of the Company not only during the present year, but also in a great measure in the next. The sums necessary for that purpose were, at the moment when the loan was issued, as follows:—

	francs.
Advances by credit accounts	63,250,000
Last payment to be made to the Italian Government (Convention of 4th January, 1869)	12,000,000
Expenses of establishment in 1871	25,000,000
Reimbursement of bonds falling due in September, 1871	15,000,000
Reimbursement of bonds falling due in March and September, 1872	30,000,000
Coupons and amortisation in arrear	12,550,000
	157,800,000

The French market being then closed to us, we applied to England, and by the intervention of the powerful firm which has so large an interest in our undertaking, and whose aid to us has never been wanting, we succeeded in negotiating a loan of 750,000 bonds (obligations) on the following conditions:—

The contracting banking-houses agreed to take the 750,000 bonds at the rate of £8 7*s*, payable at different periods in succession, and of which the last is fixed for the 15th August next.

The sums to be paid by the association to the Company are stipulated as follows:—

	francs.
19th May, 1871	41,682,500
10th July, 1871	12,549,150
7th August, 1871	11,085,100
15th August, 1871	92,498,250
	157,815,000

This great operation, successfully realised, guarantees the Company in the future from all financial embarrassments. Apart from the anticipated requirements mentioned above, and covered by the loan, the charges for which we have to provide can give rise to no difficulty.

With respect to the expenses of establishment, the only one of any importance that remains to be borne, and which refers to the lines comprised in the concession of the 27th July, 1869, accorded by the Austrian Government, is covered by the special loan negotiated at Vienna, and of which four-fifths are now realised.

Apart from these lines, there only remains on the Austrian network the completion of the Vienna and Gratz stations, which will be very far advanced in 1872, and the construction of the Trieste station, which will be spread over several years.

With respect to the Italian network, the only expenses to be provided for consist of a sum of about four millions to put the Piedmont network in complete working order; about two millions for the buying in of the shares of the Susa line; and lastly, some expenses for improvements and extensions on the different lines of the network.

The expenses remaining to be effected on the Lombard and Central Italy lines are for the construction of a certain number of permanent buildings in the stations, to replace the wooden sheds in which the service is now carried on, the enlargement of some goods stations, and the improvement of that of Bologna.

CHAPTER III.

Working.

§ VI.

Receipts.

francs.

The gross working receipts amounted in 1870 to 128,875,177

Of which—	francs
South Austrian network	74,121,967
Upper Italy	54,753,210

A comparison with the receipts for the preceding year gives the following results:—

A.—South Austrian Network.	francs.
Receipts in 1869	77,273,375
— 1870	74,121,967
Diminution	3,151,408
B.—Upper Italy Network.	**francs.**
Receipts in 1869	55,574,718
— 1870	54,753,210
Diminution	821,508

The diminution on the two networks combined amounted to 3,972,916f.

In our last report we referred to the causes which led during the first half of 1870 to a considerable falling off in the receipts of the South Austrian network. After the very considerable increase realised in 1868 and 1869, a moment of stagnation was probable. The majority of the Austrian railways suffered from the same influences. This check in the traffic was, however, only temporary. The comparative diminution in the receipts on that network, which amounted at the commencement of July to 5,750,000f, became gradually reduced in the last months of the year to a sum of 3,151,408f, and the reduction would have been greater but for the extraordinarily bad weather, which impeded the traffic during the month of December.

The results of the first six months of the present year are most satisfactory. The increase realised amounts to more than nine millions of francs, notwithstanding the interruption of the service caused in January by the snow. The augmentation is especially large on the Brenner line, and compared with 1870 represents since the 1st January an increase of 47 per cent.

The diminution of receipts on the Upper Italy line arises from obvious causes. The commercial relations of Italy with France are of such a nature that the military and political affairs in the latter country could not fail to exercise their influence on the other side of the Alps. At the moment when the war commenced the receipts of the Italian network presented on the corresponding period of 1869 an increase of a million-and-a-half of francs; but from that time the traffic did not cease to decrease, and the augmentation realised in the first half-year has not only disappeared, but gave place to the decrease of 821,508f, indicated above.

francs.

The total working expenditure amounts to..... 52,197,476

Of which—	francs.
South Austrian network	27,210,140
Upper Italy network	24,987,336

A comparison with the year 1869 gives the following results:

A.—South Austrian Network.	francs.
Expenditure in 1869	26,027,186
— 1870	27,210,140
Increase	1,182,954
B.—Upper Italy Network.	**francs.**
Expenditure in 1869	23,595,970
— 1870	24,987,336
Increase	1,391,366

The total cost of working in the South Austrian network increased by 1,182,954f, while the gross receipts decreased by 3,151,408f. The proportion of the working expenses to the gross receipts, which was $33\frac{3}{10}$ in 1869, amounted in 1870 to $36\frac{7}{10}$.

This augmentation was caused by various causes.

The year 1870 was very difficult for the maintenance of the line.

The removal of the snow, and the repairs of damage caused by the heavy rains and floods, occasioned extraordinary expenses; and the repair of the line alone in 1870 shows an increase of 855,800f on 1869.

The nature of the traffic has also been somewhat modified; although the receipts from goods trains have diminished by 4,586,000f, there was an increase of more than 100,000 tons, which means that the quantity of goods sent increased in a large proportion, while the distance diminished considerably (1).

The result is that the average cost of carriage on a ton of merchandise diminished by nearly 12 per cent., while the cost of conveyance increased.

The increase in the working expenses on the Upper Italy network arises entirely from the traction service. The mileage increased by 760,596 kilometres in consequence of the opening

	1869.		1870.
(1) Average distance = kilometres	233	...	198
Average rate per ton=francs	181	...	5·89

of two new private lines and of local demands, while at the same time the cost per kilometre also increased in consequence of a rise in the price of fuel, and the great expense of keeping in repair the old rolling-stock received from the State.

New contracts made for the supply of fuel in 1871 permit us to hope for a reduction in the cost of the traction.

In addition, the fact referred to above, with respect to the South Austrian network, occurred also on the Italian. The quantity of goods transported by slow trains increased by 313,000 tons, while the receipts under that head diminished by 821,542f.

The natural results have been a considerable increase of labour and consequently of expense.

§ VIII.

Net Produce.

A.—South Austrian Network.

	f	c
The gross receipts have amounted to	74,121,966	68
The working expenses to	27,210,139	98
Net produce	46,911,826	70
Less, share of the working account in the general expenses	2,250,303	26
Balance	44,661,523	44

The State guarantee being more than covered, we have nothing to claim of the Austrian Government.

B.—Upper Italy Network.

The net product of the Upper Italy lines was as follows:—

I.—Venetian Lines.

	f	c
Net receipts	6,214,673	55
Less, share of general expenses	404,893	70
Total for Venetia	5,809,779	85

The guarantee of the Venetian lines is comprised in that of the Austrian network.

II.—Lombardy and Central Italy Lines.

	f	c
Net returns	11,508,227	96
Less, for share of general expenses	1,673,379	79
	9,834,848	17
The net product, not including the results of the Varese and Sesto-Calende lines, which should not be composed in the calculation for the guarantee, is	11,443,754 92	
Less, share of general expenses	1,303,382 92	
There remains	10,139,922 0	
The guarantee of 5¼ per cent. accorded to those lines on a capital of 258 millions in conformity with the convention of the 4th January, 1868, required on the 31st December 1870 a sum of	13,416,000 0	
The deficit amounted to	3,276,078 0	
Total for Lombardy and Central Italy	13,110,926 17	

III.—Piedmontese Lines.

	f	c
Net product	12,042,972 28	
Less, share of general expenses	2,260,664 64	
	9,782,307 64	
The guarantee of the gross receipts accorded to those lines, including the general contribution was	28,000,000 0	
The gross receipts realised amounted to	24,287,114 49	
The deficit was	3,712,885 51	
Total	13,495,193 15	

To be deducted—

	f	c
(1) To be paid to the unredeemed shares of the Savi Cuneo and Giovenale lines	606,733 33	
(2) For the working of the private lines	461,950 34	
	1,068,683 69	
Net for Piedmont	12,426,509 46	

Recapitulation—

	f	c
Net produce of the South Austrian network	44,661,523 44	
Net produce of the Italian network—		
(1) Venetian lines	5,809,779 85	
(2) Lombardy and Central Italy	13,110,926 17	
(3) Piedmontese lines	12,426,509 46	
	31,347,215 48	
Total net revenue	76,008,738 92	

CHAPTER IV

Balance Sheet for 1870.

	f	c
The net revenue after deducting the portion of general and sundry charges on the working account, as stated in preceding statement	76,008,738 92	
Including amongst the receipts the amount of "produce from the employment of funds, closed accounts, &c."	514,285 82	
Balance	75,494,453 10	

The charges to be met are as follows:—	f	c	f	c
Interest and sinking fund on the loans	*57,501,267	50		
Deduct interest on the funds engaged in the lines in construction	367,267	5		
			57,134,000	45
Balance			18,360,452	65
Corresponding amount for 1869			25,449,257	13
The diminution for 1870 is			7,088,804	48

That decrease results—

	f	c
1. From a difference of on the net produce of the working.	5,551,309	19
2. From an augmentation of in the charges on loans.	1,136,261	20
3. From an increase of in the debit account of the "produce from the employment of funds."	401 234	9
Total	7,088,804	48

It should be remarked:—

1. That the diminution of the net proceeds is due to accidental causes; that the receipts have this year resumed, in Austria, their ascendant movement, and that the cause which has exerted so unfavourable an influence on the Italian network having ceased, they may be expected to progress considerably in the second six months of the present financial year, and especially in 1872, in consequence of the opening of the lines destined to unite our network to that of France.

2. That the charges on the loans have nearly reached their maximum, and that consequently no important increase on that head is to be feared.

3. Finally, that after 1871 the account of "Produce of the employment of funds," instead of being a debit, will become a credit.

We dwell upon those various considerations because they demonstrate, in the first place, that there is no occasion to be alarmed at the result of the financial year 1870, which is the consequence of a concurrence of unfavourable circumstances, of which some are as grave as unforeseen; and secondly, because it is necessary to take account of them in fixing the dividend From this last point of view we have still to speak of another question, which plays an important part in deciding on the dividend, and on which we could have no influence. The rate of exchange has varied little in Austria since your last meeting, and it has remained constantly at a figure approaching 21½ per cent. The situation of Europe explains that result fully; can that situation, so prejudicial to the interests of Austria, be expected to improve shortly? Our hopes on that point have been so often disappointed that we dare not affirm anything.

	f	c
The loss resulting from the exchange, which was in 1869	7,339,439	0
Was in 1870	8,851,084	0
Showing an increase of	1,511,645	0
The sum disposable on the year is, according to the foregoing accounts	18,360,452	65
That remaining disposable from previous years and placed in reserve amounts to	10,656,854	24
Total	29,017,306	89
Deduct the amount of debit to the account "loss by exchange"	8,851,084	75
Balance	20,166,222	14

In face of that result we had to determine the amount of dividend which should be proposed to you. Two solutions were to be found:—to confine ourselves vigorously to the distribution of the sum remaining disposable on the year, or to use, within the limits imposed by prudence, the special reserve made precisely with a view to circumstances analogous to those in which we are at present placed: both those opinions found partisans in the Board. That of Vienna adopted the first; that of Turin and the Committee of Paris unanimously approved of the second.

It is true that when the convocation of the General Assembly was resolved upon the first time—that is to say, at the beginning of April—communication between the Paris Committee and the Boards of Vienna and Turin being impracticable, those Boards came to an accord to propose a dividend of 12f 50c, representing almost exactly the sum remaining disposable on the returns of the year; but it would be superfluous to point out the difference between the situation at that period, and the one in which we are at present placed. The improvement which has taken place in public affairs generally, and more particularly in those of our Company, sufficiently justify the point of view adopted by the Board, which asks for a revision of that first decision, and an application of a portion of the extra-statutory reserve for the purposes of a dividend.

* The amount is composed as follows:—

	f	c
Interest on bonds	19,018,767	50
Do. do.	19,000,000	0
Sinking fund for bonds	1,482,500	0
	57,501,267	50

We propose to you to accept that view. We believe it would be superfluous to repeat the considerations we have just referred to, and which, in our opinion, place the speedy amelioration of the position of our enterprise beyond all doubt. We also abstain from repeating the reasons we have made use of in our former reports, to maintain against the objections raised the right to use, with prudence and moderation, the reserves accumulated in previous years. We believe those questions sufficiently elucidated, and we confine ourselves to stating the principle, and asking you to ratify it by applying it.

The question being so placed, it remained to determine within what limits the faculty should be used, and on that point there was room for hesitation. If we were living in a period of tranquillity, and if we were not exposed to see politics add fresh difficulties to those which our enterprise has already experienced, we should not hesitate to propose to you to use our reserves freely; but in the present state of things we think that the infinitely better course would be to sin on the side of prudence, and the divergence which was manifested in the Board imposed upon us extreme moderation. We think therefore that we ought to limit the sum taken from the reserve to the amount necessary to complete a dividend of 15f.

If you approve our proposition, the balance sheet will be as follows:—

	f	c
The sum disposable, as above stated	20,166,222	14
Dividend of 15f on 750,000 shares	11,250,000	0
Balance to be carried to reserve account...	8,916,222	14

Thus, deducting the sum of 1,740,632f 10c, taken from the extra statutory reserve to make up the dividend to 15f, we have a balance left to be carried to the profit and loss account of 1871 of 8,916,222f 14c, perfectly sufficient to place us beyond the reach of any preoccupation.

The instalment distributed in November last year was 7f 50c; there will have to be paid, to make the dividend 15f, another sum of 7f 50c per share, which will be paid on and after the 15th of this month.

CHAPTER V.

Extraordinary General Meeting.

The last general meeting not having been able, from an insufficiency of shares being represented, to constitute itself into an extraordinary meeting, we reproduce here a statement of the transactions to be submitted to your ratification, and the principal object of which is the improvement of the conditions under which we are bound by the terms of the conventions concluded with the Italian Government, to work certain lines belonging to private companies.

Lines of Montferrat.—The lines belonging to the Montferrat Company comprise:—

1. A line 98 kilometres in length, from Cavaller-Maggiore (station on the line from Coni to Alexandria), open since 1865, which by the terms of the convention with the Italian Government we are bound to work, and on which we experience every year a considerable loss.

2. A line which, branching at Castagnole station on the above-mentioned line, runs by Asti and Casale to Mortara, across our Piedmontese network, and which was opened for traffic the 5th July, 1870.

From the situation of those lines in the midst of our network and the obligation we are under to work them have arisen numerous difficulties, the greatest of which was the constantly-increasing loss resulting from working them.

To endeavour to ameliorate that state of things and to prevent for the future the present inconveniences, which threatened to become intolerable, a negotiation was opened with the Montferrat Company, and a convention was arranged, which will be submitted to your approbation.

The basis of that agreement, the text of which is annexed to last year's report, are as follows:—

The Upper Italy Company takes on lease the Montferrat lines for the whole term of their concession, with the liability of providing for the 51,891 bonds and the sinking fund for the 28,000 shares issued by the Montferrat Company, the taxes remaining payable by the holders. The total of those charges represent a sum of 842,000f—about 4,445f per kilometre, a sum which, after 1875, will be increased by about 200f per kilometre for the extinguishment of the shares. Out of the 51,891 bonds we have just mentioned, and which form the whole of the sum necessary to complete the Montferrat lines, 28,000 had not been issued at the moment the agreement was concluded. We thought that it would be advantageous to prevent that emission which was imminent, and we accepted, under the reserve of your approbation, the proposition which was made to us to purchase the right of emitting the 28,000 bonds at the total price of 5,150 388f 35c.

The securities in question would have created for the Company an annual charge for interest and sinking fund of 420,000f. The capital devoted to that purchase having cost us 6½ per cent., that is, 334,775f, we have realised on that head an annual saving of 85,225f.

It results from that combination that the convention made with the Montferrat Company assures us the possession of these lines for a capital of 5,150,000f, plus the interest on the bond previously issued to the number of 24,000, 386,000f, plus 10f for each of the 3,000 shares of the Brà line, 30,000f, plus finally the sinking fund for the 31,000 shares.

In consequence of that arrangement, and taking into account, on the one hand, some accessory expenditure at the moment of taking possession, and, on the other, the profit resulting from the contract for the permanent way, those lines stand in the Italian network for a capital of 5,231,230f 18c.

Our Company being charged with the working of these lines it had a great interest in charging itself also with the supply of the material for and the construction of the permanent way which it would have to maintain; in consequence it made a contract with the Montferrat Company to lay down the rails not yet placed over a length of 94 kilometres. That operation has enabled us to utilise the rails in good condition which we had removed from the line from Turin to Genoa, and replace the latter by steel rails.

Participation in the Purchase of the Vienna Circular Railway.

The Austrian Government, having resolved to sell the Vienna Circular Railway, the six great railway companies (1) whose lines terminate in that capital came to an understanding, and joined together to purchase and work the line in common; each was to have a sixth share.

After long negotiations, the price was fixed at two millions of florins, which sum was paid to the Government on the 24th February, 1870.

The purchasers have the benefit of the returns from the 1st January, 1870.

The expenditure to be incurred to complete the line and put it in a perfect will not in any case exceed the sum of one million of florins.

The line will be worked in common, under the direction of a special company.

The Vienna Railway was worked for ten years on account of the State by the Northern Company and our own, united for that purpose.

The interest of this combination for the associated companies, and in particular for ours, is considerable; the capital engaged is limited, and we have not hesitated to use, in this circumstance, the powers you had confided to us for the regulation of the affairs pending with the Austrian Government.

Contracts relative to the Working of Two Secondary Lines.

With a view to facilitate the establishment of useful branches, we have admitted in principle, that our Company might, under certain conditions, undertake the working of those branches.

Two agreements of that kind have been entered into: the first is relative to a line of 34 kilometres, which leaves the Vienna-Trieste line at the station of Neustadt, and terminates at the station at Grammat-Neusiedl, on the line from Vienna to Raab. This line serves numerous manufacturing establishments, whose traffic with Vienna is at present almost exclusively conducted by roads, and will thus, in great part, come to our line from Neustadt to Vienna.

The second agreement concerns a line of 13 kilometres which connects our station of Leoben with the Metallurgic centre of Vordernberg.

The general principles of those contracts are as follows:—

The line, the plans of which are drawn up in accord with us, and of which we have the right to superintend the construction, is delivered to us in a state completely prepared for a determined amount of traffic.

All the costs of working and maintenance fall upon us, but all the expenses of enlargement necessitated by the development of traffic, beyond the amount which serves as the basis of construction, are at the charge of the proprietary company.

We shall supply the rolling-stock on receiving a special indemnity.

The Company, to cover its cost and trouble, has a right—

1. To 50 per cent. of the receipts up to 40,000 florins per mile, a minimum of 20,000 florins being guaranteed it in any case.

2. To 45 per cent. of the receipts exceeding 40,000 florins per mile.

3. To 6 per cent. of the total gross receipts as an indemnity for supplying the rolling-stock.

In conformity with the terms of Article 19 of the Statutes, we submit to the ratification of the general meeting—

1. The convention concluded with the Montferrat Company.

2. The Act relative to the participation of our Company in the purchase of the Vienna Circular Railway.

3. The two agreements for working the lines of Grammat-Neusiedl and of Leoben-Vordernberg.

On August 26 was Published, No. VIII., New Series, Price 8d and 8½d.

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for August, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend on each may be payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Table of Railway Traffic Receipts; Notices and Reports of Stocks, Failures, Railway, Banking, Finance, Insurance, and Miscellaneous Companies; New Companies and New Capital. Prices made up to August 23.

Advertisements for the next Number, to be published on September 30, must be sent to insure insertion on or before September 28.

OFFICE—340 Strand.

WHY CONSOLS DO NOT RISE IN PROPORTION TO OTHER SECURITIES.

Many persons are surprised that Consols—which used to be the favourite security of all, which used to rise before anything else, and more than anything else—should not now be higher. They say and justly, that never did other securities come so near Consols. We have now—

Consols at	92⅞	paying 3/ 4s 2d	
Metropolitan Stock	94½	—	3/ 15s 2d
Great Northern Debenture Stock	100	—	4 per cent
London and North-Western Debenture Stock	100	—	4 —

There never was a time when a municipal board like the Board of Works, or when railway companies approached the borrowing capacity of the English Government within as few shillings.

The reason is that there never before was so good a competition to Consols as there is now. Formerly the credit of the English Government was much greater in England at least than that of any other body, because it was believed to be honest, with much greater assurance than any other body. But now no one believes that the Board of Works or the directors of first-class railway companies would knowingly deceive the public. They may be themselves deceived; they may suffer from the frauds and errors of subordinates; but that they themselves deliberately and as a Board should be wilfully and knowingly fraudulent is not capable of being believed. In consequence the British Government is now exposed to the competition of other bodies, which have nearly as good a repute for honesty as itself in the money market, when in old times it used to be in that respect not only first, as it still is, but infinitely and beyond all comparison first, which it now is not.

And when (the primary condition of honesty being satisfied by both) a comparison is admitted between industrial undertakings and Consols, it is at once seen that the latter are subject to great dangers from which the former are exempt. Consols are essentially a *political* security, and their *quantity* is liable to almost indefinite increase from political, and (therefore) incalculable, contingencies. Suppose a vast continental war, in which England was herself engaged, in which, as the wars of the first Napoleon, her very existence was involved, she might have to borrow 100,000,000*l* three or four years running. All first-rate modern wars are quite on this scale, and so will the next first-rate English one be too. The quantity of English Government securities upon the market may be easily increased in such circumstances 50 per cent., perhaps before long it might even be doubled. No one can doubt that an augmentation of quantity so great and sudden as this would be attended with a great depreciation of value. In a few years the price of Consols might, and (if England preserves her position) indisputably would, recover, but for a time that price would be far less than it now is. In the year of the battle of Waterloo, 3 per Cents. were at 54½, and, under analogous circumstances, we might see such rates again.

It is perfectly true that all great political events of the first order produce a *general* disorder in the money market, and so affect the price of all securities. We felt this at the outbreak of the French and German war last year. In consequence of it the value of money rapidly rose, and all securities became, as the phrase is, "weaker," and of less value. But Consols feel this general effect as well. They go down like every other security when the value of money rises, and when credit generally is disturbed. But (and this is the main consideration) in the case of a great English war, "Consols" not only feel this common and diffused depreciation, but they are themselves liable at the same moment to a particular and much greater cause of depreciation, which nothing else shares. Their quantity, as we have explained, would have to be most rapidly augmented, with no limit but the national wants; whereas the quantity of railway securities and of Board of Works stock would remain as it was. A foreign war would have no tendency to augment them.

And this peculiar danger of "Consols" is more important than any other, because political contingencies are more incalculable than any other. What a municipality or a railway company may want to spend, or what Parliament may permit them to spend, is indeed not certain. Still the elements are in some degree within calculation, and, roughly at least, we can assign a *maximum* to them. But the elements of the political problem are altogether incalculable. No one can attempt to reason about them, or to assign a limit to them. It would be pedantry (such as only the most pedantic mathematicians have been guilty of) to attempt to assign the probability of the next great war. We only know and can only know that its risk is constant, and that its effect upon Consols would be very great if it were to happen. Political causes are in their very nature so much more indefinite than any other, that securities primarily dependent on the "political element" always will, *other things being equal*, be lower than the value of securities which are exempt from it.

It may be said that if it were this general perception of the special danger of political securities which kept down "Consols," the securities of foreign governments being liable to the same, or a similar, political contingency, would not have risen. But the events of the money market are much too complex to be determined by a single cause. No doubt foreign securities have been and are affected by the fundamental doubt of which we have spoken. But on the other hand, in the comparison with "Consols" and with other domestic securities, the credit of the best class of foreign securities has risen. We know more than we used about such nations; their resources are greater, their Governments stronger, honester, and firmer. Naturally therefore we trust those Governments more than we used, and the price of their securities is higher. And the rise goes in many directions beyond the first-class of such securities. Persons who derive a high rate of interest, and are ready to take the accompanying risk, invest in foreign securities, good and bad, which pay that high interest. And the number of persons who are ready to do this was, we apprehend, never so great as now, when the accumulations of the country are greater than ever, and when the business classes, who dislike low interest more than other classes, and are bolder than other classes, are saving more than ever. We need not say that no such persons touch Consols, and therefore, though the securities of foreign Governments are to be "debited" with the same general disadvantage which applies to the English, they are in many cases to be credited with new and marketable advantages of their own, in which English securities have no share.

There are, however, two limiting considerations which should be borne in mind, or we shall push our distrust of political securities too far. Unquestionably, as far as the payment of interest goes (irrespective, for the moment, of the saleable value of the securities) the bond of a great nation is the best conceivable. A railway company may be ruined by a new mode of locomotion; every business depends on the existing state of physical science, and a change in the state of that science may alter it. But for a long period to come the taxing power of the British nation, and in a great though not equal degree of all great nations, must be immense. For the purpose of paying the interest on their debts great nations can augment their income in a manner and to an extent which no other community or corporation can. But the effect of this peculiar power is only to secure the payment of the interest, and therefore the ultimate value of their securities; their temporary value, notwithstanding, is liable to extreme depreciation in the manner we have shown.

Indisputably also, "Consols" and the securities of the English and Indian Governments have an advantage in the English money market of the first magnitude, which must always ensure their being held by English bankers and other persons under large liabilities on demand in England. At the extremity of panic—especially in the actual hours of which we have now known three sets—the hours which just precede the breaking of "Peel's Act,"—it is very much easier to borrow upon them than to borrow on any kind of railway or other securities. At the very extremity of panic you *can* borrow on the securities of the English and Indian Governments, and you cannot borrow on anything else. And while these securities exclusively possess this priceless merit, persons liable to pay much money on a sudden must hold many of these securities, or during a general collapse of credit a moment may come when they may be unable to pay.

Subject, however, to these necessary limitations and considerations, we consider the comparatively low value of Consols, though it is much wondered at, to be very natural, and to be likely to continue, because it is the effect of important causes which are steadily affecting the money market at present, and which are likely for an indefinite period to continue to affect it.

THE NEW COURT OF APPEAL.

We can forgive the Ministry many of the blunders and shortcomings that have marked the past Session in consideration of the Act which Lord Hatherley has carried for the reconstitution of the Judicial Committee of the Privy Council. The Act itself is a very flimsy specimen of those legal reforms which we have been promised so often, and for which we have waited so long. But after all, in matters of radical change it is only the first step that costs, and the first step in this case is of very essential importance indeed. Everyone knows that there are two Supreme Appellate Courts in our judicial system, deriving their origin from divers historical conditions and constitutional forms. The House of Lords stands at the head of our legal tribunals on the one hand; on the other, the ultimate fountain of justice is the Judicial Committee of the Privy Council. Both tribunals are unsatisfactory in their practical working. They are dilatory, costly—in a word, they are unpaid. The jurisdiction of the House of Lords was long sustained merely for political motives, and the authority of the Privy Council was in like manner upheld as a possibly useful branch of the prerogative. But with the progress of democratic opinions in England, the influence of such powers has waned. Nearly a generation ago the great body of the House of Peers parted with their strict right to interfere in the hearing of Appeals, and the Law Lords now constitute a professional committee, transacting all the appellate business of Parliament. The Judicial Committee of the Privy Council, established some forty years ago, has in like manner absorbed all the original judicial authority of the Queen in Council. But as is the case with the Law Lords, the eminent persons who sit on the Judicial Committee are not paid for their work. Of course the work was either slurred over or intolerably delayed, until this year such a disgraceful mass of arrears had accumulated that the Government were compelled to interpose. Hence Lord Hatherley's Bill, which provides for the payment of four Judges on the Judicial Committee. We are empowered henceforward to demand that the work of this great Court of Appeal shall be done quickly and thoroughly, because we pay honestly and straightforwardly for it. It is more than probable that we shall soon apply the same measure to the legal jurisdiction of the House of Lords.

For the necessity of having one Central Court of Appeal for all the home and colonial, the criminal and civil, business of the Empire, has now forced itself even on the mind of the laity. The best class of lawyers have long been agreed about the matter, and although this reform has not been of a kind to attract attention in Parliament, it has made its way slowly but surely among all men of thought and culture. The practical interests involved are very considerable. The Courts of Common Law and Equity in England and Ireland, and the Scotch Courts, send their appeals before the House of Lords. The Colonial Courts, which administer some dozen different codes, the Indian Courts, the Ecclesiastical Courts, the Admiralty Court, all go for appeal to the Judicial Committee of the Privy Council. In the latter tribunal a few months ago, the accumulation of business in arrear appeared to be absolutely irremovable. Lord Hatherley, who has been promising legal reform ever since the formation of Mr Gladstone's Government, was at last moved to give us a sample of his quality; but we are bound to say that he has not encouraged us to hope for much from his hands. The Bill for the reconstruction of the Judicial Committee attempted to provide for the scandalous delays of that tribunal by appointing paid Judges; but it proposed to pay them at a rate which no lawyer of respectable standing would have accepted, and to set up a mischievous, insulting, and wholly needless distinction between the English and the Indian Judges who were to be selected. A vigorous protest on the part of the legal profession procured the withdrawal or modification of these obnoxious provisions. The four Judges whom Her Majesty is empowered

by the Act to appoint paid members of the Judicial Committee are all to be remunerated at the same rate, and on a respectable scale. With a curiously obstinate passion for parsimony, the Government have refused to give these new Judges the ordinary allowance for a clerk, which makes the position inferior in dignity and in emolument to that of a Vice-Chancellor or a puisne Judge in one of the Common Law Courts. This is a blunder for which there is no excuse. If we think it worth our while to go to the expense of making the principal Appellate Court of the Empire a real working tribunal, we ought to try to secure the best men for the work. It is quite certain that we will not get the best men if we underpay them, as Lord Hatherley's Bill provides. This, however, is a minor question, for everyone must see that the position of these new Judges ought at least to be made equal in point of dignity with the Junior Judges at Equity and Common Law. Justice must be done next year if the new tribunal is to work in a satisfactory way. On the other hand a serious blemish in Lord Hatherley's original scheme has been removed by making the Judges, though in name only Privy Councillors, hold their office, like our other Judges, during good behaviour, subject to dispossession only on an address to the Crown from both Houses of Parliament. The salary of the Privy Council Judges is to be 5,000*l* a year, chargeable on the Consolidated Fund, and pensions are promised on the same terms as those granted to the puisne Judges in the Common Law Courts. Four Judges are to be selected, two of whom, it is understood, must have served in India as Chief Judges of the High Courts of the three presidential cities. The others will be English Judges, chosen, we may presume, for their acquaintance with international, civil, and ecclesiastical law.

The appointment of these Judges is a pledge that something will soon be done on a greater scale to redeem the supreme appellate jurisdiction of the country from the discredit into which it has of late justly fallen. One clause in the Bill appears to convey a definite promise to this effect. It is enacted that the Judges shall hold their office, "subject "to such arrangements as may be made by Parliament here- "after, for the constitution of a Supreme Court of Appellate "Jurisdiction." We trust this promise will be steadily held in view, and not be allowed to drop out of sight in the bustle of Parliamentary conflicts. The present Act advances a little in the right direction, but we have to travel very much farther. The appellate business of the House of Lords is almost as tardily and neglectfully transacted as that of the Judicial Committee of the Privy Council. It is notorious that the Scotch appeals in particular suffer from delay and from impatient hearing. What we want, and what we must have, is a consolidation of the jurisdictions of the Privy Council and the House of Lords, with full power over all kinds of appeals from every part of the Empire. For this Supreme Appellate Court we must choose our Judges carefully, and pay them well. We could not spend money better, for speedy justice is a commodity that is cheap at any price.

INVESTMENTS IN ENGLISH RAILWAYS.

There is one result of the exceeding prosperity of English railways at the present moment which is rather puzzling for ordinary investors. As a rough rule it usually answers in deciding about investments in public companies to look at the last annual dividend: if that will yield a satisfactory return at present prices, and there is nothing against the management of the undertaking, the investment is resolved upon. But just because railway profits are increasing rapidly, such a proceeding is not possible as regards the ordinary stocks of railways. There are plenty of keen business men on the Stock Exchange to discount the expectation of future profit, and such is the confidence felt that if the investor looks only at the last annual dividend he will nowhere see the possibility of such a return for his money as he looks for in that description of investment. We do not allude merely to the low-priced lines, such as the Great Eastern, which only paid last year 17s 6d per cent. and is quoted at 46 to 47, or the Brighton, which only paid 17 2s 6d per cent., and is quoted at 64 to 65. In such cases the difference between the price and the actual dividend is so great as clearly to shut out the investor who acts on the rule of thumb principle we have described. But even in high-priced stocks the investor will now find that if he looks only at the last annual dividend he will be unable to do business. He wishes to have about 5 or 5½ per cent. with tolerable safety, but taking the last annual dividend he would find that London and North-Western, paying 7*l* per cent., would yield only 4*l* 15s per cent. at the present price of 145; North-Eastern, paying 8*l* 7s 6d per cent., would yield only 4*l* 15s 9d at the present price of 175; Midland, paying 6*l* 12s 6d, would yield only 4*l* 17s 5d at the present price of 136; while such favourite lines for speculation as the Great Western and Caledonian would yield barely 4 per cent. if tested in this manner. The ordinary investor must therefore neglect altogether one of the most tempting forms of investment, one which may be trusted to grow rapidly in value by the mere growth of the country, unless he has some other working rule to guide him. He must discount, like the Stock Exchange, the future increase of value, and it becomes an important question for him how he is to do so.

As a help to the investor, we propose to compare very briefly the *rate* of growth in the different lines—what the current rate of improvement is in each, comparing the last year and half-year with their predecessors; and then compare the present prices with the anticipated dividend for 1871-72, should the improvement continue. Of course the investor would require to use his judgment in each case as to the likelihood of the improvement continuing, and he must inform himself the best way he can as to the management of the lines he prefers, and other points; but the essential preliminary to any such inquiries is a distinct statement of what the current rate of improvement will yield.

The rate of improvement differs very much among the leading lines from a variety of causes, but to a large extent for the simple reason that the proportion of the ordinary stock to the gross traffic varies so much. It is obvious that in the present state of railway business the lines which have the smallest proportion of ordinary stock will advance most rapidly in value. There is another point however, which we brought out last week, and which it is equally important to attend to, viz.—that the profit in some or most lines appears to be growing at an increasing rate. The improvement in the half-year ending June, 1871, over the corresponding half of the previous year is greater than the improvement in the half-year ending December, 1870, over its corresponding predecessor, and greater than the improvement in the whole year ending the 30th June, 1871, over the year ending 30th June, 1870. We shall therefore compare the actual dividend paid in the year just past—that is, the year ending 30th June 1871—with the dividend for 1871-2, estimated in two ways—(1) on the assumption that the increase will be equal to the increase of the whole year 1870-71 over the whole year 1869-70; and (2) on the assumption that the increase will be equal to the increase of the half-year just past over the corresponding half of the previous year. We subjoin below a statement of the actual dividends in 1869-70, and 1870-71, showing what these respective rates of increase amount to; and the following is the resulting comparison on the two assumptions we have stated:—

	Dividend Paid in 1870-71.	Estimated Dividend for 1871-72 (1.) Assuming Increase Equal Last Year's Increase over 1869-70	Estimated Dividend for 1871-72 (2.) Assuming Increase Equal to Last Year's Increase over Corresponding Half of Previous Year
	£ s d	£ s d	£ s d
London and North-Western	7 0 0	7 10 0	7 15 0
[illegible]	8 7 6	9 10 0	9 [illegible] 6
Midland	6 12 6	6 17 6	6 17 6
[illegible] and Lancashire	7 7 6	7 17 6	8 [illegible] 6

[illegible]	4 14 0	5 14 6	6 [illegible] 0

* [illegible] † [illegible]

It is easy to see from this what a different aspect the quotations of the ordinary stocks of these companies will have according as they are compared with the actual dividend paid in the year just ended or with the estimated dividend of 1871-2. On whichever assumption we have given as to the probable increase of the dividend for 1871-2, it will be found that no

withstanding the apparently high prices of the ordinary stocks, when compared with last year's dividend, the prices are in reality still at such a point as to offer some temptation to the investor. Everything of course depends on the correctness of the assumption as to a continuance for a twelvemonth of the present rate of increase in railway business; but even if this assumption should partially fail there is still in most cases a margin which should protect the investor from loss. The following is a comparison of present prices with the price at which the stocks would stand according to the estimated dividend of 1871-2, at the rate of 100*l* for every 5*l* of dividend:—

	Present Price, ex div.	Price according to Estimate for 1871-2 (No. 1). Dividend.	Price.	Margin on Actual Price.	Price according to Estimate for 1871-2 (No. 2). Dividend.	Price.	Margin on Actual Price.
		£ s d			£ s d		
London and North-Western	144	7 10 0	150	6	7 15 0	155	11

In most cases there is a margin even on the lowest estimate of the increase for the year—the margin being sufficient to admit of a considerable failure in the expectation of profit. In other words, the investor may be tolerably sure of his 5 per cent. at present prices, with a chance of a quarter to a half per cent. over—in some cases nearly 1 per cent. This is on the assumption that the present rate of improvement will not continue at the longest beyond the current twelvemonth, and that then there will be no farther improvement. We believe however that this is a most moderate assumption, and that the state of the country is such as to promise a larger degree of prosperity not only to railways, but to every kind of home industry dependent on the growth of the country. It is in the nature of prosperity when it once begins to be accumulative. As we have often explained, first one trade profits, and the people who are in it increase the business and profits of other traders; these in turn become larger buyers by means of their new profits, and more and more trades prosper. In consequence the aggregate profits of the country in such circumstances grow, for a longer or shorter period, at a constantly increasing rate, so that we may always expect the later years of a period of prosperity to be better than the first. Railways, like other leading monopolies, cannot but benefit by this law, and as our present tide of prosperity has not been of long continuance, we may reasonably conclude that it is not at the full. This is the general reason for relying with some confidence on a continuous growth of railway profits for many months to come; nor is there much likelihood of a large subsequent reduction. The growth of the country in population and wealth is continuous, and even in unprosperous years the level very seldom falls below the point attained in the previous period of prosperity. We should say then that, as a rule, investors may still invest freely in ordinary railway stocks, even at the present high prices, with reasonable certainty of obtaining in the first year more than five per cent. on their investment, and the prospect of a subsequent improvement.

There is another circumstance which adds to the security of the investor. Although we have taken the starting point as the 1st of July, and in one or two instances the 1st of August, the starting point ought really to be the present moment, in which view the chance of failure in the expectation of an increase of profit has been already materially diminished by the known increase of traffic since the half-year commenced. The increase since the commencement of the half-year has been at a greater rate than that at which the increase of profit has been calculated. Thus, to take only a few instances from the table in our money article, North-Eastern gross traffic has increased this half-year at the rate of 9·1 per cent., but the increase last half-year was only 8·6 per cent.; Great Eastern has increased 5·4 per cent., the increase last half-year being 3·3 per cent.; Brighton has increased 8·5 per cent., the increase last half-year being 6·4 per cent.; and Lancashire and Yorkshire has increased 9·7 per cent., the increase last half-year being 9·0 per cent. On the average, the increase of the current half-year to date has been at the rate of 7·1 per cent., the increase last half-year having been at the rate of 6·8 per cent., and that of the previous half-year 5·3 per cent. Clearly in these cases, and on the average, therefore, there is so much to the good in the part of the new year already past to compensate a smaller rate of increase in the remainder of the year than that upon which the above expectations of profit are calculated. The investor has some margin, even if the present rate of increase is not kept up. In most cases too the increase is to a larger extent than formerly in passengers, so that not only is the increase of gross traffic going on at an increasing rate, but the increase is of a more profitable kind.

In a few instances it will have been observed there is no margin at present prices, and these are even much above what the expected increase of profit, according to the rule laid down, would justify. The Great Eastern is a prominent case. We are far however from asserting that even in these cases the present price is not justified by a reasonable expectation of increased profit. Some lines apparently have been later in feeling the present tide of prosperity than others, and from special adverse circumstances last year does not indicate so great an apparent improvement as that which is now going on. Where the lines are low-priced such circumstances must be calculated very closely. As regards the high-priced lines the results brought out will probably be more useful as approximations, leaning to an underestimate, of the immediate future of these lines. We need hardly say that the closeness of the actual price in a given case to the estimated one does not show that the investor should avoid that line for others where a considerable margin is shown. It would be expedient in all cases to consider which lines are increasing most rapidly, the Great Western and Caledonian, for instance, which add 1½ per cent. per annum to the annual dividend, promising more in the future than lines whose increase is only ½ or ¾ per cent.

We need hardly repeat our caution that we only furnish these figures as a help to investors, and not with any pretence that they contain all the material facts. We may point out however that for ordinary investors who may not have time for knowing much of particular lines, a distribution of their investments among a number of the leading lines will be a great safeguard against disappointment in the expectation of profit. The average current improvement, as we showed last week, is about ¾ per cent. per annum, and by a distribution of his investments the investor may obtain that average, avoiding the risks incidental to an isolated investment.

STATEMENT of the DIVIDENDS in 1869-70 and 1870-71 in the following Railways showing the Increase in 1870-71 over 1869-70 and showing also the Increase in the Half-year ending 30th June, 1871, over the corresponding half of previous Year.

* The actual dividend was at ¼ per cent. per annum, but allowance has here been made for the change in the form of making up the accounts.
† Estimate.

BUSINESS NOTES.

RAILWAYS AS BANKING DEPOSITORS.—It has often been pointed out that one of the most characteristic features of our monetary system, as compared with that of other countries, is the relative weakness of the Executive Government in its direct capacity as a payer and receiver of money. In America and other countries the transactions of the Executive Government are so large as to throw every private dealer, or group of dealers, into the shade, and many even of our own notions and

arrangements are derived from a time when the Government had quite a singular place in the money market from the magnitude of its dealings. Our Government is no doubt very powerful still in the money market, and is bound for a variety of reasons, as we have often contended, to make its arrangements as little disturbing as possible; but still the fact is that as things are now arranged it is relatively weak. This is shown by the great magnitude of the aggregate private deposits in our banks, which could hardly be so large without several dealers, or groups of dealers, having accounts as large as that of the Government; but an actual statement of the magnitude of one group of private deposits may nevertheless be interesting. The following is such a statement as regards fourteen of our leading railways at the end of last half-year, the figures being derived from the balance sheets of the respective companies appended to the reports:—

	Current Account.		At Interest.		Total.
	£		£		£
Great Western	441,375	...	702,729	...	1,144,104
London and North-Western	188,805	...	*1,700,000	...	1,888,804

					5,950,007

* Including temporary loan.

Although the list does not include several of the principal companies whose accounts are not yet published, yet the aggregate balance, it will be observed, is nearly 6,000,000*l.*, and two-thirds of this amount, or 4,000,000*l.*, is made up by the first four companies on the list. The Government balance itself, as appears from the weekly revenue account, is usually about 6,000,000, so that two or three great companies in only one branch of industry have nearly as much command over the money market as the Government, and their incomings and outgoings approach that of Government in importance. When it is remembered that country banks deposit with London banks, that there are numerous institutions and companies, like insurance companies, which have large balances of money *in transitu*, and that there are numerous financial houses in the City which are notoriously powerful, it will be seen at once that a Government which only keeps a balance of about 6,000,000*l.*, though it may actually be the largest single customer of the banks, is yet only one out of many very large customers.

The Roumanian Bonds.—Much as we sympathise with the holders of the Roumanian State Railway bonds in their claim against their defaulting debtor, we must object wholly to the doctrines laid down in the memorandum addressed by the Council of Foreign Bondholders to the Ambassadors of the various continental nations. They invoke the friendly assistance of the Governments interested on behalf of their subjects with the view of putting some pacific pressure on the Roumanian State; and they hint that the difference between them and Roumania "should be adjusted by a Congress of Powers interested or disinterested." Now it is of course conceivable that such a proposal *might* be worked with perfect safety to European peace, but there would be obvious danger in working it in any case where it would be important to the debtors. No great State would submit to any kind of pacific pressure by its neighbours in such a matter—such pressure would in fact be treated as a gross insult—and though a smaller State, if all were against it, might submit, there is not a small State in Europe which could not, if driven, stir up endless animosities among the remonstrant Powers. The position of such states is too delicate with reference to the various Powers around them to permit of a joint intervention being peacefully conducted. If the suggestion of the Council were taken up at all, it would probably be taken up with a view to some ulterior end. In fact the difficulty of doing anything with Roumania is only a specimen of the mischief which would arise from setting the large Powers against the small ones. We object however to the course of action proposed, mainly on the ground that as it is no part of a Government's duty to collect the debts of those who have voluntarily lent money to foreign States, or exert pressure of any kind on these States, so it can be no duty of Governments collectively to take up such an undertaking. It is a business totally unsuited for Governments, and promises no sort of advantage. Even in debts between man and man, there have always been grave doubts whether the legal power of recovery does more harm than good; but where the debtors are independent Sovereigns, subject to no other pressure but war, or the threat of war, it is for the interest of the world to take away from the creditor any security for his debt except the character and resources of his debtor. The only result of giving him a legal or *quasi*-legal power of recovery would be greater safety in lending to debtors of doubtful character, which is not a desirable thing, and the price of conferring on the creditors this power would be the danger of the public peace. We hope therefore the Roumanian creditors will be left face to face with their debtor, for whatever individuals will lose the States with good credit will gain, and those who are disposed to lend to foreign States will have a lesson as to the prudence required of them.

London Gas.—A report of the gas referees, just presented to Parliament, gives the public some useful information. It appears that almost all the annoyances of which the public complain in using gas are due to imperfect burners, and the referees declare that the best in existence are those made by Mr Sugg. His London Argand, No. 1, is the most convenient ever made. The referees further state that gas burns brightest, costs least, and throws out least effluvium when under just so much pressure as will allow of an easy and equable flow without any waste, and that wavering is not due to pressure but to a bad burner, allowing the air to mix itself with the gas. The referees say nothing about the best covers for gas burners, but are very distinct in recommending the glass chimney, which reduces the size of the flame, but greatly increases its clearness and brilliancy.

Strikes.—A new illustration of the readiness of English workmen to strike, and the mischief thereby caused, is furnished in a communication to the *Times* this week respecting the silk trade. Two years' ago we heard a great deal of the sufferings of workmen in the silk trade—how foreign competition had ruined them, and how they were entitled to reciprocity, and ought to get it by our refusing admission to foreign silk manufactures until foreign countries freely admitted ours. Lately there have been no complaints, the truth being that owing to the interruption of French and German manufactures, and the general revival of industry at home, the English silk workers have once more had an opportunity of gaining a footing in the trade. The communication we refer to shows how they are abusing it. Messrs Johnson, Hatchman, and Co. state:—

> A little time ago our English handloom silk weaver was in great distress; we found him capable of producing a much finer article than we could obtain from Lyons or Germany, and we thought we gave him employment. As our trade increased, so we were asked to pay higher prices, which we have agreed to more than once. At last we got all hands fully employed, and try to get them to work hours and earn more money. The other day, without a moment's warning or any consideration, the Derbyshire hands all "struck," and demand a further advance of 15 per cent wages. The British weaver is comparatively an extinct animal, owing to such proceedings; and it is sad to commit suicide in this manner, we, as other people have done, must of course get our silks made on the Continent, where they make a very much better looking article. The romance of employing British labour is at once quite taken out of us.
>
> Now without entering into the question at all of whether the weavers may not be able to force the advance claimed, it is obvious from the tone of such a letter that both by the strikes themselves and the manner of them they run a risk. There is a look of gross imprudence in their conduct, enough to make one despair of Trades' Unions ever acquiring sufficient knowledge to enable them to make good bargains for themselves. The circumstances are clearly such as to counsel them to make sure above all of retaining the means of living, which they had so much difficulty in procuring two years ago; but on the first opportunity, to use the phrase in the above letter, they appear to be "committing suicide."

Railways and Passenger Traffic.—In an article on railways last week, we showed how singularly profitable to the railways concerned the increase of passenger traffic had been—the companies whose increase of gross traffic was made up

to a larger degree than the others of an increase of passenger traffic having relatively the largest net gain. It appeared that while the average addition to the dividend was 47 per cent. of the gross traffic, in the companies where the increase was mostly in passengers the average addition was 89 per cent. The report of the Great Western, which was published too late for us to make use of it last week, comfirms our observations as to the importance of a passenger increase. The addition to the gross traffic of that company last half-year was 129,586*l*, of which 48,009*l*, or 37 per cent. was a passenger increase, and the actual addition to the ordinary dividend was 86,525*l*, or 67 per cent.—equal to 1½ per cent. per annum on the capital. The truth is that the passenger business of a line may increase very largely without any more trains being run—the trains being simply fuller and larger than they were before—so that there is hardly any more expense to the companies earning the increased receipt. This is strikingly shown in the case of the Great Western by the statement of the train mileage. Although the passenger receipts increased 48,000*l*, against 83,000*l* from goods, yet the passenger train mileage only increased 9,282 miles, against an increase of 320,115 in goods' train mileage. For the company to earn its increased goods traffic it had to run more trains, and consequently to spend more money, but it was not necessary to do so in order to obtain more passengers.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending Aug. 26 :—

	Receipts of Week Ending Aug. 26.
	£
Customs	421,000
Excise	169,000
Stamps	162,000
Taxes	nil.
Income tax	14,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	23,989
Total	789,989

The total receipts of the previous week were 1,128,267*l*.

The Exchequer issues of the week on account of expenditure were 485,675*l*, viz. :—

	£
Interest of debt	nil.
Other charges on Consolidated fund	5,675
Supply services	480,000
Telegraph services	nil.
	485,675

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Aug. 19	716,770	1,129,300	1,846,070
— Aug. 26	812,585	1,260,143	2,072,728
Increase	95,815	130,843	226,658

THE SEWAGE MANIA.

TO THE EDITOR OF THE ECONOMIST.

SIR,—There is no doubt that a mania, whether on the Stock Exchange or produce markets, is a bad thing in the end for the general public, and although warnings are seldom heeded I regard it nevertheless as the duty of anyone in possession of superior information to contribute his efforts, however feeble, towards checking anything approaching to wild speculation.

Now I do not wish to say a single word detrimental to the commercial interests of the two companies whose shares have lately been run up to such amazing prices as manufacturers of manure. It is quite possible that in that capacity both companies may prove to be wonderful successes. I most sincerely trust they may. But it is not in this capacity only that they are before the public, and it is not in this category that their shares are bought with such avidity. It is because they both claim to have solved the sewage difficulty, and because the public believe that they are both able to extract from sewage the manure contained in it, that their shares are made to jump up several pounds in a day. I wish to say, therefore, that however successful they may hereafter become as manufacturers of manure, neither of these companies has succeeded by the processes which they have published to the world in solving the sewage question, or extracting from sewage the manure which it contains.

The liquid and solid refuse making up town sewage is worth, by analysis, little more than eight shillings annually per head of a mixed population of men, women, and children. Of this about one-eighth part is in the insoluble, and seven-eighths in the soluble, portions. Both the "Native Guano" and "Phosphate Sewage" companies' processes are processes of precipitation and subsidence; neither of them touches, or can touch, the matters (ammonia especially) in solution. Therefore for every shilling that they save from the sewage, seven other shillings run away into the sea.

They are both, however, deodarising processes, especially the phosphate process, which, for several reasons, is much more hopeful, from a sanitary and agricultural point of view, than the other, so much so that I intend, as soon as I have time, to make some experiments with it in conjunction with irrigation—the only real solution of the sewage question—at my Romford sewage farm.

If the public are buying these shares simply as shares in money-making concerns for manufacturing manures good and well, but if they are buying them in the belief that they are valuable because the different processes have solved the sewage question, then let him remember that the "Native Guano" company's "A. B. C." process has been twice examined by the Royal Commission on pollution of rivers, and twice condemned from a sanitary point of view, on the ground of inefficiency; while my friend Mr David Forbes is, I am sure, far too good a chemist to claim for his phosphate process any power extracting ammonia from sewage.—I am, your obedient servant,

W. HOPE.

Parstoes, Barking, Essex, 1st September, 1871.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, August 31.

The return of the Bank of France for the week ending this day, the 31st, that of last week, and that of the 8th September, 1870, before the investment of Paris, are as follow :—

Treasury balance	78,729,000
Deposits in branches	975,000
Prolonged bills	56,794,000
Treasury bonds	27,500

The Bill for augmenting or establishing registration duties, adopted by the National Assembly, has been promulgated as law. It contains some enactments that specially concern foreigners. First, bills "drawn in foreign countries on foreign countries, negotiated, endorsed, accepted, or paid in France," are to be taxed like native bills; secondly, foreign securities of all kinds belonging to a deceased Frenchman, or to a foreigner dying in France, are, like French securities, to pay legacy duty, from which they have hitherto been exempt; thirdly, "openings of credit" are to pay 50c per 100f; lastly, foreign assurance companies which "have an establishment or branch in France" are to pay the taxes imposed on French companies (8 per cent. on the premiums against fire, 50c per 100f on maritime insurances). As to assurances on things in France made abroad, they are to be registered and pay taxes before they can be published or made the subject of law proceedings in France; and the same is to be the case with insurances made in France on things abroad. Foreigners also are interested in the stamp of 10c (1d) which the Bill imposes on cheques and receipts. The other enactments concern only Frenchmen or foreign residents in France.

The Assembly has since last week disposed of a batch of the taxation propositions of the Government. It has accepted the Bill augmenting the postage of letters from 20c to 25c in the country, from 10c to 15c in towns, and that on prospectuses, samples, printed matters, also for increasing the charges for the transmission of money and articles of value. In accepting the Bill it rejected the motion of M. Wolowski for introducing post cards at a reduced rate, in spite of the demonstration that such cards have obtained marked success in England and Germany. In this rejection the Assembly has acted in accordance with what seems to be the fatal law of this country—never to make a reform, though repeated revolutions be the consequence. The increased postage is to come into effect to-morrow, September 1. In the course of the debate attention was drawn to the scandalous abuse of the privilege of franking made by officials, and the Minister of War admitted that under it even bread for troops is frequently sent by post from one place to another, but a proposition to remedy these evils was suggested—the French way! The Assembly has also adopted the Bill for augmenting the duties on wine, cider, perry and hydromel. These duties vary according to classes and districts, and for wines according as they are in casks or bottle. After a proposition to substitute for them and other indirect taxes a tax on the revenue from shares, bonds, &c., had been put aside, various objections were urged to them—as, for example, that they were unequal, being in Brittany the double of what they are in the Gironde, being a violation of the engagement of the Government not to increase the burdens on land, being a doubling the duty on wines—an essential article of consumption, being difficult of application, and unjust as they were the same for the commonest as for the dearest products, &c.; but none of these objections was permitted to prevail. The Bill also increased the duties on alcohol to 156f the hectolitre (22½ gallons). Complaints were made that they were not put higher in order to check consumption, that native producers, by the manner in which alcohols are taxed in Germany and Belgium, did not enjoy all the protection treaties of commerce promised, and that an export duty was not put on them. But the Assembly paid no attention. The Government demanded that the persons who produce alcohols from their own crops, and for their own use, should pay the same license as distillers. M. Pouyer-Quertier supported the demand with great energy, saying that if granted a revenue of 30,000,000f would be gained, and accusing the private makers of not consuming but selling their products, and thereby defrauding the Treasury on a large scale—to, in fact, the extent of 200 million hectolitres per annum, about half the total production of the country. But his demand was energetically opposed in the name of all the wine-producing departments, and of the agricultural interest generally, and after a sharp debate was rejected by 341 votes to 245.

In the course of the debates that have taken place M. Pouyer-Quertier recapitulated anew the charges which the war has imposed on France, and he came to the conclusion that, including the indemnities to departments and individuals, they will necessitate for some years an outlay of 645,000,000f to 650,000,000f. He also spoke of the payments that have been and are to be made. The former, he said, were very important, and on the latter he remarked:—"I do not like to announce these things in advance; but speaking only of payments directly accepted by the Germans, I have the hope to be able to tell you before we separate that the third half-*milliard* (20,000,000*l* sterling) has been paid to them." In his speech he announced the intention to maintain the tax of 20 per cent. on raw materials of textile fabrics, and undertook to demonstrate that it was just. He also defended indirect taxes, denying that they were unjust to the poor; and to establish this point he affirmed that the rich man, by consuming superior sorts of tobacco, coffee, &c., paid more than the poor man. But he left unnoticed the fact that the duty on bad tobacco and bad coffee is just as high as that on the best so that the poor man contributes on the quantity he consumes as much to the State as the rich.

The Municipal Council of Paris, which in spite of the massacres and bombardment of M. Thiers, has obtained what, according to English notions, it ought always to have possessed—the control of its own affairs,—has this week been occupied with the new loan of 350,000,000f, which the Prefect of Paris, M. Leon Say, has shown to be necessary. It has accepted the amount proposed, and has also resolved that, like the preceding loans, it shall be in 3 per cent., with lottery prizes—the latter amounting to 1,500,000f annually; but the date and condition of issue are not to be settled until after the National Assembly shall have sanctioned the loan; and before doing so that body requires that the City shall show how the new charges it will necessitate are to be met. The Municipal Council has also, after due discussion, accepted the Prefect's proposition for an arrangement with the Bank of France. That establishment, as is known, as banker of the City, held a balance in its favour of 9,500,000f, and the Commune took the money. Some councillors were of opinion that the Bank ought not to have given up the deposit, and must be held responsible for it; but others maintained that the Bank was justified in considering the Commune as *de facto* representing the City, and besides, they showed that the Government at Versailles had authorised the surrender. It was in definitive resolved to hold the Bank free as regards the City, but to demand an indemnification from the Government. Apart from this, the Bank advanced some 7,000,000f to the Commune, also by authorisation of Versailles; the latter, however, now maintains that the City must make good the sum, but the City thinks the former liable; and if an arrangement cannot be come to, the Law Courts will have to decide. Whatever the decision, the Bank is safe.

The period allowed for the free admission into France of the iron and cotton fabrics and other products of the ceded territories of Alsace and Lorraine expires to-morrow, and is not to be prolonged. Great efforts to obtain a prolongation were made, not only by the people of the said territories, but by their new masters, the Prussians, the latter being, from political considerations, anxious not to make them discontented by taking them with large quantities of unsold goods on hand. Perhaps sound policy on the part of France would have been to favour them, in order to maintain their affection for the "old country," and at the same time to benefit the French people by letting them acquire the products Lorraine and Alsace can sell cheaper and better than other provinces; but Protectionism is in the ascendant now, and so what matters the producers of the severed territories and the home consumers, when iron-masters, cotton-spinners, and their fellows are freed from competition, and gain large sums?

From all parts complaints that the railways cannot carry the goods offered are heard. They are certainly well founded, the war having on the one hand caused a vast accumulation of goods, and on the other a great destruction or capture of waggons, but what is to be done? The Government has partially thrown open the coasting trade to foreign flags, the Northern Company has hired vehicles from England, and is trying to obtain more, other companies are endeavouring to borrow vehicles abroad, and construction of new ones is going on rapidly.

The directors of the Suez Canal have obtained from their shareholders, specially convoked, the authorisation to raise a new loan of 20 million francs (800,000*l*), on the conditions at the date, and with the guarantees they may think fit. In a report they presented it is stated that the loan is to be chiefly employed in payment of interest and redemption of obligations up to October, 1872, and that lenders will not only have security for it in the value of the canal, but that the interest on it can be covered, if need be, by an augmentation of 1f per ton on ships passing through the canal, which the Viceroy of Egypt has authorised. The report repeated the affirmation so often made, that a traffic of 2,000,000 tons annually can be counted on, said that the English Government and English shipowners are preparing to use the canal

more extensively than they did, and that the lands possessed by the company are selling well.

In introducing into the London market the bonds of the Paris, Lyons, and Mediterranean Railway Company, the Société Générale has struck out a new line of business, which is likely to become important. It is strange indeed that the great French railway companies, who are always borrowing, should not long ago have gone direct to the English market. In addition to their own credit their bonds possess a Governmental guarantee.

For the convenience of subscribers to the new loan, the Ministry of Finance has decided that the call payable between the 21st and 29th August shall be received to the 9th September without any charge for interest on account of delay; and also that it and all others may be paid at the offices of tax-gatherers in Paris, as well as at the Treasury.

What has taken place in the Assembly at Versailles, and the probable consequences of it, has produced general uneasiness; but it has had no very unfavourable effect on the Bourse, as will be seen from the following:—

The Compagnie Générale des Eaux of Paris is to pay from 1st Oct. 8f, as balance of the dividend of 18f declared for 1870.

The Société Générale notifies that a new call of 60f per share on the East Hungarian Railway must be paid before 15th September.

The Perpignan to Prades Railway Company announces the payment from the 1st September of the coupons of interest on bonds due 1st January and 1st July.

Messrs de Rothschild announce the payment of what remained of the bonds of the Greek loan, guaranteed by England and Russia, and of interest thereon to 1st September.

The dividend of the Chatillon and Commentry Iron Works for 1870, fixed at 25f, is to be paid from 15th September.

The Credit Industrial Bank of Marseilles is to pay from 1st September 5f on account of dividend of 1871. Only 125f are paid up on its shares.

The Financial Commission of Spain in Paris advertises that on the 6th September it will receive subscriptions to the new loan, but it gives no names of bankers who are to do so.

The report of the markets gives these prices per 50 kilogrammes, duty paid:—

Cotton.—At *Havre*, where the demand has been much more active, New Orleans very ordinary, 110f to 111f; ordinary to good ordinary, 94f 50c; Oomrawuttee fair, 84f to 86f; fully fair, 84f 50c to 86f; Cocanada, 83f.

Coffee.—At *Havre*, Wynaad, 146f; Rio, 132f; Gonaives, 140f; Cape, 135f to 136f; Mysore, 92f 50c, in bond. At *Marseilles*, Rio, 70f in bond.

Hides.—At *Havre*, Lima salted, 63f to 68f; ditto dry and dry salted, 76f to 116f 50c; Payta dry, 101f to 115f; Valparaiso dry salted, 75f to 90f: Uruguay salted saladeros, 78f.

Sugar.—At *Bordeaux*, French West India usine, 68f 50c.

Wool.—At *Havre*, Rio Grande washed, 250f the 100 kilogs; Buenos Ayres unwashed, 175f; Monte Video lambskin, 210f.

Tallow.—At *Havre*, Monte Video saladeros, 57f; New York, 53f.

Cocoa.—At *Bordeaux*, Guayaquil, 117f. At *Nantes*, Para, 122f 50c.

Oleagenous Seeds.—At *Marseilles*, Calcutta, 48f 50c the 100 kilogs.

COMMERCIAL AND MISCELLANEOUS NEWS.

A return has just been made of the Calcutta Census of British-born subjects. The Census was taken on the 15th of June. It differed from that of 1866 in being entirely confined to persons British born, whereas on the previous occasion all Europeans were taken. The result this year is an aggregate of 8,320 males and females—5,536 of the former and 2,784 of the latter. In 1866 the numbers were—Males, 7,727; females, 3,497—total, 11,224. There are other causes besides the wider basis for the excess of that year; the river, the Commissioner of Police says, was full of shipping, and the Census was taken in January, when Calcutta is "full with new arrivals from England and Mofussil visitors." Of the 8,320 persons, England supplies 2,693, of whom 444 are females; Scotland 579, of whom 75 are females; Ireland 862, of whom 192 are females; Wales 79, of whom four are females.

United States' papers announce that preliminary arrangements have been completed for the interchange of postal money orders between Great Britain and the United States on and after the 2nd of October. Of the 2,455 money order offices of the United States 570 have been authorised to issue postal orders on the postmaster at New York city for payment in the United Kingdom, and to pay orders issued by him for sums certified by the Post Office Department of that country for payment in the United States. These offices have been selected in all the States and territories with a view of accommodating the localities where the greatest numbers of such foreigners reside as will be likely to make use of them. All exchanges are to be made through the two Government exchange offices in New York and London. In the United States applications can be made only for the equivalent in sterling of a certain sum of money in United States' currency, which latter amount being deposited at the local office is transmitted to New York, and there converted into a postal sterling draught at the current rate for gold on the day of its receipt. This draught is made payable by the British authorities in any designated locality of the kingdom. No single order will be issued for more than $50, but persons desiring to remit larger sums can obtain additional money orders. The rates of commission on these money orders will range from 0·25 on orders not exceeding $10 to $1.25 for over $40 and not exceeding $50.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the third week of August, 1871, and of the corresponding week in 1870:—

	Paupers.

Other securities	...	101,556
Bullion	...	315,779
Rest	...	9,452
Reserve	...	204,144

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house :—

	Week ending Aug. 30, 1871.	Week ending Aug. 23, 1871.	Week ending Aug. 31, 1870.
	£	£	£
Thursday	10,489,000	16,063,000	9,216,000
Friday	12,178,000	16,752,000	9,752,000
Saturday	13,487,000	14,586,000	11,145,000
Monday	12,069,000	13,867,000	9,522,000
Tuesday	10,764,000	14,854,000	9,561,000
Wednesday	12,286,000	14,470,000	20,512,000
Total	71,134,000	90,069,000	69,307,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, August 31st, 1871.

The increase for the week is apparently trifling compared with the same week last year, but last year's return included a Stock Exchange settlement which the present one does not. But for this the increase for the week would have been about 12,000,000*l*, or at nearly 20 per cent. The rate of increase in these returns since the end of June is thus being steadily maintained.

The total since the 4th of January, 1871, is 2,978,678,000*l*, compared with 2,622,640,000*l* for the corresponding period last year, showing an increase of 356,038,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding dates with the present week	Sept. 4, 1867.	Sept. 3, 1868.	Sept. 1, 1869.	Aug. 31, 1870.	Aug. 30, 1871.
Circulation, including bank post bills	£ 25,974,497	£ 24,990,142	£ 24,107,845	£ 24,220,905	£ 25,481,097
Public deposits	4,281,487	3,274,075	3,993,525	5,381,191	5,101,925

In 1867, money continued easy at the rate to which it had been reduced the previous week, the restriction of business owing to the American war continuing. The Income Tax Commission had just made a meagre report, but submitting a large mass of interesting evidence respecting the working of an income tax.

In 1868, the 2 per cent. period continued, and money was very easy at this particular time. In the course of the elections a formidable cry had been raised against the Conservative party for extravagance in expenditure, and a fierce controversy was raging. The fortress of Humaita, in Paraguay, had just been captured by the allied Brazilian and Argentine armies, and the fate of Lopez was now considered certain.

In 1869, there was for the moment a slightly improved demand for money but the open market was still a good deal under the Bank rate. There was a run in the Stock Exchange on Deep Sea Telegraph Companies, and the calculations of profits in these undertakings were being actively canvassed. The French Emperor had been seriously ill, but was recovering.

In 1870, money continued to accumulate rapidly, the first shock of the war being over, and the rates were falling in Lombard street. The surrender of the Emperor and his army at Sedan occurred this week.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 5,505,272*l*; in 1868, an excess of 3,367,800*l*; in 1869, an excess of 4,056,770*l*; and in 1870, an excess of 103,589*l*. In 1871, there is an excess of 5,619,149*l*.

Discount and Money Market.—There is no change in the state of the market since last week. Money still continues very abundant, and in spite of the abundant supply of bills and a very active demand yesterday and to-day, in consequence of the Stock Exchange settlement, the rates are without change. We have still to quote 1⅞ as the rate for two and three months' Bank bills, with 1½ as the minimum for the very best paper at shorter dates. As was the case last week, however, the market is sensibly hardening as respects long-dated bills, though there is no change in the quotations to note compared with last week. The demand at the Bank, as well as in the open market, has been good during the last two days.

The Bank return for the week shows very few material changes. The private deposits have diminished 305,000*l*, and the private securities 101,000*l*; and 316,000*l* of bullion have been withdrawn. The withdrawal of bullion however is mainly on home account, the export to the continent having ceased. In the Bank of France return the changes are important, the Treasury balance having fallen 3,200,000*l*, and the bullion 1,500,000*l*, while the circulation has increased 640,000*l*, and the deposits in Paris 1,360,000*l*. The Bank of France is thus very much weaker on the week.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 and 3 months	1⅝	per cent.
Do 4 months	2	per cent.
Do 6 —	2⅛ ½	per cent.
Trade bills—2 and 3 months	2	per cent.
Do 4 months	2¼ ½	per cent.
Do 6 —	2¾ 3	per cent.

The allowances for money at the joint stock banks and discount houses are as follow :—

Joint Stock Banks at call	1	per cent.
Discount houses at call	1	per cent.
Do with seven days' notice	1½	per cent.
Do fourteen days'	1¼	per cent

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.
Paris	6	5	6	5
Vienna	5	5	5	5
Berlin	6	4	5½	3½
Frankfort	...	3½	5	3½
Amsterdam	6	3	6	2½
Brussels	7	4	6 7	3¼ ½
Hamburg	...	...	4	2¼ 3
St Petersburg	8	6	8½	6

The Stock Markets.—The feature this week has been great animation in all departments, in strong contrast with the generally dull tone which we had to report last week. The reaction which made itself so much felt last week has thus been of very short duration, and the advance from the closing prices a week ago is again very considerable. The most prominent exception to the generally good tone which prevails is that of English Government securities, which have advanced a little, but very slightly compared with what has been customary during a long period of cheap money. But with this great exception the tone is throughout good, especially in English railways and Foreign Government securities. The approach of the settlement made it evident that the bears had gone too far, there being a great scarcity of stock, with light contangoes ruling, and the tendency to a rise was strengthened by the bears first buying back and then turning round to buy heavily for the rise. It has long been plain, however, that the market for foreign securities must speedily become better, and in English railways there has again been another week of remarkably good traffics, increasing the likelihood of the present rate of increase in the dividends being continued for some time longer. In the foreign and colonial department a good deal of attention has also been given to the shares of the principal industrial undertakings in America and the continent, as they all appear to be participating in the same general prosperity. The principal miscellaneous securities, especially banks and discount companies, have also been good, partly from the impression that they must be doing

a large business, but in the case of the smaller finance companies, partly from reports which have been current as to discoveries in sewage, which will affect for the better certain undertakings in which they are interested.

ENGLISH GOVERNMENT SECURITIES.—The change for the week in this department, which, as we have stated, remains comparatively weak, is practically *nil* as respects the price for money and the September account, and there have been no fluctuations during the week. The figure still is 93½ ⅝ both for money and the September account, and also for the new October account The stagnation in Consols is no doubt largely due to the absence of the leading operators for the holidays, and they can hardly fail to rise should the present low value of money continue; but they are also less in favour than they were in comparison with such securities as first-class railway debenture stocks, which now absorb large quantities of "Consols money." Less is said now than has been the case during the last few weeks about the prospects of dearer money in consequence of a deficient harvest and the indemnity demands, or about the apprehensions of political complications on the continent, but the sluggishness in the market continues. Whatever be the explanation, the flatness in this market during the last two months has been very unusual and remarkable.

Subjoined is a list of the highest and lowest prices of Consols every day:—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	93½	93⅝	93½	93⅝	10s to 15s pm
Monday	93½	93⅝	93½	93⅝	10s to 15s pm
Tuesday	93½	93⅝	93½	93⅝	10s to 15s pm
Wednesday	93⅝	93⅝	93⅝	93½	10s to 15s pm
Thursday	93⅝	93⅝	93⅝	93⅝	10s to 15s pm
Friday	93½	93⅝	93½	93⅝	10s to 15s pm

The following are the changes for the week, taking the latest unofficial prices for quotation:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	93½ ⅝	93½ ⅝	... ...
Ditto October	93½ ⅝	93½ ⅝	... ...

FOREIGN GOVERNMENT SECURITIES.—The rise which has been anticipated in this department has now very steadily set in, and our usual list shows a great many changes for the week, almost all, though none of them very considerably, in the upward direction. French stocks were quite exceptionally flat during a great part of the week, in consequence of the prolongation of the crisis at Versailles; but the termination of the crisis by the vote of Thursday in favour of the Rivet proposition, as amended, is assumed to have re-established the authority of M. Thiers for the present, and at least prevented an imminent revolution. Consequently French securities have rallied, and they exhibit a rise for the week similar to the rise in other departments. Among the principal stocks which have been in favour are Spanish and Turkish, the latter having steadily risen for a long time, while the former have been in request, in consequence of the anticipated success of the new Spanish loan, which was advised last week, and the prospectus of which has now been issued. The course of the Finance Minister in trying to get over the embarrassments of the Treasury by a loan in orthodox form is highly approved of, and as considerable confidence is placed both in the present dynasty of Spain and the present financial Administration, there is no apprehension of a new loan for a long time, while the Treasury will also be spared the discredit of a large floating debt. Spanish stock in consequence has largely been bought of late for investment, and the process of absorption is apparently continuing. To-day the generally good tone of the week has been more than maintained, and the market closes to-night at the highest point.

We give an account of the prospectus of the new Spanish loan below, in our "Notices and Reports." The amount is 20,000,000*l*, and the issue price is 31, and the principal and interest will be payable in London and Paris, as well as Madrid, at the fixed exchange in London of 4s 3d, and in Paris of 5f 40c per dollar. The loan is not issued through any financial house, but subscriptions will be received direct by a financial commission—next Wednesday being appointed for receiving them. The loan was dealt in at a premium even before the issue of the prospectus, and the dealings to-day have been at 1 ¼ prem., corresponding to the rise in Spanish Threes.

The closing quotations for French stocks are—Rentes, 55⅝ ¾; Morgan loan, 99⅝ ¾; New loan, 6⅝ ¾ prem.

The following are the changes for the week, taking the latest unofficial prices for quotation:—

ENGLISH RAILWAYS.—As we have stated, the market for this department has been very good, the state of the accounts at the settlement, coupled with the high average increase of the traffics not only for the week, but since the commencement of the current half-year, combining to counteract the depression which prevailed last week. The most important advance has been in Great Eastern—a stock which has for a long time been comparatively neglected, but which has risen between 3 and 4 during the last two days, and between 6 and 7 since the dulness which existed at the issue of the last report, and the announcement that there would be no dividend for the half-year. The recent increase in the traffic of this line has however been very remarkable, and is to a large extent in passenger traffic, while there are special circumstances in its favour, which will now begin to take effect, such as the approaching opening of part of the Metropolitan extensions. It will of course also benefit by the diminished severity of the coal traffic competition, and by its total cessation when the Great Northern and Midland directors regain their senses. Chatham and Dover have also been specially good, partly on the favourable traffics, and partly on anticipations of the return from the new loop line between Ludgate hill and Moorgate street, and the approaching opening of the extension to Blackheath. A good many of the lines are quoted *ex div.* for the coming account, and in most instances the quotation this week *ex div.* is about as high as it was last week *cum div.* To-day the tone of the market has been at its best, except at the very close, and prices generally close at nearly the highest point of the week.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	104½ 5½	107½ ½	+ 2½

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Aug. 26 to 843,733*l.*, being an increase of 63,168*l.* on the corresponding week of last year. The aggregate receipts of the current half-year to date are now 6,025,527*l.*, being an increase of 435,291*l.* on the corresponding period of last year. The principal increases for the week are—North-Eastern, 11,699*l.*; London and North-Western, 7,878*l.*; Lancashire and Yorkshire, 7,047; Midland, 7,431*l.*; North British, 4,233*l.*; and Great Eastern, 3,473*l.* The following shows the details of the increase in each case for the week and for the whole period :—

AMERICAN S... announce the com... loan, so that ... farther Fi... attempt w... lower r... will b...

BANKS.—Although the tone of the market for bank shares has been firm, the transactions have not been very extensive, and the upward movement in prices is not so important as might be expected from the excellent trade prospects now before us. The chief changes are—an improvement of 1 in London and County, ½ in English and Scottish, Chartered, Imperial, London and Westminster, Oriental, and Union of Australia; ½ in Anglo-Egyptian and Imperial Ottoman. Bank of Egypt shares have given way 1.

TELEGRAPHS.—Heavy purchases have been made of Anglo-American and Anglo-Mediterranean stocks, which close at an advance of 6 and 7 respectively on the week. French Cable shares have risen 1; Great Northern Extension ½, and British Australian ½. On the other hand, China Submarine, and Marseilles and Algiers have given way ½; Great Northern ½; and Indo-European 1.

MINES.—The leading feature in this department is a reaction in Eberhardts, which close at an advance of 9. Cape Copper shares have given way 1, but St John del Rey are ½ better. In the English market we note a rise of 2 in Van, and 1 in Assheton.

MISCELLANEOUS.—The attention of investors has been again chiefly directed to sewage and paving shares, and these, as will be seen from the quotations given below, have farther advanced. International Financial and London Financial have been in active demand, and have risen 3, these companies being understood to be largely interested in sewage works, though it is also probable that the London Financial at least, which was largely interested in railways, benefit by the present prosperity of railway property. Telegraph Construction shares have risen 1, and Silver's India Rubber shares have given way 1½; otherwise the market has been singularly free from fluctuation. Peninsular and Oriental shares however close at an advance of 1.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—The imports of gold, limited as they have been, have been more than sufficient for the export demand, as with the exception of a few small orders for India, nearly all arrivals are purchased by the Bank, 75,000*l.* having been sent in since the 24th instant. On the other hand, sovereigns to the value of 70,000*l.* have been withdrawn. We have received during the week—56,500*l.* per Tasmanian, from the West Indies; 2,440*l.* per Bonita, from Brazils; 80,500*l.* per steamers, from New York—total, 80,440*l.* The Nyanza has taken 68,430*l.* to Bombay, and the Celt 97,000*l.* to the Cape. The incoming Australian mail, due on the 9th inst., has 480,500*l.* for this country.

Silver.—The market has become a shade firmer, and the price may be quoted as 60½d to 60⅝d per oz standard, the demand being principally for Holland. The Tasmanian has brought 66,000*l.* from the West Indies; the steamers have brought 52,000*l.* from New York; the Simla has brought 46,500*l.* from China—total, 164,500*l.* The Nyanza has taken 5,100*l.* to Bombay.

Mexican Dollars.—Both descriptions of coinage have slightly improved in value, the old being 59¼d, and the new 59d per oz; the former are taken for China, and the latter for refining purposes. We have received about 40,000*l.* from New York and the West Indies during the week.

Exchange on India for Banks' drafts at 60 days' sight is 1s 11d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 8½d to 79s per oz std; refinable, 77s 11d per oz std; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0½d to 5s 0¾d per oz std, last price; ditto containing 5 grains gold, 5s 1½d to 5s 1⅝d per oz std, last price; Mexican dollars, 4s 11d to 4s 11½d per oz, last price.

According to the *Gazette* return the import of the precious metals during the week ended August 30 were: Gold, 102,900*l.*; silver, 268,545*l.* The exports were:—Gold, 211,327*l.*; silver, 219,775*l.*

The following notice has appeared in the *Gazette*:—"Exchequer Bills—The Lords Commissioners of Her Majesty's Treasury hereby give notice to the holders of Exchequer bills issued under the authority of the Act 24 V., c. 5, and dated 11th March, 1867, that the interest thereon for the half-year ending on the 11th September, 1871, will be payable at the Bank of England, on and after the 11th September inst.; and that the interest of such Exchequer bills for the following half-year, to March, 1872, will be at the rate of two pounds ten shillings per centum per annum.—Treasury chambers, Whitehall, 1st September, 1871."

NOTICES AND REPORTS.

STOCKS.

Greek Guaranteed Loan.—The remaining bonds guaranteed by England and Russia, together with the coupons due on 1st September, will be paid on and after that date at the offices of Messrs de Rothschild Brothers, Paris.

New Granada Bonds.—The following is from the committee: The emporary but sudden suspension by the Panama Railway Company of the yearly subvention of $250,000, owing to the diminution of receipts, has thrown the treasury, already embarrassed, into great difficulties, and the Government apply to the bondholders to lend a portion of the receipt of their charge on the Customs revenues, paying interest thereon at 7 per cent. on the security of the Panama Railway for one year, by which time, it is expected, the Panama Railway will be again in a position to pay the said subvention. The Government propose that the amount remitted to the bondholders shall not be less than the minimum sum stipulated in the contract, namely, 60,000*l* a year. The committee consider that it is their duty to recommend the bondholders to accommodate the Government.

Spanish 3 per Cent. Consolidated External Debt—New Issue.—The Spanish Financial Commission in London and Paris, and other establishments at Amsterdam, Lisbon, and Madrid are inviting subscriptions for a loan of 150 millions of pesetas (cash), equal, at 51d, the Spanish dollar, to 6,375,000*l* sterling; and the list will be opened on the morning of the 6th inst., and will close the same evening. The interest will be payable in London on the 30th June and the 31st December, at the fixed rate of 4s 3d, without deduction, and will accrue from the 1st July last. The issue price is 31 per cent., payable by instalments until the 30th December, at which rate the nominal issue of bonds will have to be something over 20,000,000*l* to produce the above sum in cash.

RAILWAY COMPANIES.

Brecon and Merthyr Tydfil.—Half-year's revenue, 33,809*l*, showing an increase of 2,144*l*; the net return being 12,286*l*, as compared with 11,277*l*. The usual interest has been paid on the rent charges and Rumsey shares, and 5 per cent. per annum on the A debenture stocks, 4½ per cent. on B 1 debenture stock, 4 per cent. on B 2, 3½ per cent. on B 3, 3 per cent. on B 4, 2½ per cent. on B 5, 2 per cent. on B 6, 1½ per cent. on B 7, and 1 per cent. on C debenture stock; and deferred warrants are issued in respect of the balance thereon. The surplus remaining is sufficient to provide the deferred warrants issued for the past half-year in respect of the stocks B 1, B 2, B 3, and five-sixths of B 4.

Cambrian.—The traffic receipts for the past half-year amounted to 75,799*l*, and for the corresponding half to 72,756*l*, showing an increase of 3,043*l*. The net receipts amounted to 21,703*l* on the inland line and to 3,036*l* on the coast line, which were divided as per award—namely, 16,841*l* to the inland line and 8,898*l* to the coast line. The scheme filed for the arrangement of conflicting claims on the inland section was confirmed by Vice-Chancellor Bacon on the 22nd of July last, and the practical effect was to convert the entire inland debt into debenture stock; to capitalise the arrears of interest as well as of dividend up to July, 1870, and to authorise the payment of the interest and dividends in cash from July, 1870. A scheme, under the powers of the same Act, was now in course of preparation for arranging and settling the affairs of the coast section. Capital expenditure, 3,836,044*l*.

Dublin and Meath.—After paying mortgage interest, 1¼ per cent. per annum is divided on No. 1 preference shares. The Kingscourt line has not yet been opened.

Glasgow, Bothwell, Hamilton, and Wishaw Tramways.—Capital, 110,000*l*, in 10*l* shares. In connection with the "Glasgow Street Tramways," it is proposed to construct a system of tramways between the above populous districts, having access to the Caledonian and the North British stations and the districts of Parkhead, Motherwell, Camlachie, Tollcross, &c. The present accommodation is stated to be imperfect, while the roads are broad and level. The whole 19 miles of line will, it is calculated, be constructed within the amount of the capital, and goods and mineral traffic will be undertaken.

Glasgow and South-Western.—Dividend announced at the rate of 5 per cent. per annum; surplus, 3,127*l*.

Great Western.—The figures given below present a comparison of the revenue accounts for the half-year ended July 31, with the corresponding period of 1870:—

	1870. £		1871. £
Gross receipts	2,116,745		2,258,896
Working expenses	979,232		1,017,414
Net profit	1,137,513		1,241,482
Add previous balance	14,746		19,032
	1,152,259		1,260,514
Deduct preference charges	963,832		985,829
Available for dividend	188,427		274,685
—On the ordinary stock at the rate of 3 per cent. per annum	173,052	(4½ % p. a.)	259,578
Surplus	15,375		15,107

Capital Account.

	Expended. £		Received. £
To 31st January, 1871	45,903,212		46,003,207
During the half-year	294,379		785,970
Total, 31st July	46,197,591		46,789,177

Revenue had been prejudicially affected by the continued reduction in the coal rates, caused by the differences between the Midland and Great Northern companies, and also by the falling off in the coal traffic, which has resulted from the strike of the colliers in South Wales. The works for mixing the gauge between Didcot and Swindon have been commenced, and will be finished by the spring of next year, and the necessary steps are being taken to enable the gauge between Swindon and Milford Haven to be narrowed in the course of the summer of 1872. The two Bills promoted last Session—one for conferring further powers, and the other enabling them to provide and work steam vessels between certain specified ports—have received Royal assent. The Bill promoted jointly with the Midland for transferring to the two companies the Bristol Port and Pier (Clifton Extension) Railway has become law, and a contract has been entered into for the construction of the railway. A vote of 100,000*l* on account is asked for. The Bill for conferring further powers on the Great Western, Bristol, and Exeter, and South Devon Companies, in connection with the Cornwall and West Cornwall Railways, has also received the Royal assent. The works for the new station at Bristol have been commenced. A compromise has been come to with the Stourbridge proprietors, and a vote of 281,780*l* is asked for narrow gauge stock and works.

Great Western.—At the meeting the 4½ per cent. per annum dividend was declared, and the chairman said it was under consideration whether it would be possible to offer the shareholders a large amount of debenture stock, payable by instalments, so as to provide for debentures falling due.

Northumberland Central.—Half-year's revenue, 1,707*l*; expenditure, 1,591*l*; traffic reported to be increasing.

Paris, Lyons, and Mediterranean—3 per Cent. Bonds.—The London agency of the Société Générale of Paris invite applications for 3 per cent. bonds at the price of 11*l* 19s per bond of 500 francs. The bonds are redeemable at par at 500 francs by annual drawings, extending over 88 years.

Scarborough and Whitby Railway.—Capital, 120,000*l*, in 10*l* shares; borrowing powers, 40,000*l*. Applications for the share capital are being invited, and 10s per share is payable on application, and 1*l* 10s on allotment. This coast line of 20 miles in length will shorten the distance by rail between these two watering places by 35 miles. The country past through is of a romantic character, possessing attractions for tourists, while a mineral traffic is also counted upon. Many

[CONTINUED FROM PAGE 1068.]

landowners will take their payment in shares, and the contractors will construct and equip the line for 110,000*l*.

Swansea Vale.—At the meeting the 3 per cent. per annum dividend was declared.

BANKS.

London Bank of Mexico and South America.—The report recommends a dividend at the rate of 9 per cent. per annum for the first half of the current year, while the reserve is increased to 20,000*l* by the addition of 3,000*l*, and 2,916*l* is carried forward.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Egyptian, Commercial, and Trading, Limited.—At the meeting resolutions were passed in favour of winding up the undertaking, and Mr W. Paxton and Mr James Sanders, two of the directors, were appointed liquidators.

MISCELLANEOUS COMPANIES.

Alum and Ammonia.—A dividend of 5 per cent., making 10 per cent. for the year, has been declared, leaving 8,562*l*.

General Steam Navigation.—At the meeting a dividend at the rate of 10 per cent. per annum, and a bonus of 2s 6d per share, were declared, payable, free of income tax, on the 18th September.

Killamey Iron.—Half-year's dividend declared of 30s per 50*l* share, and of 9s per 15*l* share.

Telegraph Construction and Maintenance.—It is announced that the first distribution on the certificates issued under the trust deed of the 18th March last, at the rate of 1*l* 17s 10d per 3*l* certificate, will be made on and after the 8th September. Of the amount proposed to be paid 1*l* 16s 5d represents capital in respect of shares sold by the trustees, and 1s 5d in respect of interest and dividends received.

West India and Panama Telegraph.—The Barbadoes cable has been laid.

MINING COMPANIES.

Silver Sheet of Utah.—A call of 11*l* 10s per share is payable on the 20th instant.

West Great Consols Mining, Limited.—Capital, 40,000*l*, in 5*l* shares. The property immediately adjoins the New Great Consols mines in Cornwall, and a large portion of the shares have been taken up.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

On the 1st of September next, and thenceforward, the rates of commission to be charged in this country on money orders drawn on any place in Switzerland will be made uniform with those chargeable on money orders drawn on North Germany and Denmark, viz.:—On sums not exceeding 2s 9d; above 2*d* and not exceeding 5*d*, 1s 6d; above 5*d* and not exceeding 7s, 2s 6d; above 7*d* and not exceeding 10*l*, 3s.

The North German Lloyd having given notice that their steamers leaving Southampton for Colon on the 10th of each month will in future call at St Thomas, any correspondence for that island that may be specially addressed to be so sent, and prepaid at the usual packet rates of postage, will be forwarded by those steamers.

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British Corn (Imperial measure), as received from the Inspectors and Officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended August 26, 1871:—

	Quantities Sold. qrs bush	Average Price. s d
Wheat	27,269 0	57 4
Barley	204 6	32 7
Oats	1,044 3	28 7

COMPARATIVE AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British Corn (Imperial measure), as received from the Inspectors and Officers of Excise, conformably to the Act of the 27th and 28th Victoria, cap. 87, in the week ended August 26, 1871, and for the corresponding week in each of the years from 1871 to 1867:—

	Quantities Sold.			Average Prices.		
	Wheat.	Barley	Oats.	Wheat.	Barley	Oats.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

With favourable weather the harvest has proceeded rapidly, but the supplies of new English wheat have been short. Prices were firmly supported to-day at Mark lane owing to the decrease in the quantity of wheat on passage as compared with last year, and to a small temporary demand for seed wheat for France. The business, however, was very limited. Flour ruled dull, but maize and oats commanded fully late rates. Barley, beans, and peas were unaltered in value. This week's imports of foreign and colonial cereal produce into London have amounted to 55,820 quarters of wheat, 11,750 barley, 58,020 oats, 8,770 maize, 610 sacks and 8,040 barrels of flour.

The Liverpool cotton market opened very firm on Friday last, but was slightly easier on Saturday. On Monday, however, the tone became very strong, and there has since been a large business done at an advance of ¼d to ½d per lb on last

Friday's prices. The total sales are 124,460 bales, of which the trade have taken 82,240 bales; speculators and exporters, 42,220 bales. The imports for the week are 47,253 bales; the actual exports, 7,498 bales; and to-day's stock is 561,580 bales. Quotations for American descriptions have advanced ¼d per lb, East Indian ⅛d per lb, and Bengals ⅛d per lb since this day se'nnight. To-day the market closes very firm. Sales, 15,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended August 31, 1871:—

	Imported.		Exported.
American.....bales	7,688	.....	624
Brazilian	8,332	.....	20
East Indian	36,386	.....	8,481
Egyptian	237	.....	25
Miscellaneous	9,185	.....	235
Total.....	61,828	.....	9,385

At New York, on August 31, middling Upland cotton was quoted at 19⅛ cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, August 1:—When our last circular was written, we were in receipt of Reuter's despatches up to the 22nd instant, on which date "fair" Dhollerah was quoted 7⅜d per lb in Liverpool, with a very firm market. This reaction was however of but short duration, as the telegrams through the same agency, since to hand, report the market as uniformly dull, the latest we have, dated 29th, quoting 7¼d with a very weak market. The value for arrival had also declined to 7 5/16d. Here the feeling throughout the week has been very quiet, and the purchases reported do not amount to more than 1,300 bales of all descriptions, prices being quoted at the close about 5 rs per candy lower all round. The utter absence of demand would have justified a greater decline in prices no doubt, but, as we have already mentioned, the stock of passable cotton is so trifling that holders are very indifferent about selling. The dull accounts from Liverpool continue also to check the operations of "Sutt" speculators, and the settlements for to day, which are fixed we believe at 225 rs for Dhollerah, are said to be comparatively small. Saturday and yesterday were observed as close holidays amoung the native merchants, being the anniversary of the Cocoa Nut Festival, after which it is supposed to be safe for native craft to resume their coasting voyages. We have again but a light fall of rain to report, only 29 inches having been registered in Bombay to date, but accounts from the up-country districts are still on the whole favourable, and although the season must now be a late one, no serious apprehensions are as yet entertained as to the safety of the growing crop. The delay in commencing sowing operations in some of the districts, and the necessity there has been in others for resowing a great proportion of the land, have prevented our getting any reliable statistics as to the acreage under cotton cultivation, but we hope to have particulars before long. From Tinnevelly we have a telegram, dated 29th, quoting 7 ⅛d, c. and f.

Actual exports since last mail left, 15,792 bales.

The colonial produce markets have ruled firm, but not particularly active. Sugar has been in request, and good refining qualities of British West India have sold at extreme rates. Tea has had a drooping tendency, but coffee and cocoa have continued steady.

The annexed is dated Havana, August 5:—We issued our last circular on the 6th ultimo. The inactivity in the sugar market then noticed has continued to prevail throughout the month now under review, owing to the reported heavy decline in London, as well as to the firmness of holders, who seemed to be as determined as ever to keep aloof rather than to lower their high pretensions. The transactions, which were on the whole of little importance, have been made on the basis of 11 rs for No. 12 of common Train, and 11¼ rs to 11½ rs for Derosne sugars, which latter descriptions are getting scarce in the market. For unexceptional qualities, as also for bright yellows, Nos. 13 and 18, from ½ rl to ¾ rl above these figures have been granted, the market being almost bare of the latter classes. We place our general quotations, which are based upon the last sales effected, as follows:—Nos. 7 to 10, 24s 5d to 27s 7d; 11 to 12, 28s 1½d to 28s 8d; 13 to 14, 29s 2½d to 30s 4d; 15 to 17, 30s 10½d to 33s 1d; 18 to 20, 34s 2½d to 35s 4d; whites, inferior to superior, 35s 4d to 39s 9d. The stock here and at Matanzas amounts to 316,620 boxes, against 276,668 boxes in 1870. Molasses sugars have continued neglected throughout the month. We quote 8 rs to 8½ rs for Nos. 8 and 10 in hhds and boxes, equal to 20s to 21s 1½d in hhds, and 22s 3¼d to 23s 4¼d in boxes. Muscovado sugars—Owing to much reduced stocks here, as well as at outports, the transactions in this staple have been insignificant; prices continue to be firmly maintained at 10 rs to 10½ rs for fair to good refining grades, equal to 24s 3d to 25s 3d. Centrifugal sugars of coarse grain have been in eager demand for shipment to the United States, and some small lots in boxes were readily taken at 12⅜ rs for No. 11; there is now, however, almost nothing left for sale of this class of sugar. The exports from here, Matanzas, Cardenas, and Sagua la Grande, during the last month, were distributed as follows:—To the United States, 59,187 boxes 8,323 hhds; Great Britain and a market, 28,289 boxes 1,002 hhds; Denmark and Sweden, 4,461 boxes; Belgium, 3,580 boxes; France, 9,801 boxes; Spain, 37,306 boxes; Genoa, 892 boxes; South and Central America and other parts, 2,774 boxes—total, 146,290 boxes 9,325 hhds, against 246,179 boxes 23,563 hhds same month last year; and the aggregate of exports from the above-mentioned ports sum up to 832,284 boxes 228,601 hhds, against 1,400,331 boxes 324,177 hhds in 1870. The Crop—No current estimate of the deficiency of the yield can as yet be given, but as far as can be calculated at present, the same will amount to 30 per cent. The weather has continued to be most beneficial to the growing cane, and if no unforeseen circumstances should interfere, the next crop promises to be a large one.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, July 28:—There is no improvement to report in the prospects of the crop. Manufacturing has come to a close in Eastern Bengal, and the out-turn will be somewhat under that of last year. The advices from Kishnaghur and Jessore are very disheartening; the yield from the plant is miserable, and hardly sufficient to pay the expense of working. These districts had splendid prospects at the opening of the season; but the excess of rain that has fallen during the past three months, and the utter absence of sun, have completely ruined the plant. Fine weather during August may mend matters slightly, but at the best their out-turn is likely to be one of the smallest for many years past. In Malda, Moorshedabad, and Bhagulpore there has been more heavy rain, and a further sudden rise of the Ganges has caused the loss of a good deal of fine plant. In Purneah the overflowing of the Coosy river has done a great deal of harm, more especially in the southern part of the district. From Tirhoot, Chupra, and Champarun we continue to receive complaints of too much rain, which has reduced the produce of the plant, and, where the water has lodged, destroyed the fine appearance of the Khoonties. Some factories that commenced early have already housed large quantities for the date, and with good second cuttings, will make very full out-turns; but others that did not commence until the end of June, are greatly in want of fine weather to enable them to do as well as they at first expected. In most of the Benares provinces and part of the Doab there has been a continuance of very heavy rain, and without a speedy and favourable change in the weather, the late sowings are not likely to be very successful. The Khoontee crop is also in need of fine weather. Exports of indigo from November 1, 1870, to July 27, 1871:—To Great Britain, 16,675 chests; France, 515; Trieste, 2,790; foreign Europe, 250; America, 2,532; Gulphs and Levant, 1,779—total, 24,541 chests.

The annexed is dated New York, August 18:—Domestic trade is gradually reviving, and the general sentiment in commercial circles in regard to the fall season appears to be hopeful. The stocks of nearly all kinds of manufactures, raw materials, and general merchandise are large, the imports during the present month having been unusually heavy, and the accessions of domestic products fully equal to the average of former seasons. Prices of all the leading commodities, too, are remarkably low—so low indeed that many kinds of staple goods could not be replaced at the ruling currency. This is especially true of nearly all the principal articles of subsistence, such as groceries, provisions, clothing, and leading manufactures. Thus, with full stocks, low prices, an easy money market, and the improved financial condition of the great mass of consumers, indicated by good crops and reviving industries, a good distributive trade during the ensuing three months is reasonably certain. The export trade is not so active as it has been along back, owing to the depressed and unsettled condition of foreign exchange, incident to the scarcity of cash gold and the advance in the premium. The low ruling of the foreign markets for some of our leading staples, in connection with the scarcity of tonnage and consequent firmness of freights, also constitutes a bar to an active outward trade. Meanwhile, stocks of most of the export staples accumulate, but with a restoration of the commercial equilibrium we may look for renewed animation in this department. The condition of the money market is one of stereotyped ease, the maximum rate for call loans being 3 to 3½ per cent., and the minimum 2 per cent. Discounts are also easy at 5 to 7 per cent., according to signatures and date. Gold has been

quite irregular, though higher, through clique manipulations in connection with an active demand for the payment of duties. The extreme ease in the money market is at length imparting a stimulus to stock speculation.

THE COTTON TRADE.

LIVERPOOL.—August 31.

Cotton has been in good demand throughout the week, and yesterday the sales were unusually large, with an animated market. To-day there has been a quieter feeling, but quotations generally show an advance of ⅛d to ¼d per lb. For Sea Island the demand has been more active and general, the lower prices accepted for the common and medium grades of Florida having attracted the attention of buyers. American has been in good request, and has risen fully ¼d per lb. New York advices to the 31st instant quote middling Uplands 19¼ cents, equal to 9 11-16d per lb by steamer. The comparatively low prices of Brazil have attracted the attention of the trade as well as speculators, and an extensive business has been transacted at fully ¼d per lb above last week's currency. Egyptian has been in active request, and prices are ½d to ⅝d per lb dearer. East Indian has been in improved demand, and although the market has been freely supplied out of the recent arrivals, prices have advanced fully ⅛d.

In cotton "to arrive" and for future delivery the business has been considerable, and after some weakness on Saturday prices have advanced. The latest quotations are, yesterday—American, basis of middling, not below good ordinary, from any port, September delivery, 9¼d, October, 9⅝d, New Orleans, Oct.-Nov. delivery, 9¼d; not below low middling, Texas, Sept. delivery, not before 12th, 9¼d; ordinary, Memphis, steamer named, from Philadelphia, 8d; low middling, Texas, not below good ordinary, September delivery, 9¼d; Maranham, mutual allowances, ship named, 9¼d; Maceio, 9d; Hinguughat, fair ship named, 7½d. Dhollerah, fully fair new merchants, May sailing, 7¼d; fair new merchants, July, 7¾d. Omrawuttee, fair new merchants, due, 7¼d; Comtah, fair new merchants, ship named, 6¾d. To-day no transactions have been reported.

The sales of the week, included forwarded, amount to 124,600 bales, of which 31,520 are on speculation, and 10,700 declared for export, leaving 82,240 bales to the trade.

SEPT. 1.—The market opens quietly; the sales will probably amount to about 12,000 bales.

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 11,885 bales, while the stocks to-night are 27,653 bales *more* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Aug. 11, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph:—

The market the past week has been fairly active for the season. Up to Thursday, prices gradually declined under the desire of holders to sell off a portion of their stock, where it was of any size, so as to be in better condition for the opening of the new crop year. This disinclination to hold on longer was increased by the general belief that the next crop is to be early; and still there was no great pressure to sell, but offerings were abundant, the assortment good, and a willingness to reduce rates to a limited extent for the purpose of stimulating the demand and decreasing stock. Thursday, however, the Liverpool accounts showed an improvement, with an enlarged business, when at the same time some unfavourable reports from the south became current; these facts appeared to stimulate the demand here, and the result was a much firmer feeling among holders, with an improvement of $\frac{1}{8}$c on ordinary and $\frac{1}{4}$c on low middling. To-day, with Liverpool strong and the quotations by cable for middling Uplands reported at 8$\frac{7}{8}$d to 9d, the demand here further improved, and a rise of $\frac{1}{4}$c in the quotations was established. For forward delivery the fluctuations have in the main corresponded with those for cotton on the spot, but with a more decided recovery to-day, though since the market closed to-night prices are off slightly. Low middling closed at 17$\frac{5}{8}$c for August, 17$\frac{13}{16}$c for September, 17$\frac{7}{8}$c for October, 17$\frac{3}{4}$c for November, 17$\frac{5}{8}$c for December, and 18c for January. The total sales of this description for the week are 72,050 bales. For immediate delivery the total sales foot up this week 14,684 bales, including 9,242 for export, 3,694 for consumption, 356 for speculation, and 1,392 in transit. Of the above, 178 bales were to arrive. The following are the closing quotations:—

	Upland and Florida.	Alabama.	New Orleans.	Texas.

Good middling	21 ...	21$\frac{1}{2}$ ...	21$\frac{1}{2}$ ...	21$\frac{1}{2}$ ...

For forward delivery the sales have reached during the week 72,050 bales.

ESTIMATES OF THE COTTON CROP.—We notice that some of our friends, both here and in Europe, are quoting us as authority for certain estimates of the yield of the growing cotton crop. This is an error, as we have at no time during the season given an opinion as to the probable total result. All we said was that up to the early part of June there had been *fifteen per cent. loss* this year as compared with last year—that is, the crop this year must necessarily be fifteen per cent. less (how much smaller events subsequent to that date must determine) than the previous one. Since then we have had fine weather (until recently) in Texas and also in the Tennessee district (which district includes over one-fifth of the crop—that is, the whole of Tennessee, the northern part of Alabama, and Mississippi, and Eastern Arkansas, &c.), and very rainy, unfavourable weather during June over most of the balance of the cotton field, followed by good growing weather in July and Aug. almost everywhere except in the lower portions of Louisiana, Alabama, Mississippi, and Georgia, in which latter district the weather has been variable all the time, though, of course, an improvement upon June. Now to estimate in figures the results of these different conditions of the weather in these various sections of the south, while the plant is in its present condition of rapid change, would be claiming a degree of foresight which we do not possess. And yet it strikes us that every reader, at least every one who has ever seen a cotton plant grow, must be satisfied that the aggregate result of the surroundings of the crop since June 1 must be a further loss as compared with last year, though, of course, a very much smaller loss than was feared before the favourable July weather began. The statement of our Macon correspondent, in a letter dated August 12, expresses only what we should expect to hear when he says that "the plant is small and without that vigour of growth and promise of fruitfulness which it had last year." We are led to make these remarks in view of what seem to us exaggerated estimates of the crop, which are now frequently heard, and which it appears to us cannot be realised.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending Aug. 18, 1871.			Week ending Aug. 18, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	329	524	4190	387	623	2479
Columbus	56	193	1561	49	99	1990
Macon	94	84	1344	56	225	3201
Montgomery	63	81	1808	48	198	2380
Selma	105	149	768	39	84	1485
Memphis	659	1528	3321	627	1029	4207
Nashville	53	213	320	101	27	3150
	1359	2772	13312	1307	2535	18892

The above totals show that the interior stocks have decreased during the week 1,422 bales, and are to-night 5,580 bales *less* than at the same period last year. The receipts have also been 52 bales in excess of same week last year.

The exports of cotton this week from New York show an increase since last week, the total reaching 2,691 bales, against 2,083 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:—

EXPORTS of COTTON (bales) from NEW YORK since Sept. 1, 1870.

—*New York Commercial and Financial Chronicle.*

NEW YORK, Aug. 25.—According to Messrs Moffatt,

Davidis, and Co.'s report, the week's receipts of cotton at all ports have been 8,000 bales, and since the 1st of September, 4,000,000 bales. Shipments to England, 11,000 bales; ditto, to France, 4,000 bales. Total since the 1st of September, 3,156,000 bales. Stock at all ports, 108,000 bales. Middling Uplnd, 8⅛d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Friday, Sept 1.—This market has assumed a quieter tone to-day, and only a limited business was done. The excitement that prevailed in Liverpool has subsided. Buyers are less disposed to-day to give the extreme rates than they were earlier in the week. Yarns for export and home trade are worse to buy, and business has in consequence been limited; low numbers have been in restricted demand, and in order to effect sales spinners have been induced to lower quotations. Goods have been worse to dispose of than yarns. In fact shirtings have been little inquired for, and to do a fair business a material reduction would be required. The same may be said as regards shirtings for the China markets. Few inquiries are made for printing cloths, and they have been rather easier to buy. Makers being well engaged have evinced little anxiety about fresh orders. Medium fabrics, jaconets, and mulls have gone off slowly, though with scarcely any alteration in prices. The same applies to longcloths and domestics. T'clothis and Mexicans are not so good to sell as they were some time ago. Quotations for 39 inch 7 lb shirtings, ordinary to best makes, 7s 10½d and 8s 7½d; do 8½ lb, 9s 4½d and 10s 1½d; thirties water twist, 1s 2d; fortees mule, 1s 2½d.

BRADFORD.—The wool market continued quiet. There has been comparatively few transactions in wool to-day. Consumers are generally well supplied, and operate only under absolute necessity. The demand for nails and brokes continues unchanged, and prices are firm. The same quiet tone pervades both the yarn and the piece markets. Offers are made in both single and two-fold yarns, but generally so much below current rates that very little business is the result. Both spinners and manufacturers continue well engaged, and prices are very firm.

LEEDS.—The number of local and out-town buyers has been about an average, including many Britain, Scotch, Manchester, and foreigners. Business in the coloured cloth halls was comparatively slow. All the large firms which have orders in the manufacturers' hands are relying upon their early delivery, and will postpone the bulk of their export orders until that is done. Moderate an unwonted trade in all kinds of tweeds is going on. Goods of all kinds are quite as dear as they have been at any time this season, but prices are more settled.

BIRMINGHAM.—The attendance in the flannel market was good, but business was hindered by the full prices asked. With respect to Yorkshire goods the prices asked are considered too high, while on the other hand makers complain that as for their prices have been very meagre. There is no speculation in wool, but prices are firm.

NOTTINGHAM.—Business in the lace trade is less active. The lace yarn market is firm, and prices have had an upward tendency. The value of silks is unaltered. The hosiery trade seems in much the same state as last week, business on the whole being healthy. Hosiery yarns remain at the prices of last week.

DUNDEE.—In our flax market for goods on the spot there has lately been decidedly more inquiry, and as there seems not to be an expectation of prices being lower for some time to come, purchasers have shown rather more inclination to operate suitable parcels, and although the business doing is still mostly of a retail character, there is altogether a busier tone in the market than there has been for some time past, and for some descriptions of fine advanced prices are required. For tows of medium quality there is a good demand at steady prices. Jute of common quality, continues dull, and prices have had a downward tendency. In the new jute some transactions have lately taken place, but prices are still considered extremely high. The yarn market has lately had a more buoyant tone, and considerable business has lately been done in flax and tow yarns at steady prices. Jute yarns have also been in rather better demand at firm prices. The demand for linens and manufactures continues good, and manufacturers generally are at present busily employed, and for some descriptions of goods have orders in hand for some time to come.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, August 18.

The market for all descriptions of flour, meal, and grain, has been quite unsettled in the past week, and closes irregular. The receipts of flour have not been so large as in previous weeks, while the demand has somewhat improved. Flours from spring wheat have become quite scarce, and extra State has been steadily advancing, although until to-day the wheat itself was declining. Flour closes 25c higher on the week. Flours from winter wheat, though closing a little stronger, have scarcely improved in prices; they have not been so freely offered, however, and there is a more confident tone prevailing respecting them. To-day, shipping extra State flour was readily taken up wherever it could be found at $5.50 to $5.60. In corn meal we notice the sale to-day of 600 bbls. Brandywine from the wharf at $4. Wheat opened firmer and more active, owing to a marked decline in ocean freights, but on Wednesday freights were again firmer, while Liverpool advices were lower. Receivers have been afraid of the freight market, apprehensive that when the new crop of spring wheat shall begin to come forward, freights will advance to extreme rates. It is to be noted, however, that the receipts of winter wheat have been mostly sold for arrival, and taken almost entirely for the continent, so that the shipments to Great Britain have been small, as there has been little spring wheat to go forward. To-day, with an advance in Liverpool of 2d, and some advance in the gold premium, there was a sharp reaction from the decline of yesterday. Spring sold freely in the range of $1.30 to $1.35, and amber winter at $1.45 to $1.47, part for arrival, the sales aggregating fully 200,000 bushels. A large number of vessels have been taken up this week to load grain for the continent. Corn advanced to 69c for Western mixed on the decline of twopence in ocean freights, but, with a partial recovery of these there has been a decline to 66c, although supplies are on a much reduced scale. The movements in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The continuance of brilliant weather has enabled farmers to make good progress with harvest work, and the crops have been secured in exceptionally fine condition. As yet but a small quantity of new wheat has been threshed out, and the result so far is not so satisfactory as was anticipated a short time back; nevertheless, the fact of the weights generally being good and the condition excellent will compensate to a great extent for any deficiency in bulk. The markets have been scantily supplied with new wheat, and the downward movement in prices is accordingly checked, factors being assisted by the decrease in the number of wheat cargoes afloat, as compared with last year, and by a demand for seed wheat on French account. Business to-day was very quiet, but no change took place in prices. Flour was inactive, and nominally unaltered in value. Some little time may elapse before threshing has been carried out to a sufficient extent to enable an accurate opinion to be formed in regard to the yield; meantime millers will restrict their operations to their immediate wants, and await the influence of the new crop upon prices.

Maize and oats were dull and cheaper at the opening of the week, but closed with more firmness to-day. Beans and peas have been dull throughout, and for barley there has been no inquiry.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 35 grain and seed-laden vessels have arrived at ports of call, viz.:—17 wheat, 10 maize, 1 barley, 2 rye, 1 linseed, 1 rapeseed, 1 valonea, 1 palm-nut kernels, and 1 maize and barley. The floating grain trade has this se'nnight been quiet in tone. Wheat was at first firm, and fine cargoes 6d to 1s dearer, but later the demand fell off, and prices have since become irregular. Maize—Fine cargoes are scarce, and 6d to 1s dearer. Barley—No sale has transpired; the nominal value for Danubian would be 27s 6d to 28s per 400 lbs. Rye—The best cargo Azow offering has been sold at 30s 6d per 480 lbs. The reported sales are:—Wheat—21 arrived cargoes: Berdianski, 49s; Marianopoli, 48s to 51s; Rostoff, Ghirka, and Taganrog, 46s 3d to 48s; Nicopol Ghirka, 47s 6d to 47s 9d; Ghirka, from Taganrog, 46s; Ghirka from Odessa, 48s 9d; ditto from Nicolaiff, 48s per 492 lbs. Choice white from Montreal, 56s to 57s; Chilian from Tome, 58s 6d; No. 1 spring from New York, 52s 6d; extra ditto, 54s per 480 lbs. To be shipped, 10,000 to 11,000 qrs, red winter, from New York or Montreal, 52s; No. 2 American spring, 49s 6d to 51s 6d per 480 lbs, American terms. Maize—8 arrived cargoes—Wallachian, 28s 3d to 29s; Anacria, 29s; mixed, from Philadelphia, 31s 6d; ditto from Baltimore, 31s 6d; American, from New York, 31s 6d per 480 lbs. On passage one cargo Odessa, 31s per 492 lbs. To be shipped, 3 cargoes mixed American, from New York, at 31s per 480 lbs. Rye—1 arrived cargo Azow, from Taganrog, at 30s 6d per 480 lbs. Linseed, improving in value; arrived in London 200 tons E.I. from Calcutta, 61s 9d per 410 lbs. On passage, 1 cargo Azow, at 58s 3d per 424 lbs. Shipped or to be shipped, 1 cargo Taganrog, 57s per 424 lbs, and about 850 tons E.I. Calcutta, at 60s 3d to 61s 3d per 410 lbs, A.T. Rapeseed is 6d dearer on the week. Arrived, 2 cargoes Azow and Odessa, 34s and 34s 6d per 424 lbs; arrived in London, 360 tons ordinary brown Calcutta, 64s 6d to 66s, and 150 tons yellow mixed at 71s and 71s 6d per 416 lbs. On passage, 250 tons ordinary brown Calcutta, 66s. Cottonseed quiet. On passage, 500 tons Egyptian at 9l 2s per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market has been devoid of activity, but prices remain steady in the face of the still very moderate stocks and large deliveries for home consumption. Low brown sorts, including Manila, attract some attention, these obtaining former rates. The refiners have taken fair supplies of West India, the sales in three days amounting to 2,169 casks. Barbadoes by auction part sold at 29s to 33s up to 35s 6d for grainy, and fine crystallised Demerara 37s 6d. Business by private contract is chiefly restricted to the lower qualities under 30s per cwt. There is not much crystallised Demerara, &c., in the market, and good qualities obtain full rates. Refined is about the same as before. 32,900 baskets Java are advertised for sale by the Netherlands Trading Company on the 19th inst. The stock of West India here is 12,300 tons less than last year, and of other colonial the deficiency amounts to 9,300 tons. Manila and Porto Rico are 13,200 tons short. Total stock, 72,700 tons, against 103,500 tons. The home deliveries have increased to the extent of 21,100 tons.

Mauritius.—388 bags soft brown and yellow part sold at 26s to 31s 6d. Privately 800 bags, including grainy, at 35s 6d to 36s 9d. A floating cargo, No. 12, at 30s for the United Kingdom.

Bengal.—1,591 bags by auction were bought in at high prices.

Manila.—Privately 13,000 bags Ilo Ilo sold at 22s 9d. 2,000 bags Taal at 21s.

Other Foreign.—By auction 2,118 bags Guatimala found buyers. Grainy sorts, 32s 6d to 36s; soft, 28s 6d to 31s. 156 casks Porto Rico were bought in.

Floating Cargoes.—Olo of Havana for the United Kingdom, No. 9½ and 13½ at 29s 3d; one of low brown Bahia for a near port at 20s 6d.

Refined.—There has been only a moderate business in dry goods, but general quotations remain unaltered. Pieces are steady at previous quotations.

MOLASSES.—150 puncheons fine Antigua have sold at 13s per cwt.

RUM.—There is not any change in the position of the market. A few sales have been made in common West India: Leewards, 1s 8d; Demerara, 1s 10d. 120 casks Mauritius at 1s 4d proof. Jamaica is firm.

COCOA.—There is a steady demand this week. Business has been done in Guayaquil at 50s to 52s. 800 bags Trinidad by auction three-fourths sold at former prices, ranging from 60s to 78s 6d, and for the good qualities, 82s to 88s. 1,842 bags Grenada found buyers at 46s 6d to 50s for ordinary to good ordinary, and 50s 6d to 58s for middling to good, with a few lots fine as high as 66s 6d. 216 bags other kinds part sold, including Surinam, at 60s. 302 bags low Guayaquil realised 46s to 47s 6d per cwt.

TEA.—Public sales are now held daily, the same as of colonial produce; but the aggregate quantity brought forward has not been extensive, amounting to 11,827 packages, nearly all "without reserve." Current qualities of new black leaf congou obtained last week's prices. Common sold as low as 10¾d to 1s 0½d. The better grades of Ping Suel green sold at steady rates. Gunpowder, 2s 11d to 3s 9½d; common to medium went irregularly at 1s 7½d to 2s 8d. Young hyson, 1s 11d to 2s 5½d; low, 1s 1d to 1s 1½d. Moyune greens, 9¾d to 1s 5¾d per lb. Further sales are declared for this day, including scented teas.

By private contract the business has been moderate in extent, now scarcely exceeding that of last week's public.

Coffee.—There has been a very good demand, with considerable business in native kinds of East India and Ceylon at rather higher prices. Other sorts remain firm. The public sales of Thursday last, comprising 2,404 casks (322 barrels 1,169 bags, were all common, ordery kinds of the three last week's sales. Small parcels and low middling to good ordinary, 60s to 70s; superior and fine 71s to 87s 6d; ang bit fine to 89s. 200 bags native realized 57s to 59s for good ordinary and bits to 63s 6d for bold. 40 casks sold, at 56s to 60s 6d. Privately business has been done in similar terms and a considerable quantity of native East India with other sorts sold. 970 casks fine ordinary mixture, chiefly mid pale Ceylon. Washed Ceylon, fine, 90s to 91s. Native Malabar, 60s 6d. 340 packages Mocha have chiefly come to hand this week. 264 bags part Mocha sold at 90s to 95s 6d, and some business transacted privately at the same. 117 bags Singapore part sold at 57s to 58s 6d for Berg. 30 casks 242 barrels and bags Jamaica low and ordinary, 60s to 62s; low middling to good ordinary, 63s to 70s. 1,402 bags Costa Rica at 58s 6d to 60s 6d. Also bags Costa Rica at 60s to 61s 6d. Santos Rio at 54s 6d to 56s 6d. And bags some unsettled. A floating cargo of good Costa Rica sold at 59s 6d per cwt for Trieste.

Rice.—There is a better demand generally, especially from the provinces and medium white sorts. A large business is reported in floating cargoes, 11,000 tons sold. Rangoon at 9s 11½d to 10s 4½d, according to quality. Newchwang Arrivals at 9s 4½d to 9s 6d. 1,400 tons Bengal, to arrive, including Rotee and Burma at 9s 6d to 9s 9d. 700 tons Cochin at 11s 7½d, on spot. Transactions on the spot include Ashantee at 10s, white Bengal at 9s 7½d to 10s, Moulmein 9s 10d, Patna 7s 3d, Bengal and Arracan, 8s to 9s; and the small portion of 2,200 bags Bengal sold by auction at 10s per cwt for white, 9s for mixed.

Imports and Deliveries of Rice in Aug. 28, with Stocks on hand.

Sago.—1,000 bags small grain steadily met with buyers at 14s 6d to 15s per cwt.

Spice Trade.—385 bags Singapore were taken in at 15s to 17s 3d per cwt.

Tallow.—600 bags were freely bought in. A few lots good Penang sold at 42s 6d per cwt, and some damaged at cheaper rates.

Black Pepper.—Several arrivals have taken place, but the market is firm. Privately Penang was sold at 6½d to 6¾d. Singapore, 6¾d to 6¾d. 240 bags of fine Tellicherry sold at 8¼d to 8¾d for the first grade. 1,500 bags Batavia were bought in at 6¾d. 30 tons Penang for distant arrival negotiated at 6¾d per lb.

White Pepper has been steadily inquired for. 1,000 bags Singapore by auction were all taken in (6¾d to 6¾d), a few lots good, bright. 50 bags Penang at 7¾d for fine and bright part to fine grain sold.

Cinnamon.—The public sales of Monday went off steadily at full rates, and 2d to 3d advance upon the lower qualities. Of 2,653 bales Ceylon about 1,000 bales sold: first sort, 2s 1½d to 3s 9d; second, 2s 9d to 3s 6d; third, 2s 7d to 3s; fourth, 2s 2d to 2s 8d. 1,476 bags Java sold at some advance, viz. 6½d to 6¾d; bark, 2½d to 3½d; quill, 1s to 1s 7d per lb.

Other Spices.—Nutmegs are again rather higher. 65 cases brown Banda sold: 104's, 2s 10½d; 97's, 3s 4d. 7 cases 1 cask ordinary mace, 4s to 4s 1d, being unseasonably dearer. 10 cases with, 9d to 10½d. 74 bags Amboyna cloves were chiefly taken in. A few lots sold at 6½d to 6¾d. 554 bags Zanzibar sold steadily at 3¼d to 3¾d. 100 bags pimento, 2¼d to 2¾d per lb. 440 cases Cochin ginger chiefly sold on former terms: rough, 43s to 46s; stale, 41s; part scraped, 58s to 70s, one lot very bold, 75s 6d. 215 barrels Jamaica 42s to 61s for ordinary to middling. 81 packages cassia were part sold at 44s per cwt for ordinary quality.

Saltpetre.—Transactions during the week have been upon a very moderate scale, including Bengal, refraction 9 to 6½, at 27s 6d cash and about prompt. 50 tons to arrive at 26s per cwt.

Imports and Deliveries of Saltpetre to Aug. 26, with Stocks on hand.

Delivered last week 200 tons

Drysalteries, Gums.—Cutch is quiet, there being a large supply here and in Liverpool. Gambier firm. Camphor firmer, last sold at 116s. No further business reported since arrival. A sale of turmeric has been made at 12s offered. 25 chests bar 15s were bought in. Cochineal is in request.

Spirits of Turpentine firm. 105 casks partly met with buyers chiefly in small lots. Fine rectified, 31; common, 30; fine, 30; common to fine, 29 to 29½. Fine orange bought in at 71½ per cwt.

Metals.—The pig-iron trade shows continued improvement. Scotch pig iron has changed in price. Warrants have risen 6d to 1s, and have closed steadily at the rise. The improvement now shows a further increase of enquiry, with less sale. Manufactured iron is very scarce. Cleveland warrants, 60s cash, 59s to 59½ English iron has brought an outdoor better rates. Other, and has to end with fully moderate transactions. Spelter is quiet but firm, and for a few weeks of October 19½ to 19½, other quotations unchanged. No intelligence of material importance. The sales of the Netherlands Trading Company, closed for the three months, will amount to 3,000 casks against 4,000 last year. Straits tin were sold here at 120½ cash; for August 120½ at the same price, and some at 120½ per cwt. Quicksilver, 6s 10½ per bottle. English lead is steady, demand.

Hemp.—The market is firm, with fair sellers on forward terms. No Manchester demand seen to-day. Importers of some extent has two ships has arrived at 44l to 47l per ton.

Jute.—A few sales have been made for second open port week's terms. The market is quiet upon. At Dundee imports are limited, but the shipments active. Manufactured goods were both rather a better demand. The stock of jute in London is still very small, being 22,120 tons against 21,000, 26,170, and 28,000 tons at the same date in the three foregoing years at the same date.

Linseed.—Several sales of Calcutta have been made at 61s 9d to 62s ex ship. Black Sea, 53 for coast and afloat, 58s 3d to 58s 4½d per qr. At these prices some cargoes have been sold.

Oils.—Spanish remains very dull, and is nominal at 82l per tun. Common fish oils also inactive. Pale seal, 38l. Olive firm, but without activity. Fine Lucca qualities, 48l 10s to 49l 10s up to 52l per tun for Gallipoli. Palm steady, with rather more inquiry. Lagos, 37l. Cocoa-nut quiet. Ceylon, 29l, and 5s less for arrival. Linseed oil without demand for future and very; but on the spot is scarce, commanding 36l. Rape oil has improved in value. English brown, 43l on the spot and to the end of the year. The sellers now require 10s more. Refined quoted 45l to 46l 10s. Foreign, 47l per ton.

Petroleum.—American refined has sold for delivery to the end of the year at 1s 10½, but is quoted on the spot at 1s 6d per gallon.

Tobacco.—American, 40s to 50s 6d per cwt.

Tallow.—Foreign continues unchanged, although the supply of Australian this week has again increased. In quotations no variation has occurred. Petersburg, 44s, October to December, 45s 3d; spring, 46s 3d to 46s per cwt.

Particulars of Tallow—Monday, Aug. 28 1871.

POSTSCRIPT. Friday Evening.

Sugar.—Two market closes without alteration. To-day's public sales consisted entirely of West India, which partly sold, making the business 1,021 casks, and for the week 3,190 casks. Privately 5,500 mats low brown Java sold at 22s.

Coffee.—842 casks 128 barrels and bags plantation Ceylon, and 30 cases 523 bags East India found buyers at fully previous rates. Of 8,164 bags Ceylon, Rota, a large proportion sold at 61s to 75s per cwt.

Rice.—A cargo of Rangoon at 10s 3d per cwt.

Tea.—At the sales of 9,164 packages scented teas went at low prices. Congou without alteration.

Rum.—Business in Demerara proof at 1s 9½d to 1s 10d per proof gallon.

Safflower.—80 bales Bengal part sold at 7l 10s to 11l 2s 6d; loose, 5l 5s to 6l 5s. 64 bales low part sold at 4l to 4l 15s per cwt.

Shellac.—Of 250 chests by auction a few lots sold; second orange, 7l per cwt.

Turmeric.—650 bags Bengal were taken in at 19s 6d.

Cutch.—350 boxes were bought in at 22s to 23s per cwt.

Metals.—Straits tin 120l, with prompt. Scotch pig iron, 61s to 61s 3d per ton, cash.

Oil.—145 casks cocoa-nut part sold; Ceylon, 38l to 39l; Sydney, 34l to 35l 6l. 66 casks palm, part sold, at 32l to 33l 5s per ton for low quality.

Tallow.—By auction 732 casks Australian went at full to rather higher rates: best, 44s 9d to 45s; mutton, 44s, low in proportion. Petersburg firmer at 44s spot, 45s last three months' and 46s per cwt spring delivery.

ADDITIONAL NOTICES.

Dry Fruit.—The demand for new currants continues fair, and though prices are easier there is no desire to get rid of fruit at a sacrifice. Some very superior samples are to hand, and high prices are paid. Valencias are firm at former rates.

English Wool.—Hardly so much doing. No alteration in prices.

Colonial Wool.—Prices very firm. Next public sales commence September 14, for which 129,000 bales are to hand.

Flax.—Market steady.

Hemp.—Market for Russian inactive. Manila is still very firm, and much higher prices are now asked and paid. A fair parcel of Sorsogon sold at 51l. Fully 10,000 bales have recently been done, principally for January to March delivery, from 46l to 47l 10s, but no more sellers at the latter price.

Silk.—Some business doing, but market generally weak.

Tobacco.—The market for American tobacco continues quiet. In other descriptions business is restricted by the smallness of the stock.

Leather.—The leather market has not indicated any change during the past week. With a continuance of small supplies, the demand has sufficed to keep down the stocks and to maintain firmness in the market. There was rather more leather at Leadenhall on Tuesday, but the offers of light crop hides, English butts, particularly those of right weights, good English shoulders, light common dressing hides, light dressed hides, kips, calfskins of middle and heavy weights, and horse hides, were in request at fully former quotations.

Metals.—The metal market has been very quiet during the past week. Copper.—The amount of business transacted has been extremely small, but holders do not materially give way in price. Tin.—The Dutch sale is announced for the 28th instant, when 54,000 slabs Banca and 2,000 slabs of Billiton will be offered. The market has been tolerably firm, transactions having taken place as low as 120l, closing 121l to 122l. Lead unaltered.

METROPOLITAN CATTLE MARKET.

Monday, Aug. 28.—The total imports of foreign stock into London last week amounted to 10,040 head. In the corresponding week in 1870, we received 12,918; in 1869, 14,776; in 1868, 4,342; and in 1867, 10,716 head.

In the cattle trade to-day nothing of interest has transpired. The receipts of fresh home beasts are in average size, and have been amply sufficient to meet the demand. The supply of beasts from our own grazing districts has been moderate, and the quality generally, has been good. Sheep's stock has still quality, and the best Downs have not been worth more than 5s 4d to 5s 6d per 8 lbs. Medium qualities have been in moderate request. There has been a good show of sheep in the

pens. The demand has not been active, but prices have been supported. The best Downs and half-breds have made 6s 8d to 6s 10d per 8 lbs. Lambs have been quiet, on former terms. Calves have sold slowly; and the demand for pigs has been inactive.

SUPPLIES ON SALE.

HOP MARKET.

BOROUGH, Friday Sept. 1.—The accounts from the plantations are tolerably favourable. The business doing is not extensive, and prices rule as under:—Mid and East Kents, 60s to 147s; Sussex, 60s to 105s; Farnham and country, 90s to 130s; Olds, 20s to 30s.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Sept. 1.—There have been moderate supplies of potatoes on offer. With a fair demand prices have ruled as under:—Regents, 60s to 80s; Shaws, 40s to 60s; Kidneys, 80s to 110s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 1.—The tone of this market during the past week has been rather quiet, but holders being exceedingly firm in their demands, there is no change in prices.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 1.—This market opened quiet, with a small attendance. Beans, peas, oats, and oatmeal are unchanged. Indian corn, 29s 9d. Wheat, spring, No. 1, 10s 6d to 10s 7d; wheat, spring, No. 2, 10s 3d to 10s 4d. Flour was unchanged, steady.

WAKEFIELD, Friday, Sept. 1.—At this market to-day there was a fair quantity of new wheat on offer, but the demand was not active, and last Friday's prices were barely maintained. Fine fresh old was steady at late rates. There was no change in other articles.

The Gazette.

TUESDAY, August 29.

BANKRUPTS.

Thomas Fletcher, Poultry, City, gunmaker.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT, and VARNISH WORKS, 24 LIME STREET.

"For public schools, and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

The Corporation also issue

CREDIT LYONNAIS.

REPORT presented by the Board of Directors in the ORDINARY MEETING held the 31st July, 1871.

M. HENRI GERMAIN in the Chair.

As your commissioners have informed you in their report, the events which for a long time interrupted the communications between Paris and the rest of France did not permit us to lay before you at the ordinary period the account of the operations of our Company.

As soon as the cause of that delay ceased, we lost no time in collecting the documents necessary for definitively drawing up the balance sheet, and we have convoked you to submit to you the results of the last year, being anxious to terminate the postponement which circumstances had imposed on us.

In meeting you again after the trials through which the country has passed, our first duty is to inform you that your interests have been preserved, and that the situation of our Company is intact.

In the midst of so many public and private disasters, our enterprise has not directly suffered; the current of its profits has been interrupted during several months by the suspension of all commercial activity in the country, but its capital and reserves have been preserved from all depreciation.

The first half of the last year had been satisfactory; the movement of business promised favourable results for the year 1870.

Political events suddenly changed the aspect of things.

From the first apprehensions of war our anxiety was exclusively directed to the measures to be adopted to assure the security of our Company, and to place it beyond the reach of all future eventualities.

Foreseeing that considerable sums would be withdrawn, we endeavoured to realise immediately, in the form of specie and banknotes, sufficient resources to more than cover all demands that might be made. As the funds were likely to be principally drawn out at Lyons, where the greater part of our depositors reside, a considerable sum had to be maintained there. At the same time we had to provide for the eventuality of the siege of Paris, where almost all our acceptances were payable, as the duration of the investment was quite uncertain. Notwithstanding the difficulties of that situation, we were able, by the abundance of our resources, to hold at our disposal, at both places, and at all times, a considerable surplus, although the withdrawals attained proportions which may be considered as a maximum. The following table, representing the amounts exigible each month during the second half of last year, shows in what proportion the withdrawals were made:—

1870	Deposits and Bonds at Fixed Dates. francs	c		Current Accounts. francs	c		Total. francs	c
30 June	37.129.720	43	.....	23.103.261	93	.....	60.231.982	36
31 July	30.598.210	44	.....	17.944.355	17	.....	48.450.565	61
31 August	12.289.502	33	.....	11.472.639	91	.....	23.762.442	27
30 September	8.768.425	60	.....	15.440.756	48	.....	24.169.182	08
31 October	8.438.922	26	.....	14.415.889	84	.....	22.854.812	10
30 November	8.143.551	60	.....	13.406.082	75	.....	21.549.634	35
31 December	9.474.730	68	.....	12.659.505	14	.....	22.134.235	82

Thus the total of our debts exigible, which on the 30th June exceeded 60 millions, was on the 31st August only 23 millions, and remained at about that sum until the 31st December. It was therefore necessary to provide in a few weeks for the reimbursement of 40 millions, apart from the payment of our acceptances, the funds for which could not be sent to us by our correspondents for want of means of communication. It must be remarked that in this movement of withdrawals, those of the deposit accounts were much more considerable than those of the current accounts. The former, which had at the commencement of the crisis amounted to 37 millions, fell at one moment to eight millions; the latter, originally 23 millions, never descended below 11 millions. As we had anticipated, the business with private individuals, from whom the deposit accounts are chiefly received, is more susceptible, and presents in moments of crisis less stability than that of traders and bankers, to whom the current accounts principally belong. If we compare the monthly account of the sums exigible with that of our disposable resources, it will be seen that the latter always showed a considerable surplus. The amounts of each were as follows:—

1870.	Exigible. francs	c	Disposable Resources.	francs	c	Balance Disposable.
30 June	60.231.982	36	(Cash	11.165.128	30	16 per cent.
			(Discounts, &c.	58.685.708	27	
				69.850.836	57	
31 July	48.450.565	61	(Cash	40.849.126	40	28 per cent.
			(Discounts, &c.	21.586.507	68	
				62.435.634	14	
31 August	23.762.442	27	(Cash	33.492.946	84	88 per cent.
			(Discounts, &c.	11.250.449	49	
				44.742.396	33	
30 September	24.169.182	08	(Cash	31.275.405	08	69 per cent.
			(Discounts, &c.	9.746.731	03	
				41.022.136	11	
31 October	22.854.812	10	(Cash	19.289.692	50	40 per cent.
			(Discounts, &c.	12.667.192	05	
				31.956.491	65	
30 November	21.549.634	35	(Cash	19.962.807	91	44 per cent.
			(Discounts, &c.	11.197.320	07	
				31.160.187	98	
31 December	22.134.235	82	(Cash	14.[illegible]	91	34 per cent.
			(Discounts, &c.	15.527.268	29	
				29.657.905	20	

Thus at the commencement of the crisis the balance of resources over the sums exigible was 9 millions, or a difference of about 16 per cent.; on the 31st August, when the crisis had acquired its full intensity and the greater part of the reimbursements were already effected, the surplus was 21 millions, or 88 per cent.; that proportion gradually decreased as the crisis diminished.

In consequence of the danger specie incurred from the war and the insurrection, we decided on establishing an agency in London, where we placed in safety the surplus of our resources. The foundation of a branch there had another object; that of connecting our establishment with the commercial and financial movement which, suspended in France, had migrated to England. We have since maintained that agency; it facilitates our participation in certain affairs, and presents advantages for our movement of funds. It is besides a useful complement to our financial organisation.

We must mention the satisfactory working of our bonds and deposits at fixed dates. Their reimbursement, spread over a long period, imposes on us only a small monthly charge. A portion of those falling due has always given rise to renewals. Their amount, which on the 30th June, 1870, was 27 millions, was still as much as 20 millions on the 31st December. The permanency of that portion of our resources was a valuable assistance to us. The public, on the other hand, have been able to appreciate the value of this service by receiving as the acceptances fell due the integral amount of their capital, while most other investments had suffered a depreciation.

The difficult circumstances which our Company has traversed, has solved two important questions we had often put to ourselves.

Penetrated with the necessity of giving to the greater part of our capital an employ capable of very prompt realisation, we had always directed our efforts to that object; but so long as the course of events had not placed us in presence of really critical circumstances, we could not be sure of having entirely succeeded. Now, after having, in presence of the invasion, reassembled without difficulty 40 or 50 millions in the space of a few weeks, we believe that the certainty is acquired.

Moreover, although we had exercised the greatest care in the choice of our debtors and in the class of securities we received, there still remained to be seen whether a general shock to credit would not affect, in a sensible measure, our assets. On that point also the facts have answered in a most satisfactory manner.

The losses we have suffered, and those to which we are liable, and which are integrally liquidated from the profits of the year, do not exceed, notwithstanding the gravity of events, the proportion which may be considered as normal in banking business. The bills of which the date of payment has been deferred cause us no uneasiness. The payment of those definitively arrived at maturity permits us to count on the others being duly honoured, and the estimates of our inventory have been made in such a manner as to render all miscalculation impossible.

The crisis through which we have passed has been a decisive proof of the stability of our Company. Long before it occurred, our thoughts had been directed to the eventualities of the future. Several times we had endeavoured to forecast the influence that a revolution or an unsuccessful war might exercise on our affairs. That preoccupation was always present in our minds, and yet

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for August, gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend in each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month; New Capital Created and Called; Tables of Railway Traffic Receipts; Notices and Reports of Stocks; Failures, Railway, Banking, Finance, Insurance and Miscellaneous Companies; New Companies and New Capital. Prices made up to August 23.

Advertisements for the next Number, to be published on September 30, must be sent to ensure insertion on or before September 28.

OFFICE—340 Strand.

THE NEW FRENCH CONSTITUTION.

The upshot of the recent crisis at Versailles is the adoption by large majorities in the Assembly of a new Constitution for France. Since the conclusion of peace France has been governed without any formal Constitution—its real Constitutional apparatus, that of a Sovereign Assembly administering the affairs of the country through a removable chief, being hardly specialised enough in French eyes to deserve the name of a form of government. By the Act of last week however the informality has come to an end. Henceforth France is to be a Republic, with a President possessing powers similar to those of the removable chief under the recent *régime*, but to be irremovable during the continuance of the Assembly. The President is to have no direct power over legislation, not even a veto,—he is merely to promulgate the laws which the Assembly makes,—but in Executive matters he will have all the authority of the American President, and more—the authority especially of appointing and dismissing Ministers, who are, like himself, to be responsible to the Assembly, though in what way the responsibility is to be enforced the Act is silent. Such is the Constitution which a Monarchical Assembly, calling itself "Constituent," and determined to show that it is so, has felt compelled to adopt for France; and both from the circumstances of its origin, and the peculiar form adopted, it is not the least interesting of the many constitutional experiments which France has tried. We are sorry we cannot join in the satisfaction which seems to be generally felt at the settlement in this manner of the constitutional difficulty. In some respects it has effected an improvement on the recent position, but any advantages it has are counterbalanced by more serious defects.

The advantages, such as they are, are of a very obvious kind. It is something, in the first place, that with so excitable a Parliament as that of France, full of keen partisans and with a minority suspicious of the majority, and believing itself to represent the country better, a constitutional crisis should have ended without any violent contest. No matter what the causes may be, whether dislike of civil war while a foreign army still holds the forts of the capital, or the doubts of each party as to its success in a *coup d'état*, it is fortunate for France that good sense enough has been left to postpone what is perhaps an inevitable contest. Each new avoidance of an impending struggle is so far a guarantee of future peace, as the country gains time to know itself and the occasions of contest disappear when there is no actual war or violent contention to inflame them. It is also a gain for France that by adopting after much debate some shadow of a Constitution, the Assembly has put the Government in a better position for negotiating with the Germans. The latter can no longer say that France must be treated as a disturbed country with an unstable Government—can no longer use that argument as a plea or a pretext for continued occupation beyond the strictest limits of the treaty. In fairness, even without the payment of the third half-milliard, the Germans would now be bound to evacuate the Paris forts.

And there are even advantages of a more permanent kind from the new position of affairs. The Act has put an end to the intrigues of which the Assembly was the scene in consequence of its disputed claim to be "Constituent," and the jealousy of the Left lest the claim should be vindicated by a Monarchical restoration. It is certainly a curious compromise that the majority should have asserted the claim by passing a Constitutional Act, and at the same time giving the only name to the new Government—viz., that of a Republic,—which the Left would not have resisted by force. That such a compromise should have been possible is a proof of the weakness of the Assembly, and of the want of harmony between the country and the majority; but it is nevertheless a compromise which will permit affairs to go on without a violent shock, till some new cause of collision arises, and that is no small matter. The Assembly confesses its weakness, but though that is not a good thing in itself it is better than an attempt to govern strongly by an Assembly which misrepresents the country. Among the more

permanent advantages too we must reckon the sentimental satisfaction apparently given to M. Thiers, the Assembly, and, for what we can see, the majority of ordinary Frenchmen. All are more or less content. M. Thiers appears to think that to be an irremovable President of a Republic is a higher dignity than to be removable Chief of the Executive. He is a vain man, and his ambition and vanity are gratified by the distinction. The Assembly, along with Frenchmen generally, conclude that they have really got a Government which passes as such among nations. They are now represented in some sort of outward form, and can fancy themselves that they are governed. Thus all parties concerned are satisfied, and however much a prosaic people like ourselves may wonder at the exaggerated importance given to form, we must recognise in the satisfaction of French feeling, and in the sop given to the vanity of the Executive Chief, most powerful instruments for establishing and working the new order of things.

But while so much can be urged for the new Constitution, on the ground of its temporary and incidental advantages, we must retain the opinion we expressed when it was first proposed to make M. Thiers irremovable for a fixed time—that such a Constitution will be essentially vicious, theoretically unworkable, and likely to turn out ill in a French Parliament, and above all in a Parliament like the present. The incurable defect is that the Parliament which makes the laws, and the President who enforces them, may disagree, and that endless confusion and strife must ensue. No Government can be responsible, in any proper sense of the word, which has not control of legislation. Otherwise the rules and objects of administration which it approves and desires may not be made law at all, while existing rules may be changed by a power above it in the direction opposite to its policy. On the other hand, the Legislature is equally powerless under such an arrangement, from the simple cause, which needs no illustration, that its laws may be enforced in the letter only and not in the spirit, by an unfriendly instead of a friendly agency. In foreign affairs the confusion arising from hostility between two powers, who are equally irremovable, and who have both vetoes on each other, would be even more intolerable. And not only is the defect theoretically flagrant, its recent illustrations in French and American history are such as might have warned any people that there is no single vice which has so clear a tendency to be fatal to the Constitution which contains it. Nor do we see that the difference between the present and similar Constitutions—that the Executive Chief, instead of being made irremovable for a definite term of years, is to hold office while the Assembly exists—will tend to cure the defect itself. The two irremovable powers will be alike unwilling to take themselves away, and neither will have power to compel the other to go. M. Thiers will have no power at all, and the Assembly will only have power to do so by also removing itself. There is thus a chance under this system of hostility between two irremovable powers, just as there is under the system of a Presidency for a term, and there is no way out of it except by a voluntary dissolution or resignation of one of the parties to the struggle. There cannot be a penal dissolution in France.

We should anticipate therefore, as the inevitable consequence of the new Constitution, no matter who were working it, a constant succession of serious collisions. This is the most likely thing to happen with any Executive and any Parliament. How likely it is where the Parliament is French and the President is far from being its free choice, and is utterly alien in habits of mind and opinion not only to the Assembly which elected him, but to the new generation of his countrymen, it would be useless to insist. The informal Constitution which the French have just discarded had the one great merit of providing a single ultimate power. The Assembly was master, and could change the Executive when it pleased, and so long as this was the case there could be no real collision of authority, even where the Assembly did not quite like the chief it appointed. Now the Constitution is changed, and the only substantial alteration is the removal of the one merit which the old Constitution possessed. M. Thiers and the Assembly say, and perhaps believe, that they have strengthened the Government, but they have only made it rigid, and rigidity is not strength.

The Constitution is also objectionable for other reasons. The change has settled controversy for the present, but we do not know that France will gain in the long run by the formal constitution of a "Republic." The name cannot but offend many parties, and give them something tangible which they will seek to overthrow, whereas under a nameless and provisional Constitution all parties might have acquiesced in living, pending the formation of an opinion in their favour which never came, and France meanwhile learning the supreme art of self-government with the simplest form of Parliament. The French Republicans have got the name instead of the reality which was otherwise possible for them, and it would be rashness to anticipate the permanence of the name. It is also a grave defect in the Constitution that the President is only to speak in the Chamber after giving notice. Perhaps in a French Parliament, from the more formal style of debate, the necessity of constant intercourse between the head of the Government and the Sovereign Assembly is less stringent than with us; but there are still emergencies where the head of the Government should be able to intervene without notice, and in any case it should be his duty to be present that he may instantly intervene if expedient. The new French Constitution removes its chief to a distance from the Assembly, instead of encouraging that constant interchange of opinion which would be one chance of keeping them in harmony. Last of all, by making the declaration that the President and the Ministers shall be responsible to the Assembly without defining the means or nature of the responsibility, the Act commits the common sin of continental Constitutions. Everyone knows how for many years the Ministers of Prussia treated with the utmost contempt a precisely similar clause. A few lines giving the Assembly power to veto the President's appointments, or to remove him or any of his Ministers by votes of censure, would have been worth any number of phrases about responsibility. As it is, there will be endless wrangling about what responsibility means, and the clause in fact provides many occasions for quarrel. Altogether we cannot hope for much good out of this new Constitution, and we only trust the mischiefs we dread may not soon be developed—not until the time shall have come when even the Assembly must recognise that a new election is inevitable.

THE HAMPSHIRE CAMPAIGN.

THE commencement of the Hampshire campaign marks a great and probably permanent change in the general feeling of this country. Ever since 1815 Englishmen have entertained, and some classes of them have openly expressed, a feeling of dislike or contempt for soldiers, the Army, and the incidents of a military career. The money for the Army has been voted only as matter of necessity; few debates have occurred upon its organisation, though many upon the right to command it, and every reduction proposed by a Government has been accepted gladly. The middle classes have cared little about it, and with the masses of the people a lad who enlisted has been looked upon as a "ne'er do weel," quite lost to respectability. So deeply impressed was the Duke of Wellington with the existence of this feeling that he believed the only way to preserve the Army was to hide it away, dreaded debates on it, dreaded court martials within it, and would have declared a campaign like that of Hampshire fatal to the very existence of the force. This steady policy of concealment reacted on public opinion, increasing the general distaste for military affairs, until many politicians, usually sober enough, declared themselves in favour of the abolition of a standing Army; and had we not become possessed of India and so many colonies, and had not the Crown watched so persistently and strenuously over the Army, there can be little doubt that very rash experiments would have been attempted. A different feeling has arisen at last. Partly from the Volunteer movement, partly from the accord which has at last been produced between the discipline of the Army and the popular notion of what discipline should be, but mainly from excitement caused by the commencement of a new cycle of war upon the continent, the English people has suddenly begun to take an interest in its Army, debates competitive plans for enlarging it, and is distinctly pleased at an opportunity of seeing a *corps d'armée* in motion in the field. The abandonment of the plan for the campaign in Berkshire caused bitter disappointment, and the smaller campaign now in progress is watched almost with the interest felt in actual war. Long reports are published of every day's operations, little incidents like the breaking loose of the Guards' horses are dis

persed with acrimony, and the statements that the Artillery are in fine order, and the Militia do their work well, are discussed with cordial pleasure. No annoyance of any kind is expressed at the pageant, and the cost, which will be very considerable, is defended as an unavoidable necessity. It really appears as if the people were again about to take an interest in their Army, as they did in 1814-15, and to insist on efficiency—a sure sign that the interest is genuine. Should the Hampshire campaign prove a success, we may expect to see it repeated every year, until the Army has been fairly brought within the range of the subjects which British politicians are inclined to study. It is too early as yet to judge, but on the whole it would seem probable that this success will be attained, that the Control Office in particular, which has been so much attacked, will work well, and that the "army" of 30,000 will be pronounced by competent observers a first-rate *corps d'armée*, fit for active service anywhere; a verdict which will raise an immediate though possibly inaccurate impression that the other *corps d'armée* are equally efficient, and tend greatly to increase the national pride and therefore the national interest, in its military equipment.

Two consequences will follow from this new interest, one of them decidedly beneficial, but the other doubtful. There can be but little doubt, we think, that the habitual concealment of the Army has greatly increased our liability to severe occasional panics. Most men able to form an opinion are able to understand that no force exceeding 80,000 men could possibly be thrown upon our shores, even if two or three Powers combined for the operation without giving us ample warning—that is, quite two months' time in which to prepare for a descent. The panic therefore has always arisen from a notion that even this force could not be readily defeated, that we had not a sufficient number of trained men to meet such an army with any chance of success. Of late years this has never been true—that is to say, there has never been a time when with a week's notice the Government could not, by leaving Ireland ungarrisoned, calling out all reserves, employing all nondescript forces, and using the marines, have assembled 100,000 men between London and the coast. The great want has been of a reserve army to support them, of the means of transport, and of officers known to be fit for the superior commands. The reserve army is now being supplied, and if Mr Cardwell carries out his scheme we shall by March have a defensive army thrice the number of any probable invader. The existence of this force will not however reassure the country, which is taught by the Press to be most distrustful of the military department, unless it is occasionally seen and demonstrates its ability to assemble quickly, to march, and to keep the field. The best method of showing it is by two annual "campaigns," one in the south and one in the north, and we believe the expense of such manœuvres would be amply repaid by the freedom we should enjoy from recurrent panics, followed by a preposterous and often useless expenditure on everything. The main expense they would entail indeed would be in compelling Government to keep up the "Control services" requisite for (say) sixty thousand men in time of peace, and this would be a distinct gain to the efficiency of the Army. With the two *corps d'armée* of 30,000 men, whose efficiency would be visible, and two more well ascertained to be in reserve though not quite in such a state of preparation, panics would become infrequent or impossible.

The counterbalancing disadvantage might be the growth of a military spirit among our own people. Those who have strength are very apt to use it, and the English people is neither a meek nor a very virtuous one. Those who judge its temper only by the experience of the last ten years forget English history and the interest the English people have always taken in war, their indisposition to suffer any loss, and their occasional eagerness as shown in 1853, to fight for mere fighting's sake, just to see whether they were competent to fight or not. Had we a powerful Army a very slight change of circumstances might revive this spirit again and plunge us once more in all the complications of European wars, alliances, and expenditure on standing armies. The fretfulness exhibited by the country during the recent war illustrates this danger, the country, though on the whole content to let affairs drift, being all the while very uncertain whether it did not owe it to its own dignity to mingle in the affray. We should greatly deprecate the revival of this spirit which would probably suspend our prosperity for years, or impair it for ever, through the diversion of the national mind from healthier enterprises; but this is the principal, indeed the only danger we anticipate from the Hampshire campaign, an experiment which in itself may be justified to economists by a single line. The costliest of all conceivable armies is an inefficient one.

THE NEED OF UNIVERSITY TEACHING FOR WOMEN.

We have heard with extreme regret that there is some sort of doubt hanging over the continued existence of the Hitchin College which has attempted and successfully commenced so very useful a work for women, in demanding from all who enter it full proof of capacity to pass the ordinary matriculation examination of the English Universities, and then proceeding to give them the thorough training which young men who take their degree at Cambridge, Oxford, or London, are compelled to undergo. The work the Hitchin College has done must be carefully distinguished from that of the ordinary Ladies' Colleges, which, with one or two rare exceptions, are compelled by the necessities of the case to admit pupils very slightly prepared indeed even in relation to what is ordinarily regarded as purely school subjects. The lower classes of the best Ladies' Colleges in London are certainly filled with girls learning what the middle or even lowest forms of such schools as University College School or King's College School have already successfully drilled into the pupils. Girls beginning Latin, beginning arithmetic (as a science that is), beginning geometry, beginning natural philosophy, nay sometimes even beginning French and German, are almost inevitably received at the Ladies' Colleges, for these girls are quite above the age to be treated as children, and yet quite unable to pass such an examination as boys in the middle forms of any good day school would pass with ease. This being so, it is of course absurd to expect that these ordinary Ladies' Colleges can provide for those who attend them, even if they be qualified to seek it, the kind of education which we properly associate with University study. There are far too many who want much more elementary teaching to admit of classes which begin at the highest school level and carry on the pupils to the point attained by University graduates.

And yet nothing in the world is more important for English education just now than that women who are up to the mark should have access to the higher course of study we have referred to, and have access to it under circumstances which give them every advantage for its prosecution. Here we have the Middle Class School Commissioners pressing most justly and wisely for as large a share of the disposable endowments for girls' schools as they can persuade the somewhat prejudiced opinion of our country districts to acquiesce in assigning to them; and, again, in relation to the primary schools, we have School Boards all over the country trying to establish good elementary schools both for girls and for the younger boys, in which, as it is frankly admitted, we shall be both obliged and glad to accept a great many women teachers. Now how are we to expect that these middle class girl schools and elementary schools for infants of both sexes and for the elder girls can be provided and rendered efficient while there is literally no class of thoroughly-educated women to aid in the teaching of the teachers? It is perfectly true that women may be taught wholly by men,—perhaps as well or better taught than they would, at present at all events, be taught by women. But it is also perfectly true that no large class ever will be so taught till there is diffused amongst women themselves such a regard for a high standard of education as will rescue the professional studies of intending governesses and teachers from the stigma of being forced on them by poverty, and make them a sign of good breeding instead of a sign of want. Just consider too, what the teaching class would be even amongst men if

the teachers were not part of a much larger class who value the same studies for their own sake. As it is, it is the fate of schoolmasters to produce very often a painful sense of didacticism on those with whom they associate; but that sense of didacticism is as nothing to what is frequently left by well-taught schoolmistresses, and for this very simple reason, that they are conscious of being far more distinguishable and distinct from the ordinary society of their equals of the same sex than men,—so few women being thoroughly taught anything but "accomplishments," except for the purpose of imparting knowledge to others. It is hardly possible to exaggerate the value of an educated class *not engaged in education* to those who *are* engaged in education. It gives them a field of intellectual sympathy where they are on an equality, and not in the position of dictators, and altogether makes them feel their own position and attainments to be in the order of nature, and not, as it so often seems to be with irritated teachers, out of the order of it, and in a sort of preternatural order of their own. Moreover, if we once get a real class of highly-educated women, no one can doubt but that they would be of the most material use,—of a kind of use which men equally well educated can never be,—in teaching girls. What you want for girls is not only the lectures which supply the outline of instruction, but the tutors who will go over the ground again patiently and at the rate best suited to the pupil's capacity, explaining and removing difficulties, adding new illustrations, and impressing carefully what the lecturer has only opened up. Now it is nearly impossible that this function can be properly discharged for girls above a certain age, except by their own sex. There is too much danger of this sort of intellectual intimacy ripening into undesirable attachments to render it likely that one mother in ten would approve of such relations between her daughters and a tutor—to say nothing of the high price which men's intellectual labour still commands, and which renders tutorial help of this kind for girls very expensive. Now the Hitchin College really provided this as well as the more rapid and general teaching of the lecture rooms. And it was by providing both that it really managed to enable its pupils to reach a high standard of intellectual culture.

No doubt there will be a difficulty in the proposed removal of the Hitchin College to the immediate neighbourhood of Cambridge against which it is important that the conductors of the College should carefully guard themselves. We believe that the habits of intellectual independence in which it is proposed to train girls will be very good for them, but of course they will have their dangers, and those dangers will be far greater in the immediate vicinity of a great University of the other sex, than they would be on the old plan. We are disposed to fear that the economy caused by the gain of professional help at so much less a cost will be somewhat more than balanced by a far greater and not quite unnatural timidity on the part of parents in sending their daughters to a place where at one and the same time they will be learning independence of mind, and in not a little danger of exercising their independence rashly. It will be hardly possible to prevent Cambridge students from visiting their cousins or sisters' friends in the new College—certainly quite impossible to prevent it if the freedom of University life is in any sense to be accorded to the girls—and yet a single grave scandal of any kind, resulting even in a long course of years, would do much more to throw back the public appreciation of this higher education for women than all the specimens of perfect success would do to promote it. We are well aware that amidst the many economical difficulties of the scheme, it is by no means easy to provide at once adequate teaching for the College, and to provide it at a distance from any place of learning. Still the ideal College for women should clearly be in a spot remote from any such institution for young men; and if pecuniary difficulties render this impossible, the managers of the institution must restrict very sensibly the amount of social freedom which they propose to connect with the student life in their college.

Be the difficulties however what they may, we can hardly conceive of any object which better deserves the munificent help of rich men than this of providing for young women an education of the true University character, to be offered only to those who have already passed successfully one of the ordinary matriculation tests.

BOARD OF TRADE RETURNS.

THE Board of Trade Returns for August have been issued, and the results of the month's operations, as shown in these figures, are highly satisfactory. The value of the imports of produce, &c., during the eight months of the current year compares as follows with 1870 and 1869:—

	£
1869	174,309,101
1870	188,230,539
1871	215,510,494

In addition to which the arrivals of specie were:—

	£
1869	14,619,116
1870	17,957,156
1871	25,455,571

This large increase in the imports of bullion arises chiefly from the large increase in the shipments from the United States (10,540,173*l*, against 6,761,367*l* last year, and 2,186,112*l* in 1869), and from China (2,032,398*l*, against 42,870*l* and 1,266*l* respectively). The receipts from Germany, Russia, and Belgium have also been unusually heavy, while there is an increase of nearly 1,500,000*l* in the arrivals from "other countries."

The general imports (not including specie) during August are returned at 24,377,798*l* in 1869, 24,902,194*l* in 1870, and 29,003,027*l* this year. It must be borne in mind that the later period to which the returns are now made up creates some discrepance in the comparison of this year's figures with the previous ones, but the actual increase in both the inward and outward clearances this year is undoubtedly great.

With regard to the export trade, the figures for the eight months compare as follows:—

	£
1869	126,341,811
1870	131,643,368
187.	143,677,206

And for August only—

	£
1869	17,461,595
187.	17,087,496
1871	22,221,245

As the system of compiling the statistics of the export trade has undergone no particular change—though we believe later clearances are included in each month's return—these figures must be regarded as eminently favourable. They do not, however, include the exports of specie, which for the eight months have amounted to—

	£
1869	11,283,393
1870	11,600,993
1871	16,890,568

This large increase is attributable to the movement in connection with the payment of the French war indemnity, as will be seen from the following statement, which shows the shipments to Germany, Belgium, and France, as compared with last year. The increase in the two former cases and the decrease in the latter fully account for the total augmentation shown in the returns:—

	1870. £	1871. £	Comparison. £
Germany	511,290	5,243,997	+ 4,732,707
Belgium	1,405,783	3,246,370	+ 1,840,587
France	3,815,941	1,795,180	− 2,020,761

The following comparison shows the increase or decrease in the values of the leading articles imported during the past eight months of the present and previous year:—

Imported.	1870. £	1871. £	Increase. £	Decrease. £
Coffee	2,736,883	4,113,969	1,377,086	...
Wheat and flour	12,392,967	16,095,635	3,702,668	...
Cotton	36,828,406	39,064,237	2,235,831	...
Flax	3,824,535	3,274,998	...	549,837
Silk, raw	4,767,756	5,224,395	456,539	...
Silk manufactures	8,178,083	4,192,493	...	3,985,590
Sugar, unrefined	10,571,444	11,762,210	1,190,766	...
Tallow	1,770,569	1,720,718	...	49,851
Tobacco and snuff	836,113	2,656,788	1,820,675	...
Wine	3,351,245	4,819,668	1,468,423	...
Wool	12,199,234	13,876,645	1,677,411	...

Annexed is a similar comparison with regard to the export trade:—

Articles.	1870. £	1871. £	Increase. £	Decrease. £
Beer and ale	1,343,148	1,267,560	...	75,588
Coal	3,750,344	3,881,111	130,767	...
Copper	2,022,618	1,898,838	...	123,780
Cotton twist	9,518,899	9,924,437	405,538	...

BUSINESS NOTES.

TURKISH FINANCE.—We have so often published the figures regarding the finances of Turkey that there is no occasion to do so in connection with the new loan which happens to have failed. The general situation—that with a revenue of barely 14,000,000*l* there is a regular deficit of between 2,000,000*l* and 3,000,000*l*, and that the charge for the debt is an increasing burden of over 5,000,000*l* a year, is well enough understood. It is also comparatively well known that by the system of Turkish finance a very large part of the revenue is spent in the provinces without coming into the Central Treasury; that the best part of the revenue which does come in is pledged for special loans; and that money is constantly being borrowed to meet the interest on the old debt. These facts are so well known that the credit of Turkey is already much the lowest of any considerable State which is able to borrow in Western Europe, and no lender can be sure that his borrower may not break down at any moment. There is one point, however, which cannot be too often impressed on those who are disposed to invest in Turkish securities. The cause of Turkish discredit lies in the essential nature of the Government. It is in fact a Mahometan Empire, full of the defects of every priestly Government, pledged by its very existence to resist improvements, and likely to collapse at no distant date from the natural growth of the alien races which it governs. The dangers of trusting Turkey are thus real and imminent, no matter what the goodwill and intelligence of particular administrations may be. Then with regard to the present loan, there are not a few doubtful matters. There is a certain advantage in having the security of the Egyptian tribute, because some part of this tribute will be looked after by France and England, who guarantee an earlier loan for which it is pledged. The English and French Governments would only look to their own interests, but the attention they give to the common security might improve it for the benefit of their partners. But apart from this doubtful advantage, the security of the tribute is not a firm one — no firmer than the credit of Egypt, which is better than Turkish, but is not of the best. The Egyptian engagement moreover is one which is likely to be repudiated in the event of a Khedive succeeding who is not in the direct line of succession, an event which is quite possible notwithstanding the care with which the Khedive has provided for his son's succession. As the agreement to pay the additional tribute was only made on condition of a change in the succession being authorised, it is not likely that a successor will recognise it whose own inheritance has been hindered by the change. There are only too many reasons indeed why every Turkish loan should be discredited, and investors ought to know that few people who are familiar with the Stock Exchange ever think of holding "Turks."

PROPOSED DOOMSDAY BOOK.—We hope Lord Derby's suggestion of the expediency of a new Doomsday Book for England will in the end come to something. In the present state of the controversy about land, when strong allegations as to the small numbers of landowners are met by flat contradictions, it is obviously expedient to provide some accurate means for getting at the truth. If a complete Doomsday Book is impossible, it should not be very difficult to get a return of the number of "owners" and the average of their holdings. But there are one or two points in making up such a return which it will be important to attend to, or in the present social state of the country it will be worse than valueless. One is that the return should not be merely of "owners" in the strict legal sense of the word, but of all who have permanent interests of any kind carved out of the soil. It is no doubt important to know what is the number of legal owners, but the bearing of that fact socially is apt to be misunderstood, unless we can ascertain what other people have real interests in the visible property of the country—whether as copyholders, leaseholders (say) for terms of more than twenty years, and even mortgagees, if it were possible to include them. The order for the return will therefore require to be carefully worded. Another important point will be to distinguish above all between house property and unbuilt-upon land. We anticipate that a return of the kind we describe will bring out the fact that an immense number of people have a stake in the country as the owners of houses; but though this is an important fact socially, it would be a misfortune if it should give rise to an erroneous belief as to the ownership of agricultural land. It might give the impression that England is a country of small proprietors as regards land in cultivation as well as houses, which is far from being the case. For ourselves we should hope to see that the ownership of agricultural land, which is really a difficult business suitable only for considerable capitals, is neither in a very few hands nor yet very widely diffused. But it will be interesting to see what the distribution really is, and whether it is possible by legislation that would not be worse than the disease to improve it.

AMERICAN FINANCE.—The following is the annual statement of the United States' receipts and expenditure for the year ending 30th June last :—

RECEIPTS.	$		£*
From Customs	206,270,108	...	37,812,000
Internal revenue	143,098,153	...	26,233,000
Sales of public lands	2,588,646	...	468,000
Miscellaneous sources	31,556,736	...	5,787,000
Total net revenue	383,323,944	...	70,276,000
EXPENDITURES.			
For civil and miscellaneous	69,498,710	...	12,742,000
War Department	35,709,021	...	6,545,000
Navy Department	19,131,027	...	3,502,000
Pensions and premiums	41,870,592	...	7,676,000
Interest on public debt	125,576,565	...	23,023,000
Net ordinary expenses	292,177,188	...	53,566,000
SURPLUS	91,146,756	...	16,709,000

* Converting [illegible] at [illegible].

America is thus nearly 17,000,000*l* to the good in its national account by the working of the last fiscal year, the higher rate of repayment of the debt, which was commenced after the war, but has been interrupted at times by large remissions of taxation, having been resumed. It is not to be wondered at with such figures that American securities should be rapidly rising in value. Such large repayments, coupled with the recent conversion of a large part of the 5·20 debt, will make together a very large saving of interest in the current year. The interest is already almost as little as the annual interest charge of the English debt. It will not fail to be noticed that, in spite of some partial reductions of the tariff, the Customs still yield an enormous amount, and Mr Boutwell, it must be obvious, could spare enormous sums with the sure hope of recovering them through the natural elasticity of this branch of the revenue.

PRESERVATION OF COMMON RIGHTS.—We have received a short statement of the points decided by the Lord Chancellor in a recent suit, "Betts v. Thompson," affecting the question of the public interest in "commons." The subject has come to be one of the utmost importance to the inhabitants of large towns, whose health and comfort depend on the preservation of open spaces in the suburbs, and it is of no less interest to a large class of property-owners in the suburbs, whose holdings would be deteriorated in value by the commons in the neighbourhood being taken up for building. The question has moreover come to be an urgent one, because the traditions of the law are all in favour of the lord of the manor's privileges of enclosure, and it had come to be believed that practically the rights of commoners could not be successfully made use of to maintain in existence the commons on which the lord had made up his mind to en-

croach. In consequence of this state of the law, common after common around London has been attacked, and the suit to which we have referred was occasioned by one of these attacks. According to the statement before us, the manor of Tooting Graveney, in Surrey, within seven miles of Charing, cross, and which includes a common of sixty-three acres was purchased in 1861 by Mr W. J. Thompson, the present lord, and defendant in the suit referred to, for 3,650*l*—the cottage property being worth over 2,000*l*. Not long after the purchase various attempts were made to enclose half the common, resulting finally in a committee of the neighbouring inhabitants for its defence, and a Chancery suit on behalf of the commoners, which has just been decided by the Lord Chancellor. The importance of the decision lies in its getting rid of the supposed practical difficulties in the way of commoners defending their rights, as will be seen from the succinct statement in the paper before us of the points decided in favour of the public :—

1. That a freehold tenant of a manor may maintain a suit, not only on behalf of other freehold tenants, but also on behalf of others having a common right, in the event of that right being invaded by a common enemy.

2. That to justify his enclosure, the lord must prove that he has left sufficient common for the use of the commoners, and that in contradiction of the presumption of law, hitherto held by the lords of manors, the onus no longer rests on the commoners of proving an enclosure to be excessive.

3. The common rights actually exercised for centuries will be upheld in spite of occasional difficulties of language in the Records.

4. That the frequent use of such words as "inhabitants," "parishioners," and "resciants," in Court Rolls, is reducible in substance to the original prescriptive grant to the freeholder, and through him to his tenants, exercising the rights which he possessed, and thus points to the legal establishment of such a class having a definite status.

Thus the entire legal machinery by which it was supposed no effectual defence could be made against a lord's encroachments is swept away; a sufficient *locus standi* is given to single freehold tenants to enable them to act for all parties interested, the rights of the miscellaneous public are recognised, the onus of proof is thrown on the lord, and prescription is recognised in favour of the actual exercise of commons rights. By virtue of the decision it will be easy enough to defend most of the commons which are worth preserving against enclosure. The policy of the law has perhaps been the other way hitherto, and perhaps wisely so in the interests of agricultural industry; but under the new conditions of life in England, caused by the growth of manufacturing industry and of towns, there is good reason for its reversal, and we are glad to see that the Lord Chancellor has at length settled the point. No small credit is also due to the committee which has fought the battle in the present case, and we hope they will have no difficulty in obtaining subscriptions for the heavy bill of costs they have to pay.

PARAGUAY AFTER THE WAR.—Several official documents are now being circulated on behalf of the Government which has been set up in Paraguay since the overthrow of Lopez and the entire conquest of the country by the allied troops. To those who took an interest in the Paraguayan contest they are not without interest, from the light they throw on the terrible exhaustion produced by the war, to which the exhaustion of the South was by comparison nothing, and on the remarkable vigour and energy with which the mere remnant of a people after the ravages of war enters on the work of reconstruction. Paraguay before the war had an industrious population of about 1,337,000, a revenue of half-a-million sterling, numerous public works, including a splendidly equipped State railway, and in a material aspect was certainly one of the most prosperous communities out of Europe—the population working under an iron discipline upon one of the most fertile areas in the world. The Government was everything in the community, owning two-thirds of the territory, and disposing at pleasure of the subjects; but the resulting force was a great one, as was only too clearly proved by the duration and magnitude of the war which has destroyed it. Now however Paraguay is only a fragment of what it was. Its inhabited area at least is practically undiminished, but the population is reduced to one-sixth of what it was, and when life was resumed after the war the instruments and appliances of production were found to be terribly damaged where they were not completely destroyed. The railway had to be re-equipped with rolling-stock, engineers' shops, and stations, public offices had to be rebuilt, a population without food for daily maintenance, much less seed for the future, had to be settled, and hospitals and alms-houses were requisite on the largest scale. So complete was the wreck that even the Government's title-deeds to its own property had been lost, and a special Commission of Inquiry was necessary to vindicate its rights against squatters. Everything had to be done from the beginning—courts of justice re-established, paper money issued, immigration encouraged, arrangements made for having Paraguay represented at an international exhibition at Cordova, new taxes imposed. So far as can be gathered from official documents, the work of reconstruction is apparently proceeding apace, though under frightful difficulties. It will be interesting to see how soon Paraguay will recover to something like its old position, thus furnishing a new illustration of the rapidity with which States recover after the most devastating wars. We have seen how rapid the recovery of the South from its extreme prostration, though not to its former level, has been, and we should anticipate that Paraguay will recover almost as quickly. The fixed capital of an agricultural community—viz., the soil—is peculiarly indestructible, and this is especially so in a country like Paraguay, where the soil remains virtually in its native state, and is not to a large extent, as in England, the artificial product of long-continued labour. Hence a few years of peace should speedily make a diminished population at least as prosperous as the old population was. Unless there is immigration it will probably take a generation or two for Paraguay to recover its numerical force, but it is usually the case, even in the most destructive wars, that the loss of population is disproportionately among the adult males. There is consequently an elasticity of growth in such a people not to be found in the ordinary case, and we should not be surprised in ten or fifteen years, when the children have grown to maturity, to see the population of Paraguay rising from a sixth to at least half what it was before the war. We are glad indeed to find that a people which could do so much as the Paraguayans have done has not been extinguished by the war, but that a sufficient nucleus is left to ensure their future growth and independent existence.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending Sept. 2 :—

	Receipts of Week Ending Sept. 2.
	£
Customs	361,000
Excise	253,000
Stamps	201,000
Taxes	2,000
Income tax	17,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	9,148
Total	843,148

The total receipts of the previous week were 789,989*l*.

The Exchequer issues of the week on account of expenditure were 832,336*l*, viz. :—

	£
Interest of debt	5,229
Other charges on Consolidated fund	nil.
Supply services	827,107
Telegraph services	nil.
	832,336

During the week the cash balances have decreased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Aug. 26	812,585	1,260,143	2,072,728
— Sept. 2	711,150	1,225,613	1,936,763
Decrease	101,435	34,530	135,965

THE SEWAGE QUESTION.

TO THE EDITOR OF THE ECONOMIST.

SIR,—In your last issue Mr W. Hope publishes a letter on the above-mentioned subject. As the question just now engrosses great attention, and very rightly so, and as Mr Hope's letter would give wrong notions on the subject, as far as the process which I am alluding to is concerned, I trust you will allow me space in your columns for the following remarks.

I am a shareholder in the Phosphate Sewage Company and

I can assure Mr Hope that before becoming one I carefully studied the subject, and witnessed myself the experiments of the company, giving the following results :—

1. The Phosphate Sewage Company's process precipitates the solid matter in the sewage, making a manure containing on average about 10 per cent. phosphoric acid and 1½ to 2½ per cent. of ammonia, which, as every manure merchant will acknowledge, is worth from 4 to 5 guineas per ton, and will enable the company to show financial results of an unparalleled character.

2. The process deodorises and purifies sewage to such an extent that, as Dr Voelcker in his report says—"Effluent "sewage as thoroughly purified as I saw it done at the time of "my visit may be safely discharged into a watercourse without "fear of causing a nuisance."

3. The company does not in any way, after having extracted the solid matter, preclude the liquid from being employed for irrigation, quite the contrary; where the position of the town allows of irrigation, by all means irrigate with the effluent sewage, which, according to the same high authority (Dr Voelcker), "is more valuable bulk for bulk for irrigation pur-"poses than the raw liquid;" and besides, being a pure liquid, does not cause any such nuisance as irrigation farms do, where raw sewage is employed for irrigation.

4. If Mr Hope knows anything better to do with sewage as to purify it, and make at same time every part of it more valuable than before, his advice will be very welcome indeed; but he must be prepared then to show better results than those of the Essex Reclamation Company, which I believe tried to carry out Mr Hope's ideas on a large scale, with what result is sufficiently known. Until then I maintain that the Phosphate Sewage Company has solved the sewage question, and solved it most admirably too from a sanitary, as well as agricultural, point of view.

In the meantime is is satisfactory to see that even Mr Hope cannot refuse a qualified tribute of admiration to the process and its discoverers, and it is of course very interesting to know that as soon as Mr Hope has time, he will make some experiments with the company's process in conjunction with irrigation at his Romford sewage farm. Would it not have been fairer to wait for the result of such experiments, and let us have the benefit of them instead of criticising a process of which he clearly has only very imperfect notions?

I abstain from offering any calculation with regard to the probable financial results of the company's operations. I, and I trust all my fellow shareholders, knowing the value of our property, and having no desire to part with our shares, do not seek to influence the price of the shares either way. As Mr Hope however puts forth his statements in such an authoritative way as possibly to misguide some opinions with regard to the process itself, and as I consider, in a public question like this, such things should not be allowed I wish to state in a few words the fallacy and hollowness of his arguments.

Mr Hope begins by stating that town sewage in average is worth by analysis about eight shillings per head of a mixed population of men, women, and children. This calculation is based simply on the fact that the liquid and solid refuse of men contains in average about 10 lbs of ammonia; now, the price of ammonia, like that of any other commodity, is subject to supply and demand, and at present, with the falling off of Peruvian guano, ammonia is worth considerably more than the price which Mr Hope puts on it. Mr Hope, like most persons that have hitherto meddled with sewage, rejects the bulk of the solid residue, consisting of organic matter and some insoluble salts, as worthless, while in the process of the company such residue becomes a most valuable agent, by evolving a large quantity of carbonic acid, thereby making the large portion of phosphoric acid contained in the manure immediately available for the plants.

Mr Hope says that irrigation is the only real solution of the sewage question. I have stated already that the company's process is not in any way hostile to irrigation; what it combats is the diffusion of the infection and bad smell from the sewage works, where it is relatively harmless, to the neighbourhood of populous towns or villages, and what it tries to establish is the necessity of irrigating with colourless water instead of with raw sewage. Mr Hope, in a patronising way, of which no doubt his friend Mr Forbes will feel very proud, says that the latter is far too good a chemist to claim for his phosphate process any power of extracting ammonia from sewage. Mr Forbes, I have no doubt, in reading this exclaimed—"Save me from my friends." Dr Voelcker in his report states that in two samples of sewage deposit treated by the company's process he found 1·25 per cent. and 2·61 per cent. of ammonia respectively extracted from the sewage. The process of extraction is very clear, and known to everybody who has any notions of chemistry. Sewage deposit contains a more or less considerable quantity of magnesia, and the latter with phosphoric acid brought in contact with ammonia forms a salt, insoluble under ordinary circumstances. It does not extract the whole, because in such an enormous bulk of water a great part of the salt is redissolved. What Mr Hope means by the seven shillings running away into the sea is not clear to me. The company does not send anything into the sea; it purifies the water, and having made it harmless to man and beast, leaves it to be employed for the best purpose according to the locality.—Your obedient servant,

A Shareholder in Phosphate Sewage Company.

London, September 8, 1871.

Foreign Correspondence.

(From our own correspondent.)

Paris, Sept. 7.

The following are the returns of the Bank of France for this week, for last week, and for the week ending 8th September, 1870 :—

Total	2,944,881,216	21	3,016,910,382	95	2,694,757,906	92

Comparing this week's figures with those of last, these results are presented :—

Increase.	£
Deposits at Paris	70,[illegible],000
Decrease.	
Discounts at Paris	10,000,000
Prolonged bills	14,[illegible],000
Treasury bonds	[illegible]
Discounts at branches	16,[illegible],000
Treasury balances	125,[illegible],000
Deposits in branch banks	2,561,000
Cash and bullion	23,900,000
Notes in circulation	20,920,000

Notwithstanding the reduction in prolonged bills and in notes, the return is not satisfactory.

M. Michel Chevalier, in an article in the *Journal des Debats*, treats of "the negotiations the French Government has entered into with different States of Europe to escape from the liberal obligations of the treaties of commerce concluded since 1860." He affirms that "French diplomacy has received the order to make in Europe a sort of crusade" against the policy inaugurated by those treaties, and he denounces that order as a "reaction against the civilising ideas which are highly approved by the genius of liberty, and are essentially favourable to the fecundity of the industry of nations, since they stimulate the producer, and oblige him, by competition, to make incessant improvements, since too they are not less advantageous by the economy they permit in the formation of capital, which is one of the principal elements of the power of States, and the source of welfare for the people." He remarks how sad it is that France, which has the ambition of being in Europe and the world the champion of progress and of all political and religious liberties, should now adopt the worn-out doctrine of Protectionism, "a subject of disdain to almost all men who possess generous, elevated, and liberal ideas." But, nevertheless, he expresses the conviction that the ill-conceived crusade in question will fail, since it will have to encounter grave obstacles. At the present moment, for example, the French Government can only denounce the treaties with England and Belgium, the period for which they were concluded having expired; but those with Italy, Sweden and Norway, Holland, Austria, and other countries, have still several years to run, and M. Michel Chevalier thinks that their evident interest is to reject the propositions of the French Government. He assigns another reason why the Protectionist crusade should not succeed—namely, that the Treaty of Peace has granted Prussia the treatment of the most favoured nation, and she has consequently great interest in not letting the commercial conventions be modified in the spirit of restriction. No doubt, he says, France can exercise an influence on the treaty States, but so can Prussia, and in a conflict with her he feels sadly that under existing circumstances the advantage would not remain with France.

In connection with this subject, it has been suggested by a very high French authority that the English Government can do a great deal to thwart the Protectionist crusade of M. Thiers against the commercial treaties. It has simply to exhort the States concerned not to yield to the pressure that personage is putting on them: and that it would be listened to by them is not doubted. At the same time the opinion is expressed that by so doing England would efficaciously, though indirectly, protect her own interests; inasmuch as, though her own treaty be denounced, the Thiers Government will never dare to apply to her a tariff more restrictive than that it has with Austria, Italy, Prussia, and other States. It is to be hoped that this 'idea 'will attract the attention of our Ministers, if so be they have not conceived it themselves.

Not only is the commercial policy of M. Thiers and M. Pouyer-Quertier, imprudently sanctioned by the National Assembly, exciting serious alarm, seeing that being contrary to the teachings of economic science, and to the practical experience of different nations, including France herself, it is almost certain to be as disastrous in economic order as were incompetence, presumption, and want of preparation in the military—not only is the commercial policy of these statesmen exciting alarm, but the manner in which they are acting with the Bank of France is doing the same. They are, it is thought, treating that establishment too much as an instrument in the hands of the Government, without sufficient regard for the *eventual* interests of commerce. Instead of reducing the huge issue of notes imposed on the outbreak of the war, which rendered the suspension of cash payments necessary, it has increased the issue, and has thereby of course made the difficulty of returning to such payments greater—the consequence to be feared being a depreciation in the notes. M. Michel Chevalier treats the matter in his usual luminous way in the *Journal des Debats* of to-day. After some general observations on the impolicy of Governments exercising pressure on national banks to obtain issues of paper money, whereby the latter are prevented from rendering due assistance to commerce, and after demonstrating the truth of them from the history of the Bank of England, and from what has taken place in France, he says:—"The Bank of France was forced to do what is contrary to its mission, and even to the interest of its conservation, in accepting at the commencement of the war the issue of notes with forced currency to the amount of 2,400,000,000f. On the part of the Imperial Government the fault was grave, as I proved at the time from the tribune of the Senate. To place industry and commerce in the abnormal conditions of the forced currency of notes, with a margin of 2,400,000,000f, was to cause perturbation in all interests, and to produce disquietude in the public mind. But at least there was the excuse of the inexorable necessities of a war, which had begun by great reverses. It could be alleged that the resource of credit becoming very difficult for the Government, it was necessary, even by the violation of rules recommended by prudence, to provide it with financial resources. But when peace was signed and sanctioned by the National Assembly in 1871, the scene changed. The excuse of the war disappeared, and the other excuse, based on the fact that the credit of the State was destroyed, existed no more. It was then important to restore to commercial transactions their activity and facility by giving the Bank the liberty of its movements. To effect that, means ought to have been devised for making the Bank resume the payments of its notes in coin, or in other words, for putting an end to the forced circulation of notes. And the only means of doing that was that the Government should reimburse part of the enormous advances it had received. But instead of that, by an error which is much to be regretted, in place of reducing the exorbitant advances which the Treasury wrung from the Bank during the fatal war, and which amounted to 1,330,000,000f, it was decided that they should be increased by 200,000,000f." M. Michel Chevalier then refers to the allegation of M. Thiers, made some time ago to prove that there was no over-issue, that "the notes of the Bank of France were at a premium abroad." He says—"We must be disabused on this point. Instead of notes being at a premium either at home or abroad, they sustain a slight depreciation—a very slight one it is true, but which nevertheless should be regarded as a warning. The exchange on England, of which the par is 25f 20c, or even 25f 15c, is now 25f 47c. In order to get a pound sterling payable at sight at London, 25f 47c in Bank of France notes must be given. We have consequently begun the descent of the bad side of the mountain, but we are not so far advanced that it is not easy to return. It is not the less true that this merits all the attention of the Parliament and the Government, it is a recommendation to be circumspect and not to adjourn longer the measures necessary for approaching the Bank to its normal situation—that in which there would no longer be forced currency. The Bank itself would be delighted with that." As to the means of reducing the Governmental debt to the Bank, M. Michel Chevalier indicates it in a word—by borrowing. And he expresses regret that the amount of the last loan was not augmented expressly for that purpose. He concludes by advising the Assembly not to adjourn without dealing with this "grave and pressing matter." If it does not, he says, 'it may have reason to regret."

The National Assembly, in the course of the past week, has disposed of the remaining clauses of the Bill for increasing the taxes on wines, beer, and spirits. An attempt was made to obtain for wine producers exemption from duty of the alcohol employed in mixing with wine (the operation is entered *vinage*), but it failed. In the course of the debate, it was stated as a reason for granting the demand that the addition of alcohol improves all wines, and is absolutely indispensable for some sorts; and as a reason for refusing, the Chamber was told that alcoholisation as now practised permits a cask of wine on arriving in a town to be, by the mixture of water, transformed into two, and that if the spirits were freed from duty, the abuse would be increased. An attempt was also made to permit hop growers and malsters in the north to fabricate, free of duty, beer for their own consumption; but the Government objecting, it failed. The Bill contained clauses for making brewers, distillers, wholesale wine dealers, also manufacturers of playing cards and sugar pay for licenses, which also were adopted, and it has been promulgated as law. After it had been disposed of, the Assembly proceeded to discuss the Bill augmenting the price of tobacco, putting duty on chemical matches, chicory, and paper. A very long discussion took place, especially on paper, and several amendments were proposed. It was affirmed that the tax on matches would be ruinous to the trade, that it would lead to extensive frauds, and that in the end the Government would have to transform match making into a monopoly in its own hands, like tobacco. The tax on chicory was complained of as interfering with industry and oppressive to the poor. That on paper would, it was said, weigh heavily on several interesting trades, and would at the same time check the instruction of the people. To all this M. Pouyer-Quertier replied in substance that industry would not be injured, and that he wanted money. Eventually the amendments were rejected, and the propositions of the Government accepted. The duty on paper is from 5f to 20f the 100 kilogs (2*l* to 8*l* the ton), newspapers and periodicals paying the latter sum. In the course of the debate the Minister said that he did not propose to modify the law on rags, in consequence the export of them will continue to be permitted.

The National Assembly yesterday adopted the Bill which authorises the City of Paris to raise a new loan of 350 millions (14,000,000*l*), to which lottery prizes of 1,500,000f per annum are to be attached. Some objection was made to the lottery on the ground of immorality; but it was represented that such things had accompanied preceding loans, were popular among the Parisians, permitted borrowing at a low rate, and

that without them there might be difficulty in getting the money. The loan is to be in bonds of 500f, bearing 15f interest, and the precise figure at which they are to be offered is to be fixed by a Committee of the Municipal Council, and the prefect, M. Leon Say. They have already given rise to a good deal of speculation at the Bourse, and have gone to a premium of from 11f to 12f. In addition to the loan, the City is authorised to issue for 1871 and 1872 bonds to the amount of 60,000,000f. The Bill provides that, as on previous occasions, the registration duty to be paid shall be only 1f. M. André, the banker, represented that under the new law the City ought to pay 4,500,000f, and complained that from favour to it the Treasury should lose so large a sum; but he spoke in vain.

The Parliament has also passed a Bill for throwing on the State the indemnification of all the persons who during the war had to pay contributions or fines, or were subjected to requisitions in money or kind, or were made to pay taxes by the enemy. It is an affair of many millions, but the Government is to provide them as it can, on condition of furnishing 100 millions immediately. In addition other Bills have been or are to be passed for paying expenses of all kinds occasioned by the war and not provided for in the Budget. In the aggregate the outlay will be large. The town of Chateaudun, which was bombarded, is to get 1,000,000f.

A Bill has been presented to the Chamber for the sale of the site on which stood the Ministry of Finance, burned down under the Commune. The site is of vast extent, and from its position must be of considerable value. The sale of other Governmental property in Paris might be made with advantage. Why, for example, should the public be put to the expense of maintaining palaces for Ministers to live in?

In the sitting of the Assembly on Saturday the Minister of Finance made this announcement:—"This morning I sent to Strasburg the last 100 millions of the third demi-milliard (20,000,000*l*.) due to the Germans; and if they be accepted by the German authorities I should have the right to say that that debt is completely paid, and even more than paid, for I sent a surplus." [5 millions as a guarantee against any sort of error on the securities various] placed in the hands of the German Government." It was expected that in a subsequent sitting the Minister would announce whether the 100 millions offered had been accepted or not, but he has not done so.

On the Bourse the general opinion appears to be that the rate has been carried far enough, and there has accordingly been a reaction, but it closes prices higher than last week. An unfavourable impression has been produced by the remonstrance [illegible] of the withdrawal of the Germans from the [illegible] of Paris. Prices are as follow:—

	August 31.			September 7.	
	f	c		f	c

The receipts of the Crédit Foncier [illegible] show that the dividend for the year are double of the general [illegible] of the Bank of Marseilles has risen [illegible] that of Guadaloupe to 240 fr., that of La Réunion 225f. the total of Comptoir 178 60c., and then there are new payable.

The Suez Canal Company announces to-day the issue of its new loan. It is represented by 400,000 bonds of 100f., bearing 5f. interest, and to be redeemed at 125f. by annual drawings in 50 years. The coupon bonds and coupons are to be issued on and after [illegible].

The Company des Chemins de Fer Ottomans, which is [illegible] Constantinople was established in 1863, and for each of the [illegible] following it gave 10 per cent. In 1868, a Commercial [illegible] and since then has paid nothing. In addition to the [illegible] has had about 2,000,000f.

An establishment called the Société Industrielle announces that it has just distributed 150 per share for 1870, and that with preceding payments it makes 24 per cent. For a year of war and [illegible] this sum is certainly considerable.

The shareholders of the Company of Lits Militaires held their annual meeting a few days back, but the directors could present no report on the operations of 1870, the military authorities not having yet officially ascertained the extent of the damage and loss sustained by the company in the war, and which they have to pay. The meeting at the request of the board authorised a new issue of debentures to meet an extra demand for material made by the Government.

The annual meeting of the Eastern Railway fixed for the 27th April, could not be held, and 7th October is now appointed.

A drawing of 6,075 bonds of the Ottoman loan of 1869, to be paid off in October, was made by the Comptoir d'Escompte on Tuesday.

The Credit Foncier Colonial is to pay from the 15th 12f 50c as half-year's interest on bonds of the first and second issues, and 15f on those of the third.

The Foncier Company of Italy is paying through the Société Générale the coupons of shares of second half of 1870, amounting to 6f 84c, and that of the first-half of 1871, amounting, with balance of dividend of 1870, to 14f, but the payment is only being made on the shares numbered from 4,001 to 12,000.

The quotations from the markets, per 50 kilogs, duty paid, are subjoined:—

Cotton.—At *Havre*, New Orleans very ordinary, 112f to 113f; Ocarawattee good ordinary, 87f to 88f.

Hides.—At *Havre*, Uruguay salted saladeros ox, 78f; Lima dry salted, 90f.

Wool.—At *Havre*, Buenos Ayres unwashed, 125f to 182f 50c the 100 kilogs; Monte Video ditto, 110f to 210f.

Cocoa.—At *Havre*, Haiti, 49f.

Sugar.—At *Nantes*, French West India, 54f, bonne quatrieme; Capitania, 134f.

Coffee.—At *Havre*, Cape Haiti, 134f; Santos, 135f; Bahia, in bond, 68f; Malabar, 92f 50c. At *Marseilles*, Capitania, 130f; Maracaibo, in bond, 87f 50c. At *Bordeaux*, Wynaad, 149f; Costa Rica, 146f; Ceylon native, 144f.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

An Account pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 6th day of September, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	39,185,750	Government debt	11,015,100
		Other securities	3,884,900
		Gold coin and bullion	24,185,750
		Silver bullion	...

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house :—

	Week ending Sept. 6, 1871.	Week ending Aug. 30, 1871.	Week ending Sept. 7, 1870.
	£	£	£
Thursday	32,969,000	10,489,000	11,587,000
Friday	21,718,000	12,176,000	10,904,000
Saturday	15,579,000	13,480,000	13,453,000
Monday	16,913,000	12,059,000	9,703,000
Tuesday	13,308.000	10,704,000	9,187,000
Wednesday	13,049,000	12,286,000	10,498,000
Total	115,536,000	71,194,000	65,332,000

JOHN C. POCOCK, Deputy Inspector.

Bankers' Clearing-house, September 7th, 1871.

The total since the 4th of January, 1871, is 3,094,214,000*l*, compared with 2,687,972,000*l* for the corresponding period last year, showing an increase of 406,242,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding dates with the present week.	Sept. 11, 1861.	Sept. 9, 1868.	Sept. 8, 1869.	Sept. 7, 1870.	Sept. 6, 1871.
Circulation, including	£	£	£	£	£
bank post bills	20,555,788	24,435,424	23,918,225	24,276,792	25,631,434
Public deposits	4,968,069	3,715,925	4,569,973	6,110,544	5,421,935
Other deposits	12,357,680	19.423,966	17,552,943	19,315,454	21,202,265
Government securities	10,450,800	13,790,131	14,339,928	12,483,861	13,768.368
Other securities	17,372,545	16,215,856	14,334,091	19,442,033	16,860.092
Reserve of notes & coin	8,446,572	11,860,193	12,217,155	12,529,834	14,727.040
Coin and bullion	13.649,402	20,766,143	20,602,050	20,996,662	24,816,585

Clearing-house return	...	56,472.000	61,110.000	65,322.000	115.536 000

In 1861, money continued tending downwards, and there was some disappointment that the Bank had not reduced its rate of discount to 3½ per cent. Business was still restricted by the American war. The recognition of the independence of the Southern states was beginning to be actively urged by a strong party in this country, but the better opinion was against it.

In 1868, money was easy, the 2 per cent. period continuing. Russia had recently been borrowing largely in the Western money markets, for the purpose of railway construction.

In 1869, money was slightly advancing in the open market. The illness of the French Emperor, and a Stock Exchange panic in Vienna, had tended to increase the apprehension of dearer money, and large sales of foreign stocks had already been made here.

In 1870, there had been a farther increase of the resources of the Bank, and a reduction of the rate was expected in some quarters, but it was not made, there being a great deal of apprehensiveness as to the effects of the course of the war, and the impending siege of Paris. The announcement of Count Bismarck that he would require a part of Alsace and Lorraine to be ceded to Germany as a condition of peace was giving rise to numerous protests.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 5,014,865*l*; in 1868, an excess of 3,208,110*l*; in 1869, an excess of 3,218,852*l*; and in 1870, a deficiency of 126,579*l*. In 1871, there is an excess of 4,342,173*l*.

Discount and Money Market.—There is no variation from last week in the open market rates for money, which are still 1½ for 2 and 3 months' Bank bills, with a minimum of 1⅛ for the very best paper at shorter dates. The demand however both in the open market and at the Bank has rather fallen off as compared with last week, which included a rather heavy Stock Exchange settlement. A great deal of business is being done, but the unprecedented accumulation of money still weighs upon the market, and there is no sign in the demand for accommodation of any speedy change in the value of money.

As regards the future there is a good deal of speculation, and notwithstanding the state of the market there is a strong belief in some quarters that we are likely to have rather a sharp rise in the value of money at a no very distant date. The talk is that there is now an enormous business being done in the country, and consequently a large supply of bills; that several of our staple articles, especially wool and cotton, have lately become dearer, and corn, from the deficient harvest, is also likely to be dearer, so that we must import largely at a high price; and lastly that a good deal of our superabundance of money is caused by deposits on German account, which may be withdrawn at any moment. The market is thus considered to be really in a delicate condition, and any change in the supply, in consequence of the strong demand, is thought likely to have a very quick and marked effect. We cannot say however that we share this view. We have no doubt seen the worst point in the money market, and the tendency is towards an enhancement of value; but we do not think that the trade demand, great as it is, can act very quickly, the accumulation being so large, while we doubt if the German command over surpluses in Lombard street is so large as is apprehended. The Germans have not received their recent instalment wholly in bills, as is shown by the large reductions during the last two weeks in the balance of the French Government with the Bank of France, and the bills actually given are not likely to become due, or be discounted at one time—at least in the absence of a new crisis in Europe which might make the Germans anxious to cash their bills at once. However great the German demands may be therefore, they will be gradual, and the savings of the country are accumulating at such a rate as quickly to fill up the void. The Germans besides are to repay large sums in the spring, and must keep some money in London for the purpose. We expect money to get dearer, but rather in a gradual manner, in the absence of any sudden and large foreign demand, of which as yet we see hardly any sign.

The changes in the Bank account show a slight diminution in the resources of the Bank, the private securities having increased 431,000*l*, while the bullion has also diminished 227,000*l*. The private deposits have also diminished 845,000*l*. These changes are held to indicate the gradual weakening of the Bank's position, owing to the causes we have enumerated as tending to enhance the value of money; and this view is strengthened by a farther withdrawal of bullion to-day on account of Buenos Ayres. The changes however do not amount to much, while the Bank reserve stands at its present figure; and as regards bullion especially the arrivals are so constant that after every withdrawal the store in the Bank soon mounts up to its old figure. The changes in the Bank of France return appear to show that France is meeting the indemnity from her own banking resources. The bullion is reduced about 920,000*l* this week, and the Treasury balance is 5,000,000*l* less. Of course the emptiness of the Bank of France will tend to draw money from here, but that will have only an indirect and gradual effect, compared with a direct withdrawal from London on German account.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 and 3 months	1⅝	per cent.
Do 4 months	2	per cent.
Do 6 —	2⅜ ½	per cent.
Trade bills—2 and 3 months	2	per cent.
Do 4 months	2¼ ½	per cent.
Do 6 —	2½ 3	per cent.

The allowances for money at the joint stock banks and discount houses are as follow :—

Joint Stock Banks at call	1	per cent.
Discount houses at call	1	per cent.
Do with seven days' notice	1¼	per cent.
Do fourteen days'	1¼	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent. 1870.	1871.	Open Market, per Cent. 1870.	1871.

St Petersburg	8	6	8½	6

The Stock Markets.—This week has been one of comparative inactivity compared with last. Consols have continued dull, and have been duller than before, while there has natu-

rally been a pause in the railway market after the recent great rise. As regards the tone of the market however, an exception must be made for foreign stocks, where the subscription of two new loans—one for Spain, and another for Turkey—has caused some excitement. The Spanish loan has been a great success, and there has been a large amount of dealing in all Spanish stocks. In Turkish, the excitement has been of a contrary kind, the loan, it is understood, not having been fully applied for, and a strong rise in other Turkish stocks, which commenced on the faith of the loan, having been checked by its failure, and given place to a rather marked depression. In the miscellaneous market, a good deal of attention is still being given to the sewage and paving companies, and one or two new mining companies have been introduced, but there has been comparatively little dealing.

English Government Securities.—As we have stated, this department has been dull, and Consols at the close are weaker than last week. There has now been little movement in Consols for nearly two months.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money.		Account.		Exchequer Bills.
	Lowest.	Highest.	Lowest.	Highest.	March and June.
Saturday	93⅛	93⅜	93⅛	93⅜	10s to 15s pm
Monday	93⅛	93⅜	93⅛	93⅜	10s to 15s pm
Tuesday	93⅛	93⅜	93⅛	93⅜	10s to 15s pm
Wednesday	93⅛	93⅜	93⅛	93⅜	10s to 15s pm
Thursday	93⅛	93⅜	93⅛	93⅜	10s to 15s pm
Friday	93⅛	93⅜	93⅛	93⅜	10s to 15s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

Ditto New 5 %	104 5		104 5	...	...

Foreign Government Securities.—The events of the week here have been the great success of the new Spanish loan and the failure of the Turkish, the former event having been the most considerable in the market. The applications, according to the prospectus, which we described last week, were receivable on Wednesday at the Spanish financial agency here, and simultaneously in Paris and Madrid. Here the applications were most numerous, and the loan is also stated to have been largely applied for abroad—the total applications being reported as about twenty times in excess of the effective amount. Of course the applications in such cases are ordinarily in excess of what the applicants really wish to have, but the success of the loan is most unequivocal for all that, and will have no slight effect upon Spanish credit. We noticed last week that the loan was at 1¼ pm.; but on Thursday, after the reports as to the subscriptions came out, there was an advance, while old Spanish Threes equally improved, closing to-day after a slight reaction at 32⅝ 33⅛—the premium on the new loan being 1½ 1⅝. As regards Turkish the feeling at first was apparently in its favour, Turkish stocks generally advancing, but it soon became known that it was not being eagerly taken up, and Turkish generally went back. The depression was aided by what seemed at first dubious telegrams from Constantinople respecting the illness of Aali Pasha, and the imminence of a financial crisis, but the telegrams were confirmed, at least as far as the illness of the Prime Minister is concerned, and had a prejudicial effect on Turkish credit. The repeated postponements of the loan however have no doubt had something to do with its want of success. To-day there has been no improvement in the feeling about Turkish securities, and while the scrip of the new loan is at ⅛ dis. to par, the old Turkish stocks close—5 per cent. at 45⅛ ⅜; 6 per cent., 1865, at 62⅛ ⅜; and 6 per cent., 1869, at 57⅛ ⅛.

Outside of Turkish and Spanish securities, there has been comparatively little dealing, though the tendency is still to improvement. The changes for the week are shown in our usual table. The market closes firm.

French securities have improved this week, and close—Rentes, 55⅛ ⅛ 56⅛ ⅛; Morgan loan, 99⅞ 100; and New loan, 6⅛ ⅛ to 7⅛ ⅛ pm. ex div, showing a considerable advance for the week.

We gave an account last week of the prospectus of the Spanish loan, and a notice of the Turkish loan will be found below in our Notices and Reports. The principal points are that the loan is a 6 per cent one, consisting of 5,700,000*l* nominal stock, which at the issue price of 73 makes it 4,161,000*l* effective. It is secured upon the Egyptian tribute, which was 282,000*l* originally, but now amounts to 705,000*l* a-year. There is a previous hypothecation of the tribute, as is well known, but it is stated that 422,128*l*, being the excess of the increase over the original amount, remains unpledged, and the Khedive undertakes to remit 399,000*l* direct to the Bank of England on account of the present loan. There will be an accumulative sinking fund of 1 per cent. per annum, commencing in July next. At the issue price, and allowing for instalments, it is calculated that the return to subscribers will be 9 per cent.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

English Railways.—The market here has been flat compared with last week, there being generally a cessation of buying, but prices in the absence of any event to disturb the money market do not give way though it is stated that the buying lately has not been quite so good as it was, and that in most of the more speculative stocks very little would suffice to cause a serious fall. The traffics however are on the whole well maintained, and so long as this is the case and money continues easy there is little chance of English railways falling in value, while in the leading lines the investor who can afford to wait has still a good opportunity, and may disregard any probable fluctuations. The traffic increase too is to a most unusual extent in passengers, and the accrued increase in the current half-year is already so large in the leading lines—the London and North-Western, Lancashire and Yorkshire, North-Eastern, Midland, Brighton, and others—as *already* to justify an addition to the annual dividend equal to the addition made in the half-year just past, and in some cases exceeding it. The stocks in which weakness has mainly been shown are—Great Western, Great Northern, and Great Eastern—Great Western especially dropping suddenly on Wednesday on the report of an accident at Reading, but subsequently recovering 1¼ per cent. The weakness in Great Northern and Great Eastern has been due to the traffics, though it is curious to observe that even in these cases the falling off is not in passengers, the most profitable kind of traffic, but in goods. In Great Northern there is a considerable passenger increase for the week. On the other hand, Caledonians have had an important rise for the week on the announcement of a dividend at the rate of 4½ per cent. per annum, accompanied by reports that it might have been 4*l* 17*s* 6*d*. The Caledonian

traffics have also been remarkably good for the current half-year. Altogether there is a rise of 6 for the week. London and South-Western have also improved 5 for the week, not so much, so far as we can judge, upon any specially good traffics, but from the extremely low position of this stock compared with the last actual dividend paid. The market on the whole closes firm, and prices are generally better than they were yesterday, which was the most depressed day of the week.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Caledonian	107½ ¾	113½ ¾	+ 6

Metropolitan District 6 %	121 3	121 3	... ...

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Sept. 2 to 856,049*l*, being an increase of 55,280*l* on the corresponding week of last year. The aggregate receipts of the current half-year to date are now 6,881,845*l*, being an increase of 490,570*l* on the corresponding period of last year. The principal increases for the week are—North-Eastern, 11,366*l*; London and North-Western, 10,744*l*; Lancashire and Yorkshire, 7,069*l*; Midland, 8,092*l*; Caledonian 3,865*l*; and North British, 3,583*l*. Great Eastern has decreased 1,602*l*; and Great Northern, 1,459*l*; but it is important as regards profit to observe that the decrease is almost exclusively in goods traffic, the return of the Great Northern even showing a considerable increase of passengers, notwithstanding the decrease of gross traffic:—

RAILWAY TRAFFIC RETURNS.

	856,049	+55,280	6,881,845	+490,570

* In these cases the aggregate is calculated from the 1st of August.

FOREIGN AND COLONIAL RAILWAYS.—This department has participated in the firmness which has prevailed in the railway market generally, and the movements have ordinarily been in the upward direction. The chief feature is the demand which has set in for Lombardo-Venetian shares, owing to the large increase in the traffic receipts, which leads to the expectation of a 5 per cent. dividend for the current year. The following are the principal changes for the week:—

Foreign.	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Antwerp and Rotterdam	15 ½	15½ ⅜	+ ⅛
Bahia and San Francisco	19⅞ 20⅛	19⅞ 20⅛	... ...

Great Western of Canada	19½ ¼	19⅝ ⅜	+ ⅛
Madras 5 %	107½ 8	107⅝ 8½	+ ¼

AMERICAN SECURITIES.—Owing to the partial success of the United States Funded loan in Germany, the scrip has given way to ⅛ dis. to par. The old bonds of 1862 and 1865 are also lower, but 1867's have maintained previous quotations. Erie and Illinois Railway shares are higher on receipt of advanced prices from New York. Annexed are the changes for the week:—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	93 7/16 ⅜	93 7/16 ⅜	− 1/16
Ditto 1865 Issue	93½ ⅜	93½ ⅜	− ¼

Illinois Central Shares	109¼ ⅜	111 13	+ 2½
Massachussets 5 % Sterling Bonds, 1900	94½ 5½	94½ 5½	... ...
Panama General Mortgage 7 % Bonds, 1897	75 8	75 8	... ...
Pennsylvania Gen. Mort. 6 % Bonds, 1910	95 ⅛	95 ⅛	... ...
Virginia 6 % Bonds	52 4	52 4	... ...

JOINT STOCK BANKS.—A very firm tone has prevailed in the market, and some considerable upward movements have taken place in the quotations to-day. London Bank of Mexico and London Joint Stock were in request, and closed at an improvement of 1 and 1½ respectively as compared with Friday last. Anglo-Egyptian show a rise of 1¼; South Australia and London and River Plate, 1; Australasia, British Columbia, London and County, London and South-Western, Standard of South Africa, and Union of London ½; Hong Kong and Shanghae, 2; London Chartered of Australia ¼. London and Brazilian have given way 1, and Chartered Mercantile of India ½.

TELEGRAPHS.—There has been less animation in this department, and a slight tendency towards reaction is apparent in the quotations. For instance, Anglo-Mediterranean and Indo-European are 1 lower, French Cables ⅜, and Cuba ¼. On the other hand, British Australian have advanced ⅜; British India Extension, British India Submarine, and Reuter's ½; and Falmouth and Gibraltar ⅜. Telegraph Constructions close at a decline of ½; while Hooper's are ⅜ better on the week.

MINES.—Some important changes have taken place in the quotations of British mining shares. West Caradon have been in demand, and close at a rise of 1½, while West Chiverton are 4 higher on the week. There is a rise of ½ in South Condurrow, and ¼ in Wheal Grenville. The market generally, however, has been flat, and we note a decline of 2½ in South Wheal Frances, 2 in Tin Croft, 1½ in Van, 1 in East Lovell, ¼ in Marke Valley. Nearly all the movements in the foreign market have been adverse: Eberhardts have given way 3; Capula Silver and Colorado, ½; Pacific, Sweetland Creek, and United Mexican, ¼. St John del Rey have risen ½.

MISCELLANEOUS.—The dealings in this market have been somewhat numerous, and the tendency of the quotations has been upwards. Peninsular and Oriental shares have risen 3; North British Australasian 2; Rhymney Iron and Roumania Iron Bridges Annuities 1; London Financial and North Metropolitan Tramways ½. Peel River and Foreign and Colonial Trust have given way 1, and Liebig's Extract of Meat ½.

In the new undertakings, Val de Travers Asphalte shares are quoted 37 to 39, Neuchatel Bitumen 72 to 73, Limmer Asphalte 4¾ to 5, Native Guano 37 to 39, Phosphate Sewage 11 to 13 premium, Patent Gas shares 7 to 9 premium, Montrotier Asphalte 4½ to 5 premium, and North American Asphalte 12 to 17 premium.

BULLION.—The following is taken from the circular of

Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week :—

Gold.—A somewhat sudden demand for gold has sprung up, sufficient to absorb all arrivals, as well as the 480,500*l* due on the 9th inst. from Australia by the overland mail, which amount has also been purchased for the continent. Withdrawals from the Bank of bars and coin have also taken place to the extent of about 110,000*l*. We have received during the week about 25,700*l* from New York, and 2,800*l* from Africa. The Mirzapore has taken 45,500*l* to the East. The Somersetshire is bringing 33,500*l* from Melbourne; and the overland mail, due about the 1st prox. has 604,500*l* for this country, also from Australia.

Silver remains firm at 60¼*d* per oz standard for fine bars. The arrivals have been during the week comparatively small, amounting to about 168,000*l*, half of which has come from New York, the other mainly from the Brazils. The P. and O. steamer has taken 11,100*l* to the East.

Mexican dollars are also without alteration in price, the old coinage being 59½*d* per oz and the new 59*d* per oz. The arrivals principally from New York have been but small. The Mirzapore has taken 36,680*l* to China.

Exchange on India for Banks' drafts at 60 days' sight is firmer, the rate being 1s 11⅛*d* to 1s 11½*d* per rupee. Tenders for the India Council bills were received yesterday. The allotments were—52 per cent. at 1s 11*d* per rupee, the minimum remaining as before, 1s 10½*d*. The amounts appreciated were—to Calcutta 317,000*l*, to Madras 54,000*l*, and to Bombay 28,400*l*.

Quotations for Bullion.—Gold—Bar gold, 77s 8¾*d* to 77s 9½*d* per oz std; fine refinable, 77s 11*d* per oz std; United States gold coin, 76s 3*d* per oz. Silver—Bar silver, fine, 5s 0¾*d* per oz std, last price; ditto containing 5 grains gold, 5s 1¾*d* to 5s 1⅞*d* per oz std, last price; Mexican dollars, 4s 11*d* to 4s 11½*d* per oz, last price.

The sum of 220,000*l* was withdrawn from the Bank of England to-day for transmission to Buenos Ayres.

According to the *Gazette* return the imports of the precious metals during the week ended September 6 were: Gold, 28,997*l*; silver, 168,584*l*. The exports were:—Gold, 119,601*l*; silver, 393,845*l*.

NOTICES AND REPORTS.

STOCKS.

Egyptian Khedive's Loan, 1870.—Bonds representing 90,500*l* have been drawn for redemption on the 1st October.

Georgia (U.S.) 7 per Cent. New Loan.—Messrs Clews, Habicht, and Co. are receiving, through the agency of the Imperial Bank, subscriptions for an issue of $1,400,000, in bonds of $1,000, to bearer, being the balance of $3,880,000 which has been partially taken up in America and Europe. The issue price is 175*l* 10s per bond 78 per cent. at 4s 6d the dollar, at which price the interest yielded is 8 per cent., irrespective of a bonus of 15 per cent. on redemption at par in 1890. The interest is payable quarterly, and the money is required for general purposes, and for the completion of State and other railroads. Principal and interest are payable in America, or here in sterling at the current rate of the exchange.

Turkish 6 per Cent. Egyptian Tribute Loan of 1871.—Messrs Dent, Palmer, and Co. have received applications for 5,700,000*l* nominal in bonds to bearer, secured upon the balance of the Egyptian tribute money, which annually amounts to 150,000 purses, or 705,000*l*. Of this, 282,872*l* is already pledged for the 1854 and 1855 loans, and of the balance the Sultan has ordered that 399,000*l* shall be annually paid to the Bank of England for the purposes of the present loan. The half-yearly coupons will be payable on the 10th April and 10th October, the first falling due in April, 1872; and the redemption will be effected at par by annual drawings of 1 per cent. (accumulative), the first to take place in July, 1872. The issue **price is 73 per cent., payable by instalments up to the 11th December; and the coupons will be cashed in London or Paris, free from taxation.**

RAILWAY COMPANIES.

Caledonian.—The half-yearly dividend has been notified at the rate of 4¼ per cent. per annum, as contrasted with 3½ per cent. at this time last year.

Dudley and Dunghedia.—The half-year's revenue was 52,130*l*, **as against 50,038*l* for the corresponding half of 1870. The net profits, after providing for working expenses, interest on loans, and dividends on preference stocks, were 22,330*l*, out of which the directors recommended a dividend on the ordinary stock** of the company at the rate of 5*l* 10s per cent. per annum, less income tax. The dividend amounted to 19,034*l*, leaving 3,295*l*.

Glasgow and Cape Breton (Nova Scotia) Coal and Railway.—A call of 2*l* per share is payable on the 6th October.

Monmouthshire.—A dividend at the rate of 5½ per cent. per annum is announced.

North Eastern.—Hull and Selby.—The North Eastern Company have issued a circular announcing their readiness to complete **the purchase of this line at once, at the rate of 112*l* 10s of the** new guaranteed preferential stock bearing 4½ per cent. dividend for 10 years, and afterwards 4 per cent. in perpetuity, for each 50*l* Hull and Selby share. The new stock is offered to the Hull and Selby proprietors in the first instance. Those not accepting will be paid in cash.

BANKS.

London and San Francisco.—A dividend on account of 10s per share is payable, free of income tax.

London Bank of Mexico and South America.—The report shows an available 22,126*l*, inclusive of 2,434*l* brought forward, and recommends a dividend of 18s per share (9 per cent. per annum), the addition of 3,000*l* to the reserve, leaving 2,917*l*.

Mercantile Bank of Sydney.—The report of the directors **issued in anticipation of the annual meeting on 26th July** last shows an available balance for distribution for the year of 20,730*l* 17s 5*d*. Out of this it is proposed to pay a dividend and bonus equal to 12½ per cent. per annum, leaving an undivided surplus of 3,688*l* 10s 9*d* to be carried to next account.

MISCELLANEOUS COMPANIES.

Birmingham Small Arms.—After making large deductions for depreciation, the dividend for the year has been 20 per cent., free of income tax.

Brazilian Street Railway.—At the meeting an interim dividend at the rate of 10 per cent. per annum was declared out of a profit of 6,096*l*. The Cavanga extension commenced yielding returns on the 23rd of June.

Canadian Oil Works Corporation, Limited.—Messrs Bates and Co offer for subscription an issue of 1,500 £2 per cent. first mortgage debenture bonds of 100*l* each, payable to bearer, secured by a first charge upon nine large productive oil wells, distillery, machinery, plant, and 1,118 acres of freehold oil lands now in full operation, and yielding an annual profit of upwards of 100,000*l*. The £2 per cent. interest will be payable half-yearly in London, and the principal will be redeemed at 10*l* premium by ten half-yearly drawings, commencing on the 1st March, 1872. The prospectus states—

By the contract entered into the vendor is to undertake to complete the entire wells, distillery, engines, plant, machinery, stores, tools, effects of every description, and [illegible] lands, also the good will of the business for the sum of 450,000*l*, of which 200,000*l* will be in fully paid-up shares. No shares will be entitled to dividends until there are in hand reserve funds sufficient to meet the interest and bonus upon the mortgage debenture bonds and the proportion of principal repayable for such succeeding six months. The vendor does undertake to place at the disposal of the corporation such of his shares as may be applied for by the shareholders under the conditions herein stated.

[CONTINUED FROM PAGE 1097.]

A deputation from the board of directors will at once proceed to Canada, and no part of the purchase-money will be paid over until the property is legally transferred.

London General Omnibus.—At the meeting a dividend at the rate of 5 per cent. per annum was declared, free of income tax.

Mutual Tontine (Westminster Chambers).—At the meeting a dividend at the rate of 3½ per cent. per annum was declared.

Surrey Commercial Dock.—Dividend announced at the rate of 5 per cent, per annum, free of income tax.

MINING COMPANIES.

Carmarthen Silver-Lead, Limited.—Capital 25,000*l*, in 5*l* shares. Object to acquire the lease and to work same silver-lead mines at Trelech, Carmarthenshire.

Imperial Ottoman Mining Company.—The following telegram has been received by the board, dated "Pera, 5th Sept., 1871: —Pelidli ore shipped yesterday by steamer Marsden for Liverpool. Bills of lading by this post."

Independence Gold Mining, Limited.—Capital 120,000*l*, in 5*l* shares. The Independence property is stated to adjoin the Sierra Butts mine, the same lodes running through each. The crushing machinery of this Californian mine is worked by a continuous water supply, and the purchase price of the whole is 80,000*l*.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was a firm tone apparent in the grain trade to-day, and the tendency of the quotations was in favour of sellers. Both English and foreign wheat were the turn dearer, and the few samples of new English on offer were taken off freely. Supplies of English were small, but there were numerous exhibits of foreign. Flour and oats commanded about 6d more money; but barley, beans, and peas were unaltered. This weeks imports of foreign and colonial produce into London have amounted to 26,270 quarters of wheat, 3,280 barley, 11,580 oats, 350 maize, 350 beans, 560 peas, and 1,990 barrels of flour.

The Liverpool cotton market opened quiet but firm on Friday last. The demand improved on Monday, especially for American descriptions, and on Wednesday the market became excited in consequence of American news. A very large business has been done during the week, the total sales being 118,940 bales, of which the trade have taken 82,470 bales, speculators and exporters, 36,470 bales. The imports are 50,435 bales; the actual exports 8,123 bales, and to-day's stock is estimated at 521,430 bales. Quotations for American descriptions have advanced $\frac{1}{16}$d to ⅛d per lb; East Indian, ⅛d to $\frac{3}{16}$d per lb; and Bengals, ⅛d per lb since this day se'nnight. To-day the market has been quieter but firm; sales, 15,000 bales.

At New York on September 7, midling Upland cotton was quoted at 20¾ cents per lb. Telegraph advices from Bombay to Sept. 4 quote fair Dhollerah at 216 rupees. The daily arrivals had averaged 9,300 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended September 7, 1871:—

	Imported.	Exported.
American.....bales	27,473	530
Brazilian	13,958	1,987
East Indian	13,382	10,765
Egyptian	1,181	467
Miscellaneous	3,933	181
Total	59,927	13,930

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, August 8:—Telegraphic communication with England has been very irregular during the past week, Reuter's messages of the 3rd, 4th, and 5th, having all been delivered together yesterday morning. The tenor of these advices is not at all reassuring, the Liverpool market being reported uniformly dull, especially for Surats, and the quotation for fair Dhollerah being reduced to 7⅛d per lb, which shows a decline of ⅛d on the quotations we had when last mail left. In sympathy with the tone of the home markets, the feeling here has also been very quiet, and prices have given way from day to day, closing 7 rs to 8 rs per candy below the quotations given in our last circular. This decline however seems to have attracted the attention of exporters, and there has been an increased inquiry within the past day or two, although the smallness of stock prevents anything beyond a retail business being done. The week's transactions aggregate a total of about 3,800 bales of all descriptions, including one or two parcels of Dhollerah, for delivery in 10 weeks, at 215 rs, the business in ready cotton being chiefly in Sholapore and low Oomrawuttee kinds, of which small supplies continue to come forward by rail. The weather during the past week has been showery, but the rainfall, as registered in Bombay, is still very much short of the average. Notwithstanding this the reports from the districts as to the prospects of the growing crop continue on the whole favourable. Berars—The cotton commissioner telegraphs as follows on the 5th instant:—"Cotton prospects in Wurdah valley and East Berar favourable. In West Berar about one inch of rain has fallen and prospects are better." Gujerat—We have no official report, but our correspondents inform us that excepting in one or two villages where more rain was wanted, the second sowing has all been completed, and so far the season promises well. Tinnevelly—We have a telegram dated yesterday quoting 7d, c. and f.

EXPORT of COTTON from BOMBAY to August 7.

	1871.	1870.
London.....bales	21,247	1,570
Liverpool	6,37,518	7,31,208
Total, Great Britain	6,58,765	7,32,778
Channel for orders	37,333	10,379
Continent	2,62,684½	1,29,360
China	43,151½	40,745
Grand total	10,01,934	9,13,262

Actual exports since last mail left, 33,108 bales.

The Imperial Ottoman Bank have issued the following circular, dated Alexandria, August 25:—More favourable news has caused some movement in our cotton market, and to-day prices are more sustained with a slight increase in price. Operations have not, however, been numerous, which is to be attributed to the very limited stock. In contracts there is more activity, and prices to-day are equal to 10¼d to 10½d per lb, f.o.b., for fair, November delivery—Fair, 8¾d per lb, f.o.b.; good fair, 9⅛d to 9¼d, ditto; fully good fair to good, 9¼d to 10¼d, ditto. Shipments from August 11 to August 24—England, 570 bales; Italy, 49; Austria, 160—total, 779 bales.

The colonial produce markets have been without particular movement this week. Sugar has ruled quiet, and prices have been barely supported for low qualities. The estimated stock in the United Kingdom is 163,240 tons, against 212,465 in 1870; and the quantity of East Indian afloat for Great Britain and the continent (not including Government exports from Java), is 28,400 tons, against 34,500 last year. Good and fine coffees have maintained late rates, but inferior descriptions have sold on slightly easier terms. The quantity of East Indian coffee afloat for Europe (not including Government exports from Java), is 15,850 tons, against 24,920 last year. There has been more doing in rice, both on the spot and forward, and values have ruled firm. The quantity afloat is 162,000 tons against 194,700 last year. Inferior teas have ruled dull, and drooping in value.

Estimated Stock of Tea in the United Kingdom.

	Sept. 1, 1869. lbs.	Sept. 1, 1870. lbs.	Sept. 1, 1871. lbs.
London	56,894,000	66,320,000	71,229,000
Liverpool	776,000	7,200,000	7,000,000
All other ports and estimated in transit	11,000,000		
	68,670,000	73,520,000	78,229,000

The following report dated August 5, has been forwarded by Messrs. Fyfe, Schultze, and Co., of Colombo:—The shipping season of the Interior has been of the usual extent at this season of the year, and in spite the clearances have increased the Coffee in the season's exports to nearly [illegible] over last year's, the comparison is seen below:—

Plantation Coffee.

	1871. cwts.		1870. cwts.
To Great Britain	664,440	.....	772,008
Foreign ports	40,238	.....	40,744
Australia and India	12,637	.....	12,087
	717,315	.....	824,839

Native Coffee.

	1871. cwts.		1870. cwts.
To Great Britain	87,267	.....	64,356
Foreign ports	27,758	.....	51,752
Australia and India	3,763	.....	2,216
	118,788	.....	118,324

Small parcels of new native coffee have found their way down from the districts but Colombo stocks are still very low. [illegible] transactions have taken place to high-grown native crops of well-known characters at 10s. 6d. to 11s. 6d. per cwt. Very little business is doing in native coffee which cannot be said to attract purchasers at 10s. 6d. to 11s

rangement of margins and exchange values from this disturbing cause is exceedingly embarrassing to both exporters and importers, and efforts are understood to be making to induce the Secretary of the Treasury to increase his gold sales, in order to break up clique combinations to advance the premium, which have lately been decidedly injurious to the interests of legitimate trade. The money market remains easy, and there appears to be no apprehension of sufficient stringency during the active business season to interfere with mercantile calculations, or to put a check upon the free interchange of commodities. The scarcity of tonnage continues, and comparatively good rates of freight to foreign ports prevail, but should the outward trade continue to halt, in consequence of the difficulty in connection with gold and exchange, it is not improbable that an influx of vessels, of which there is a large fleet due, will serve to bring about a decline. But meanwhile the supply is under easy control, and there is sufficient business to keep rates steady and firm in the principal trades. The complete success of the new five per cent. loan is a gratifying evidence of the strength of our public credit; and with the ice thus broken, we shall have little difficulty at the proper time to negotiate the four and four-and-a-half per cents., as there is an eagerness among foreign investors to hold our obligations, which is as gratifying as it is beneficial to our prosperity. At the close money was easy at three per cent. on call and 5 to 7 per cent. discount of prime business paper.

The large business in cotton last week has been followed by an equally active demand during the present one, at gradually hardening prices, and to-day the sales have been very extensive, and the quotations are raised about ¼d per lb. For Sea Island there has been a good inquiry, but chiefly confined to the medium and better grades of Florida, without change in prices. American has been in general request, and has risen nearly ¼d per lb. New York advices to the 7th instant quote middling Upland 20¾ cents, costing to sell in Liverpool 10½d per lb, by steamer. Brazil has continued in good demand throughout the week, closing at an advance of ¼d per lb. The demand for Egyptian has again been large, and prices have further risen about ¼d per lb. For East Indian there has been an increased inquiry, especially for the better qualities, which have advanced ¼d per lb; the lower and medium sorts are only ⅛d per lb dearer.

In cotton "to arrive" and for future delivery the transactions continue large, at higher prices. The latest quotations are—American, basis of middling, from any port, not below good ordinary, September delivery, 9⅜d; October delivery, 9 9/16d; not below low middling, September delivery, not before 20th, 9⅛d; October, 9 9/16d; November delivery, 9⅝d; new crop, not below good ordinary, November-December shipment, 9 9/16d—Mobile, September delivery, not before 15th, not below middling, 9½d; not below good ordinary, September shipment, by steamer, 9⅝d—New Orleans delivery, not below good ordinary, October, 9¾d; October, not below low middling, 9⅜d; new crop, November-December shipment, without clause, 9¾d; Texas, not below good ordinary, October delivery, 9¾d; low middling, Texas, not below strict ordinary, October delivery, 9½d; Bahia, basis of fair, mutual allowances, ship named, 9d; Santos, fair, no allowance to seller, ship named, 9⅜d; Broach, fair new merchants, June sailing, 7½d; good fair, machine-ginned, June sailing, 8⅜d; Dhollerah, fair new merchants, ship named, 7½d; sailing June, 7½d; July, 7½d; July shipment, 7½d; Oomrawuttee, fair new merchants, ship named, 7½d; Comptah, fair new merchants, at sea, 7d; Scinde, fair new merchants, at sea, 6⅜d per lb.

The sales of the week, including forwarded, amount to 118,940 bales, of which 25,810 are on speculation, and 10,660 declared for export, leaving 82,470 bales to the trade.

SEPTEMBER 8.—The sales to-day will probably amount to about 15,000 bales, with a firm market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	720,300
An increase of quantity taken for consumption of	475,680
An increase of actual exports of	283,390
An increase of stock of	27,530

In speculation there is an increase of 255,070 bales. The imports this week have amounted to 50,435 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to September 1) is 58,000 bales, against 16,000 bales at the corresponding period last year. The actual exports have been 8,123 bales this week.

The following is a return showing the number of bales of cotton imported, exported, and forwarded inland for consumption during the month of August, 1871, and also showing the stock on hand on the 31st day of August, 1871, and the total imports and exports of cotton during the first eight months of the year:—

NEW YORK.—AUGUST 25.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening Aug 25. From the figures thus obtained it appears that the total receipts for the seven days have reached 7,844 bales, against 7,939 bales last week, 9,454 bales the previous week and 10,472 bales three weeks since, making the total receipts since Sept. 1, 1870, 4,002,461 bales, against 2,898,109 bales for the same period of 1869-70, showing an increase since Sept. 1 this year of 1,204,352 bales. The exports for the week ending this evening reach a total of 14,339 bales, of which 10,712 were to Great Britain, 3,623 to France, and 3 to rest of the continent, while the stocks as made up this evening are now 105,529 bales. Below we give the exports and stocks for the week and also for the corresponding week of last season, as telegraphed to us from the various ports to-night :—

Week ending Aug 25	Exported to		Total this week.	Same week 1870	Stock.	
	Great Britain.	Continent.			1871.	1870.
New Orleans	1,979	909	2,888	703	29,844	25,344

[illegible]	...	...	...	...	2,700	1,100
Charleston	...	...	...	...	1,611	697
Texas	...	...	...	...	9,211	5,927
New York	6,457	...	6,457	2,274	46,000	22,000
Other ports	1,305	...	1,305	...	12,940	6,940
Total	10,712	3,623	14,339	2,977	105,529	77,931
Total since Sept 1	2,502,242	1,500,219	4,002,461	2,797,759	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 11,361 bales, while the stocks to-night are 28,194 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Aug. 18, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph :—

Ports.	Receipts since Sept. 1.		Exported since September 1 to				Shipments to Northern Ports	Stock

The market the past week has, notwithstanding the small amount of business done, taken another upward turn in response to the increased sales and higher prices at Liverpool, which appear to have been induced by the reports with regard to the crop sent from this side. The Associated Press have telegraphed over the country that caterpillars are destroying the cotton plant, and this statement, together with the fact that the rains of late have been frequent and excessive in some sections having been telegraphed to Liverpool, formed the basis of this rise in prices. Consumption in Europe and this country is in fact so large at present that the market is very sensitive to the least adverse rumour of the kind referred to. We learn this week that late returns indicate that our Northern mills are now consuming fully 19,000 bales per week, and so long as this is the case, and Liverpool disposes of 75,000 bales per week for consumption and export as during the past week, we cannot be surprised at the effect of reports which state that the supply from this country is to be very materially curtailed. Fortunately these newspaper reports of destruction from the caterpillar are at least premature, and this conviction has shown its influence in our market to-day by a decline of ¼c from the highest prices of yesterday, and the close to-day was quiet at the decline, and the total sales for the day reaching only 883 bales. Holders are becoming rather more timid of late, and generally the offerings have been abundant at the current rate. This timidity arises from the near approach of the period when the new crop will begin to be sent forward, and the fear that the improvement in prices will lead planters to market their cotton early and freely, and thus prices be forced down below their present level. For forward delivery there has been a very active movement with wider fluctuations in prices than for spot cotton, but at the close rates show only about the same improvement. Low middling closed at 18c for August, 18¼c for September, 18⅛c for October, 18⅛c for November, 18¼c for December, and 18¼c for January. The total sales of this description for the week are 84,150 bales. For immediate delivery the total sales foot up this week 7,081 bales, including 2,607 for export, 3,975 for consumption, 249 for speculation, and 250 for transit. Of the above 360 bales were to arrive. The following are the closing quotations :—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary per lb	15¼ @ ...	15¼ @ ...	15¼ @ ...	15¼ @ ...
Good ordinary	16¼ ...	16¼ ...	16¼ ...	17 ...
Low middling	18 ...	18¼ ...	18¼ ...	18½ ...
Middling	19 ...	19¼ ...	19¼ ...	19½ ...
Good middling	20¼ ...	21 ...	21¼ ...	21¼ ...

For forward delivery the sales have reached during the week 84,150 bales.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870 :—

	Week ending Aug 25, 1871.			Week ending Aug 26, 1870.		
	Receipts	Shipments.	Stock	Receipts	Shipments.	Stock.
Augusta	175	295	6,130	209	670	2144
Columbus	79	63	1681	56	240	1809
Macon	62	77	1,120	75	425	2809
Montgomery	177	232	1,764	61	195	2338
Selma	65	209	564	60	44	1479
Memphis	1121	1102	3442	680	620	4147
Nashville	64	227	141	93	253	2460
	1743	2205	13870	1274	2447	17719

The above totals show that the interior stocks have decreased during the week 342 bales, and are to-night 4,749 bales less than at the same period last year. The receipts have also been 461 bales in excess of same week last year.

The exports of cotton this week from New York show an increase since last week, the total reaching 7,101 bales against 2,691 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction

since September 1, 1870; and in the last column the total for the same period of the previous year:—

—*New York Commercial and Financial Chronicle.*

NEW YORK, Sept. 1.—According to Messrs Moffatt, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 8,000 bales; ditto, since 1st September, 4,011,000 bales. Shipments to England, 13,000 bales. Total since 1st September, 3,169,000 bales. Stock at all ports, 98,000 bales. Middling Upland, 9d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Sept. 7.—Our market is again very strong in tone, but it is quite devoid of any animation or excitement. The increased firmness is entirely owing to the excited state of the cotton market, and the large business done in cotton yesterday and to-day at advancing rates. There is certainly more inquiry to-day for both yarns and goods, and at Tuesday's rates a moderate business could be done, but the advance asked and required checks operations. In yarns it is quite impossible to sell largely at the prices asked, but fortunately for spinners they are well sold, and are not pressing sales; on the contrary, many refuse to name a price to-day owing to the excited state of the Liverpool cotton market. Cloth is even worse to sell than yarns, and manufacturers complain much of the difficulty of selling almost at any reasonable price. 39in shirtings are especially neglected, and less are making now. Jacconets and mules are well in order, and dearer. Heavy goods show no improvement in demand. Printing cloths are quiet, as is usual at this time. The market closes strong, but prices asked have rendered business impracticable for the present.

BRADFORD.—The wool market shows greater strength. Both buyers and sellers seem to be more in accord in the conviction as to the inevitable necessity of quotations being more firmly maintained in the immediate future. The operations are still mostly confined to good wethers and hogs. Lustre and demi-lustre wools are also in some request. Short wools continue in good request, and prices are firm. In both the yarn and the piece markets there is a very restricted business doing.

LEEDS.—The woollen cloth market has been buoyant. The run keeps good upon various kinds of tweeds; but there is not quite so much call for Victorias as there was a fortnight ago. A fair amount of business was done in coatings, but the quantity of these goods passing through the coloured cloth hall does not by any means represent the full extent to which they are being manufactured. The market for hair lists has been brisk, and makers entertain no fear of any risk through over-production.

ROCHDALE.—The principal demand has been for low-priced goods, but merchants are more barely supplied with those than with any other kinds. The trade doing in Yorkshire goods is also almost altogether to order. Prices of both goods and wool are very firm.

DUNDEE.—Our flax market has remained firm, and as there now seems to be a general impression that prices will be at least maintained, there is more confidence in operating, and a fair amount of business has taken place in goods on the spot, although the transactions are still somewhat of a retail character. In some instances holders ask rather higher prices, but buyers only operate if they can do so at about previous rates. The demand for tows of good and medium quality continues active, and prices are well maintained. The jute market continues very quiet. Flax and tow yarns continue very firm, and prices are well maintained, although the demand has scarcely been so active during the past week as in the previous one. Jute yarns continue in fair demand, and prices are steady. The linen trade continues in a healthy active state, and there is also an extensive demand for many kinds of jute goods, so that manufacturers generally have abundance of employment.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, AUGUST 25.

There has been a general improvement in prices during the past week, with a good business both for local use and export, and the market closes firmer. Flour has arrived moderately, but the bulk of the receipts have been brands manufactured wholly or in part from winter wheat. Flours from spring wheat have not only been in very small stock, but receipts limited, so that although prices are generally 25c to 50c per barrel higher, it has not been possible to fill orders for them, and buyers have had no alternative but to await fuller supplies or purchase other brands. The extreme scarcity of flours from spring wheat, together with less pressure to sell flours from winter wheat, has worked some advantage to them in prices, but the supply has been fully equal to the demand. The prices of shipping extras and those of family flours have shown a smaller range than now. Corn meal has declined. To-day there was a heavy rain, which checked trade. Shipping extras were quoted at $5.85 to $6. Lines of fair extras from winter wheat sold at $6.50. Wheat has also arrived sparingly. The demand has been variable, but latterly active for export. It would appear that Liverpool has been taking very little wheat from us for some time; almost the whole of our new crop of winter wheat has been going forward to the continent, while of spring wheat our supplies are apparently not much in excess of our home wants. English shippers have therefore been compelled to advance their bids, stimulated to this course also by bad weather for their crops. Yesterday there was a large business in prime spring at $1.38 to $1.41; red winter, $1.42 to $1.43, and white Western, $1.54½. To-day the offerings were very small. Most of the wheat arriving was sold previous to arrival; prime spring sold at $1.40 to $1.43; white Western, $1.55, mainly for export; also, one load of amber Michigan, $1.50, but the market was without much spirit. At Chicago, there has been serious speculative complications, No. 2 spring, cash and August delivery, was forced up to $1.25, resulting in several failures yesterday among parties who were "short." To-day cash wheat was quoted at $1.22½, and September options $1.14. Corn has arrived less freely, while the local demand has been large, with a fair export business; Western mixed has consequently advanced, opening this morning at 67½c and closing at 68½c. Western yellow has been in better supply, and sold freely yesterday and to-day at 70c. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

It is daily becoming more evident that the early estimates formed of the wheat crop were too sanguine, and there is a tendency now to fall into the opposite error, and to regard the deficiency as a large one. No doubt the results of recent threshings are less favourable than was anticipated, but the falling off is not of sufficient extent to create alarm, and though it may check the downward movement for the time will probably not do so for long. We now receive such heavy supplies of cereal produce from abroad that the deficiency in the wheat crop in England must assume important dimensions to cause any great rise in prices. It does not appear that France will compete largely for the supply of breadstuffs, as not only is the harvest there larger than was believed, but consumption will probably be as much restricted as possible, in consequence of the straitened circumstances of trade. Exports, however, will continue, and this must be attended by a corresponding effect upon the market. Many extravagant estimates were afloat as to the quantity of wheat we should require to import, but it will probably not exceed 11,000,000 quarters, and there is little reason to doubt that the full quantity will be forthcoming. During the season just closed (from September, 1870, to August 31 last) we received 9,250,000 quarters of wheat and flour, against 10,250,000 in 1869-70, and 8,175,000 quarters in 1868-69. The increased means of transport and the cheapness of money will be sure to bring adequate supplies to whatever extent they may be needed. The admitted deficiency in the English crop, however, has caused a firm tone to prevail in the market, and all qualities of wheat have met a ready sale at an improvement of 1s per quarter on the week. Flour has ruled firm at a rise of 6d to 1s in sacks and barrels.

There has been more animation in the spring corn trade, and purchases have been made with more freedom. Sweet grinding barley has been in request, while malting qualities have been neglected. Maize has ruled firm in value, while mixed oats are 6d to 1s cheaper. Beans and peas have changed hands pretty on former terms.

Mr George Davidson's three reports the state of the floating grain and seed trade:—During the last eight days 108 grain and seed-laden vessels have arrived at ports of call, viz.:—70 wheat, 27 maize, 5 barley, 2 rye, 11 beans, 1 linseed, 2 rapeseed, 4 cottonseed, 5 valonea, 1 beans and oats. The floating grain trade has thus throughout been firm in tone, and prices of most articles are higher or have been tending upwards. Wheat—The demand has been inactive, and prices of the cargoes are nearly 2s to 3s on the week. Maize, the cargoes have been firm at 1s advance upon last week's prices, and many cargoes different to sell. Barley—Only one cargo has been sold at 27s 3d per 400 lbs. Rye scarcely enquired after at 6d to 1s more money. The reported sales are as follows:—Wheat—29 arrived cargoes. Marseilles, 700 qrs at 52s 3d; hard Taganrog, 400 qrs at 50s 6d; Odessa, 800, Nicolaieff, 400, Galatz, 400 qrs 50s to 52s; Galatz from Taganrog, 47s 9d and 48s 6d; Odessa from Nicolaieff, 48s 6d and 50s 6d; Nicolaieff Odessa, 50s 6d; Odessa from Odessa, 48s 9d to 50s 6d; Galatz, 48s 6d and 49s 6d per 480 lbs. No 1 spring from Montreal 47s 6d and 48s 9d; from New York 47s 6d and 48s 6d; red winter, 48s and 49s 6d per 480 lbs. On passage one cargo No 2 spring from New York, 48s. Stopped or to be stopped, 80,000 qrs. No 2 spring from New York, 51s and 51s 6d; white from Montreal, 52s 6d; red winter, 50s per 480 lbs. Maize—19 arrived cargoes. Odessa, 300, Galatz, 400 qrs 33 to 34s 6d per 480 lbs. Walachian, 27s 6d and 28s 3d; Danube, 27s 6d; Danube, 28s 6d and 29s 6d; Ibraila, 29s 6d; mixed American, from New York, 31s 6d and 32s 6d; mixed American, from Philadelphia, 31s 6d per 480 lbs. Barley—1 arrived cargo Nicolaieff, 27s 6d per 400 lbs. Rye—2 arrived cargoes Odessa, 37s 10½d; Nicolaieff, 42s 6d per 480 lbs. 1 cargo Odessa arrived at Rotterdam, 38s 10½d per 480 lbs. Linseed—1 arrived cargo, On passage, 700 tons East India from Calcutta, at 61s to 62s 6d per 416 lbs. A.T. Rapeseed steady. Arrived at London, 200 tons ordinary brown from Calcutta, 60s 6d and 61s 6d per 416 lbs. A.T. On passage, 450 tons ditto, 60s 6d to 61s 6d per 416 lbs. A.T. Stopped or to be stopped, 300 tons, ditto, 60s 6d per 416 lbs. A.T. Cotton-seed quiet; no sale reported.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market remains quiet, with smaller transactions in West India than for some time past, and other descriptions have been generally inactive. Consumption is less satisfactory, the duty payments in the Kingdom showing only 7,800 tons increase on last year, but the stock at the chief ports is deficient by about 44,000 tons. Lowest estimates of the European beet crop are 1,000,000 tons, a fact which accounts for the absence of speculation in cane sugar. The sales of West India to yesterday were only 683 casks. Barbadoes by auction were chiefly taken in. A few parcels of Ice Mauritius and Madras Jaggery have changed hands. Refined is without improvement. The home deliveries at this port exhibit an increase of about 16 per cent as compared with last year. On the 1st instant the stock of sugar in the four ports of the United Kingdom was 156,200 tons, or 44,000 tons less than at the corresponding date of the previous season. In 1869 the stock amounted to 146,500 tons.

MOLASSES.—The export inquiry last week was sold in the Clyde. A small parcel of soft brown has sold on the spot at 29s 6d.

RUM.—2,500 bags Demerara, by auction, sold; yellow and grey, 30s to 32s 6d; brown low to fair, 25s 6d to 27s.

MADEIRA.—3,500 bags Jaggery have sold at 20s.

FRUIT.—At auction, 1,162 boxes Havana were withdrawn above the market rates. By private contract 11,000 cwt Muscatels sold: Toni, 21s 6d to 22s 6d; Le Ley, 22s 6d.

PROVISIONS.—One of grocery, Port Rico, 46 tons for the United Kingdom; one of Havana, No 11 to 11½ at 37s 3d; one for transhipment to Italy 35s 6d.

LARD.—The market remains without improvement, but prices have not shown any material change since last week.

MANILLA.—No sales reported.

RICE.—Trade is not any more lively in the meantime, several sales having been effected upon Liverpool terms chiefly consisting of West India, Demerara, &c., 6s 6d to 7s 3d; Demerara, 7s 10½d per proof gallon. Jamaica is in steady demand, the business has included some common quality at 7s 3d per gallon.

COCOA.—The small quantity of Trinidad offered by auction this week

partly sold without further change in price, viz., 168 bags at 67s to 75s per cwt. 463 bags Guayaquil were withdrawn. By private contract a few sales have been effected at 47s 6d to 50s per cwt. Other kinds are in limited demand.

TEA.—There has been less pressure to sell by auction without reserve, the quantity printed to yesterday amounting to only 4,852 packages. Old season's congou in second hands went at moderate prices. The small quantity of new season's black leaf obtained former rates. Privately steady prices have been paid and business done in Foo Chow red leaf, the good to fine qualities attracting most attention. Several public sales of Indian tea are declared for Tuesday next. The stock in the United Kingdom is now estimated at 79,500,000 lbs, or 5,000,000 lbs more than in 1870 at the same date.

COFFEE.—The large supply brought upon the market has had the effect of checking any further advance, but in few instances have prices shown weakness, and the sales yesterday went off with spirit. During the week 3,521 casks 1,344 barrels and bags plantation Ceylon all sold: grey and pale, 63s to 75s; low middling to good middling colory, 66s to 78s; good to fine, 79s to 86s. 976 bags native sold steadily: rather small to good ordinary, 56s 6d to 57s 6d; real good ordinary to bold, 58s to 59s 6d. 80 casks 2,109 cases 3,368 bags East India went without material alteration: Coorg and Wynaad, 63s 6d to 69s 6d; bold, 70s to 77s; Naidoobatum only part sold at 68s to 68s 6d for middling and 77s 6d to 79s 6d for bold. Native sorts were partly bought in. A few lots sold at 58s to 61s. 128 packages Mocha were partly disposed of at 78s 6d to 79s 6d for low ungarbled. Of 156 casks Porto Rico a portion sold at 64s, and the chief part of 3,227 bags Costa Rica at 60s to 64s 6d. 317 bags Guatimala sold at 59s to 63s 6d, and 294 bags Santos at 58s 6d to 59s 6d. 1,192 barrels and bags Jamaica realised 58s to 61s for ordinary and pale sorts. A floating cargo of Santos for a near port at 55s 6d per cwt. The export deliveries here have increased by rather more than 30 per cent. contrasted with last year, and continue large. There is also a steady increase in the deliveries for consumption. Recent heavy arrivals have brought the stock to nearly the level of last year's at the same date.

RICE.—Rather a limited business has been done by private contract, including low white Bengal at 10s, Rangoon at 9s, and 1,360 bags ex a late sale, at 10s 6d for middling. 500 tons yellow Bengal to arrive at 9s 6d to 9s 9d. A floating cargo of Rangoon at 10s for the continent; one at 9s 10½d, ex ship, for London. A cargo of Necrancio Arracan at 9s 4½d for the continent. 2,180 bags good white Bengal by auction were bought in, and some sold at 11s 1½d. 1,090 bags Casla, on account of whom it may concern, sold at 9s to 9s 6d per cwt.

IMPORTS and DELIVERIES of RICE to Sept. 2, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports.....tons	47650	35540	54000	47500
Deliveries	76560	49250	42800	37050
Stock	24500	36070	43880	27000

SAGO.—346 bags well grown were bought in, and there is not any improvement in the demand by private contract.

SAGO FLOUR.—Business has been done at 14s 6d per cwt, ex ship.

TAPIOCA.—850 bags Singapore and Penang were bought in. 268 bags pearl tapioca were chiefly damaged; one lot sound chiefly sold at 20s per cwt for good medium grain.

BLACK PEPPER.—The market remains without further alterations, a few sales being made privately. Singapore, 6⅛d to 6¼d; Penang, 6⅛d. The Batavia pepper bought in at last week's sale has been sold at 6¼d. At the public sales yesterday 26 bags fine bold Siam kind brought 6⅜d per lb, but 748 bags good brownish Malabar not meeting with satisfactory bids were withdrawn.

WHITE PEPPER.—The market continues firm, and the late advance is maintained. 2 bags very fine bold Siam kind sold at 1s 2d per lb.

OTHER SPICES.—97 cases nutmeg went rather dearer: brown sorts 103's, 2s 11d to 3s; 90's, 3s; 86's to 83's, 3s 1d to 3s 2d; 73's to 67's, 3s 4d to 3s 7d; small defective and wormy limed, 1s 7d. A few packages West India at 2s 8d to 3s 2d. 17 cases mace were only partly sold: good red Penang, 4s 3d; low Singapore, 3s 10d to 3s 11d. Inferior Java kinds chiefly taken in, as there were not buyers at the high prices of last week. 56 bags pimento were bought in above the value. 50 bags low Amboyna cloves withdrawn. No change in other kinds. 878 bags cinnamon chips went at 4d to 6d; bark, 1¾d per lb. 132 bales Ceylon cinnamon, including some spurious quality, were withdrawn. 150 cases cassia vera part sold at 59s to 60s for broken. 332 barrels of Jamaica ginger of old import sold at 40s to 56s per cwt. Cochin remains quiet.

SALTPETRE.—There is a better demand, partly speculative, the stock being moderate, and the quantity afloat still less than usual. About 6,000 bags Bengal sold on the spot: refraction, 8½ to 3, 28s to 29s. 300 tons afloat at 28s 6d to 28s 9d per cwt.

IMPORTS and DELIVERIES of SALTPETRE to Sept. 2, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported.....tons	8490	7320	7520	5160
Total delivered	7740	10370	6730	6380
Stock	2740	1780	4980	6300

COCHINEAL.—At the sales on Wednesday 954 bags Teneriffe went at the late advance to a farther recovery of 1d: silver, 2s 5d to 2s 7d; black, 2s 6d to 3s; fine and very bold, 3s 1d to 3s 10d. 128 bags Honduras obtained full quotations: silver, 2s 4d to 2s 8d; black, 2s 8d to 3s 1d. 69 bags Mexican: silver, 2s 4d per lb.

INDIGO.—The next sales will be held on the 9th October, and there are 10,800 chests now advertised.

OTHER DRYSALTERY GOODS.—Business has been done in safflower including low quality at 80s. Cutch remains without animation, the market being quiet. By auction 400 boxes were held at 22s. 486 bags low at 20s. Fine qualities are steady. Gambier has been firm. 100 tons sold at 16s with all faults. 182 bales by auction were bought in. 300 mats cubes sold at 21s 6d. 300 bags Bengal turmeric were bought in at 20s 6d. 797 bags with all faults sold without reserve at 17s 6d to 18s 6d. 1,019 bags Madras part sold at 17s 6d for low and wormy quality. China galls, 49s 6d to 50s per cwt.

SHELLAC.—561 chests partly sold at barely former rates, and there is less inquiry by private contract. Reddish to fine orange obtained 6/ 17s 6d to 7/ 7s 6d; good garnet, 5/ 15s per cwt.

METALS.—The markets have not shown any important changes this week and the general tone of business is rather quiet. Foreign tin has been unsettled through realisations by speculators. Sales of Straits are reported at 129/ 10s to 130/ 10s. British iron continues to meet with an increasing demand. A steady business in Scotch pig during the week, the latest sales for cash being at easier rates, viz, 60s 6d to 61s per ton. Quicksilver has advanced to 11/ per bottle. Spelter is quiet. The stock in London amounts to 3,750 tons, against 3,350 tons last year, and 1,230 tons in 1869. Silesian quoted about 18/ 5s. A better demand prevails for Chili, &c. Copper with sales at 66/ 10s to 69/ according to quality. Walaroo has brought 76/ to 76/ 10s. British copper remains quiet.

JUTE.—The home trade buy rather sparingly, owing to the expected large supplies to Europe. During the week a few parcels have sold afloat, but the chief feature has been the very heavy quantity brought to auction on Wednesday, viz., 15,076 bales, of which almost one-third part sold, common to middling being about 10s lower; good to fine about the same as before; low to fair quality, 18/ to 24/; good to fine, 25/ to 27/ 5s per ton.

HEMP.—The advanced rates demanded for Manila have prevented much business being done. Good roping is worth 49/ to 50/ per ton. 4,000 bales are declared for public sale next week.

HIDES.—At yesterday's sales of East India there was a good demand. Common kips brought former rates, and good to fine an advance of about ¼d per lb. Tanned hides obtained very full prices. Buffalo, with few exceptions, were quiet. Of 202,012 hides, &c., brought forward, 189,660 sold.

LINSEED.—A good business has been done in Calcutta. On the spot, or close at hand, 62s 6d to 63s; to arrive, 61s to 62s. Odessa afloat, 57s 9d; off the coast, 58s 6d per quarter.

OILS.—Pale seal and other common fish oils are quiet. A limited business in sperm at 81/. Olive on the spot is quiet. A floating cargo of Smyrna sold for the United Kingdom at 47/ 10s, c. f. and i.; one of Gioga at 49/ 10s per tun, same terms. Linseed oil steady at 33/ on the spot, and 32/ forward to February. Brown rape oil has advanced: English, 43/ to 43/ 10s. A large business in the last four months at 43/ 10s to 43/ 15s; refined quoted 45/ 10s; foreign, 49/ 10s. Cochin cocoa-nut is likely to be in small supply, and the price remains disproportionately high. The last sales in quantity were at 50/. Ceylon steady, and the deliveries have been remarkably large. Present price on the spot, 39/; to arrive, 38/ 10s to 38/ 15s. Palm in steady demand at 32/ to 37/ per ton.

PETROLEUM.—American refined has been in good demand. Present quotation, 1s 6½d per gallon, and the same price asked for the last three months.

TALLOW.—The weekly supply of Australian to-day is again moderate, but the quantity afloat keeps heavy. Russian has been quiet, and prices show a slight reduction. Petersburg, 44s; October to December, 44s 9d; January to March, 45s 3d to 45s 6d; March only, 45s 9d to 46s per cwt.

PARTICULARS OF TALLOW—Monday, Sept. 4 1871.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market closes flat. Barbadoes by auction only partly sold upon former terms. Sales of West India, 239 casks, making 922 casks for the week. A floating cargo of Havana sold for the United Kingdom: No. 12½ at 29s 1½d. On the spot 15,000 bags clayed Manila at 26s to 27s per cwt.

COFFEE.—418 casks 197 barrels and bags plantation Ceylon, and 565 cases 63 bags East India by auction sold upon former terms. 1,811 bags Costa Rica chiefly sold at 59s to 66s 6d. 1,817 bags Guatimala at 60s 6d to 61s 6d. 300 bags Rio at 57s to 58s 6d.

RICE.—No further sales reported.

SALTPETRE.—130 tons sold afloat at 28s 6d to 29s, and a small parcel fine on the spot at 29s per cwt.

LAC DYE.—110 chests were bought in.

SAFFLOWER.—298 bales Bengal were chiefly taken in.

METALS.—No change in prices.

OIL.—182 casks Ceylon cocoa-nut were bought in. 737 casks palm part sold at 32s 6d to 34s 6d. Lagos bought in at 37s per cwt.

TALLOW.—Foreign and town made unaltered. 912 casks Australian by auction went rather dearer. Mutton, 43s to 44s 3d; beef, 37s to 42s 3d per cwt.

ADDITIONAL NOTICES.

DRY FRUIT.—There has been a very severe fall in currants, and since the opening on the 23rd ult. prices are 7s lower and have a tendency for further decline in all low stuff. Dealers will only buy with great care at the reduced rate, and evidently with further arrivals we shall see greater pressure applied on buyers. The crop is nearly all secured and prices in Greece have gone down nearly as much as here. Old currants sold at auction without reserve at 21s to 23s, and this has been a means of lowering the value of new. Valencias are lower and have every appearance of an approaching fall. The season is very early and buyers very cautious in face of large crops of all fruit. New Sultanas sold to-day at 42s upwards.

COLONIAL WOOL.—Good inquiry, but few sales, as holders prefer waiting for public sales commencing 14th inst. Prices are very firm.

FLAX firm; the stock of Egyptian very small.

HEMP.—Russian rather more inquiry at late prices. Manila importers demanding higher prices restricts business; not much done this week. Market very firm.

SEEDS.—The seed trade continue steady for all varieties, and rape seed has advanced 5s per qr.

Tobacco.—There has been but little doing in American tobacco during the past week, buyers have operated only as in need. The market is very bare of old Virginia strips, for which of late there has been a great demand. In substitutes and segar tobacco there has been a fair business done, and for some growths of the latter descriptions full prices have been realised.

Metals.—The market for copper has somewhat improved the last few days. Higher prices have been paid for ores, and a better inquiry exists for Australian. Tin has been unsteady, to-day's price being 130*l.* Spelter nothing doing. Tin plates still command full prices.

METROPOLITAN CATTLE MARKET.

Monday, Sept. 4.—The total imports of foreign stock into London last week amounted to 17,709 head. In the corresponding week in 1870, we received 7,951; in 1869, 14,032; in 1868, 8,419; and in 1867, 12,991 head.

In the cattle trade to-day business to a moderate extent has been passing. The show of beasts has been rather more liberal, but really prime stock has been scarce. The demand has been to a moderate extent. The best Scots and crosses have made 5s 6d to 5s 8d, and occasionally 5s 10d per 8lbs. Foreign beasts have realised 5s to 5s 6d per 8lbs. Fair supplies of sheep have been in the pens, the foreign element predominating. The trade has been firm at full prices, the best Downs and half-breds readily making 6s 8d to 6s 10d per 8lbs. Calves have been disposed of at the rates previously current. Pigs have sold at about late rates.

Supplies on Sale.	Sept. 5, 1870.	Sept. 4, 1871.
Beasts	5,220	5,153
Sheep and lambs	22,440	25,520

Veal	4	8	5	4	Small pork	4	8	5	4

HOP MARKET.

Borough, Friday, Sept. 8.—The hop market has been in a quiet state. A few new parcels have been on offer of indifferent quality, but high rates are required. Mid and East Kents, 60s to 147s; Weald of Kents, 60s to 140s; Sussex, 60s to 100s; Farnham and country, 90s to 120s; olds, 20s to 30s per cwt.

POTATO MARKETS.

Borough and Spitalfields, Friday, Sept. 8.—Moderate supplies of potatoes have been on sale. The trade has been quiet, at late prices: —Regents, 60s to 80s; shaws, 40s to 60s; kidneys, 80s to 110s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

Friday, Sept. 8.—Comparative quietness still prevails in our market, however, as there is no cause for any falling off in the rate of consumption, holders are content to wait for resumed activity, and continue very firm in their demands.

The Gazette.

BANKRUPTS.

Tuesday, Sept. 5.

John Bruce, Fenchurch street, shipowner.
Charles Page Bignell, Portsea, potter.
Jesse Farmer, Whitechapel, painter.
James Field Headworthy, Devonshire, ironmonger.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK'S, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For general purposes and all rooms occupied by children there will now be no excuse for using poisonous paints. Painters may remember that those children so painting from the master to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

CARSON'S PAINT,

PATRONISED BY THE QUEEN,

Is extensively used for all kinds of

OUT-DOOR WORK.

It is especially applicable to

WOOD, IRON, BRICK, STONE, AND COMPO.

HAIR DESTROYER.—248 HIGH Holborn, London.—ALEX. ROSS'S DEPILATORY removes superfluous hair from the face, neck, and arms without effect to the skin. Price 3s 6d, sent for 54 stamps. Hall of all Chemists.

HAIR COLOUR WASH.—BY ... the head with this beautifully perfumed Wash ... restores hair to its original colour, and ... by an occasional using. 3s 6d sent for 54 stamps. ALEX. ROSS, 248 High Holborn, London, and all Chemists.

JOSEPH GILLOTT'S

STEEL PENS.

SOLD BY ALL DEALERS THROUGHOUT THE WORLD.

RUPTURES—BY ROYAL LETTERS PATENT.

WHITE'S MOC-MAIN LEVER TRUSS is allowed by upwards of 200 Medical Gentlemen to be the most effective invention in the curative treatment of HERNIA. The use of the steel spring so often complained of, is here avoided, a soft bandage being worn next the body, while the requisite retaining power is supplied by the MOC-MAIN PAD and PATENT LEVER, fitting with so much ease and concealment that it cannot be detected, and may be worn during sleep. A descriptive circular may be had and the Truss will be sent (the circumference of the body two inches below the hips being sent to the Manufacturer).

Mr WHITE, 228 Piccadilly, London.

Price of a single Truss, 16s 21s, 26s 6d, and 31s 6d; postage 1s. Double Truss, 31s 6d, 42s, and 52s 6d; postage 1s 6d. Umbilical Truss, 42s and 52s 6d; postage 1s 6d. Post-office orders to be made payable to John White, Post-office Piccadilly.

NEW PATENT

ELASTIC STOCKINGS, KNEE CAPS, &c., for VARICOSE VEINS and all cases of WEAKNESS and SWELLING of the LEGS, SPRAINS, &c. They are porous, light, inexpensive, and are drawn on like an ordinary stocking. Price 4s 6d, 7s 6d, and 10s each; postage 6d.

WHITE, MOCKA-MAIN, 228 Piccadilly, London.

BANK OF BOMBAY (IN LIQUIDATION).

NOTICE TO THE PROPRIETORS OF THE BANK.

I hereby give notice that a Fourth Distribution of the Assets of the Bank, at the rate of 10 rupees per share, will be Payable on and after Tuesday, the 1st proximo.

Share certificates must be produced at the time of application for payment.

WILLIAM RODGIE, Liquidator.

Bombay, 26th July, 1871.

BANK OF BOMBAY.

IN LIQUIDATION.

Notice is hereby given, that an Extraordinary General Meeting of the Proprietors of the Bank of Bombay (in Liquidation), will be held at the Offices of the New Bank of Bombay (Limited), in Elphinstone Circle, Bombay, on Monday, the second day of October, one thousand eight hundred and seventy-one, at Three o'clock in the afternoon, for the following purposes:—

First,—To consider and determine as to the propriety of forthwith completing the Liquidation of the Bank, and distributing the surplus assets thereof, and dissolving the Bank according to the provisions of Section XCV. (subsections 10 and 11) of Act XIX. of 1857, of the Legislative Council of India.

Second,—To consider and determine on the course to be adopted in order to provide for the debts and liabilities of the Bank now still outstanding, the nominal amount of which is Rupees two hundred and six thousand five hundred and forty, Annas ten, and Pies nine, according to the particulars stated below, out of which sum of Rupees two hundred and six thousand five hundred and forty, Annas ten, and Pies nine, it is, however, estimated that not more than Rupees fifty-one thousand six hundred and thirty-five will be established as payable.

Third,—To consider and decide as to the adoption of a scheme, whereby, in order to facilitate the dissolution of the Bank and to provide for the said outstanding debts and liabilities, it is proposed that the sum of Rupees sixty-one thousand six hundred and thirty-five shall be placed in the hands of two or more Trustees, to be nominated or approved of by the proprietors at the meeting, Rupees fifty-one thousand six hundred and thirty-five thereof being contributed by the Bank, and Rupees ten thousand, the remainder thereof, being contributed by Mr William Rodgie (the Liquidator of the Bank) upon trust; that the said Trustees shall out of the said sum of Rupees sixty-one thousand six hundred and thirty-five pay all claims in respect of the said outstanding debts and liabilities of the Bank which shall be satisfactorily established before the thirteenth January, one thousand eight hundred and seventy-four; and that the said Trustees shall after the said day so named possessed of the balance of the said sum of Rupees sixty-one thousand six hundred and thirty-five then remaining in their hands (if any) in trust for the said Mr William Rodgie, subject to any claim in respect of the said debts and liabilities which shall have been made before that time; and that the said Mr William Rodgie shall enter into covenants with the Bank and the Trustees for the payment by him of all claims in respect of the said outstanding debts and liabilities of the Bank which the sum of Rupees sixty-one thousand six hundred and thirty-five proposed to be placed in the hands of the Trustees shall not be sufficient to pay, and also for the indemnification by him of the Bank and the proprietors and the Trustees from all responsibility in respect of the said outstanding debts and liabilities of the Bank.—Copies of the Deed by which it is proposed to carry the above scheme into execution in case the same shall be approved by the proprietors may be seen at the Office of Messrs Rimington, Hore, and Langley, Solicitors to the Bank, at Apollo street, Bombay, and at the Offices of E. M. Hore, Esquire, 52 Lincoln's inn fields, London.

Schedule of outstanding debts and liabilities on twenty-third June, one thousand eight hundred and seventy-one:—

	Rs	a	p
Current deposit account	84,944	9	10
Bank notes	85,140	0	0

THE TRURO ELECTION.

It can hardly be denied that the Truro election, following as it does in the West Surrey election, shows that the Ministry is or has been losing popularity rapidly during the last Session. It was to be expected that it would be so. A close and protracted fight with a great class-interest on a subject on which the mass of the people are not deeply interested is always a losing fight,—by which an administration may indeed gain moral credit in the eyes of "the impartial historian," but by which it is quite certain to lose support in the eyes of a multitude who only see that the enemies of the Government are triumphing; and as it is in a matter about which they themselves know little and care less, instead of coming to the assistance of the Government they are apt to applaud the pluck of the successful belligerent. That Mr Augustus Smith should have found the feeling in favour of a Government candidate at Truro so feeble that he retired early from the contest, proves sufficiently that the existing administration has lost for the time its warmest supporters in Truro. It would, however, be very false to suppose that the Truro election testifies to the truth either of a Conservative reaction or of a Radical reaction in the country. Colonel Hogg, the successful Conservative, polled far fewer votes than the Conservative candidate at the last election, fewer by more than a sixth of the total number of votes polled by that candidate (only 605, as against 731 then polled for Sir J. M. Williams). Still more remarkable was the unsuccess of Mr Edward Jenkins—the enthusiastic author of "Ginx's Baby," and the earnest propagator of many curious and questionable doctrines as to land and emigration, the heartfelt faith in which, he told the country about a fortnight ago through the *Daily News*, was the only possible salvation for the Liberal party. "If "my political ear does not deceive me," wrote Mr Jenkins, rising to the height of the great political emergency he had discovered, or imagined he had discovered, "if my political ear does not deceive me, I hear "afar off the surgings of a tide that, coming una- "wares, would blanch the cheek of the strongest or most "indifferent political mariner, and it is because I observe "that in the interest of persons—not principles—an attempt "is being made to divert attention from this rising peril, that "I appeal, through you, to the Liberal party." It is quite clear that Mr Edward Jenkins was precisely the man to give energetic expression to the discontent of the Liberals below the gangway; and that if even he could not open the "political "ears" of the householders of Truro to "the surgings" of that tremendous tide of which he had a vision—if the Liberals of Truro were not startled into energy by his prophecy, and persisted in ascribing these remarkable phenomena to a subjective singing in Mr Edward Jenkins's ears—the advanced Liberals had not very much to hope in Cornwall. For Mr Jenkins's alarm when his ear was visited by the surgings of a tide that was thought likely to blanch the cheek of the bravest political mariners, was very properly not merely confided to the *Daily News*, but illustrated at length by himself to the electors of Truro, where he found a fair number of Radicals, who in 1868 had, in testimony of their faith, given 406 votes to Mr J. Passmore Edwards. To these Radicals Mr Jenkins has been preaching for about a fortnight his somewhat excited gospel of land and emigration reform, and at first, we suppose, his contempt for the Prime Minister. The country, he told the *Daily News*, and doubtless also the Truro Radicals, is governed by "statesmen in hysterics," and Mr Jenkins should certainly know what hysterics mean if his own letter is any clue to his experience; and he further declared that measures are "com- "menced with a scream, and when they come to be carried they "dwindle down to a whisper." His own canvass seems to have shared a similar fate. He began it when it was held certain that he would have to dispute the seat with a Ministerialist, and accordingly we have this letter in which Mr Gladstone is denounced for his systematic "Ananias and "Sapphira policy" of "keeping back part of the price." But when Mr Augustus Smith retired, and the Conservative, Colonel Hogg, came forward, Mr Jenkins would have been very glad to obtain as many of the Ministerial Liberal votes as he

could, and, according to the Press at least, his language towards Mr Gladstone and his Ministry at once softened, or as he would, we conclude, himself have put it, he began to hold back from his proposed constituents "part of the price" he had put upon himself. He still preached of course his gospel of a State bounty on emigration, and very likely hinted his dark hints that if it were not granted the landowners should be forced to put the artisans on the land here—a destiny to which Mr Jenkins in his letter bound them by a solemn and most inappropriate oath; but he began to think that Mr Gladstone might be allowed to lead him wherever Mr Gladstone had grace to see the right way. His denunciations nearly ceased. He began to speak of defects where he had spoken of something like political crimes and sins. But Truro, however apathetic to the Ministerialists, seems to have been still more apathetic to Mr Jenkins's warnings about the surgings of a tide that would blanch the cheek of the stoutest mariner. Though Mr Augustus Smith had retired and his only opponent was a Conservative, Mr Edward Jenkins only succeeded in recruiting Mr Passmore Edward's 406 stout supporters by thirty from the Ministerial ranks, and polled only 436 votes in all. It was a sadly fatal result for a man to whose political ear it was given to hear "the surgings of a "tide, that, coming unawares, would blanch the cheek of the "strongest and most indifferent political mariner."

The truth is, that English householders are not susceptible to excited appeals of this kind. Nothing we take to be clearer than that extreme Radical views, with a violent and alarmist sound about them, rather disgust the ordinary British elector, and do so especially at a moment when he is really dismayed by the terrible catastrophe which excitable politicians have brought upon Paris and France. The French events of 1871 have not been favourable to the views of the extreme party in England. If Mr Gladstone's Ministry has lost credit, it is rather because it is too enthusiastic, too reforming, too sanguine for the public temper at the present moment, than because it is too little so. If it would regain credit, its best way will be to take things quietly,—not to attempt too much; not to confide to the public too many golden visions; not to hope "all things," but only a little of a very moderate kind; not to be "high-minded, but fear." If it will do this, it will quickly regain public confidence, which is in no degree inclined to tend in the direction of Conservatism, and to trust the affairs of England to a party which numbers amongst it so few experienced administrators, and is led by so viewy and dangerous a chief.

THE LOW-PRICED ENGLISH RAILWAYS AS INVESTMENTS.

In our article a fortnight since on English railways as investments, we pointed out that there were special difficulties in the case of the low-priced railways in estimating the probable return to the investor at present prices. Not only would the investor find it impossible to secure a return of 5 per cent. by basing his expectation on the last dividend paid—a difficulty which exists in the case of all railways owing to the high rate at which the expectation of future profit is discounted—but in the low-priced railways the anticipation of capital profit by the same addition to the dividend is much greater than in the case of the high-priced lines. A smaller investment of money secures the same rise upon the nominal 100*l* of stock. In addition, most of the low-priced lines have lately been suffering from difficulties peculiar to each, or to one or two of them, so that it becomes impossible to estimate the current rate of progress by merely looking at the net dividends. We propose therefore to examine specially the circumstances of some of these lines, with a view to assist the investor by a fair estimate of the dividend for 1871-2. In the present state of railway property some such estimate is absolutely necessary in the case of the low-priced lines before any investment can be made.

1. The London and Brighton Railway.—The special cause of depression in this line, as is well known, is the New cross accident, which was only completely paid for in the half-year ending December, 1870. The payments on this account in the year ended 30th June last were about 40,000*l*, making a difference of 10s per cent. in the dividend. But for the accident therefore, a dividend of 1*l* 12s 6d would have been paid for the twelve months, instead of 1*l* 2s 6d. Another special circumstance in connection with the Brighton line is the reduction of about 10,000*l* per annum which has just been made in the debenture and preference charges. The shareholders in the year just past received half of this improvement, but they have a half more to get. In estimating the dividend for 1871-2, both these special circumstances must be taken into account.

The most material circumstance however is the increase of traffic, and it will not be very easy for an investor to decide what rate of increase he will take. In the half-year just passed the increase was 36,000*l* upon a total of 581,000*l*, or about 6·2 per cent., and being almost all net profit was equal to an addition of 1 per cent. per annum to the dividend. During the current half-year however, the accrued increase is already 28,000*l* upon a total of 296,000*l*, or at the rate of over 9 per cent. Assuming such a rate of increase to be maintained for a twelvemonth, the total increase would be about 120,000*l*, giving an additional sum of at least 100,000*l*, or 1½ per cent., available for dividend. That this last sum is likely to accrue we do not consider improbable. The increase last half-year was at the close and not at the beginning, the increase in passenger business on other lines as well being comparatively recent, and there is yet no sign of the accelerated rate of increase diminishing. In addition more than one-third of last half-year's increase was in goods, while of the above 28,000*l* only 3,000*l*, or one-tenth, is in goods. The current increase will therefore be at least as profitable as last half-year's.

Taking these various points into account, we estimate as follows the dividends for the two half-years of 1871-72:—

Half-Year ending December 31, 1871.

	%	Amount.	Total. %	Total. Amount.
	£ s d	£	£ s d	£
Dividend for corresponding half-year 1870	15 0 ...	51,000		
Addition for diminished compensation, 11,000*l*.....)	5 0 ...	17,000		
Do. do. preference charges 6,000*l*.)				
Do. for increased traffic (9 per cent. on 702,000*l*, but deducting ⅒th for working).....	17 6 ...	59,500		
Do. for arrears of preference charges, 29,636*l* say	7 6 ...	25,500		
			2 5 0 ...	153,500
Half-Year ending June 30, 1872.				
Dividend for corresponding half-year, 1871.....	7 6 ...	25,500		
Addition for increased traffic (9 per cent. on 618,000*l*, but deducting ⅒th for working) ...	15 0 ...	51,000		
			1 2 6 ...	76,500
			3 7 6 ...	230,000

This is on the assumption that the current rate of increase will continue. If the increase should be less, only equal say to the increase of last half-year, then the dividend would be a half per cent. less, or 2*l* 17s 6d. It can hardly we think go below that point, and it is probable that the above figure of 3*l* 7s 6d will be exceeded. It would perhaps be safe for the investor to estimate that the actual dividend will be somewhere between the two, and he can consider what allowance he ought to make for the capital increase upon his investment when he takes up a rapidly-improving property below par.

2. The South-Eastern Railway.—The special circumstance affecting this line is the war, which interrupted traffic for almost the entire period embraced in the last two reports. The loss of traffic on this account must have been very serious, the diminution of gross traffic in the half-year ending January, 1871, was 44,000*l*, and although there was an increase in the subsequent five months, it would undoubtedly have been greater had there been no war. In estimating the current rate of increase therefore, we must allow in some way for a special increase on account of the stoppage of the war, not likely to be continued beyond the current twelvemonth. Other points have also to be considered, such as the carrying over of a very large balance from the half-year ending July, 1870, to the following half-year to meet the losses anticipated from the war. The division into Preferred and Deferred stock when the Preferred is insufficiently paid in the first half of the year, also makes it at first sight intricate to estimate for a year which terminates in June.

In making an estimate the first matter is the actual dividend paid in 1870-71, but, owing to the change just made in the date of making up the accounts, this can only be done for the eleven months ending June, 1871. The dividends paid on the undivided ordinary stock were:—

	Rate per Cent. £	s	d		£
Half-year ending January, 1871.....	2	0	0	.....	152,729
Five months ending June, 1871	1	1	10½	.....	85,524
	3	1	10½	.....	236,253
Add ¹⁄₁₁th	0	5	7½	.....	21,441
Last annual dividend	3	7	6	.....	257,694

Thus in the eleven months ending June last the actual amount paid to the ordinary shareholder was 236,253*l.* the equivalent of an annual dividend of 3*l* 7s 6d per cent., which would have absorbed 257,694*l.* Practically the latter figure may be taken as the net earning of the South-Eastern Company in the war year. The next point then is what is the current rate of increase, and we get for answer that since July there has been a total increase of 25,000*l.* the increase in passengers alone having been 22,000*l.* or 8 per cent. Assuming that this rate of increase will be maintained (say) for eleven months, the whole period embraced by the war and insurrection, there will be an addition of 78,000*l* to the passenger business, the goods increase being too insignificant to be considered. This will be an increase equal to about 1 per cent. per annum, and will be a pure gain, unless there are additional working expenses or preference and debenture charges. The former is unlikely, notwithstanding the increase in the last five months, and the latter will not be much, owing to the small increase of capital. The large balance carried over from June, 1870, 20,000*l* in excess of the balance carried over from June, 1871, will however make a difference of ¼ per cent. in the amount to be paid. The addition to 1871-2 therefore will probably be at the rate of ¾ per cent. per annum, making the dividend 4*l* 2s 6d. The account will stand thus:—

	£		£	s	d
Last annual dividend (say)	258,000	=	3	7	6
Estimated addition to passenger traffic (say)...	76,000	=	1	0	0
	334,000	=	4	7	6
Less excess balance carried over from 1869-70 (say)...	19,000	=	0	5	0
	315,000	=	4	2	6

Of course the war had not in September begun to tell upon the South-Eastern traffic as it afterwards did, but the months just probably represent the average—those in which the war told most being in ordinary times the months of least business. The real dividend estimated to be earned by the Deferred stock is also shown by the above—viz., 2¼ per cent., though it may possibly *look* more, owing to there having been a deficiency at the end of June last to meet the Preferred dividend, which may not occur next year. The current rate of addition to the dividend on the Deferred stock is thus about 1½ per cent. per annum, a point of course to be considered by the investor as well as the present return at 2¼ per cent. on what he has to pay.

3. London, Chatham, and Dover Railway.—This line has also suffered like the South-Eastern from the interruption of the continental traffic through the war. In addition, it has been comparatively "undeveloped," from the inability of the company to construct a few necessary works while in Chancery, and also from the general newness of the line. The result is, that at present it is in a singular position, apparently beginning to justify the sanguine hopes which its promoters at one time entertained. Everyone knows that the reconstruction was directed a year ago by Lord Salisbury and Lord Cairns, on the footing that the debentures would be covered and a small surplus over, and this was actually the result of the first year's working—the year ended 30th June last. There was finally an available surplus of 15,576*l.* after paying the debenture interest for the year, out of which a dividend of ½ per cent., absorbing 10,979*l* (say 11,000*l*), was paid. This was the net result of the first year, which was affected by the war. But *already* in the current half-year there is an assured increase of gross traffic amounting to 17,638*l.*, and this being exclusively in passengers, and therefore all but pure gain, is equal to an addition of nearly ¾ per cent. to the annual dividend. The increase is in fact 10 per cent. upon the figure of last year's traffic, and if it were continued for a year, would amount to over 30,000*l.* equal to an addition to the annual dividend of ¾ per cent., which would make it 1 for the whole year. At this rate it would take barely five years for the Chatham and Dover line to pay its preference shareholders in full. The real state of the line appears however to be much better than this. The increase of passenger traffic since the half-year began has been proceeding at an increasing rate, partly of course owing to the season, but partly also because the effects of the war must have been more felt in the weeks with which comparison is now made. The passenger increase since the beginning of August has been over 2,500*l* per week, and is as large in September as in August, and although this is the passenger season, we should probably, taking everything into consideration, be justified in estimating that about 2,000*l* a week will turn out to be the average increase of the year. This would make an addition to the gross traffic of upwards of 100,000*l* for the year, and after allowing 20,000*l* for extra working expenses and the interest on the additional debenture stock, we should still in this case have an addition to the dividend of 2½ per cent., making it for the whole year 2½ per cent. Assuming that the increase in subsequent years will be 1 per cent. per annum, the preference shares would be covered in three years. We should not be surprised however if the current year's dividend exceeded 2½ per cent. There is no line at present whose traffic returns promise so much as that of the London, Chatham, and Dover Railway.

In this view of the prospects of the Chatham and Dover line, the chance of the ordinary shareholders getting something becomes a tangible one—a view, we confess, which we were at one time inclined to doubt. The rapid increase of the traffic changes the complexion of the matter altogether for investors. What they will have to consider will be the probable date at which the ordinary stock will begin to pay them a fair return upon the present price of the stock plus the interest for the intervening period. Thus at the price of 25, the investor at the end of 5 years, allowing for 5 per cent. interest, would have paid 31*l* 5s—at which figure a return of 1½ per cent. per annum from a rapidly improving line would clearly pay him. As the ordinary capital is nearly 8,000,000*l*, and the preference stock is 4,250,000*l*, the same annual increase of traffic when the ordinary shareholders have a surplus will only increase their dividend by half the rate per cent. of its additions to the preference dividend. The investor of course must judge whether he can afford to look forward for about five years, or whatever he judges the interval before the dividend on the Chatham and Dover ordinary stock will repay him at present prices.

4. The Great Eastern.—The difficulties of the Great Eastern are notorious, its embarrassments having been such that even very considerable additions to the traffic have not much increased the ordinary dividend. This was especially the case in the half-year just ended, and we know that the coal traffic competition, which affected last half-year so injuriously, continues, probably causing a loss of about 10,000*l* in the half-year. For the present this cause of loss must be set against any improvement in the prospects of the line, and allowance must also be made for the causes which increased the working expenses last half-year out of proportion to the increase of traffic. But making every allowance there are some good points in the prospects of the Great Eastern. 1. There is a noteworthy change in the nature of the traffic this half-year. The gross increase—17,000*l* to date—is important, but it is still more material that we may consider this increase as about one-half in passengers. This fact also bears upon the decrease of traffic during the last fortnight—the actual state of the case having been that while the goods traffic decreased the passenger traffic increased. Even if we should have similar returns to the end of the year, the issue would undoubtedly be satisfactory—the substitution of passengers for goods to the extent of between 1,500*l* and 2,000*l* per week being equal to an addition of about 1,000*l* weekly to the net revenue, or an addition of 1½ per cent. to the annual dividend. This would make the Great Eastern dividend for the current year 2½ per cent., allowing for the drawbacks we have stated above; and the prospect is in reality more favourable, the comparison being now made with a period before the coal competition began, whereas in a month or two we shall have got into the second year of that competition when the effect of that cause will have been fully felt, and the natural increase of the line will be resumed. We see no reason to anticipate that the present falling off of goods traffic will be long continued. 2. Another point in favour of the Great Eastern is the approaching opening of the Metropolitan extensions. This will not be a simple change of unproductive into reproductive capital, for interest is being charged to capital during construction on at least a portion of the expenditure. Still it is probable that there will be a surplus after meeting new charges, and the whole line will gain by improved access to the City. It would be useless to attempt calculating what the net addition to the Great Eastern dividend from this source will be, but altogether if we look at the improvement which appears to be going forward, irrespective of this coming change, we cannot but consider that the Great Eastern, like the other lines in

the kingdom, has at last seen the worst, and cannot but improve somewhat rapidly. The Great Eastern is supposed to have a poor district, but after all, according to the Census returns, the Eastern counties have not lagged behind the rest of the country in the increase of their population; they cannot be so non-progressive as they are commonly supposed to be.

5. MANCHESTER, SHEFFIELD, AND LINCOLNSHIRE.—The dividend on this company's ordinary stock for the year just ended was 2*l* per cent., absorbing about 110,000*l*. The gross traffic during the current year has increased 18,168*l*. At this rate the increase in the whole year would be about 120,000*l*, and allowing one-third off for additional working expenses, which must be done as the increase is all but exclusively in goods, the net addition to the dividend would be 1½ per cent., making the dividend for the current year 3½ per cent. The drawback is the large addition which is being made to the capital of the company—1,369,000*l* last half-year, almost sufficient of itself to absorb two-thirds of the above net increase. The point for investors to consider will be the probability of the continuance of the traffic increase, its rate being rapid enough to bring the line up quickly as soon as the capital account is closed.

6. METROPOLITAN RAILWAY.—The difficulty as regards this line is the "surplus lands," and we should not venture to offer an estimate as to the gain to the shareholders, or the date at which it will accrue. There appears to be little immediate improvement, and investors must reckon as they best can both upon this point and as respects the benefit which will be derived from the future extension to Whitechapel. It should be noted *per contra* however that the current year will be a trying one in the matter of working expenses. In the half-year just past the company received an unusually large sum from the District line for working its traffic, and we should think this had something to do with the improvement of ½ per cent. in the dividend for that period. There will be no receipt of this kind in future, and it is not so certain that the Metropolitan working expenses will be proportionally diminished. The shareholders would be fully justified in feeling some anxiety on this head.

Altogether, and in spite of some unfavourable circumstances, the prospects of the low-priced lines we have discussed would appear to be exceedingly good—quite as tempting to the investor as the best of the high-priced lines, if he is only determined to hold and is content meanwhile with a lower return for his investment. The capital improvement will in the end be much greater, owing to the capital required being only a half, a third, or even a fourth of what is needed in high-priced lines for the same profit. The investor of course will run the risk of the business of the country being checked before the traffics increase to the point that will pay him, and this risk is greater than in high-priced lines, the present return being so much less. Still the natural growth of the country is such that the risk is not much to be reckoned upon. An investor who distributes his risks may do very well, even in the low-priced lines.*

THE NEW YORK CITY FRAUDS.

THE Mayor of New York and his confederates of the Tammany Ring have at length been compelled to make a small concession to public opinion. The exposure of the Tammany finance, which is due to the boldness and persistence of the *New York Times*, excited indignation throughout the Union, and anywhere else, save in New York, an explanation could not have been evaded or delayed. It was shown that within two years and a-half the City debt had risen from 30,000,000 of dollars to 100,000,000 of dollars—an increase of about thirteen and a-half millions sterling during so brief a period without the excuse of any public works of construction or improvement. And while the City was borrowing at this rate, the tax-payers were contributing to the ordinary municipal revenue not less than 23,000,000 of dollars a year. Paris under Baron Haussmann never outdid this lavish expenditure, and Paris after all had some visible result to show for her money. But in New York these millions on millions of dollars have been spent on the furnishing of armouries and offices, the carpeting of court-houses, and such important items of outlay. It is alleged by the opponents of Tammany Hall that vast quantities of the material ordered and paid for were never in fact delivered, that the tradesmen to whom vast sums were thus handed over—one man being paid for 70 *miles* of carpeting at 5 dollars a yard—were in fact dummies, representatives of the Tammany magnates, who retain and divide the money for private or party purposes. These charges have been openly bandied about in the New York journals since the *Times* had the courage to commence its series of exposures. It is almost incredible that for a long time the officials accused of such frauds declined to take any measures to clear themselves, that they coolly professed their belief that the affair would soon "blow over," and made light of the attack as an "electioneer-"ing dodge." The Mayor of the City, Mr Oakey Hall, who is however by no means so important a person in the municipal politics of New York as some of his colleagues, has not been able to maintain his attitude of indifference. On the 24th ult., he transmitted to the Board of Supervisors and the Common Council the municipal accounts of expenditure from January, 1869, to July, 1871. It is not probable that even if we had these voluminous documents before us we could arrive at any definite conclusion from them as to the truth of the charges made by the *New York Times;* it is asserted that they are purposely confused and involved, extending to 7,000 pages, without counting two messages from the Mayor in defence of himself and his colleagues. The policy of the Tammany leaders in publishing the accounts after this fashion is probably founded on their confidence in the political apathy and want of public spirit among the respectable class. They calculate that very few will take the trouble to decipher the detailed history of particular jobs out of this mass of complicated figures, and they know that general charges make little impression on the public mind without the support of details. Although Mayor Hall has not been able to endure public obloquy with the same serene *sang froid* as his colleagues of Tammany, he has probably satisfied his conception of honour and public duty by the publication of the accounts, and will now be content, like his colleagues, to wait until the storm blows over.

Meantime the facts of an enormous annual tax-levy, of a municipal debt increasing at the rate of 30 per cent. a year, and of a monstrously lavish expenditure by the officials of the Corporations, are established beyond any possibility of question. If the municipal authorities of New York and their subordinates are concerned to dispute the charges of embezzlement brought against them without reserve or stint, they must admit, in order to shield themselves from the imputation of fraud, the accusation, scarcely less grave, of gross negligence in dealing with the City finances. The New-Yorkers have to take their choice between the alternatives of scandalous incompetence or flagrant dishonesty in their municipal rulers. We do not believe they will fix upon the former. The leaders of the Tammany Ring are men who have proved in their individual careers their remarkable business capacity. We are therefore justified in crediting these gentlemen with considerable abilities for business, and in refusing to believe that without good reason they would not have sanctioned the grotesque extravagance which is apparent on the face of the New York City accounts.

We are therefore driven back to the original hypothesis of fraudulent administration, which is all but universally credited in New York. It is believed that the splendid fortunes acquired by the members of the Ring have been derived directly from the plunder of the public. It is right at the same time to say that the Mayor, Mr Oakey Hall, is not supposed to have profited personally by the frauds, to which however, as the nominee of Tammany, and as an energetic leader of the Democratic party, he consented. The Tammany chiefs owe their appointment, under the new charter, to the Mayor, and the primary object of the pillage has been the promotion of Democratic ascendancy in the City and State of New York. The assailants of the Tammany Ring are far from contending that all the plunder "lifted" by the municipal officers and their instruments goes to enrich the Ring exclusively. They only receive a percentage, and we may estimate the entire quantity of the spoil by the visible amount which sticks to the fingers of the Tammany chiefs. The money of which the City taxpayers are robbed is employed to purchase the votes of legislators at Albany, and to win over the State of New York to the Democratic side at such critical periods as a sharply con-

* We have omitted two important companies from the above—the Metropolitan District and the North British. We have discussed the affairs of the former so frequently that we need not return to them, also we do not discuss the latter as the last half-year's report is not yet issued.

tested Presidential election. Unfortunately these political gains appear to many members of that party of more immediate value than a character for honesty. Some time ago the respectable members of the New York Democracy made an effort to oust the entire Tammany organisation from its supremacy in the City; and *The World*, the ablest of the Democratic journals, denounced it as vigorously as the *Times* and the *Tribune* are denouncing it now. But it soon became clear that in the City of New York the Ring was not to be evicted from authority without running the risk of letting the Republican party into power. This in the eyes of American party managers was not to be endured; so the opposition to "Boss Tweed" died out, and Tammany was seated more firmly than ever on the municipal throne. It is then with the respectable portion of the Democratic party that the blame of the New York scandals mainly rests, and now that the eyes of the world are turned upon these abuses it is time to think of wiping out the shame. A coalition of the decent citizens of New York, without regard to party, would put an end to this rule of Tammany, but nothing short of this will do.

A meeting held on the 4th inst. to protest against the doings of Tammany, has led to the first practical step for the rescue of the City from its plunderers. A petition was presented by the Committee appointed at this meeting to Judge Barnard, commonly known as "Mr Fisk's Judge," praying for an injunction to restrain Mr Controller Conolly from issuing New City bonds, or paying dividends on those already issued. To the astonishment of everybody, for Tammany is in close alliance with Mr Fisk and the Erie Ring, Judge Barnard granted the injunction. As this decision affects the validity of bonds alleged to have been illegally issued to the amount of 12,000,000 of dollars, there has been great excitement in New York. It is not generally believed, however, that for the present the party of honesty is strong enough to win. The Erie bondholders have often had such glimpses of triumph as that which has just shone upon the respectable taxpayers of New York; but they have been always eluded in the labyrinths of law. At the same time, the moral effect of such a demonstration as this must be considerable, and sooner or later the control of the finances of New York City must be restored to the citizens. Meantime there is not a little risk of municipal bankruptcy, or of still more severe taxation than what is now levied.

BUSINESS NOTES.

The Amalgamation of Railways.—Sir Edward Watkin's suggestion at the Sheffield Railway meeting last Friday will commend itself, we think, both to the public and the shareholders. He suggests that the various railways throughout the country should in effect conduct their business as one company, avoiding the traffic where there are competing routes; granting through bookings from any railway station to every other station in the kingdom, with return tickets available by all routes; and saving working expenses by unity of management. It is easy to see how the public would gain by such an arrangement. With all the lines treated as a single concern the facility of communication would be multiplied, and especially in the Metropolis passengers would have a selection of stations at which to arrive and depart which would be beyond measure convenient. To mention only the South-Eastern and Brighton lines, it would be an obvious convenience for the travelling public if some of the Brighton trains ran into Cannon street and Charing cross, while the South Eastern passengers would equally benefit by similar access to Victoria. The arrangement of trains could in fact be made the most convenient possible for the public without reference to the wish of particular companies to keep traffic for themselves. Another advantage would be as regards London at least, that where there are double or treble lines to suburban places or coast towns, the trains might be so timed that instead of three or four starting all but simultaneously at certain hours, going by different routes, there would be trains at short intervals at particular hours of the day. The communication with Brighton especially could be made such that business men might easily be saved the hurry and flurry of special and express trains to take them to and from business. It would not take very long, the companies may be assured, till such facilities, especially if accompanied by a judicious lowering of fares, would enormously increase business, the shareholders as well as the public being the gainers. How working expenses would be saved needs no explanation. We fear however that Sir Edward Watkin would hardly be prepared for the logical result of his suggestion—the adoption of the railways by the State. Still it is plain that this is what his suggestion points to. The single amalgamated railway company would in fact be a State department; their business would be managed by officials almost as powerful and dignified as Cabinet Ministers, and subject to the same pressure of public opinion and criticism; they would be so important a Confederacy that the State, with natural jealousy, could not but seek to control it. The result would be one which we should not deprecate, and we see in the suggestion one of the best proofs that the State management of railways is far from being a dream. One of the shrewdest of our "railway kings" proposes, as the best means of working our railways profitably, the nearest approximation to a universal State management which could have been devised.

The North-Western Amalgamation.—Following very closely upon Sir E. Watkin's speech, which we have glanced at above, has come the announcement of the conclusion of a "joint-purse agreement" between the London and North-Western and Lancashire and Yorkshire companies. The details of the arrangements are probably not yet fully settled, while the sanction of the shareholders of both companies will have to be given; but we may congratulate the shareholders of both companies, and the districts to be affected, as well as the country generally, on the prospect. The arrangement will in fact be a great step towards the scheme of a general amalgamation which Sir Edward Watkin has broached. The North-Western is the leading line in the country, with a capital of 54,414,000*l*, and a mileage of 1,509 miles; and the Lancashire and Yorkshire is among the next in rank, with a capital of 23,792,000*l*, and a mileage of 428½ miles. The aggregate capital of the two companies will thus be about 80,000,000*l*—about a seventh of the railway capital of the United Kingdom, and in reality it will be more if we include the capital of the leased lines. The aggregate annual receipts of the two companies are at present upwards of 10,000,000*l*, or nearly a fourth of the aggregate railway business of the country. We shall thus have a single company possessing this large share of the railway business of the country, and one or two amalgamations on a similar scale would speedily place the whole undertakings of this class virtually under one management. It is already one of the greatest securities of railway property that new competition is practically impossible, while there is little temptation to mutual competition on account of the magnitude of the business. Now that the advantage of the arrangement to the shareholders of both companies is perceived, we should anticipate that their example will be followed. The consequence however will be that the existing companies being formed into a vast monopoly, the usual principles of dealing with monopolies will be applied by Parliament and public opinion. When 10 per cent. dividends are in prospect, and railway shareholders have secured the utmost economy in working their monopoly, the public will clearly be entitled to participate in the advantages in every way—in lowered fares and rates as well as additional accommodation. The advantage of the situation will be that the united companies will be able to try experiments which single companies could not venture upon, and that they may concede much to the public, for the sake of future gain, without any serious risk of appreciable temporary loss.

The Roumanian Railway Bonds.—A correspondence has been published between the Council of Foreign Bondholders and the Foreign Office on the subject of the Roumanian State Railway bonds. The views of the former body we criticised recently, on the publication of the memorial which they had drawn up on the subject, and we are glad to see that the Foreign Office has not been moved from the line of policy we supported, and which is also the established policy of the English Government in such matters—viz. to refuse to treat as an international question any claim on foreign Governments in respect of private loan transactions with them, while giving the claimants the benefit of the "good offices" of our diplomatic agents. This policy was very distinctly established by Lord Palmerston, and it is on many grounds for the advantage of the country that we wonder at the perseverance of the foreign bondholders in a course of action which the Foreign Office

cannot possibly yield to without incurring an instant vote of censure from the House of Commons. If people choose to treat with independent nations, and that is what a loan transaction really is, they must not expect the Governments of the country to which they belong to enforce their treaties for them. There is no compulsion on them to lend, and if they trust a faithless State that is surely their own affair. It would be a different matter perhaps if they were the victims of any default, which is recognised as against the comity of nations; but unluckily repudiation of loans has always been upheld as the privilege or right of independent Governments, and we cannot be expected to press on smaller Powers what we dare not press on Powers like Austria or Spain. We trust the Foreign Office will steadily refuse anything more than its good offices in such a matter, giving foreign Powers clearly to understand that no question will be made of it.

THE POSTAL DUTIES.—Now that the reduction in the postal charges on letters, by which a parcel post will in effect be established, appears to be definitely announced for inauguration—viz., on the 5th of October next—we may again congratulate Mr Graves on the magnitude of the reform which he has been mainly instrumental in accomplishing. But for his cool business statements of the value of a parcel post to the public, and the probable gain to the Exchequer by the change, it is hardly possible that we should have had the reform so soon. Not only however did he raise a strong public opinion in his favour, but he had the merit of winning over the Department to the conviction that his project need not injure the revenue. To all appearance an instant success is anticipated for the change, and the delay in its introduction is in fact due to the delay in making the necessary arrangements for the anticipated large influx of business. Mr Graves has thoroughly convinced the Post Office Department, and their belief, from the knowledge they possess, is so far evidence of the great value which the change will be to the public. Among the principal reforms we may again point out should be an increase in the number of deliveries, or a greater subdivision of the delivery districts in the large towns. If this change is made not only will the public have the direct advantage of the parcel post, but they will also gain by the quicker delivery of their letters, which are often delayed as it stands by a long interval between deliveries, or by the magnitude of the district which a postman may have to travel over before he reaches the last houses on his beat. No doubt the department wishes to make money, but there can be little doubt that the almost immediate effect of the numerous recent changes, but more especially of the parcel post, will be a large augumentation of revenue.

THE DISPOSAL OF THE GERMAN WAR INDEMNITY.—The following account of the uses which the Germans are making of the instalments of the indemnity paid to them is furnished by the Berlin correspondent of the *Times*:—

In the first place, 325,000,000f, being the purchase money for the Alsatian railways, must be deducted from the sum total. The rest, 1,175,000,000f, is equal to 313,000,000 thalers. Of this 4,000,000 thalers have been reserved to endow the generals, and another 4,000,000 thalers to assist those members of the Landwehr and Reserve whose pecuniary circumstances have suffered in the war. Two million thalers more will indemnify the Germans expelled from France; 7,000,000 thalers are allotted to shipowners whose vessels were seized or detained in harbour by the blockade; and about 20,000,000 thalers have to go to the inhabitants of Alsace and Lorraine for damages sustained and provisions supplied both to French and Germans in the campaign. Add to this 5,000,000 thalers required for repairs and rolling-stock of the Alsace-Lorraine railways, and we have a total of 42,000,000 thalers consumed in redressing some of the evils wrought by the war. Of the remaining 271,000,000 thalers, Government would, under a new Act of Parliament, be entitled to appropriate 240,000,000 thalers as a pension for invalids; but as the whole sum is not required at once, and as the individual States are anxious to have a portion of their war expenditure reimbursed, it is assumed that only 31,000,000 will revert to the pension list for the present, and the remaining 240,000,000 be distributed. The division is made according to the number of men supplied by each State. In other words, Prussia, or rather the late North German Confederacy, receives five-sixths of the whole, the remaining sixth being portioned out between Bavaria, Würtemburg, Baden, and the southern half of Hesse, which before the war had a separate contingent. The 200,000,000 thalers thus accuring to North Germany will be employed in replenishing the war treasury, and cancelling a portion of the war debt. The war treasury amounts, it is well known, to 30,000,000 thalers. As to the war debt, Treasury bonds to the amount of 35,000,000 thalers were redeemed in the last few weeks, 68,000,000 thalers more fall due before the first of February, and 17,000,000 paper money are to be drawn from circulation in the course of the present year. This does not of course cover the whole of the expenditure, which can be only gradually made up in proportion as the indemnity flows in.

This account of the disposal of the instalments of indemnity which have been paid will be reassuring as far as the effect of the payment on the money market is concerned. The actual money which passes is 47,000,000*l* (viz., 60,000,000*l*, less the deduction for the Alsatian railways), but it has been paid very gradually, a great deal of it is being paid out again, and it does not appear that when all demands are met, the German Government will have very much to look up. A very large amount, it will be observed, is devoted to the repayment of the debt incurred for the war, so that the money which is taken out of the market by one channel immediately returns by another. No doubt the transit of large sums of money tends of itself to cause pressure, but it takes a very delicate state of the market to let the pressure be much felt, and this is not the case at present. The bulk of the indemnity of course remains to be paid, but 120,000,000*l* is postponed for three years if the French desire, and that is enough to keep it clear of any speculations concerning the immediate future of the money market.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending Sept. 9:—

	Receipts of Week Ending Sept. 9.
	£
Customs	366,000
Excise	375,000
Stamps	172,000
Taxes	nil.
Income tax	33,000
Post Office	nil.
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	48,202
Total	994,202

The total receipts of the previous week were 843,148*l*.

The Exchequer issues of the week on account of expenditure were 400,000*l*, viz.:—

	£
Interest of debt	nil.
Other charges on Consolidated fund	nil.
Supply services	400,000
Telegraph services	nil.
	400,000

During the week the cash balances have increased as follows:—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Sept. 2	711,150	1,225,613	1,936,763
— Sept. 9	1,232,524	1,316,793	2,549,317
Increase	521,374	91,180	612,554

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Sept. 14.

The following are the returns of the Bank of France for this week, for last week, and for the week ending 8th September, 1870:—

	DEBTOR. Sept. 14, 1871.	Sept. 7, 1871.	Sept. 8, 1870.

Comparing this week's figures with those of last, these results are presented:—

		francs.
Debtor.		
Notes in circulation	Increase	9,500,000
Treasury balances	—	25,250,000
Deposits at Paris and branches	Decrease	41,930,000
Creditor.		
Coin and bullion	Decrease	17,300,000
Prolonged bills	—	11,375,000
Treasury bonds	—	100,000
Discounts at Paris	Increase	11,182,000
— branches	—	8,075,000

On the Bourse there has been a new advance in the principal speculative securities, notwithstanding the general opinion that prices have been carried as high as is prudent. The augmentation in the Credit Mobilier is owing to the belief that its new Director-general, Baron Haussmann, will devise means for restoring its activity. Much has been said about the premium on gold which money-changers are offering, also on the exchange on London, and about the probable effect on banknotes. The following are the quotations:—

	September 7. f	c		September 14. f	c

The Committee on the Budget of the National Assembly, after an elaborate examination, occupying several months, has presented a report, which gives these results for 1871 —

	francs.
Expenses	3.197.116.492
Receipts	3.149.973.072
Deficit	47.143.420

The said deficit, it adds, is likely to rise to 53,770,371f by supplementary expenses. In English, the expenses are 127,744,679l, the receipts 125,958,928l. It is probable that, as usual in France, the expenses are understated, the receipts overestimated, and besides to the former must be added new demands about the war, which are constantly cropping up, also local charges, which in the aggregate are heavy. The total is really bewildering especially as by the system of taxation M. Thiers and M. Pouyer-Quertier have imposed, the productive resources of the country will be lessened. There is reason to fear too that the political discontent which has long prevailed among the workmen of towns, and has produced events that have startled the world, will now be extended to peasants, inasmuch as more than any other class they have "an ignorant impatience of taxation."

The report of the Budget Committee is drawn up by M. Casimir Perier, who possesses considerable authority in financial matters. It must be very mortifying to M. Pouyer-Quertier, for the reason that it condemns and rejects his pet project of putting a duty of 20 per cent. on the raw materials of textile industries, and proposes taxes of which he never dreamed. In place of the 20 per cent. it recommends one of 3. That is certainly objectionable, but it is doubtless meant as a sort of salve to the wounded vanity of the minister and his chief, M. Thiers, who is as Protectionist as he. The taxes advised are, first, on incomes, estimated to produce 80,000,000f; secondly, on the carrying of passengers and goods by railway and steamers, 28,000,000f; thirdly, on gunpowder, 300,000f; fourthly, on clubs and billiard tables, 200,000f; fifthly, on horses and carriages, 2,500,000f; and lastly, on shares, bonds, &c. (*valeurs mobilières*), 5,000,000f. The 3 per cent. on raw materials being calculated to yield 50,000,000f, there would thus be a total of 170,500,000f, which is more by 500,000f than the Government expected from its 20 per cent. The proposed taxes have at least (that on raw materials excepted) the merit of being politic, inasmuch as they are to fall on the rich, and it is important, in presence of the Socialist doctrines of the working classes, and of the effect they produced under the Commune, to make the possessors of wealth pay specially. Is it not astonishing that whilst M. Thiers, by taxes on wines and beer, has rendered the cost of living greater to the working men, and actually proposed to reduce their means of occupation by taxes on industry, he never thought of asking for a sixpence from the wealthy? Yet he would be astonished if any one were to tell him that he is not the most sagacious statesman and the most profound financier in Europe.

The Assembly, impatient to adjourn for holidays, has dealt with the Budget of 1871 in an unseemly manner. It has scarcely discussed it at all—has, in fact (the phrase is not too strong), scampered through it. One point is to be noticed—that M. de Soubeyran drew attention to the fact that 50,000,000f were put down for the Bank of France, when a sum of less than one-fifth of the amount would suffice to pay the interest on the advances it has made to the Treasury; but the Minister of Finance stated that the 50,000,000f were for part reduction of the debt as well as for interest. He added that the interest, at first fixed at 6 per cent., and now reduced to 3, was about to be lowered, negotiations being pending on the subject. M. de Soubeyran also revived a matter which he brought forward under the Empire—a miscalculation in the annuities payable to railway companies, whereby the Government was giving more than it need do; but at the request of the Minister of Public Works, he postponed a discussion to next Session. An attempt was made to obtain from the Government definite explanations and engagements respecting the admission of the products of the ceded territories of Alsace and Lorraine into France. It is contrary to the interests of French Protectionists, and particularly of cotton spinners, to facilitate the entrance of those products into France, though there are large stocks on hand, formed before the territories ceased to be French; and so all that could be extracted from M. Pouyer-Quertier, himself a cotton spinner, was the statement that negotiations with Prussia on the subject are in progress.

The Government, fearing that its project about the 20 per cent. on raw materials would have no chance of passing before the prorogation of the Chamber, presented a demand to be allowed to put an additional *decime* on all taxes from 1st January next, in the event of the said tax not being adopted before that date. This was a cunning scheme for inveigling the Chamber into the adoption of the tax at least in principle. But it received the demand with marked repugnance, and referred it to the Committee on the Budget. The Committee reported against it, and it stands over.

In a message to the Assembly, M. Thiers treats of the raw material tax, and he lays down with respect to it, "that it is an established truth" (literally he says "a usual truth"—*une vérité usuelle*—but the expression is not clear) that the weight of a tax infinitely divided becomes almost insensible to those who bear it. This was the principal argument in favour of dear bread of the English Protectionists years ago; and in using it now, M. Thiers gives proof, if any were needed, of his ignorance of economic science.

In addition to the displeasure which, as noticed above, this report of M. Casimir Perier must have occasioned him, M. Pouyer-Quertier has been subjected to another at the hands of the Assembly which must be still more sensible. A Bill was presented for throwing on the whole country the expenses to which localities and departments were subjected in raising and equipping mobile material guards in the war. Nothing could be more just, seeing that in certain places they were exceedingly heavy, in others trifling or nil. M. Pouyer-Quertier thought fit to propose to pay the 146,000,000f. to which they amount, by means of an addition of 10 centimes to the direct taxes for five years; but as these taxes are already burdened with additional centimes, and as such things are a clumsy and oppressive way of taxing, the Chamber, by an overwhelming majority—in fact only six members supported the Minister—rejected the proposition. It was expected that after such a severe and, it may be said,

contemptuous check, M. Pouyer-Quertier would have resigned, but he has not done so. The 146,000,000f are to be provided by the Government from general resources; but it is allowed five years for doing so, and no interest is granted. The Minister of Finance has also sustained another check. He wanted to deprive newspapers and periodicals of the privilege of being sent in parcels by railway, instead of by post; but after two days discussion the Assembly found itself unable to consent, and the matter was postponed to next Session.

That, as intimated before, the estimate of the expenses of 1871, large as it is, must not be considered definitive, is demonstrated first by the grant of the aforesaid 146,000,000f, and next by the adoption of a Bill according 153,125,000f for feeding the German army of occupation to the end of 1871; 6,080,302f for "the contributions due to the Germans in execution of the Convention of 16th March;" and 315,168f "as indemnity for the carrying off of a railway train near Epernay." By another Bill, adopted yesterday, 113,000f are furnished for the expense of executing the new law on stamps and registration.

A report on "the general financial situation," presented to the Assembly by a special committee, states that the Budget, ordinary and extraordinary, of 1870 was fixed at 1,811,813,000f —that was "the Budget of peace." But war came, and between the 18th July and 31st December of that year supplementary credits of 1,656,129,776f were opened.

The Assembly having sanctioned the new loan of 350,000,000f of the City of Paris, it was expected to be announced for subscription to day, but no advertisement has appeared. The Municipal Council has decided that it shall be in 400f bonds, not 500f, bearing 12f interest, but, as proposed last week, it has left to the Prefect and to a special committee to fix the price of issue. This fixing is only to take place at the last moment, in order to prevent unseemly speculation, but *on dit* the figure will be 277f. The Municipal Council has also decided that 50f shall be paid on subscribing, 30f on allotment, the rest in instalments. Discount is to be given on calls paid in advance. Lottery prizes not exceeding 1,500,000f per annum with quarterly drawings are attached to the loan. Interest is to run from 1st July, and is to be paid half-yearly. The loan is to be redeemed in 75 years. The bankers who sometime ago advanced 41,000,000f are to be allowed to subscribe that sum, which is to their advantage, and holders of bonds of the Caisse Municipale and the Caisse des Travaux are to enjoy the same privilege. Out of the proceeds of the loan the debt to the Bank of 210,000,000f is to be paid, and so likewise are the bonds of the said two Caisses and that of the Caisse du Boulangerie. The premium on the loan at the Bourse has fallen to from 10f to 11f.

The Prefecture of the Seine proceeded on Tuesday to the drawings of the bonds entitled to prizes of the 1869 loan, which ought to have taken place on 15th April and 15th July. The amount of prizes for each drawing was 250,000f, the principal one in cash being 200,000f. It has since been notified that they will be paid on presentation of the winning bonds.

Numerous other towns are under the necessity of borrowing as well as Paris, but none approaches its figure. Versailles, for example, has been authorised to raise 3,000,000f; Elbeuf, 700,000f; Rouen, 3,500,000f; Laval, 100,000f; Caen, 310,000f.

In consequence of the refusal of certain foreign houses to pay bills on the pretext that, in virtue of the delays accorded in France, they were not protested in due time, the Bank of France has published a notification to the effect that, "in order to maintain as far as it can the respect of engagements, it will in its discounts treat those houses as it does those in France who are not sufficiently careful to do honour to their signatures," and in order that it may do so it calls for lists of the firms that "have thought fit to replace the payment of their debts by a legal technicality contrary to equity." It may be remembered some time ago German courts held that, under the circumstances, the refusal to pay was justifiable, and similar decisions have been given both in Italy and Switzerland. But if legal are they not, as the Bank says, "contrary to equity?"

The Board of Customs makes known that beer imported from countries with which there are treaties of commerce must henceforth pay 5f 60c the hectolitre instead of 4f 40c, in consequence of the taxes on beer made in France being augmented. The treaties permit an increase of duty on foreign products where the internal tax on corresponding articles is increased.

A competent writer on agricultural affairs, after examining reports from all parts of France, comes to the conclusion that the wheat harvest this year presents a deficit of 20 to 25 million hectolitres; but that the yield of rye, oats, barley, buckwheat, and maize will, on the whole, be abundant. The potato crop, which at one time was promising, has suffered considerably, and the malady has broken out in it; in consequence a marked advance in price is to be expected. The beetroot crop will be good. The wine crop will be of an average in quantity and not bad in quality, but there will be little cider, the apple crops having failed in Normandy and Picardy. Forage is everywhere a good average; rapeseed is indifferent, but hemp and flax, olives, and madder are good; lastly, silkworms, an important branch of agricultural industry, have suffered less from the malady than in previous years.

The subscription to the Suez Canal loan is reported (not officially) to be progressing favourably, many of the holders of overdue bonds and coupons thinking it expedient to exchange old paper for new. The company advertises that in August, 1871, its receipts were 487,371f more than in the corresponding month of 1870.

No official account of the result of the subscription in Paris to the new Spanish loan has been published; but some bankers, and notably the Banque de Paris, are understood to have entered into it largely.

In the meeting of the Credit Foncier Colonial, the operations of 1870 in the colonies were reported to have been unsatisfactory, owing partly to political events, but principally to sickness and drought, particularly in La Réunion. The profits of the year were only 43,970f, and that sum being too small to distribute, was ordered to be carried forward.

The Western Railway Company announces the payment from 2nd October of 10f as interest on shares.

The Company of the Mines de la Loire (coal pits) is to pay from 16th October 4f as dividend for the first half of the present year.

The Company of the Railway from Vitré to Fougères solicits subscriptions to 6,478 obligations at 280f, redeemable at 500f in 94 years, and producing 15f interest.

The Medoc Railway Company is about to make a call, the last, on its shares—it will be of 75f.

The Portuguese Royal Railway Company announces the payment at Paris of 7f 50c for the coupon No. 13, on bonds due since July 1, 1867.

Subjoined are the quotations of the markets of the last three days per 50 kilogs, duty paid :—

COTTON.—At *Havre*, New Orleans very ordinary rose to 114f, but was yesterday (Wednesday) 113f; Oomrawuttee good ordinary, 87f to 88f.

SUGAR.—At *Havre*, French West India usine, 64f to 66f. At *Marseilles*, Havana, 55f 50c to 59f 50c. Ht *Nantes*, Reunion in bond, 60f, bonne quatrieme; French West India, 53f 50c.

HIDES.—At *Havre*, Lima salted ox, 69f; Calcutta calf, first quality, 126f to 136f 50c; other sorts, 48f 50c to 132f 50c; Martinique salted, 50f; Monte Video dry ox and cow, 126f; Valparaiso dry salted, 93f.

TALLOW.—At *Havre*, Buenos Ayres sheep, 55f 50c; New York, 56f 75c; Monte Video saladeros ox, 57f.

PEPPER.—At *Bordeaux*, Tellicherry, 170f; Aleppy, 170f.

COFFEE.—At *Marseilles*, a cargo of Rio, 72f if at the old duties be imposed, 76f if the new; Maracaibo, 87f 50c. At *Havre*, Hayti, 132f; Guatimala, 141f; Malabar in bond, 92f 50c. At *Bourdeaux*, Costa Rica, 145f.

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house :—

	Week ending Sept. 13, 1871.	Week ending Sept. 6, 1871.	Week ending Sept. 14, 1870.
	£	£	£
Thursday	12,105,000	32,969,000	9,161,000
Friday	12,558,000	21,718,000	10,077,000
Saturday	16,842,000	15,379,000	12,684,000
Monday	13,414,000	16,913,000	10,290,000
Tuesday	14,570,000	13,308,000	11,522,000
Wednesday	14,390,000	13,049,000	10,153,000
Total	84,405,000	115,356,000	63,887,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, September 14th, 1871.

The total since the 4th of January, 1871, is 3,178,682,000*l*, compared with 2,751,859,000*l* for the corresponding period last year, showing an increase of 426,823,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding date with the present week	Sept. 18, 1861.	Sept. 16, 1868.	Sept. 15, 1869.	Sept. 14, 1870.	Sept. 13, 1871.
Circulation, including bank post bills	£ 20,190,972	£ 24,515,859	£ 23,760,479	£ 23,997,376	£ 25,297,965
Public deposits	5,761,421	3,975,728	4,913,219	6,925,582	5,943,945
Other deposits	12,442,850	18,830,767	17,548,245	19,501,144	20,129,518
Government securities	10,120,000	13,750,151	14,330,926	12,468,849	13,870,065
Other securities	17,580,032	16,114,020	14,941,827	18,792,905	16,439,792

— Hamburg	13 4½	13 10½	13 10½	13 9½	13 9
Clearing-house returns	...	74,000,000	67,000,000	63,887,000	84,405,000

In 1861, the Bank rate was further reduced from 4 to 3½ per cent. The restriction of business due to the American war continued.

In 1868, money was still at 2 per cent. The report of the Select Committee of the House of Commons as to the deficiencies of technical education in England had produced a great impression.

In 1869, there was rather an improved demand for the week, but no change in the rates. A new Protectionist agitation was being fostered in the great towns, occasioned by the distress of trade. An outbreak of war between Spain and the United States was apprehended, in connection with the Cuban insurrection.

In 1870, the Bank rate was further reduced from 3½ to 3 per cent., the accumulation of foreign money in England for safety being very large. The siege of Paris was now imminent, and there was a strong public opinion both that France should make peace, and that England ought not to mediate.

The amount of the "other" deposits, as compared with the "other" securities, showed, **in 1861, a deficiency of** 4,816,182*l*.; in 1868, an excess of 3,185,747*l*.; in 1869, an excess of 2,766,418*l*.; and in 1870, an excess of 2,576,710*l*. In 1871, there is an excess of 3,695,726*l*.

DISCOUNT AND MONEY MARKET.—The demand for money has been better this week than last, and to-day there is a good inquiry both in the open market and at the Bank. The rates in the open market have also made a decided advance for the week, the minimum quotation now being 1½ instead of 1⅛, while for three months' Bank bills it is 1½. The improvement was partly due in the middle of the week to the requirements of the Stock Exchange settlement, which caused a very active demand, but the hardening of the rates has continued to-day, and is simply ascribed to the large amount of general business coupled with a scantier supply of money, and some apprehensions felt on account of the withdrawal of bullion from the Bank—over 600,000*l* for the week—chiefly, it is stated, on German account.

The appearance of the Bank return, showing the large reduction of bullion which we have noticed, has strengthened the view to which we referred last week—that money may rise in value sharply at an early date. But the circumstances are not really changed from last week, and we see no likelihood of any immediate change, except a very gradual rise. A good deal of bullion has certainly been taken away, but the store is still very large, and the amounts on the way from Australia are also considerable—quite enough to compensate in great part for any probable withdrawals. The statement which we publish elsewhere, extracted from the Berlin correspondence of the *Times*, quite confirms the view that any payments of the indemnity which have yet been made will not be the means of causing a great lock-up of bullion. For the moment there is no doubt some demand for coin, which is likely to continue a few weeks longer, on account of the harvest and the holidays, but the Bank is too strong for this cause, either by itself or in conjunction with other causes in prospect, to produce any sharp rise. Two or three months later, when the present causes have accumulated, such a rise is most likely, but we doubt if the extreme apprehensions entertained as to an immediate change are well founded.

The changes in the Bank return for the week besides the withdrawal of bullion we have noticed are—an increase of 521,710*l* in the public deposits, a decrease of 1,072,747*l* in the private deposits, an increase of 201,637*l* in the Government securities, and a decrease of 426,301*l* in the private securities. The decrease of the private securities is very nearly the same as the increase in the previous week; so that there has been little real change for some time in the business of the Bank. Next account will probably show an increase. The bullion in the Bank of France has diminished 692,000*l* during the week.

We subjoin our usual quotations for mercantile paper having various periods to run :—

Bank bills—2 months	1⅞	per cent.
Do 3 —	1⅞	per cent.
Do 4 —	2⅛ ¼	per cent.
Do 6 —	2¼ ⅜	per cent.
Trade bills—3 months	2	per cent.
Do 4 —	2¼	per cent.
Do 6 —	2½ 3	per cent.

The allowances for money at the joint stock banks and discount houses are as follow :—

Joint Stock Banks at call	1	per cent.
Discount houses at call	1	per cent.
Do with seven days' notice	1¼	per cent.
Do fourteen days	1½	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871
Paris	6	5	6	4½
Vienna	6	5	6	5
Berlin	5	4	5	3½ 5
Frankfort	5	3½	4½ 5	3½
Amsterdam	5½	3	5½ 5	2½
Brussels	5½	4½	5½ 5	3½ 4
Hamburg	...	...	5½	2½
St Petersburg	8	6	6	6

THE STOCK MARKETS.—The week has witnessed another step in the upward movement of prices on the Stock Exchange, which has been the striking feature of the market ever since the suppression of the Paris insurrection and the conclusion of the great French loan. The movement has been especially manifested in the two great departments of **English railways and Foreign Government securities, and** there is still the same noteworthy exception of Consols from the general current. In both the leading departments we have named there have been special causes at work to promote the rise, in addition to the general causes of the abundance of money, the prosperity of the country, and the scarcity of established investments. In English railways, the traffic returns have not only continued most favourable, but now that nearly three months of the current half-year have elapsed, **it is seen that the rate of increase in the traffic is greater than it has been before,**

and that it is every day of a more profitable character. The announcement in this state of things that the directors of the London and North-Western and Lancashire and Yorkshire Railways had entered into a joint-purse agreement, showing that in the case of these two large undertakings the natural growth of business profits would be assisted by conciliation and harmonious working, was just the kind of event to produce a sort of railway mania. London and North-Western went up 4 per cent. at a jump, remaining firm at the advance, and there was a general movement almost all through the market in sympathy—not much disturbed at the close yesterday by less favourable announcements of the North British dividend than were anticipated. In foreign securities again the market is still influenced by the great success of the Spanish loan of last week, which has increased the purchases for investment, so that the bears being tightly squeezed at the settlement are eager to buy back. The continuous absorption of Spanish stock however is only a part of the general movement which has lately been in progress in foreign securities, and which must gradually diminish the return which an investor may expect to obtain in this department. The miscellaneous market continues to show the features which we have noticed for some time. The better home securities are all in favour, as prosperity is naturally expected of them with the growth of the country; certain credit institutions, whose capital was locked up in unsaleable investments during the 1866 panic, are now beginning to revive; and there is still a great deal of attention being given to the Asphalte, Sewage, and other new companies which are turning to account some novel application of science. There are some signs that the next great mania may be in this description of company, the sanguine disposition of the public being already so great that a few successes, which are likely enough, can hardly fail to cause a run.

One of the most noticeable features in the present rise is its continuance in spite of the assurances in many quarters that the value of money may at some early date rise very suddenly. We have noticed above the principal fact relied on to support this conclusion—the diminution of the store of bullion in the Banks of England and France; but it would seem that the apprehended advance is still too remote to affect seriously Stock Exchange speculation, though a slight dulness to-day is ascribed to this cause. As regards home securities besides, it is remarked that their real value is increasing so rapidly, that even a severe panic need not have many terrors except for the very weakest speculators.

ENGLISH GOVERNMENT SECURITIES.—As we have already remarked this department has continued without animation, especially compared with the activity displayed in almost all other departments.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money.		Account.		Exchequer Bills.
	Lowest.	Highest.	Lowest.	Highest.	March and June.
Saturday	93⅛	93⅜	93⅛	93⅜	10s to 15s pm
Monday	93⅛	93⅜	93⅛	93⅜	10s to 15s pm
Tuesday	93⅛	93⅜	93⅛	93⅜	10s to 15s pm
Wednesday	93⅛	93⅜	93⅛	93⅜	10s to 15s pm
Thursday	93⅛	93⅜	93⅛	93⅜	10s to 15s pm
Friday	93⅛	93⅜	93⅛	93⅜	10s to 15s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	93 3/16 5/16	93⅛ ¼	− 1/16
Ditto October	93 3/16 5/16	93⅛ ¼	− 1/16
Reduced 3 %	91⅛ ¼	91⅛ ⅜	... ...
New 3 %	91⅛ ⅜	91⅛ ⅜	... ...
Bank Stock, last dividend 4½ %	245 7	...	... ...
India Stock, 10½ %, red. at 200 Apl. 30, 1874	206 8	207 9	+ 1
Ditto 5 %, red. at par, July 5, 1880	110½ ¼	109½ ¼	− 1

EXCHEQUER BILLS.—8s to 15s prem.

INDIAN GOVERNMENT SECURITIES.—An announcement is made this evening by the Secretary of State for India that the Indian Government on 16th October next will issue a formal notification of their intention to discharge the "new 5 per cent. loan of 1856-7" at maturity, viz., on the 16th January, 1872. In anticipation of the notice, the Government of India further announce that holders of the loan will have the option of converting to the extent of 13,500,000*l* into a new loan, to be called the Transfer Loan of 1872, which will bear interest at 4½ per cent. per annum during the first seven years of its currency, and afterwards at 4 per cent., the loan not to be paid off before the 16th January, 1882, nor without a previous three months' notice. The notice given will be found in our advertising columns.

COLONIAL GOVERNMENT SECURITIES.—The following shows the changes for the week in this department :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	108 9	107 8	− 1
Ditto 5 %	101 2	101 2	... ...
New Zealand 5 % Consolidated Bonds	101 ⅛	101 ⅛	... ...
New South Wales 5 % Bonds, 1883 to 1896	104 ½	103¾ 4⅛	− ⅛
Nova Scotia 6 % Bonds, 1875	103¾ 4⅛	103¾ 4⅛	... ...
Queensland Government 6 % Bonds, 1884-5	109 ⅛	109 ⅛	... ...
Victoria 6 %	114 15	114¼ ½	... ...
Ditto New 5 %	104 5	104⅛ 5⅛	+ ⅛

FOREIGN GOVERNMENT SECURITIES.—The event of the week, as we have already said, is the rise in Spanish stock, including the new loan. It was officially announced from Madrid that the applications for the loan were seven times in excess of the effective amount required, and the applications, as well as the recent purchases of Spanish, being all of the best kind, the effect necessarily was to make Spanish stock in great demand. This effect, as usual, was intensified at the settlement, by the anxiety of the bears to buy back or to obtain the loan of stock, and we understand that the severe blow given to the bears is one of the main causes of the sharpness of the rise this week. The reception of the King of Spain on his present tour has also contributed to improve the credit of Spain, proving as it does that the new dynasty is very firmly seated, and that barring accidents it has at least a pretty long lease of the throne in prospect. There is a concurrence of testimony moreover to the reality and vigour of the attempts being made to put the finances straight; and the recent growth of the country is remarkable. Apart from the dealings in Spanish there is very little to notice in the foreign department, except the generality of the rise—the lead as usual being given by French securities, which have steadily improved since the settlement of the constitutional crisis. South American securities continue, as they have been for some time, in strong demand, though the immediate cause of the special favour shown to them during the closing months of the late war—the apprehension of continental complications—is weaker than it was. To-day the market continued good till very nearly the close, when there was a slight reaction, but the market is substantially firm, and there has been another rise for the day. The closing price of Spanish Threes is 34 9/16 1/16, a rise of 1¼ for the week, and the quotation for the scrip of the New loan is at a corresponding premium.

The closing prices of French securities are—Rentes, 56⅓ ⅛; Morgan loan, 101⅛ ⅜; New loan, 8 7/16 9/16 prem.—showing respectively a rise of 9/16, 1⅜, and 1½ for the week.

It is understood that an appeal will shortly be made for subscriptions to a Paraguayan loan for the nominal amount of 1,000,000*l*, to assist the country in the difficult work of "reconstruction," in which it is now engaged.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

ENGLISH RAILWAYS.—The last week has been one of great excitement in the railway market. The impression a week ago, though the market was still good, was very decided that no great farther rise was imminent. It was currently said that there had been so much weak buying that some reaction at the settlement would be inevitable. This turned out to have some foundation, the contangoes in the leading high-priced lines being very heavy, and causing a weak market at the settlement; but on the other hand, most of the low-priced lines, as well as Caledonian, showed that the bear account had been worked off, and with light contangoes and good traffic returns there was an upward movement all through the settlement. London and Brighton, and Chatham and Dover preference and ordinary had a strong advance, the former rising to 69½; but the improvement, as will be seen from our subjoined list, has been general among the low-priced lines, including Caledonian, Great Western, and South-Western among the higher-priced, but excepting North British, which latterly fell upon an unfavourable dividend announcement. On the other hand, in the high-priced lines a somewhat unexpected incident—the announcement of the conclusion of a joint-purse agreement between the London and North-Western and Lancashire and Yorkshire companies—produced an immediate rebound on the last day of the settlement. North-Western, which had been continued at 143 to 143½, rose almost at once to 147¾ 148¼, and Lancashire and Yorkshire also improved, North-Eastern, Great Northern, and Midland being also favourably affected, and rising 1 and 2 per cent. above the making-up price at the settlement. The advance was thus very general. To-day the market has continued good, except at the very close, when a relapse was occasioned by the pressure of some sales for realisation, the dulness being also increased by apprehensions of dearer money. There is no doubt a great amount of pawned stock which would come on the market in the event of a monetary panic, but railway property is increasing so rapidly in real value every month that no apprehensions of a check of this sort appear to have much effect.

With regard to the joint-purse agreement between the London and North-Western and Lancashire and Yorkshire companies, there can be little doubt of its having the good effects anticipated. It ought to be pointed out however that the traffic returns of these two lines during the current half-year would of themselves justify the present quotations of the ordinary shares, assuming that the increase will continue for some months longer. The *passenger* increase alone in the London and North-Western line has been 45,000*l* since the 1st of July, equal of itself to an addition of about 6s 8d per cent. per annum to the current half-year's dividend, while the profit of the goods increase to-date would be sufficient to cover the new preference charges for the half-year. As there are still three and a-half months of the half-year to return, this is a very favourable account, and gives some colour to the anticipation that the addition to the current half-year's dividend may be at the rate of 1 per cent. per annum. At this rate of increase the North-Western dividend for the current year—that is, the year ending June 1872—would be 8 per cent., and in our opinion this is no improbable contingency. It is obvious therefore in what a favourable position the line is, when the natural prospect of profit is increased by an arrangement which will save working expenses and probably increase the business of both companies concerned. Great as the rise has been we should anticipate a still more important rise in North-Western stock at least, if not in the other leading lines, within the next few weeks.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices:

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	102½ ¾	.....	102½ ¾	+ 1¼
Great Eastern	65½ ¾	.....	65½ ¾	+ ¾

Metropolitan District 6 %	121 3	.....	121 3	... ...

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Sept. 9 to 833,139*l*, being an increase of 55,683*l* on the corresponding week of last year. The principal increases for the week are—London and North-Western, 9,336*l*; Midland, 6,262*l*; Lancashire and Yorkshire, 6,218*l*; Great Western, 4,513*l*; Brighton, 3,899*l*; London and South-Western, 3,594*l*; and London, Chatham, and Dover, 3,301*l*. Great Eastern shows a fractional decrease, and Great Northern only a fractional increase; but the feature to which we drew attention last week of a considerable increase of passenger traffic, notwithstanding a decrease of goods traffic, is still characteristic of the returns of these two lines. The following are the details in each case for the week and for the whole period:—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts. Amount.	Inc. or Dec. on Corresponding week in '70.	Aggregate Receipts of Half year to date. Amount.	Inc. or Dec. on Corresponding per. in '70.
	£	£	£	£
Bristol and Exeter	9,584	+ 187 ...	95,550	+ 1,319

AMERICAN SECURITIES.—Five-Twenty bonds have ruled firm throughout the week, and close at an advance of ¼. It is asserted that the success of the new Funding loan in the United States has created a demand for the issue of more Five per Cents., but this is not likely to be attempted for the present. Erie shares have fluctuated considerably in sympathy with the movements in the New York market. The following are the principal changes for the week:—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
United States 6 % 5-20 Bonds, exchng. 6%	91½ ¾	.....	92½ ¾	+ ¼
Ditto 1865 Issue	89½ ¾	.....	90½ ¾	+ ¼
Ditto 1867 Issue	92½ ¾	.....	92½ ¾	— ¼

Pennsylvania Gen. Mort. 6 % Bonds, 1910	95 ½	.....	95 ½	... ...
Virginia 6 % Bonds	53 6	.....	53 6	... ...

JOINT STOCK BANKS.—There has been a fair business passing in joint stock bank shares, and the movements have been generally of a favourable character. Colonial, Midland, and New South Wales have risen 1; Anglo-Egyptian, English and Scottish Chartered, London Joint Stock, London and South African, and Union of London, ½; but Anglo-Austrian and London and Westminster have given way ½.

TELEGRAPHS.—There has been a fair amount of activity in this department, and the result of the week's operations is a somewhat general rise in the quotations—Anglo-American close at an advance of 3; Great Northern Extension, 1¾; French Cables, 1; British India Extension, and Marseilles and Malta, ¾; British Indian Submarine, China Submarine, Falmouth and Gibraltar, ⅜; British Australian, ½. On the other hand, Anglo-Mediterranean stock has declined 1; and Great Northern shares are ½ lower. Telegraph Construction shares closed with firmness at a rise of 2¾, and India Rubber Works at an improvement of ½ on the week.

MINES.—The transactions in British mining shares have been on an average scale, and the market closed quietly to-night. South Wheal Frances and Wheal Buller have risen 5; Great Laxey ½; and Great Wheal Vor ¼. North Roskear have declined 2; West Chiverton 1½; Tankerville and Providence 1; West Caradon and West Bassett ½. In the foreign market, Eberhardts have risen 1, and Pacific ¼ on the week; but Sierra Buttes Gold have declined ¼, and St John del Rey ½.

The prospectus of the Castle Gate Tin Mining Company, Limited, with a capital of 10,000*l*, in 10*l* shares, has appeared, the object of which is to purchase a mining property at St Columb.

MISCELLANEOUS.—The changes in the miscellaneous market are not important. Financial companies have met with a fair amount of attention, and International have risen ⅝; Credit Foncier are ½, and National Discount and London Financial ¼ higher. City Offices have been pressed for sale, and have declined 1, while Royal Mail Steam have given way to a similar extent. Among other changes we note an advance of 5 in North British Australasia, 1 in Roumanian Iron Bridges Annuities, and Madras Irrigation, and ½ in London Tramways. Crystal Palace preference stock has declined 2.

In the new undertakings Val de Travers Asphalte are quoted 31½ to 32, ex all, and Neuchatel Bitumen, 68 to 70 per share; Limmer Asphalte, 4 to 4¼ prem.; Montrotier Asphalte, 4 to 5 prem.; Phosphate Sewage, 14 to 16 prem.; Native Guano, 39 to 41; Patent Gas, 5½ to 6½ prem.; while North American Asphalte shares have relapsed to 2 to 7 prem.

A prospectus is issued this evening by Messrs Chadwicks, Adamson,, and Collier, of a new Shipbuilding Company—Earle's Shipbuilding and Engineering Company, Limited—with a nominal capital of 300,000*l*, in 6,000 shares of 50*l* each, of which 10*l* is to be paid on deposit and allotment, and 10*l* in January next. The company is formed to take over the works of Messrs C. and W. Earle, of Hull, and it includes among its directors Mr E. J. Reed, the late Chief Constructor, and Sir Spencer Robinson, the late Controller of Her Majesty's Navy—the former gentleman having also agreed to be chairman, and to conduct the business of the company for five years. The prospectus contains an extract from a letter of Mr Reed's, giving a most favourable account of the capabilities of the works; and it is stated that the terms of purchase are unusually favourable.

The directors of the City Offices Company nave announced a dividend of 3s per share.

EXCHANGES.—Bills on Antwerp and Brussels have been rather more in demand this week, the Belgian rates for money having advanced.

BULLION.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—The demand for gold is active. The whole of the gold which arrived per Peninsular and Oriental steamer on 11th inst. was taken for export, and 493,000*l*, in bars and sovereigns, have been withdrawn from the Bank of England. The arrivals comprise 423,000*l* per Delta, from Australia; 15,500*l* per Nile, from West Indies; 33,500*l* per Somersetshire, from Melbourne; 28,500*l* per Jessie Redman, from Otago. The shipments are—225,226*l* for the Brazils, per Oneida; 11,800*l* (coin) for Bombay, per Peira; 15,000*l* for the Cape, per Sprite.

Silver.—The market is firm, and we quote the price 60⅜d to 60½d per oz standard. The Delta brought 193,000*l* in silver from the East, 180,000*l* of which was sycee silver from China. The Nile, from the West Indies, arrived with 11,500*l* in bars and coin, and we have received 74,500*l* from New York. The Magellan, from South America, has 11,680*l*. 4,600*l* was shipped per Pera, to Bombay, on 9th inst.

Mexican dollars are scarce, and firmer in price. We quote the new coinage 59½d per oz, and the old 59¾d; the supply of this latter description is becoming sensibly smaller.

Exchange on India for Banks' drafts at 60 days' sight is 1s 11 1/16d to 1s 11⅛d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 9¾d to 77s 10d per oz std; ditto refinable, 77s 11d per oz std; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0⅜d to 5s 0 1/16d per oz std.; ditto containing 5 grains gold, 5s 1¼d to 5s 1 5/16d per oz std, last price; Mexican dollars, 4s 11⅜d to 4s 11⅝d per oz, last price.

According to the *Gazette* return the imports of the precious metals during the week ended September 12 were:—Gold, 538,330*l*; silver, 299,665*l*. The exports were:—Gold, 366,686*l*; silver, 115,643*l*.

The sum of 88,000*l* in bar gold was withdrawn from the Bank to-day, the larger portion for India and Alexandria.

FAILURES AND EMBARRASSMENTS.—The suspension is announced of Messrs Muir, Brown, and Co., calico printers, of Glasgow, with liabilities, chiefly in Glasgow, estimated at between 100,000*l* and 150,000*l*, of which about one-third is secured. The suspension has produced another—viz., that of Messrs Inglis, Anderson, and Co., cloth agents, Glasgow and Manchester, whose losses will fall chiefly on the latter city.

Kettering, Thrapstone, and Huntingdon Railway, general, 2 Westminster chambers.
Royal Portuguese Railway, general, Lisbon.

THURSDAY, September 21.

Midland Great Western, Ireland, Railway, general, Dublin.
Roman Railway, general, Florence.

FRIDAY, September 22.

Florida Silver Mining Company, general, Aberystwyth.

SATURDAY, September 23.

Vale of Llangollen Railway, general, Denbigh.

NOTICES AND REPORTS

BANK OF ENGLAND MEETING.

The ordinary half-yearly general Court was held on Thursday in the Bank Parlour, the Governor, Mr George Lyall, presiding. The minutes of the last quarterly court having been read and confirmed.

The Governor acquainted the Court that the present was

one of the quarterly courts, held under the charter; also a half-yearly court for the making of a dividend. The net profits for the half-year ending the 31st August were 621,214*l.* 11s 4d, making the rest at that date 3,653,964*l.* 5s 8d, and after providing a dividend at the rate of 4*l.* 5s per cent., the rest would amount to 3,015,461*l.* 15s 8d, the directors therefore proposed that a dividend for the half-year be made payable on the 5th of October next of 4*l.* 5s per cent., without deduction for income tax; and the question he had to put was that the Court orders such dividend of interest and profits to be made.

Mr G. Botley seconded the resolution, and he believed that it would be confirmed unanimously. He remembered when the dividend was at the rate of 4½ per cent., one proprietor proposed that it should be 4¼ per cent. Now they had got down to the 4¼ per cent., he imagined there would be no difference of opinion. Under all the circumstances, he thought they might well congratulate themselves upon the dividend, and upon the peaceful state of the continent of Europe, and generally upon the improved state of trade, not in this country and in Europe merely, but in India and other parts of the world.

Mr Jones complained of the systematic reticence of the directors in regard to the affairs of the Bank, and urged the propriety of the Corporation of the Bank of England using its influence to make the florin equal to the rupee, urging as a reason the great extent of our Indian trade, and that the whole currency system of India, and the whole trade of India, depended upon the rupee as the basis. He thought the dividend very satisfactory, having regard to the low rate of discount.

The resolution was carried unanimously.

Mr Jones then submitted his suggestion as to the assimilation of the florin and the rupee, in the shape of a recommendation to the Governor and directors to confer with the Government on the subject.

The Chairman, in replying to Mr Jones, said that the question of the assimilation of the florin and the rupee was one which the Bank in its own capacity was not likely to interfere in, unless called upon by the Government to give an opinion. As far as he knew, the subject had not recently been discussed in any quarter, and he could not of course be aware of the reasons which had induced Mr Jones to moot it at this particular time.

The resolution ordering the dividend was carried unanimously.

Mr Jones then submitted his suggestion in the shape of a recommendation to the Governor and directors to confer with the Government on the subject.

A Proprietor recommended Mr Jones to go to India, and try to get the authorities there to agree to assimilate the rupee to the florin in value.

Sir D Salomons, M.P., said that was rather a sly way of shelving Mr Jones.

The recommendation not being seconded was not put.

Mr Botley gave notice that at the next quarterly court he should put the following question to the Governor and directors:—"Knowing the discussions the subject has undergone, the Congresses held on the continent, that held so recently in Germany, the adhesion of the greatest bankers, merchants, financiers, and men of science, including the Statistical Society and the British Association; considering, I say, such great authorities advocating and zealously supporting the principle, also Chambers of Commerce and Agriculture, it cannot, I presume, be out of place to ask the Governor, the Deputy-Governor, and Court of Directors at the next general court, whether the subject has been considered or is then under the favourable consideration of the Court?"

Sir D Salomons, M.P., moved a vote of thanks to the Governor, Deputy-Governor, and directors, which was carried by acclamation, and the Court adjourned.

STOCKS.

Turkish 6 per Cent. Loan.—Bonds representing 121,500*l.* have been drawn for redemption at par on the 1st October.

RAILWAY COMPANIES.

Caledonian.—An extraordinary meeting will be held on the 27th inst., to authorise the directors to raise 373,000*l.* by the issue of ordinary stock, to be offered at par to the holders of ordinary stock and shares; to raise on mortgage or debenture stock 67,200*l.*; and the issue of debenture stock in lieu of the whole mortgage debt of the undertaking.

East Argyleshire.—Advices have been received that the Government has fully approved the statutes and contracts of the company, and that the works have already been entered upon and will be urged forward with the utmost expedition.

Greenock and Ayrshire.—After paying preference dividends, a dividend at the rate of 2 per cent per annum was announced on the original shares.

Glasgow and South-Western.—The revenue accounts for the half-year ended July 31 are compared below:—

	1870. £		1871. £
Gross receipts	341,640		331,898
Working expenses	150,951		162,908
Net	190,689		169,990
Add previous balance	4,185		3,686
	194,874		194,676
Preference charges	85,265		96,155
Available for dividend	108,589		97,931
—On the ordinary stock at the rate of 5¼ per cent per annum	103,978	(5 % p. a.)	94,804
Surplus	5,611		3,127

Capital Account.

	Expended. £		Received. £
To January 31, 1871	7,351,813		7,349,191
During the half-year	102,291		44,913
Total, July 31, 1871	7,454,104		7,394,104

The working cost was increased by maintenance and renewal charges; and the new Union stations have increased the preference charges without as yet making any adequate return. For the purpose of paying off the Paisley Canal capital, powers are asked to borrow 65,000*l.*, and to create 25,250*l.* new ordinary stock. The new works in Ayrshire are approaching completion.

Hornast'k.—The balance available for dividend is 1,873*l.*, out of which they recommend a dividend of 6s 3d per share; this, after deducting income tax, will absorb 1,468*l.*

Wanarlshire.—The gross receipts of the past half-year amounted to 84,212*l.*, the working expenses to 42,982*l.*, and the net earnings to 41,230*l.* The receipts of the corresponding half of 1870 amounted to 81,536*l.*, the working expenses to 40,069*l.*, or 49 per cent., and the net receipts to 41,467*l.* A further sum of 5,000*l.* was transferred from net revenue to the relaying suspense account, which was thereby reduced to 22,462*l.* The net revenue showed that there was a balance of 27,162*l.*, and that sum would yield a dividend at the rate of 5 per cent. per annum on the preferential stock, and a dividend at the rate of 5*l.* 10s per cent. per annum on the ordinary stock, leaving 64*l.*

North British.—The directors recommend a dividend for the past half-year on all the company's preference stocks, and to the extent of 1¼ per cent. per annum on the Edinburgh and Glasgow preference stock (Ordinary), as compared with ¾ per cent. per annum in the corresponding period of last year, 286*l.* being carried forward.

South Austrian and Upper Italian.—The receipts of capital amounted on the 31st of December last to 51,060,913*l.*, and the expenditure to 54,057,054*l.*, being in excess of the company's resources of 2,996,141*l.* The deficiency had since been covered by loans. The revenue for the year 1870 showed that the gross receipts amounted to 5,155,097*l.*, of which 2,964,879*l.* was received on the South Austrian lines and 2,190,128*l.* on the Upper Italian lines. The working expenses amounted to 2,009,899*l.* The net profits on the South Austrian lines amounted to 1,786,453*l.*, and on the Upper Italian line to 1,253,888*l.*, making the total amount of net profits 3,040,341*l.* From this was deducted 2,300,051*l.* for interest and for partial extinction of debt, and other items, leaving a balance of 734,418*l.*, against 1,017,970*l.* in 1869, showing a decrease of 283,552*l.* To the available balance of 734,418*l.* was added 426,274*l.* at credit of reserve, making 1,160,692*l.* From this was deducted losses by rate of exchange 354,043*l.*, leaving 806,649*l.*, or 12¼ per share; but as it was deemed more prudent to take only 450,000*l.*, or 7¼ per share, to make up 15*l.* per share, a balance of 356,649*l.* remained. Of the 15*l.* 7¼ per share were distributed in November last, and 7¼ in July last.

BANKS.

Bank of Australasia.—Dividend announced of 4 per cent., making 9 per cent., free of income tax, for the year.

Union.—The directors have declared a dividend for the half-year ending June last at the rate of 6 per cent., in addition to a bonus at the rate of 2 per cent.

ASSURANCE COMPANIES.

London Assurance Corporation.—Dividend, 10s per share, free of tax, for the half-year.

MISCELLANEOUS COMPANIES.

Canadian Oil Works Corporation, Limited.—It is stated that from the returns just received the amount of oil sold between the 24th of July and the 28th August reaches 5,470 barrels.

Holcomb and Co.—Dividend declared of 5¼ per cent., making 8 per cent. for the year.

Newcastle Intercolonial Rock.—At the meeting it was unanimously resolved to reconstruct the undertaking, the shareholders accepting eight 10*l.* shares in the new undertaking for each share in the existing company.

Scarborough Sub-Tramway, Aquarium and Improvement, Limited.—Capital 25,000*l.* in 5*l.* shares. Object—to construct a tramway between the North and South Bay, with a tunnel of 600 yards through the high ground by which they are at present separated.

[CONTINUED FROM PAGE 1125.]

Surrey Commercial Dock.—At the half-yearly meeting it was stated that the tonnage had increased, and a dividend at the rate of 5 per cent. per annum, free of income tax, was declared.

MINING COMPANIES.

Menzenberg Mining, Limited.—Capital, 63,000*l*, in 12,000 shares of 5*l* 5s each (35 thalers). These mines are situated close to the St Josephberg and Marienberg Copper Mines, which have paid over 1,500,000*l* in dividends, and the same lodes are stated to run directly through the Menzenberg estate. The property, two miles long and a mile broad, is stated to be advantageously situated.

Independence Gold Mining, Limited.—In consequence of an unanticipated delay in completing the purchase of the mine, the allotment of shares will not be proceeded with.

Silkstone Fall Colliery, Limited.—Capital, 50,000*l*, in 5*l* shares. The colliery is stated to contain best silkstone and cannel coal, and turns out over 1,000 tons weekly. Profits are also expected from sales of fire-clay and coke.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

On the 5th October next, the following reduced rates of postage for inland letters will come into operation:—

						d
For a letter not exceeding		1 oz				1
For a letter exceeding		1 oz	but not exceeding		2 ozs.	1½
—	—	2 ozs	—	—	4 ozs.	2
—	—	4 ozs	—	—	6 ozs.	2½
—	—	6 ozs	—	—	8 ozs.	3
—	—	8 ozs	—	—	10 ozs.	3½
—	—	10 ozs	—	—	12 ozs.	4

Any letter exceeding the weight of 12 ozs will be liable to a postage of 1d for every ounce, or fraction of an ounce, beginning with the first ounce. A letter, for example, weighing between 14 and 15 ounces must be prepaid fifteenpence. A letter posted unpaid will be charged with double postage, and a letter posted insufficiently paid will be charged with double the deficiency. An inland letter must not exceed the dimensions of one foot six inches in length, nine inches in width, and six inches in depth. Concurrently with the reduction of postage on inland letters, the inland sample post will be abolished. From the same date inland book packets will be limited to the same dimensions as inland letters, viz., one foot six inches in length, nine inches in width, and six inches in depth, and to a maximum weight of 5 lbs. Any book packet which may be found to contain a letter or communication of the nature of a letter, not being a circular letter or not wholly printed, or any enclosure sealed or in any way closed against inspection, or any other enclosure not allowed by the regulations of the book post, will be treated as a letter, and charged with double the deficiency of the letter postage. Any newspaper, registered for inland transmission, which may be found to contain an enclosure will be charged as a letter. In other respects the regulations affecting inland book packets and newspapers will remain unaltered.

The packets employed in the conveyance of mails between this country and Halifax, Nova Scotia, will in future leave Queenstown every alternate Wednesday instead of on Saturday as heretofore, commencing on Wednesday, the 27th inst. The next despatch of these mails from London will consequently take place on the evening of Tuesday, the 26th inst. (instead of Friday, the 22nd), and thenceforth on the evening of every alternate Tuesday, and from Dublin on the following morning.

The next mails will be despatched from London as follows:—New Zealand, via San Francisco, on the evening of Thursday, the 21st Sept.; Australia, via Southampton, on the morning of Saturday, the 30th Sept.; via Brindisi, on the evening of Friday, the 6th October.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was less animation in the grain trade at Mark lane to-day, though there was no disposition shown on the part of factors to submit to lower prices. The show of new English wheat was small, but there were numerous samples of foreign on offer, and sales proceeded slowly at Monday's advanced currencies. Flour was held firmly, but buyers held out for a slight concession. Maize and oats were the turn dearer; barley, beans, and peas were unchanged in value. This week's imports of foreign and colonial produce into London have amounted to 40,770 qrs of wheat, 10,590 barley, 53,290 oats, 5,210 maize, 770 beans, 140 peas, 880 sacks of flour.

At Liverpool and Wakefield this morning there was a moderate demand for wheat at late quotations.

The Liverpool cotton market has been quieter during the past week, but a good steady business has been done without change in prices. The total sales for the week are 76,810 bales, of which the trade have taken 52,900 bales, speculators and exporters 23,910 bales. The imports are 33,598 bales, the actual exports 6,714 bales, and to-day's stock is 498,140 bales. Quotations are unchanged since last Friday; but a slight advance is obtainable for some American descriptions. To-day the market closes firm. Sales, 15,000 bales.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended September 14, 1871:—

	Imported.	Exported.
American.....bales	14,073	1,163
Brazilian	5,173	131
East Indian	9,400	12,335
Egyptian	85	83
Miscellaneous	6,823	121
Total	35,504	14,301

At New York, on 14th inst. middling Upland was quoted at 21¼ cents per lb. Bombay advices to Sept. 11, quote the cotton market firm at 220 rupees for fair Dhollerah. The shipments of the week had amounted to 3,000 bales.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, Aug. 15:—When our last circular was written we were in receipt of telegraphic news from England to the 5th instant, reporting the Liverpool market dull at 7¼d per lb for fair Dhollerah. This has been followed throughout the week under review by still more unfavourable advices, the quotation on the 7th, for the same description of cotton, being reduced to 7d, and on the 12th (the latest date to which we have news) to 6¾d per lb, the market closing weak. This rapid decline, although partly no doubt the natural reaction following the recent excitement, appears to have been mainly owing to more favourable accounts as to the prospects of the American crop, the probable out-turn of which is now, as we learn from a private telegram, estimated at 3,500,000 bales. We have again to report a very inactive market here, the week's business only aggregating some 1,900 bales of all sorts. As we mentioned in our last circular, stocks are much reduced, especially of good cotton, and exporters are unable to

compete with the local spinning companies, whose requirements amount to an average of 1,500 bales a week. We quote prices 7 rs to 8 rs per candy lower than last week, but they are in nearly every instance nominal. The weather during the past week has been very unseasonable as far as regards Bombay, the rainfall to date being fully 30 inches short of the average. Notwithstanding this, however, the accounts from the districts continue favourable, the fall of rain above Ghaut having been general and ample, and the reports from our correspondents both in the Berars and in Guzerat are very encouraging. From Dhollerah we have not had any particulars lately. From Tuticorin we have a telegram of yesterday's date quoting 7d per lb, c and f.

EXPORT OF COTTON from BOMBAY to August 14.

Grand total	10,10,387	.....	9,29,781

Actual exports since last mail left, 8,403 bales.

The colonial produce markets have ruled quiet, and prices have been scarcely so firm. Sugar has met with a moderate inquiry only, and buyers have had the advantage both in raw and refined goods. The stock of sugar in the United Kingdom on September 9 was estimated at 161,445 tons, against 217,280 tons of the corresponding period last year. Coffee has been in fair request at steady currencies. The Dutch Trading Company have advertised 150,000 bags for sale at Amsterdam on Wednesday next. Tea has realised higher rates, while the rum market has shown firmness.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, August 11.—We have but little change to notice in the prospects of the crop. The rivers have lately risen again very rapidly, and some plant has been lost in Mungyr but the season in Lower Bengal is so nearly finished that an inch or two now will not make much difference in their outturn. The latest advices from Tirhoot and Chuprah report better weather, and an improvement in the appearance of the Khurreeng; produce is still poor in many factories. Champaran continues to do well. The weather has also cleared up somewhat in the Benares Provinces and the Doab, and has thus enabled planters to get through some weeding. Where manufacturing is in progress, the plant is giving but a poor yield, and the prospects of the late sowing are still very doubtful; the outturn from this part of the country will mainly depend upon the weather during the next few weeks. On the average basis of the result of the London July sales, some enquiries were made for marks to arrive, and one or two sales were effected, but later on when crop prospects appeared less favourable and London telegrams continued to quote a strong market, a very eager demand took place, and several sales were made at enhanced rates.

Mr Bellamy's circular writes:—The fourth series of London public sales commenced on Thursday with the following catalogue:—3,292 bales Sydney, 1,086 New Zealand, 425 Adelaide, 184 Port Phillip—total, 5,487 bales. There was a large attendance of both home and foreign buyers. All kinds were sparingly offered, and prices as compared with the closing sales of last series ruled for finer and greasy kinds 1d to 2d and 4d per lb higher. The appended is true comparison:—42,097 bales Sydney, 26,870 Port Phillip, 1,616 Van Diemen's Land, 9,944 Adelaide, 294 Swan River, 38,456 New Zealand, 21,393 Cape of Good Hope, 138,670 bales. The series as at present announced is to last till the 11th October, to be followed or varied by sales of low woods.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on July 31, thus refer to the Cape wool trade:—The receipts of wool from the country during the past fortnight have been almost nil, and owing to the small supply there has been very little business done. The few parcels that have come in have been sold at enhanced prices to complete shipments. The demand for all descriptions is very strong, and there will be plenty of business when we receive larger supplies. The following are the current prices:—Greasy, Fullgrown, superior 24d to 25d; fine, light, fat scouring, 23d to 24d; heavy and inferior, 21d to 22d. Fine combing, Superior, clean, 29d to 31d; good average, 26d to 28d; inferior and heavy, 23d to 25d. Slipe skin—Prime, Unobjectionable assorted, 17d to 18d; second quality, down, 14d to 16d; superior country assorted, merino, 15d to 16d; inferior to good country assorted, 13d to 14d; inferior to good country assorted, 12d to 13d.

The New York Economist, Let of the 2nd inst. has the following encouraging report of trade prospects in the United States:—Autumn opens in with cool evening weather, which is generally grateful after the oppressive temperature which prevailed through out the greater part of August. The change is quite perceptible in packing and trade, and a more cheerful feeling among business men. Monetary affairs remain easy, the gold and exchange markets steady, and business matters progress favourably, with every indication that the volume of trade will prove considerably above that of last season. The low schedule of freights to and from the West is highly favourable to the interchange of commodities, and merchants and forwarding agents are making the most of it, judging from the fact that all the leading avenues of communication, leading from this point, are crowded to repletion. The general run of merchandise prices too are conceded on all hands to be low, and as there is little probability of any decided abatement during the active business season, buyers respond with an alacrity that is in striking contrast with the distrust and apprehension so conspicuous during the last three or four years of shrinkage. The course of foreign trade is equally favourable, though the continued scarcity of tonnage is still something of a hindrance. The European demand for our surplus cereals is active, owing to deficient harvests abroad, and the shipments are very large, not only to Great Britain and Ireland, but to France, Germany, Belgium, &c. The free exports of produce, and various kinds of American securities, furnish a liberal supply of exchange at relatively low rates. The natural effect of this would be to put down the price of gold, but the supply is unusually light and the mercantile demand active, which for the time being keeps the premium steady. The natural tendency, however, is to a low range, in view of the remarkable plethora of money at London and the leading financial centres of continental Europe, and the increased disposition of investors to take American securities, which in connection with the probability of a continued active export trade in produce, cannot fail to have an important bearing upon our foreign exchanges, if European gold do not soon begin to flow in this direction. We shall unquestionably have a large surplus of the fruit of the soil to export at good prices, which will not only keep down the adverse trade balance, but afford employment at remunerative rates for all the tonnage that is likely to be available. The rates of currency remain 2½ to 3½ per cent. on call, and 5 to 7 per cent. discount, with increased activity.

Messrs Laurence Brothers' report:—The leather trade since our last report has been very animated, and prices have in consequence risen considerably. The increase in value has however hitherto failed, to draw nearly adequate supplies, for the existing requirements of merchants and consumers. Not only are the stocks light in London, but from all parts of the country reports testify to general scarcity such as for a long period has been unknown. Unfortunately the raw materials has again advanced, and thus the advantage which should accrue to tanners has been seriously curtailed. The articles particularly in request at the moment are light, medium, and heavy butts and bends, light shaved hides, dressing hides, kips, all selections of horse hides and calf skins, prime basils, shoe butts and middlings, light and medium weight kip butts, grain and harness leather. Market hides have further advanced, and only limited supplies are received. The demand for salted hides remains active, and upon all descriptions a rise in value may be noticed. Dry hides also sell freely. East Indian kips continue in good request, and although quotations have not materially altered an upward tendency is noticeable.

THE COTTON TRADE.

LIVERPOOL.—SEPTEMBER 14.

Cotton has been in fair demand throughout the week, although the trade have not bought to the same extent as during the previous fortnight. Prices have been fairly supported, and the market closes with firmness. For Sea Island there has been a fair demand, and full rates are maintained. American continues in good request, without change. New York advices to the 14th inst. quote middling Uplands 21¼ cents, costing to sell in Liverpool 10½d per lb, by steamer. Brazil has been but in moderate request, closing at slightly easier rates. Egyptian has been in fair demand, and last week's quotations are renewed. East Indian continues to attract the attention of buyers, and though very freely offered, prices are pretty well supported.

In cotton to arrive and for future delivery the business has been considerable, and, after some slight fluctuations, the latest quotations are:—American, basis of middling (from any port), not below low middling, September delivery, 9¾d; November, 9¾d, not below good ordinary, October delivery, 9¼d; new crop, October-November shipment, 9¼d; November-December, 9¼d. New Orleans, not below good ordinary, October-delivery, 9¾d; new crop not below good ordinary, November-December shipment, 9¼d; sawginned Dharwar, fully fair new merchants, November-December shipment, 7¾d; Broach, good fair new merchants, machine-ginned, June sailing, 8¼d; Dhollerah, fair new merchants, May sailing, 7¾d; Oomras, fair, fair new merchants, August sailing, 7¾d; Veraval, fair new merchants, June sailing, 6¾d per lb.

The sales of the week, including forwarded, amount to 70,810 bales, of which 14,480 are on speculation, and 9,480 declared for export, having 52,880 bales to the trade.

SEPT. 15.—The sales to-day will probably amount to about 15,000 bales, with a firm market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	691,910
An increase of quantity taken for consumption of	470,380
An increase of actual exports of	281,910
An increase of stock of	8,600

In speculation there is an increase of 262,790 bales. The imports this week have amounted to 33,598 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to September 8) is 51,000 bales, against 17,000 bales at the corresponding period last year. The actual exports have been 6,714 bales this week.

LONDON.—SEPTEMBER 14.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

There has been a quieter market this week, with only a moderate business on the spot, at last week's rates, whilst for arrival, prices are rather in buyers' favour.

NEW YORK.—SEPT. 1.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Sept. 1. From the figures thus obtained it appears that the total receipts for the seven days have reached 7,579 bales, against 7,844 bales last week, 7,630 bales the previous week, and 9,454 bales three weeks since, making the total receipts since Sept. 1, 1870, 4,009,502 bales, against 2,907,909 bales for the same period of 1869-70, showing an increase since Sept. 1, this year, of 1,101,593 bales. The exports for the week ending this evening reach a total of 12,853 bales, of which 12,853 were to Great Britain, none to France, and none to rest of the continent, while the stocks as made up this evening are now 99,040 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending Sept. 1.	Exported to Great Britain.	Exported to Continent.	Total this week.	Same week 1870.	Stock. 1871.	Stock. 1870.
New Orleans	4943	...	4943	6369	25512	19396
Mobile	...	...	...	...	5505	10013
Charleston	...	...	...	...	3413	1218
Savannah	...	...	...	...	3215	2833
Texas	...	...	...	...	10490	[illegible]
New York	6893	...	6893	2308	38875	18000
Other ports	1017	...	1017	[illegible]	12000	8000
Total	12853	...	12853	8702	99040	64355
Total since Sept. 1	2376769	787996	3164765	2178917	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 4,151 bales, while the stocks to-night are 34,686 bales *more* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Aug. 25, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph:—

Ports.	Receipts since Sept. 1. 1870.	1869.	Exported since September 1 to Great Britain.	France.	Other Foreign.	Total.	Shipments to Northrn. Ports.	Stock.

The market the past week has continued quiet, but prices, under the influence of the same causes operating last week, have further improved, and the close to-day was firm at 19¼c for middling Uplands. Rumours that the crop has been greatly damaged of late in many ways have been current, and have found believers both here and at Liverpool. A short supply is, therefore, counted upon, and with the present consumption the upward movement in prices was only a legitimate and necessary consequence. Liverpool has advanced during the week about ¼d for middling Uplands, with the week's sales for consumption at 82,000 bales, and for export 11,000 bales. It is claimed, however, by many, that foreign spinners are accumulating unusually large stocks, and that they must soon withdraw from the market. This idea is based upon the current estimates of consumption (58,000 bales weekly as given by the leading Liverpool circulars. If those figures are correct the Manchester spinners now hold 267,000 bales stock; but if their consumption is in excess of the above weekly total, as we have claimed, then the stock is less to just the same amount. So long, therefore, as the sales for consumption and export at Liverpool remain at the present large figure there will be a belief in an enlarged consumption and a short supply. For forward delivery the movement has been fairly active, with about the same fluctuations as for cotton on the spot. Low middling closed at 18½c for September, 18¾c for October, 18¾c for November, 18¾c for December, and 19c for January. The total sales of this description for the week are 80,900 bales. For immediate delivery the total sales foot up this week 9,441 bales, including 4,115 for export, 3,463 for consumption, 413 for speculation, and 1,450 in transit. Of the above 582 bales were to arrive. The following are the closing quotations —

	Uplands and Florida.		Mobile.		New Orleans.		Texas.	
	c	c	c	c	c	c	c	c
Ordinary	16	@ ...	16½	@ ...	16½	@ ...	16½	@ ...
Good ordinary	17¼	...	17¼	...	17¼	...	17¼	...
Low middling	18¾	...	18¾	...	19	...	19¼	...
Middling	19¼	...	19¼	...	20	...	20¼	...
Good middling	21¼	...	21¼	...	21¼	...	22	...

For forward delivery the sales have reached during the week 80,900 bales.

Movements of Cotton at the Interior Ports.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870 :—

	Week ending Sept. 1, 1871.			Week ending Sept. 1, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	200	1780	2550	540	1240	1444
Columbus	32	140	1574	281	608	1574
Macon	67	240	1760	273	872	2591
Montgomery	97	246	1575	128	901	1575
Selma	131	131	502	68	248	1310
Memphis	765	1336	2178	593	617	4334
Nashville	282	233	550	200	909	2191
	1467	4767	14729	2154	5345	16629

The above totals show that the interior stocks have decreased during the week 2,194 bales, and are to-night 3,902 bales less than at the same period last year. The receipts have also been 687 bales less the same week last year.

The exports of cotton this week from New York show an increase over last week, the total reaching 8,631 bales, against 7,101 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870, and in the last column the total for the same period of the previous year :—

Exports of Cotton (bales) from New York since Sept. 1, 1870.

—*New York Commercial and Financial Chronicle.*

Messrs Neill Brothers and Co. have received the following summary of the United States' cotton crop by Atlantic cable. Our usual detailed statement will be given on the arrival of the mail :—

Receipts.	1870-71	1869-70	1868-69	1867-68	1866-67	1865-66.
New Orleans	1,446,000	1,142,000	794,000	579,000	702,000	712,000
Mobile	401,000	306,000	231,000	309,000	230,000	120,000
Texas	315,000	243,000	145,000	115,000	186,000	175,000
Florida	17,000	23,000	13,000	35,000	58,000	149,000
Total Receipts at the Gulf Ports	2,180,000	1,717,000	1,183,000	1,038,000	1,176,000	1,465,000
Savannah, &c.	725,000	485,000	357,000	495,000	276,000	283,000
Charleston, &c.	351,000	247,000	169,000	240,000	162,000	112,000
North Carolina	77,000	50,000	36,000	30,000	30,000	65,000
Virginia	360,000	264,000	161,000	187,000	124,000	37,000
Northern Ports	335,000	156,000	178,000	294,000	207,000	212,000
Overland	249,000	127,000	143,000	171,000	110,000	67,000
Total Receipts at the Atlantic Ports	2,073,000	1,318,000	1,074,000	1,336,000	801,000	749,000
Total Commercial Crop	4,256,000	3,035,000	2,261,000	2,431,000	2,076,000	2,214,000
Add quantity consumed and burnt South of the Potomac and Ohio Rivers, estimated by New York Shipping List	91,000	80,000	173,000	168,000	157,000	100,000
Estimated Total Growth	4,347,000	3,115,000	2,434,000	2,599,000	2,233,000	2,314,000
Exports.						
Great Britain	2,346,000	1,476,000	950,000	1,129,000	1,216,000	1,262,000
France	170,000	347,000	225,000	197,000	198,000	227,000
Other foreign ports	649,000	351,000	243,000	240,000	143,000	72,000
Total Exports	3,134,000	2,174,000	1,418,000	1,636,000	1,557,000	1,555,000
Consumption.						
Taken for home use North of the Potomac and Ohio Rivers	1,073,000	777,000	822,000	800,000	697,000	604,000
Ditto South of the Potomac and Ohio Rivers and burnt	91,000	85,000	173,000	168,000	157,000	128,000
Total consumed in the U.S. (including burnt at the Ports)	1,164,000	862,000	995,000	968,000	854,000	732,000
Stock at all Ports	1,49,000	65,000	11,000	37,000	80,000	282,000
Receipts of New Cotton prior to 1st September	500	546	1,082	1,075	200	150

New York, Sept. 8.—According to Messrs Moffatt, Davids, and Co.'s report, the week's receipts of cotton at all United States' ports have been 9,000 bales; ditto, since 1st September, 12,000 bales. Shipments to England, 10,000 bales. Total since 1st September, 13,000 bales. Stock at all ports, 96,000 bales. Middling Upland, 9¼d, cost and freight, per steamer.

New York, Sept. 12.—The receipts of cotton at all United States' ports for the last four days have been 6,000 bales. Shipments to England, 9,000 bales. Middling Upland, 9⅞d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS

Manchester, Sept. 14.—This market has again been very tame and inactive during the week, buyers showing a great reluctance to enter into new contracts at the prices asked, which sellers are obliged to adhere to firmly in consequence of the strong position and large business doing in cotton. As a consequence of the very limited business done of late, stocks have begun to accumulate in many hands, chiefly cloth, and contracts running out are not being renewed. There is therefore in some quarters a pressure to sell, and occasionally a slight concession is made to effect sales. The failures which have lately occurred here and in Glasgow have cast a gloom over the market, and contributed to increase the dulness, and the advices from our large eastern markets being still unsatisfactory, buying for that quarter is still very restricted. The home trade are only supplying their pressing wants as prices are considered to high to buy largely for future wants. Altogether the trade of the district is in a very unsatisfactory state both for producers and merchants. The market closes very tame, and prices steady.

Messrs. Alexander Collie and Co. received the following telegram from Manchester yesterday:—No change since Tuesday. The market remains quiet, business being on a very restricted scale.

BRADFORD.—The transactions in wool have been very few and small. Staplers still hold out for extreme quotations, which tend to prevent business. The limited business doing is chiefly in good weathers and lustre wools. The yarn market is not active. Lustre yarns on the tube meet with considerable inquiry. The transactions in the piece market are very restricted. Prices are very firm.

LEEDS.—We have had a buoyant market for woollens. The appearances of satiety among buyers which first presented themselves about a fortnight ago seems to be passing off. The prices are satisfactory to the makers, and further orders were taken upon the same terms. Every other branch of the trade was brisk, and especially heavy goods.

ROCHDALE.—The business done was not at all in proportion to the number of merchants present. The conclusion these came to was that manufacturers are not at all likely to give way with regard to prices. The millowners, for their part, are fully employed, and their stocks of wool will about finish their old orders out of the way, and no more. The market for Yorkshire goods is in much the same condition as that for flannel; there were no sales, except at the most extreme rates yet known. Wool only moves out of stock in small parcels, and it is getting dearer.

BELFAST.—Flax—Supplies not extensive. Demand steady for all descriptions. Prices rule very high. Yarns—Demand during past week has been animated, while the business accomplished has been to a very large extent. Prices still tend upward; in some cases an advance of 1½d to 3d per bundle has been realised. Linens (brown) powerloom—For many descriptions demand has been of a fair steady character. Handloom linens—Approved makes of light linens for bleaching and linen handkerchiefs changed hands freely at late full prices, and stocks of same are very small. Bleached and finished linens—Demand for home consumption continues very good. Prices tend upward.

DUNDEE.—Our flax market is very firm, and during the last few days there has been considerable inquiry for some of the better descriptions, for which holders require full prices. The demand has been chiefly from buyers at a distance; consumers in this locality, being in general well supplied by their recent importations, operate sparingly untill they see how the market is likely to be affected by the result of the present crop. Tows are without change. The market for jute continues very quiet, and prices of common qualities have still a drooping tendency. The yarn market has been quiet during the week, and although prices of flax and tow yarns are very steady, there has not been much activity in business. Jute yarns have been in moderate demand at former prices. An active business continues to be doing in linens, and manufacturers are all actively employed. Jute goods also continue to be in extensive request.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, SEPT. 1.

The markets for flour and grain have been unsettled during the past week, and close depressed under adverse foreign advices and high rates of ocean freights. The receipts of flour have been rather more liberal, including some lines of shipping extras, whose scarcity has been quite remarkable, but the limited supply of freight room has held the shipping demand in check. The local trade has been very good, and some of the favourite brands from old wheat have become very scarce, causing some irregularity in prices. The lower grades are more plenty and lower. Rye flour has been quite active for home use, and corn meal has met with a moderate demand. To-day, with dull accounts from Liverpool, prices fell off 10c per barrel. Western extra seconds, from winter wheat, sold at $5.50 to $5.65 for good lines of extra State. $5.70 bid and $5.80 asked. Wheat has arrived more freely, and although these supplies have been met by an increased export demand, prices have not been fully sustained. There has been a pressure to sell in the past few days, owing to a decline in Liverpool and increased receipts at the Western markets, and prices have given way 5c to 7c per bushel. There being an end to the speculative "corner" at Chicago, the supplies at Western markets are being shipped eastward with more freedom, but the quantity nearby is not large, and receivers are in some hopes of seeing lower freights during the coming week. To-day the market was quite depressed, the principal sales being at $1.30 for good No. 2 spring, $1.40 for prime red winter, $1.45 for amber do, and $1.52 for choice white Michigan. Corn has declined; the supply has been in excess of the home demand; speculation has been dormant, and the export demand held in check by the difficulty of securing freight room, the orders for wheat being apparently the more pressing. The receipts of corn for the remainder of the season are expected to be somewhat reduced, and some holders do not offer their samples at current prices. Western mixed closes at 65½c to 66c, the lower figure ruling. The movement in breadstuffs at this market has been as follows:—

RECEIPTS AT NEW YORK.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

Although the weather has been somewhat unsettled, there has been little interruption to harvest operations, and there is now but little corn standing in the Southern and Midland districts; while by far the larger proportion has been secured in the North. Many complaints have reached us of the scarcity of labour, which has been felt severely in some districts. On the whole, the wheat crop has been secured in excellent condition, but the opinions in regard to the actual yield vary very much. It would appear that the out-turn is more than usually variable, and while there is no doubt that the deficiency is considerable there is great difficulty in estimating its extent. Under these circumstances the grain trade has been in an uncertain state, but holders so far have had a decided advantage owing to the short supplies of English produce offered at market. Prices are fully 2s per qr higher for all descriptions of wheat, but it is probable that the highest currencies have now been reached. As before shown, there is no good reason to apprehend the failure of supplies from abroad, more particularly as the French demand will not be extensive, and it seems certain that our requirements for the ensuing season will be fully provided for. Flour has also ruled firm; country sacks have been held at 40s, but to-day 39s was the extreme price paid.

Maize and oats have tended upwards, while sweet grinding barley has been in steady demand at full currencies. Malt has remained nominally unchanged in the absence of important business. Beans and peas have sold on former terms.

IMPORTS OF GRAIN, &c., INTO THE UNITED KINGDOM.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 30 grain

and seed-laden vessels have arrived at ports of call, viz.:—12 wheat, 14 maize, 1 barley, 3 rye, 3 beans, 2 linseed, 1 rapeseed, 2 cottonseed, 1 oilcakes. The floating grain trade was early this week very animated and firm in tone. Wheat to-day quiet. Fine cargoes have been actively inquired after, at an advance of 1s to 2s on the week. Large speculative transactions have taken place in American wheat to arrive. Maize has been in active demand, and 1s to 2s dearer. American corn to arrive is 6d to 1s dearer. Barley, with a restricted choice business, has been limited. Rye has improved in value of 1s to 2s on the week. The reported sales are as follows:—Wheat—20 arrived cargoes Berdianski 50s 6d to 54s 1½d; Marianopoli, 51s 6d to 54s. Russoff Ghirka, 49s 6d; new coast Ghirka, 53s; hard Taganrog, 48s 6d; Ghirka, from Nicolaieff, 50s to 52s; Ghirka, from Yeisk, 49s to 49s 6d per 492 lbs; No. 1 spring, from New York, 52s 9d and 53s; ditto, from Montreal, 53s per 480 lbs. On passage, 2 cargoes Saidi, from Alexandria, 48s 6d, and No. 1 spring, from New York, 54s per 480 lbs. Shipped or to be shipped about 24,000 quarters red winter, 56s and 57s; No. 1 spring, from New York and Montreal, 54s and 54s 6d per 480 lbs American terms. Maize—25 arrived cargoes Odessa, 31s 6d and 33s 6d; Galatz, 31s to 34s; Wallachian, 29s 9d to 31s 6d per 492 lbs; Danubian, 28s 3d and 31s 6d; Bulgarian, 28s 7½d and 29s; mixed American, from New York, 31s 9d to 32s 6d; ditto, from Philadelphia, 32s per 480 lbs. On passage, 5 cargoes Odessa, at 29s; New Galatz, 33s; Old Galatz, 34s 6d and 35s per 492 lbs; mixed American, 32s 6d per 480 lbs. Shipped or to be shipped, about 24,000 quarters, at 33s per 480 lbs. Barley—1 arrived cargo Azow, from Taganrog, 29s 6d; and 1 cargo new Danubian arrived in London, 27s 9d per 400 lbs. On passage, 1 for Odessa, 27s 3d. Shipping, 2 cargoes Danubian, 27s 6d and 28s per 400 lbs. Rye—2 cargoes Azow, from Taganrog, 31s and 32s 6d per 480 lbs. Linseed—A large business has been done at 6d to 1s advance on the week. Arrived 5,000 quarters Odessa, 53s; and 3,755 quarters Azow, from Taganrog, 53s per 424 lbs. On passage 17,500 quarters Azow, from Taganrog, 60s to 60s 3d; and 5,000 quarters Black Sea and Azow, 59s and 59s 3d per 424 lbs; and 1,000 tons East India, from Calcutta, 61s 6d to 62s 6d per 416 lbs. Shipped or to be shipped, 700 tons East India, from Calcutta, 61s 1½d to 61s 9d per 416 lbs. A.T. Rapeseed steady at late rates. Arrived, 1,060 qrs Azow, from Taganrog, 37s 6d for 424 lbs; 50 tons Guzerat, 73s 3d, and 100 tons yellow mixed Calcutta, 72s 6d per 416 lbs; and 50 tons ordinary brown Calcutta, 66s 9d. Shipped or to be shipped, 1,300 tons ordinary brown Calcutta, 66s 9d to 67s per 416 lbs. On passage, 3,000 qrs cultivated Dunabura, 67s 9d; 3,000 qrs wild Azow Taganrog, 40s per 424 lbs; and 200 tons ordinary brown Calcutta, 67s and 67s 6d per 416 lbs. Cotton seed quiet, at about late rates. Arrived, 1,879 tons Egyptian, from Alexandria, 8 10s 3d per ton.

COLONIAL AND FOREIGN PRODUCE MARKETS.

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market is exceedingly dull with prices about 6d per cwt lower in several instances. According to the latest return the stock in the kingdom was about 55,000 tons less than last year, and it will probably show some further reduction before the supply of beet sugar is available. The landings at this port last week were 4,360 tons, the delivered 4,500 tons, leaving the stock at the close deficient by 30,400 tons. Sales of West India to yesterday amounted to only 600 casks. **The Barbadoes by auction, including 1,956 bags was bought in or withdrawn.** Part of the latter since sold at 28s to 29s. A few parcels low or wn sorts have found buyers at easier rates, and grainy Mauritius shows a slight decline. Since last Friday the imports have been upon a very moderate scale.

Mauritius.—By private contract about 3,000 bags grainy yellow have sold at 37s 6d. 3,956 bags grainy white by auction were withdrawn.

Bengal.—1,650 bags chiefly sold at 22s 6d to 28s 6d for brown to low yellow Dunsean.

Penang.—687 baskets partly found buyers at 22s to 23s for soft brown. **Very low pasty brown taken in at 21s.**

Manilla.—350 bags soft brown sold at 24s 3d; by private contract 14,000 bags reported: Taal, 20s 6d; Zebu, 22s 6d.

Other Foreign.—287 casks 66 barrels Porto Rico by auction were taken in above the value. 248 bags Egyptian sold at 29s 6d per cwt.

Floating Cargoes.—Two of brown Bahia at 21s 3d to 21s 6d for cases and bags; one at 20s 3d for bags. One of good brown Bahia at 23s 6d for Liverpool.

Refined.—**The market continues unsettled. Dry goods are quoted** 39s upwards for common grocery sorts. 7,595 Dutch loaves offered **by auction were chiefly bought in at 39s. A few lots of very low quality sold at 36s 6d to 37s per cwt. Pieces are about the same as last week.**

MOLASSES.—130 puncheons Antigua have sold at 12s. 295 barrels American treacle by auction were taken in at 15s.

RUM.—**There has been a steady demand for West India at fully last week's quotations. Sales of Jamaica at prices varying from 3s 4d to 3s 10d per gallon. Common kinds remain firm, and a moderate business is reported. Leewards, 1s 8d to 1s 9½d up to 2s for small packages. Demerara, 1s 9½d to 1s 11d. 400 puncheons Cuba, at 1s 10d per proof gallon.**

COCOA.—No change can be quoted in this market. The public sales have been small. 203 bags Trinidad chiefly sold at steady rates for the good, and about the same as before for other qualities; middling to fine red, 75s to 90s. 600 bags good Guayaquil were taken in at 57s, and 230 bags Surinam at 60s to 65s. Small sales of Guayaquil are reported at 50s to 55s per cwt for common to fair qualities.

COFFEE.—**The advance last quoted is generally maintained, but the continental buyers operate less freely, and the next sale of the** Netherland's Trading Company, fixed for the 20th inst., will contain 124,000 bags Java, 3,700 bags Palang, and 5,000 bags Rio—total, 132,700 bags, against 115,600 bags last year. 1,457 casks 121 barrels 1,512 bags plantation Ceylon also found buyers. Common kinds being rather easier, good at steady prices. Pale and grey, 64s to 74s 6d; low middling to middling coarry, 68s to 73s; good middling to fine, 76s to 85s, including held. 949 bags native were part sold at 59s to 59s 6d for ordinary and small, the remainder being held above the value. 35 casks 510 casks 1,147 bags East India went at last week's rates: Wynaad, &c, 64s to 71s; held, 72s to 79s; native sorts, 59s 6d to 61s. 140 casks 177 bags Courtallam sold at 63s to 68s; held, 69s to 72s. 376 bags Manila at 60s 6d to 62s. 1,115 bags Guatemala, 59s 6d to 60s 6d. 1,212 bags Costa Rica, 60s 6d to 70s. 104 bags Santos at 64s to 68s per cwt. The deliveries continue large.

TEA.—The market has been steady, and the small quantity of new season's import brought to auction has sold upon former terms. Further public sales are announced, and fresh imports of black and red leaf have taken place. The Indian tea sales have gone off with great spirit. Of 6,254 packages in the catalogues, about 4,800 of these had sold privately. The average may be quoted 14 to 16 per lb. Assam Company's pekoe of the finer qualities sold at 2s 4½d. Broken teas sold 1d to 4d dearer. The next sales will be held on the 26th instant. By private contract fine season's congou are in demand. Moderate red leaf went rather slow past.

ICE.—A fair amount of business has been transacted, but the sales are in many instances not fully reported here other purchase, and the brokers weekly statement is not complete to Thursday evening. It does comprise part of the previous week's transactions. At auction, 6,826 bags Bengal about two-thirds sold, from 10s 9d to 11s 6d for middling to good 0 21 white. 457 bags Siam realised 8s 9d. Sales have been made privately of low white Bengal, at 10s, ex quay. Rarce,

Ballam, &c., at 9s 6d to 9s 9d, ex quay; Arracan equal to 10s 3d, landed; and Madras at 9s 7½d to 9s 9d, ex quay. A floating cargo of Nocrancie off the coast at 9s 6d for the continent; two of Rangoon afloat at 10s 3d to 10s 6d per cwt for the same.

IMPORTS and DELIVERIES of RICE to Sept. 9, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports ..... tons	50560	36360	55450	47900
Deliveries	76900	51300	43940	38000
Stock	27100	34900	44200	28450

SAGO.—317 bags small grain, only partly sold, at 15s to 15s 6d per cwt. The bulk was bought in.

SAGO FLOUR.—1,773 bags Singapore were taken in.

TAPIOCA.—1,289 packages were only partly disposed of, including a few lots of pearl at 20s 6d per cwt, and some very good rough Singapore at 2¼d to 2⅜d per lb.

BLACK PEPPER continues steady. Sales have been effected privately in Penang at 6⅞d cash, 6 1/16d to 6⅞d in course of landing, and 5⅞d afloat. A small quantity of Singapore at 6¼d. 63 bags Aleppy by auction sold at 6½d. 389 bags Penang kind, from Singapore, were bought in at 6⅜d per lb.

WHITE PEPPER.—Business has been done during the week at 9⅜d cash for Singapore. The sound portion of 870 bags Singapore, and 159 bags Penang, by auction, was bought in above the value, but the former since part sold at 10d to 10⅛d. Yesterday there was a demand for export, at 10⅛d to 10⅜d per lb, being the highest price yet attained.

OTHER SPICES.—At the public sales 123 cases nutmegs partly found buyers. Small brown, 2s 10d to 2s 11d. 87 to 85, 3s 1d to 3s 2d; 78 to 70, 3s 2d to 3s 4d; 68 to 66, 3s 9d to 3s 10d; defective, 1s 6d to 1s 10d. The advance last quoted was not in all instances maintained. 7 cases fair Penang mace sold at 4s 6d to 4s 7d. 3 cases low Cochin at 3s 11d to 4s. 16 cases low Java kind withdrawn. 21 cases low Amboyne cloves were taken in at 7d. 2 cases good Penang sold at 1s 6¾d per lb. Zanzibar cloves firm. 33 bales Ceylon cinnamon were withdrawn. Of 172 packages China a few lots only sold at 10½d. 327 bags bark and chips bought in. 159 bags pimento sold at 2⅜d to 2¼d per lb. 629 cases Cochin ginger part sold: rough, 45s to 47s; part scraped, 49s to 58s; two lots fine bold, 6*l* 5s and 8*l*. 341 barrels Jamaica sold steadily: low to good bold, 42s to 87s per cwt.

SALTPETRE.—The business on the spot has been very small. Fine Bengal is selling at 29s to 29s 3d. About 200 tons have sold for arrival at 28s 6d to 28s 9d per cwt, usual conditions, according to date of sailing. The market may be quoted firm.

IMPORTS and DELIVERIES of SALTPETRE to Sept. 9, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported ..... tons	8270	7530	7570	5630
Total delivered	7950	10500	6900	7060
Stock	2710	1860	4850	6700

Deliveries last week, 208 tons.

INDIGO.—There are now 10,800 chests declared for the sales on the 9th proximo. The market continues steady.

OTHER DRYSALTERY GOODS.—There have been few transactions reported during the week, a quiet tone pervading the market for cutch and gambier. The former has sold at 21s 3d to 22s. Sales in safflower and turmeric have been unimportant. A parcel of Myrabolanes sold at 12s 6d to 15s 6d per cwt. A good demand prevails for cochineal.

SHELLAC.—162 chests sold at 6*l* 17s 6d to 7*l* per cwt for good orange, being about the former value. Privately, fine button has sold at 7*l* 15s to 8*l* per cwt.

METALS.—These markets have shown some tendency towards improvement, and are now very steady. The chief feature of the week has been the increased demand for tin, latest sales establishing an advance of about 2*l*. Straits, 131*l* to 133*l*. A few sales have taken place for arrival. English firmer. Tin plates have continued in good demand. A large business in Scotch pig iron, latest transactions yesterday being at 60s 9d cash. Shipments as compared with last year exhibit an increase of over 30 per cent. Manufactured fully supports the late advance in price. Few sales are reported in spelter. Silesian firm at 18*l* 10s. Belgian sold to arrive at 18*l* 5s. Chili coppers meets a steady demand. Sales at 67*l* 10s to 69*l*. Walaroo and Burra, 66*l* 10s to 77*l* per ton. No change in English. London rolled sheet zinc sold by auction yesterday at 21*l* 15s to 22*l* per ton.

MOTHER-O'PEARL SHELLS.—At the public sales this week Manila sold at 8*l* 10s to 9*l* 2s 6d; Macassar, 11*l* 7s 6d; Freemantle, 10*l* to 11*l* 2s 6d; Bombay, 6*l* 10s to 8*l* 7s 6d; wormy, 3*l* 18s to 5*l* 15s; sound Egyptian, 4*l* 5s to 5*l* 6s per cwt.

HEMP.—The high rates required for Manila have rather checked business; but 4,028 bales by auction on Wednesday were partly sold at some advance. Brown and common quality, 40*l* to 46*l*; fair to very good, 48*l* to 52*l*. A few lots of white, 65*l* to 65*l* 10s. 700 bales Sunn partly found buyers at 14*l* to 26*l* 15s per ton. 225 bales Coconada were bought in.

JUTE.—There is not any further change in this market, which remains without animation, owing to further liberal shipments and the want of active demand in Dundee. Several contracts have been made to arrive, including some for Dundee. Prices have ranged from 17*l* 15s to 26*l* per ton.

LINSEED.—During the week there has been a good business done. Calcutta to arrive at 61s 3d to 62s 6d, according to date of shipment; on the spot or now landing, 62s 9d to 63s. Several cargoes of Azoff reported sold at 59s to 60s per quarter. Bombay is scarce.

OILS.—Olive quiet but firm. Fish oils dull. Sperm nominal at 80*l* per tun. Linseed, owing to scarcity, has advanced to 34*l*. Forward deliveries, 33*l* 5s to 33*l* 15s. English brown rape after declining to 43*l* has recovered, closing at 43*l* 10s to 43*l* 15s in all positions. Cocoa-nut—Ceylon is in good supply and quoted at 38*l* to 39*l*, but the Cochin oil is likely to keep high. Palm remains as last quoted, viz., Lagos 37*l* per ton downwards.

TURPENTINE.—American spirits has met a speculative demand up to 39s, and holders now require 40s per cwt.

PETROLEUM.—A large business done. Price on the spot 1s 7d to 1s 7½d. Several cargoes have sold, including one near at hand, the latter at 1s 6½d per gallon.

TALLOW.—The market for Russian remains inactive from the cause so often alluded to, viz., the full supply of Australian. Quotations of the former are rather weaker than on Friday last: New Petersburg, 45s; October to December, 44s 9d to 45s; January to March, 45s 3d to 45s 6d; March, 45s 9d to 46s; old on the spot, 44s per cwt. About 2,200 casks, Australian, are advertised for public sale to-day.

PARTICULARS of TALLOW—Monday, Sept. 11. 1871.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is still flat. Sales of West India 458 casks. For the week 1,031 casks 808 boxes Havana by auction were withdrawn. 287 tierces Trinidad concrete bought in at 28s per cwt. A floating cargo of Havana, No. 12½ to 13, sold for the United Kingdom at 29s 3d per cwt.

COFFEE.—278 casks 268 barrels and bags plantation Ceylon by auction sold at fully previous rates. 885 bags East India, including native Cochin, at 59s to 59s 6d. 630 bags Guatimala at 61s 6d to 65s 6d, and 1,678 bags Costa Rica at 62s to 72s per cwt.

TEA.—At the sales to-day Ping Suey greens realised fair prices.

RICE.—A floating cargo of Bassein at 10s 4½d per cwt, ex quay.

WHITE PEPPER.—Sales in Singapore at 10½d to 10⅝d per lb.

BLACK PEPPER steady.

SALTPETRE.—50 tons afloat, at 28s 9d per cwt.

SHELLAC.—200 chests by auction were chiefly bought in. A few lots fine orange sold at 7*l* 7s 6d per cwt.

DRYSALTERY GOODS.—187 bales Bengal safflower of the new crop sold at 10*l* to 13*l* 17s 6d per cwt. 125 chests lac dye part sold at 7½d to 1s 1d per lb. 2,043 bags Bengal turmeric at 18s 3d to 18s 6d per cwt, being lower. 804 boxes cutch were bought in.

METALS.—Tin was depressed at one time, but closes firmer at 133*l* cash. A large business in Scotch pig iron at 61s 3d to 61s 4½d per ton cash.

OIL.—At auction 170 casks East India fish were taken in at 30*l* per tun. 35 casks low quality palm sold at 30*l* 10s to 31*l*. 101 casks Cochin cocoa-nut at 50*l* 15s to 51*l* per ton. 438 casks other kinds bought in.

TALLOW.—2,061 casks 176 cases Australian by auction all sold. Mutton, middling to fine, at 42s to 44s 3d; beef, 41s 6d to 42s 6d; mixed melt, 42s to 43s; and inferior, 36s to 39s.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that Lisbon grapes are coming forward in quantity, and have a good sale. Almeria daily expected. Malaga lemons of the new crop have arrived, but too green for immediate use. Naples and Sicily in demand. Large arrivals of fresh walnuts from Holland and Belgium. More inquiry for Brazil nuts.

DRY FRUIT.—A farther reduction in low currants has been the feature of the week. Fine are a shade firmer. The business of the week has been extensive, and deliveries large. Valencias are quiet, but not many in the market are in keeping condition. Sultanas cheap, and figs are good, and when later arrivals take place will meet a good demand.

ENGLISH WOOL.—Prices quite recovered from the little check of last week.

COLONIAL WOOL.—The public sales commenced to-day with very large attendance of home and foreign buyers; competition brisk; prices about 1d per lb dearer than close of last sales.

FLAX.—Market firm.

HEMP.—Market very firm both for Russian and Manilla, and higher prices again paid this week.

SEEDS.—The seed trade rules without change, but quotations are firm.

SILK.—Prices easier: market quiet.

TOBACCO.—There has been a trifle more doing in the market in North American tobacco, but buyers generally hold off from increasing their stocks, preferring to wait for a better assortment, which is expected will be found when the last import from the States has been sampled; prices continue unchanged. Advices furnish very unfavourable reports of the growing crop. In other growths there has been a fair business done.

LEATHER.—There was a small supply of fresh leather at Leadenhall on Tuesday, with a fair demand for most descriptions of goods, without any alteration in prices. A good inquiry existed for English bellies, prime shoulders, light shaved hides, and calf skins of middling weights, which were in very short supply.

METALS.—We have firm markets without any special activity. Copper has been in rather better demand, which has given an improved tone to the market. Iron has become still firmer from the complications with the workmen. Tin has fluctuated considerably in consequence of a sale announced for next week, by tender, of over 300 tons of Straits, but the depression first experienced has been more than recovered. Lead and spelter are steady in price, but in small demand. Tin plates are in good request.

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 11.—The total imports of foreign stock into London last week amounted to 29,161 head. In the corresponding week in 1870, we received 12,009; in 1869, 15,310; in 1868, 6,285; and in 1867, 12,144 head.

The cattle trade to-day has been in a quiet state. A fair supply of beasts has been on sale, but foreign breeds have predominated and really choice stock has been scarce. There has been a want of ani-

mation in the inquiry, and the value of the best Scots and crosses has not exceeded 5s 6d to 5s 8d per 8lbs. Foreign stock has realised 5s 2d and occasionally 5s 4d per 8lbs. There has been only a moderate supply of sheep in the pens. Sales have progressed quietly, on former terms. The best Downs and half-breds have made 6s 8d to 6s 10d per 8lbs. Calves have been in fair supply and moderate request, at about late rates. Pigs have sold at previous quotations.

SUPPLIES OF STOCK.

	Sept. 12, 1870.	Sept. 11, 1871.
Beasts	3,015	4,780
Sheep	13,770	23,680
Calves	64	230
Pigs	60	90

METROPOLITAN MEAT MARKET.

Prime small ditto	5	0	5	4	Large pork	3	8	4	4
Veal	5	0	5	4	Small pork	4	8	5	4

HOP MARKET.

BOROUGH, Friday, Sept. 15.—For new hops, which arrive freely, a steady demand has prevailed, while other descriptions are purchased to a fair extent at previous quotations. Reports from the plantations continue unfavourable. Mid and East Kents, 60s to 140s; Weald of Kents, 60s to 130s; Sussex, 60s to 95s; Farnham and country, 90s to 120s; Olds, 20s to 90s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Sept. 15.—Only moderate supplies of potatoes have been on sale. The trade has been quiet, at our quotations.—Regents, 70s to 85s; Shaws, 60s to 70s; Kidneys, 70s to 80s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 15.—Our market has again been more animated this week, a considerable amount of business has been done, and prices rule very firmly. Our fifth series of public sales of East India wool will open on Tuesday next, the 19th inst., the arrivals for which are about 14,000 bales.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 15.—There was a fair attendance at this market to-day, but the trade ruled quiet. In wheat a moderate business was done at 1d decline. Flour was steady and unchanged. Maize, 32s 6d, steady, and in fair request. Beans, barley, peas, oats, and oatmeal were unchanged.

WAKEFIELD, Friday, Sept. 15.—At this market to-day the supplies of new grain were very small. Millers were not eager to buy. White wheats are in fair request at 1s per quarter advance, but best is more difficult to sell at that improvement. The supply of barley is not sufficient to give fair quotations. Prices range from 36s to 40s. In other grain there is no alteration.

The Gazette.

BANKRUPTS.

TUESDAY, Sept. 12.

James Denlens, Adam street, Adelphi, textile salesman.
Richard A. Hardman, Stanley street, Pimlico, gentleman.
Edmund John Niemann, Brixton hill, artist.
Stephen Pusey, Finchley New road, victualler.
John Revell, Cornwall road, Westbourne park.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by their process, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the Iron from decay or incrustation. It should be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Barytes, in proportions varying from ten to thirty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never willingly use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON, WHITE LEAD, OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"For public schools and all rooms occupied by children there will now be no excuse for using poisonous paints. Parents have remarked that their children on returning from the country to newly-painted houses have suffered in health. The reason is evident—the breath extracts the insidious poison from paint, and the lungs draw in the deadly vapour."—JOHN BULL, September 14, 1850.

September 15, 1871.

NEW WHEAL SPEEDWELL TIN MINE (Limited).

Now that the price of tin has been raised so as to render the working of tin mines once more about one of the most profitable businesses in which capital can be invested, the attention of the outside public is being strongly directed to the oldest and what may be really termed the legitimate field of mining enterprise and speculation, the tin mining districts of West Cornwall. The advance in the price of shares in Cornish tin mines during the past month has been astonishing, and many investors have more than doubled their money during that time. For example, Carn Brea shares, which a very short time ago were unheeded at a price of about £20 per share, cannot now be bought under £100, and will doubtless soon go higher still. Indeed, it is the opinion of competent judges that now tin mines have begun to go up they will continue doing so for some time to come. Messrs LISCOMBE and CO., of 39 South Castle street, Liverpool, would therefore draw the attention of their clients and the public to the New Wheal Speedwell Mine, one of the most promising setts in a district which is unsurpassed for the value of its metalliferous deposits, and which is surrounded by mines which either are paying or have paid enormous profits. It immediately adjoins and is on the same lodes as Old Wheal Speedwell Mine, which on a small outlay returned upwards of £160,000 to its fortunate proprietors. Among other rich neighbours may be mentioned the Marazion Mines, which returned over £160,000; Great Wheal Fortune, nearly £600,000; Great Work, £700,000; Whea Neptune (which is almost immediately contiguous to New Wheal Speedwell), £400,000; and a score of others with nearly as large returns. Indeed, such examples as these might be referred to without number, but the enumeration of all such would occupy too much space. Messrs Liscombe will only remind their clients that it has been computed by the best authorities that the gross returns of this district may safely be estimated at not less than six millions sterling. The New Wheal Speedwell sett is traversed by all the most productive lodes of the neighbouring mines, and is even now in a position to return a large quantity of tin before the great deposits of ore are reached. Messrs Liscombe beg that no time may be lost in applying for shares, as very few remain on hand, and they may speedily be expected to go to a good premium.

FINE FLAVOURED STRONG BEEF TEA at about 2½d a pint. Ask for LIEBIG COMPANY'S EXTRACT OF MEAT, requiring Baron Liebig the Inventor's Signature on every jar, being the only guarantee of genuineness.

Excellent economical stock for soups, sauces, &c.

KINAHAN'S LL WHISKY.

THREE PER CENT

The raising of the Bank rate from 2 to 3 per cent. this week was a very unexpected event. In the best informed quarters on the previous day, at least until the very close, the opinion was that though money was getting more and more in demand, yet the Bank was so strong that there would either be no rise for a week, or at most a very slight rise. On the Stock Exchange, where there has lately been a great deal of speculative buying, there was more appprehension of dearer money, but still more fear of so great a change. Still, the action of the Bank, though unexpected, is quite justified by the event, and the facts which have since become known. The demand for money, both at the Bank and in the open market, has continued strong at the advanced rates. Possibly this is to some extent the result of precautions on the part of the public, who may be over-providing themselves; but so far as we can learn the current requirements are very large, and quite up to the supply of money. This demand is the best justification of the step which has been taken. To have continued to supply money at 1 per cent. less than the public were willing to pay, would only have ended after a little in a still more catastrophic change than what has occurred.

The point which is most difficult to understand in connection with the advance is the state of the Bank account. Since the rate was reduced to 2 per cent. in July, the Bank has not got much weaker, and it is still very strong. The liabilities in the Banking department—

	£
On the 12th of July were	32,712,000
They now are...	27,325,000
Decrease	5,387,000

The reserve, on the other hand—

	£
On the 12th of July was	16,646,000
It now is	13,711,000
Decrease	2,935,000

The absolute amount of the reserve has diminished; but relatively to the banking liabilities, the Bank is rather better than it was when the rate was lowered. The stock of bullion in both departments, 23,507,000*l*, though it is nearly three-and-a-half millions less than it was in July is nevertheless very large. In ordinary circumstances such a position of the Bank would have enabled it to stand a farther strain upon its resources before it raised the rate. The circumstances however are most unusual. The private securities have increased in the week over 1,300,000*l* and are now 17,781,000*l*, only a million less than they were in July, although the Bank's deposits are so much less. So large an increase in one week, with some prospect of its continuance, could not but excite alarm, coupled with the knowledge otherwise obtained that the reserve was immediately to be reduced by a drain of gold for export. There is some uncertainty as to how much gold was really booked to go away before the rate was raised; but the known German demand was so large, and was accompanied by so many minor demands, that the Bank directors might well have feared they would not be in time if they deferred advancing the rate a week. No harm is done by being a little premature.

There is naturally some anxiety after so sudden a change as to what the future of the money market will be. On one point there can be no doubt. We shall probably not see 2 per cent. again for a good while to come. The present rise was preceded by a general advance in the German rates for money, and as the demand has been a growing one in England too for some time, we conclude that the period of 2 per cent. is for the present at an end. As we have lately remarked more than once, the Bankers' Clearing-house Returns show that we are doing a large business, and the last Board of Trade Returns, making every allowance for the change in their form, confirm this. Our imports—

	£
In eight months of 1871 have been	215,[illegible],000
— 1870 were	[illegible],000
Increase	25,[illegible],000

Our exports have also increased largely, especially of late.

Our chief raw materials—wool, cotton, and corn—are likewise dear, and owing to the deficient harvest, our corn imports are likely to be above the average. In addition, there is a fair amount of commitments in foreign loans during the next few months. In these circumstances, and with the usual autumn pressure before us, it is not likely that when the rate has to be raised in September it will go down again very soon.

The doubtful point is whether the Bank minimum may not be put up again soon. On this head we can only say, that the whole circumstances, as now disclosed, are such as to require some caution. We are still of opinion that the German demands must be nearly satisfied. M. Thiers stated last week in the Assembly that he had preferred making an arrangement about Alsace and Lorraine, as a means of securing the evacuation of additional provinces, to a farther payment of the indemnity for the same purpose, because the payments already made had tried the money market to the utmost, and to pay more now would produce a serious disturbance in it. It is also to be considered on the same side that the continental exchanges, since the rate was put up, have turned rather more in our favour. Still the exact use which the German Government may make of its money power cannot be definitely foreseen, and after what has occurred, it will be udicious to wait a few days for the result of the present advance.

THE PRESIDENT OF THE FRENCH REPUBLIC.

"M. Le President de la Republique," as M. Thiers is now officially termed, is certainly in a political position which nobody has any reason to envy. And yet we suspect that some of its chief charms for him consist in precisely those elements in the situation on which any English statesman would look with the most dismay and even disgust. M. Thiers' immediate task is to "manage" a multitude of negotiations, the parties to which are hardly even capable of appreciating sound argument and sober reasons, but are only to be swayed as a horse is swayed by bit and bridle, or Leviathan by the hook of Job's vision. Now it is quite certain that the faculty of appreciating the weight of sound arguments on any side of a question is not one of M. Thiers' fortes. He has all his life sacrificed reason to effect, and has never mastered even those simplest of scientific problems which ought to be the very alphabet of statesmanship. But undoubtedly he is, on the other hand, most adroit in the task of playing off antagonistic powers against each other, so as to obtain for his own Government the maximum of influence and success; and ever since he undertook to make peace with Germany, and to hold the balance, if possible, between the various parties of France, this has been his daily and nightly task, often achieved with a neatness and brilliance which a stronger man acting on principle, and therefore limited by principle, would emulate in vain. Ever since his advent to power, M. Thiers has been pitted first against Prince Bismarck, in the effort to give as little, and get rid of the enemy as soon, as possible; next against the Royalists, backed by a Royalist Assembly, in the effort to prevent a Monarchical restoration; lastly, against the Republicans, backed by a very large and active and the only increasing party in France, with a large part of the army behind them, in the effort to prevent the dissolution of the present very Conservative Assembly, and a general election favourable to Liberal views. The very difficulty which would have embarrassed any statesman of fixed and large views, the impossibility of laying any foundation of principle for his procedure, the absence of a public opinion to which any such foundation could appeal—has been to M. Thiers a clear gain. As to the negotiation with a conqueror, of course that is essentially an empirical sort of negotiation, a matter which depends mostly on the political views and wishes, the vanities, the fears, the calculations, of the Power which has the power in its hands to dictate terms. M. Thiers is just the man to enjoy sounding these views, and to show considerable skill in playing off those which are favourable to his own country against those which are hostile. He has had the keenness to see how much the Germans prefer him to more revolutionary statesmen, and to make great use of that perception with the timid and hesitating Assembly from whom he derives his power. He has had the tact both to make Prince Bismarck strengthen his hands against ambiguous supporters, and to make his open enemies strengthen his hands against Prince Bismarck. But perhaps his most subtle bit of negotiation in this way has been that last piece of clever political manœuvre in regard to the Alsatian treaty, in which M. Thiers had the art to turn his own crass economical ignorance to doubly good account, by using it on the one hand as a weapon for extracting very great military concessions from Prince Bismarck, who apparently shares his ignorance, and on the other hand as an instrument for enormously strengthening the confidence of the Assembly in him, and justifying his orthodoxy as one of the most benighted Protectionists of the day. The situation was this. Germany, greatly fearing the outcry of the German manufacturers against the competition of the Alsatian workshops, was anxious to delay as long as possible the evil day, and negotiate with France a treaty which would compel her to take the Alsatian manufactures, temporarily at least, free of duty, or at so low a duty that very few of them would flow into Germany. Prince Bismarck hoped to get this treaty out of the professed tenderness of France for her former provinces. Never was he more disappointed. M. Thiers expressed himself full of sympathy for Alsace, but his duty was to think of France, not of a country that was not any longer French. He would not *hear* of free importations from Alsace. Well, said the Germans, but might not his consent be *bought*? Would the immediate evacuation of six more departments be no consideration? M. Thiers was struck, and asked for how long a period of free trade or low duty on Alsatian products the treaty would be. Six years was the reply. M. Thiers put down his foot;—rather eight months longer occupation of six departments than free trade for six years; and so in fact he beat Prince Bismarck down to *two* years, not of free trade, but of duties rising from *nil* to 50 per cent. of the ordinary duties; he got almost a promise that the six departments should be evacuated; and the only remaining hitch is on the point whether he may or may not have, what he promised the Assembly, reciprocity for French goods imported into Alsace during these two years. And observe what he will have gained by his Protectionism if his treaty succeeds. He will have gained from the Germans the evacuation of six departments eight months before the appointed time—for that is the price they pay for a treaty which, if M. Thiers had had the mind of a sound economist, he would have been glad not only to make, but to make in an infinitely stronger form, without any equivalent at all. But then what he would have gained by such a concession for France, he would have lost in popularity with the Assembly, which is Protectionist to fanaticism. Now he has gained with that Assembly too. The reluctance he showed to hear of free trade; the shortness of the time for which he admitted even low duties; the fight he made for strict reciprocity; the hard-heartedness he showed towards the Alsatians when the interests of France were supposed to be on the other side; the terms he extorted for his very small concession—all redounded to his honour with an Assembly which is blindly and almost madly Protectionist, and most selfishly patriotic (since it casts loose Alsace without a sigh).

Precisely the same skill which M. Thiers showed in this matter in using his own errors for the advantage of his position, he has shown throughout in balancing first Commune against Royalists, then Commune against Republicans, and last of all, the "traditions of a thousand years" against the too rapidly growing force of Republicanism, so as to keep his own seat unshaken. After so frequently declaring that the Republic was firmly established, it sounded rather oddly to hear him telling the Assembly last week that the country had to decide between "the glorious traditions of a thousand years" and "the torrent which in the present day precipitates human "society towards an unknown future." But the elections for the Conseils Generaux were just coming on, and M. Thiers probably feared that they might prove too Liberal, and undermine the authority of the present very reactionary Assembly. So he threw out a hint to the fears of the electors—a hint that they should not send up men who affect "torrents "which precipitate society into an unknown future." For himself, who has hymned the first Emperor, been Minister under Louis Phillippe, opened his arms to the European Revolution, and finally succeeded to the no doubt mutilated power of the second Emperor, as "President of the French Republic," it is hard to say whether he prefers "the glorious traditions "of a thousand years," or that torrent which precipitated France into his keeping. But there is no doubt he will con-

tinue as long as may be so to play off the one against the other, that France shall remain yet a little while longer in the same keeping.

We are far from thinking that M. Thiers has no sincere French patriotism. Whatever he has been he has always in his most ambitious times and in his least wise moods been thoroughly French. He was thinking no doubt more of France than of himself when he advised Louis Phillippe to go to war with England on the Eastern question, and he is doubtless thinking more of France than of himself now that he casts Alsace adrift as an alien country, labours to restore full "Protection" to French industry, and buys the Prussians out of French departments by acceding reluctantly to a modicum of free trade. But whatever his patriotism, he is only fit to govern France while administration is a work of mere tactics, of playing on the prejudices and vanity of French deputies and the fears of German diplomatists. Let once order be so far restored that France needs a statesman who can lay down just and true principles, and popularise them, and M. Thiers will no longer be anything but a burden on the country. He is not a statesman, but a very clever political manager, without a political ideal of any kind; useful to stave off a difficulty—helpless to suggest for a rudderless country any principle of guidance.

THE TERMS OF THE LONDON AND NORTH-WESTERN AND LANCASHIRE AND YORKSHIRE AMALGAMATION.

It has been briefly announced that the terms of the amalgamation between the London and North-Western and Lancashire and Yorkshire Railways, which the boards of both companies have agreed to recommend to their respective shareholders, are substantially—the payment to the ordinary shareholders of the Lancashire and Yorkshire company 12s 6d more of annual dividend than what is to be paid to the London and North-Western ordinary shareholders. It may throw some light on the prospects of the amalgamated company, as well as on the position of railway property generally, if we inquire into the reasonableness of these terms.

At first sight it would seem that the Lancashire and Yorkshire shareholders get an advantage at the expense of the London and North-Western. The last annual dividends were:—

	London and North-Western.				Lancashire and Yorkshire.		
	£	s	d		£	s	d
Half-year ending Dec., 1870	3	12	6	.....	3	10	0
Half-year ending June, 1870	3	7	6	.....	3	17	6
Annual dividend.....	7	0	0		7	7	6

The Lancashire and Yorkshire therefore, according to the last annual dividend paid, is only 7s 6d a year better than the London and North-Western, whereas in the amalgamation the shareholders are to get 12s 6d. They are thus to be better off than they were and of course whatever they get the London and North-Western shareholders will lose. Even in this view however, provided the disadvantage were not too great, the amalgamation ought not to be pronounced a mistake for the London and North-Western shareholders. The amalgamation must be worth paying for, and it is natural in such an arrangement that the stronger company should pay, its absolute interest being greater, and the directors of the weaker company being likely to have most difficulty in getting their shareholders to agree to anything which looks like taking them at a disadvantage. In the present case, the disadvantage to the bigger company, though it should be as great as it seems will not amount to very much. The Lancashire and Yorkshire shareholders are to have their position improved by 5s a year as compared with the London and North-Western shareholders, but the latter will not lose 5s from their dividend. The London and North-Western ordinary stock is 30,579,000*l*, while that of the Lancashire and Yorkshire is only 12,765,000*l*—less than one-half; so that to give 5s to the Lancashire and Yorkshire shareholders out of London and North-Western money will not cost the latter so much as 2s 6d. This would be a very trifling loss indeed, and in fact a quite imperceptible one compared with the ordinary fluctuations of increase or decrease to which railway property is liable.

But in reality it cannot be said that the London and North-Western shareholders are called on to give away anything. It is quite an insufficient test to look only at the last dividend paid. The rate at which the property improves is a most material element, and tried in this way it is almost impossible to say on which side the advantage lies. But this point requires to be very closely looked at. There is yet no evidence from the dividends recorded that the Lancashire and Yorkshire is improving any faster than the London and North-Western, so that its ordinary shareholders should get some advantage when they unite. The increase last year over the previous one was the same in each case. In 1870-71, as above shown—

	£	s	d
The London and North-Western dividend was	7	0	0
And in 1869-70 it was	6	10	0
Annual increase	0	10	0

And the comparison for the Lancashire and Yorkshire company is—

	£	s	d
Lancashire and Yorkshire dividend in 1870-71	7	7	6
— in 1869-70	6	17	6
Annual increase	0	10	0

If we take the increase of last half-year only, we get a similar set of figures:—

	London and North-Western. Rate pr ct. per annum.				Lancashire and Yorkshire. Rate pr ct. per annum.		
	£	s	d		£	s	d
Dividend for half-year ending June, 1871.....	6	15	0	...	7	15	0
— — June, 1870.....	6	0	0	...	7	0	0
Increase for half-year.....	0	15	0	...	0	15	0

Thus the last annual increase is in each case 10s, and the last half-yearly increase at the rate of 15s per cent. per annum. So far then the properties would appear to be improving at the same rate, and there would have been some reason for adjusting their future dividends so that there would be no more difference between them than what now exists. But to get at the exact truth of the matter, we must also take into account the increase in the current half-year, and it is here that we find the Lancashire and Yorkshire entitled to an advantage.

In *both* cases the increase in the current half-year—and this is a point of great importance in connection with railway property generally—is very much greater than what has yet been witnessed. Not only is the increase last half-year at a much greater rate than the increase of the whole year, but the increase in the current half-year will again be in excess. But the improvement in the London and North-Western, though very striking, is not quite so great as the improvement in the Lancashire and Yorkshire. The gross traffic of the two companies since June has increased as follows:—

	London and North-Western.		Lancashire and Yorkshire.
	£		£
Aggregate traffic to date.....	1,678,088	.....	663,187
Do for corresponding period, 1870	1,583,660	.....	595,264
Increase.....	94,428	.....	67,923
	— 6 per cent.		— 11 per cent.

The current rate of Lancashire and Yorkshire improvement must therefore be much greater than that of the London and North-Western, provided there are no concealed drawbacks; and we are not aware of any. If we inquire more minutely into the probable effect on the net revenue, we come to the same conclusion. Analysing the London and North-Western increase, we find that it will probably yield the following additions to net revenue:—

London and North-Western Railway—2nd Half-year, 1871.

	Gross Increase to Sept. 16.		Probable Addition to Net Revenue.
	£		£
Passengers	50,000	.....	50,000
Goods	44,000	(4ths)	27,000
	94,000	.....	77,000
Proportionate addition to net revenue for whole half-year			177,000
Deduct probable new preference charges			34,000
			143,000

—equal to 1¼ 6*d* per cent. per annum.

Of course it is quite possible that the increase in the remainder of the half-year will neither be so great in amount nor so profitable as the increase which has accrued to date, and

which is more than one-half in passengers. We do not estimate however that the *weekly* increase will be so great to the end of the half-year as it has been, only that it will be in proportion; and considering the steadiness of the increase we should think it not unlikely that the result will conform to the estimate. Thus the London and North-Western improvement for the current half-year will probably be at the rate of nearly 1 per cent. per annum, as against 15s the previous half-year, and 10s the previous year.

Treating the Lancashire and Yorkshire receipts to date in the same manner, we get the following figures:—

LANCASHIRE and YORKSHIRE RAILWAY—2nd Half-year, 1871.

	Gross Increase to Sept. 16.	Probable Addition to Net Revenue.
	£	£
Passengers	32,000	32,000
Goods	36,000	(⅔ths) 21,000
	68,000	53,000
Proportionate addition to net revenue for whole half-year		122,000
Deduct probable new preference charges		9,000
		113,000

—equal to 1*l* 15s per cent. per annum.

Thus the current improvement in the Lancashire and Yorkshire is much greater than in the London and North-Western, notwithstanding the great advance which the latter shows upon the previous half-year, when both were advancing at the same rate. In either case the figures are most remarkable, those of the Lancashire and Yorkshire especially, and would still be so, even if the remainder of the half-year should turn out much less profitable in proportion to the aggregate traffic than the first eleven weeks have been. The state of matters in these two companies however, so far as we can judge, is only a specimen of what is quite general in railways, which cannot but show an unprecedented improvement in the dividends for the current half-year.

It is not difficult to see from these figures that the London and North-Western shareholders are not unjustly dealt with by the Lancashire and Yorkshire shareholders getting an apparent advantage of 5 per cent. per annum in apportioning the joint dividend. If North-Western is only improving at the rate of 18s 6d per cent. per annum and Lancashire and Yorkshire at 1*l* 15s, it is the latter and not the former which really suffers by the arrangement. Practically however the latter will in no wise suffer. Something must be allowed for the probability of the improvement not continuing very long at its present enhanced rate, and for the benefit which the shareholders will experience by sharing in the peculiar stability of the London and North-Western stock. As conforming approximately to the relative real position of the two stocks, the arrangement may stand—the shareholders of either company remembering that if they are put to a slight disadvantage they will be compensated by the gain from the amalgamation. The arrangement moreover shows afresh that if railway companies are disposed to amalgamate, the present circumstances of railway property offer them unusual facilities for so doing. When it is only a question of a greater or less improvement it is easy to give and take. This has been shown by the rapid increase in value of the Great Western and North-Eastern stocks since their respective consolidations, which has made every cause of grievance be forgotten; and the circumstances of the present amalgamating companies are such as to promise a like result. The panic in the railway market this week offers a rare opportunity to investors to obtain the stocks at a price considerably under their present intrinsic value, allowing for the accrued increase of profit in the current half-year.

BUSINESS NOTES.

THE AGRICULTURAL RETURNS.—The following is the annual abstract of agricultural returns of Great Britain for 1871, issued from the Statistical Department of the Board of Trade:—

	Extent of Land in Great Britain under—				
	Wheat.	Barley.	Oats.	Potatoes.	Hops.
1869	3,688,357	2,251,480	2,782,720	581,211	61,792
1870	3,580,543	2,371,739	2,763,300	587,861	60,594
1871	3,575,906	2,387,719	2,719,308	628,287	60,028
	Increase (+).		Decrease (−).		
1871 over 1870	+75,453 or 2·2 %	+15,980 or 0·7 %	−43,992 or 1·6 %	+40,626 or 3·9 %	−566 or 0·9 %
1871 over 1869	−112,361 or 3·0 %	+136,239 or 6·1 %	−63,412 or 2·3 %	+43,076 or 7·4 %	−1,764 or 2·9 %

Total Number of Live Stock in Great Britain on the 25th of June.	Cattle.	Sheep.	Pigs.
1869	5,313,473	29,538,141	1,930,452
1870	5,403,317	28,397,589	2,171,138
1871	5,339,332	27,132,898	2,499,889
	Increase (+). Decrease (−).		
1871 over 1870	−63,985 or 1·2 %	−1,264,691 or 4·5 %	+328,751 or 15·1 %
1871 over 1869	+25,859 or 0·5 %	−2,405,243 or 8·1 %	+569,437 or 29·5 %

From this it appears that the change in the acreage of the wheat crops, as compared with last year, is too slight to make any material difference in the calculations about the harvest, which have been based on the supposition that the acreage was substantially the same. The diminution in the number of sheep is perhaps the most noticeable fact in the returns—the numbers in 1871 being 1,264,691 less than in 1870, in which there had been a great falling off compared with the previous year. Altogether the diminution in the number of sheep since 1869 is 2,405,243, or 8.1 per cent. A difference like this, coupled with the greatly improved demand for woollen manufactures, due to the growing prosperity of the country, goes far to account for the present enhanced values of wool, as compared with two years since.

SPANISH PROSPECTS.—According to the *Madrid Gazette*, the actual applications for the new Spanish loan were as follow:—

Applications at—	Nominal Capital. £*	Effective Money. £*
Madrid	22,617,640	7,011,469
Provinces	5,035,320	1,560,949
Lisbon	1,274,440	395,076
Paris	55,594,240	17,172,214
London	59,073,320	18,312,729
Amsterdam	14,404,800	4,465,488
	157,999,760	48,917,925

* Converting the peseta at 25 per £.

The amount required being 6,350,000*l*, the distribution has been on the average about 12*l* 5s for every 100*l*, showing that the loan was about eight times applied for. The success of the Spanish Government is thus most unequivocal, and is all the more creditable because the issue was a straightforward appeal to credit, and was buttressed by none of the expedients of special assignments of revenue and other illusory securities which former Ministers of Finance in Spain have tried. Altogether there is more than ever cause for repeating the remark which we made sometime ago, that in financial matters the new dynasty in Spain really has a chance. The current deficits are not so formidable as they were on the eve of the revolution and a year or two after, a good deal having been done both in the way of retrenchment and in the way of adding new sources of revenue. The inherent difficulties of Spanish Governments, in consequence of the nature of the people, a mischievous system of land tenure, and the arrears of work to be done in improving communications, are no doubt most formidable, and will probably make it impossible for Spain to obtain the credit of a first-class State for many a day; but the new dynasty has at least some materials to work with, and is in far from a hopeless situation. We may notice in passing that Spain at the present moment appears in fact to have got into a vein of luck. First of all the recent tour of the Sovereign proves that he is really able to make himself King, and that the people have no Legitimist feelings which will interfere fatally with his success. If King Amadeo turns out as well as he promises, the Spaniards may be congratulated at last on their long search for a Sovereign. It is almost as important a piece of luck that early in his reign, the harvest in the country should have turned out abundant beyond precedent for many years in Spain. According to all accounts, this is the fortune of Spain at the present moment, the harvest being in fact good enough to make up for three or four bad years. It is easy to see how important a fact this is for Spain, especially as in the present season, with a deficiency in France and England, the Spanish farmer will get a long price for his produce. Everybody in Spain will be richer, and there will be ample means for extending sensibly those material improvements, which are essential to farther progress. The harvest may in fact do for Spain what was done for Austria by the harvest of 1867, which at once repaired the losses of the Sadowa campaign the previous year, and gave the country a start. It remains now to be seen

what use Spain and her rulers will make of their new opportunity.

ROUMANIA.—A well-informed correspondent at Bucharest, in a letter which has been communicated to us, supplies a few facts about Roumania which will be interesting at the present moment when so much is being said about the alleged repudiation of its obligations by that country. It appears that last month there was a local Government loan of 3,120,000*l.*, and according to a list of subscribers published by the Roumanian Government, 2,520,000*l.* was subscribed by the public and the remainder, 600,000*l.*, was retained on account of the Department of Judicial Deposits. The correspondent, whose letter we quote, points to this financial transaction as "showing the material progress of the Principalities, and proving "that the habit which formerly prevailed among the inhabitants of hoarding up large sums of money, and keeping it "in their possession, is yielding to the advantages of receiving "interest and the facilities of letters of credit." It is farther stated that there are nearly 15,000,000*l.* of rural bonds held in the country, whilst the Stern and Oppenheim Roumanian loans are also extensively held in the Principalities, but "the "Strousberg securities never met with favour, or they "probably would not have been repudiated." We should recommend the English and German holders of these securities before they repeat parrot-like their charges of repudiation to inquire under what circumstances the Roumanians, who are in the habit of investing in their own securities, have neglected this particular issue. If it should appear that from first to last the issue, as made to the public, was never authorised, and was contrary to the Roumanian law, and that in point of fact the Roumanian people have not got the railway line for the construction of which a *conditional* guarantee was authorised, there will be less cause for wonder at those who are on the spot being chary of touching such tainted obligations. The foreign holders, on the other hand, will have reason to blame themselves for not making proper inquiries before they invested, and so trusting people who pretended to bind the Roumanian State when in fact they had no power to do so. We have before expressed the opinion that the Roumanians are far from justified in their present course of action, as the Strousberg bonds were publicly issued on the European exchanges, and the alleged undue assumption of powers was not publicly repudiated at the time by any Roumanian authority. Still the Roumanians, according to the strict letter of the matter, have something on their side, and have acted under a great deal of excusable irritation—things which cannot be said of the repudiating acts of some of those very Powers whose intervention has been invoked by the Council of Foreign Bondholders. We should recommend Roumania for her own credit to acknowledge the disputed obligations, but we should equally recommend the unlucky bondholders to look at the other side of the question, and be very thankful for the best terms they can get.

THE NEWCASTLE STRIKE.—We fail to see the point of public interest in a great deal of the correspondence and reports of public meetings in connection with the Newcastle strike which are being published in the daily Press. Whether particular employers or a particular group of employers have been "conciliatory" or not in negotiating for the services of certain workmen can hardly be a point of first-rate public importance. We should never dream of inquiring whether particular bankers are conciliatory or not to their depositors or borrowers. The subject is no doubt good enough for gossip, but it is essentially local and personal, on which the expression of public opinion will hardly be of any use. The recurrence of such personalities in all strikes however suggests that there must be something radically amiss in the methods practised in the negotiations between great employers and their workmen. There is usually some reciprocity among people who have business dealings with each other, which allows of bargains being concluded or broken off without any personal ill-feeling or recriminatory charges which are ventilated in all the newspapers. Fancy the Lancashire and Yorkshire manufacturers forming a union, crying out in all the papers that the Manchester warehousemen will not pay them enough for their goods and asserting moreover that they refuse in an irritating manner. As there is often no reciprocity between great employers and workmen, there will probably be something different in the methods of business on one side or other to produce these exceptional bickerings which we witness. That something different, we suspect, is just this, that workmen as a class are often ignorant of what business means; that they are apt to be jealous and suspicious, and that there is a real perversity, fatally injurious to themselves, in their methods and principles of doing business. The mere combination of men whose interests are frequently antagonistic is a vice of unions from the outset, and necessarily strains to the utmost the arrangements for doing business with those who employ them. Good workmen in a large combination are reduced below their fair level, and bad workmen raised above it, so that no small difficulty arises in striking an average. By forming vast combinations besides, the workmen secure for themselves an artificial power of stopping the business of entire trades, superadding to the ordinary difficulties of trade the chance of ruinous interruptions at the bidding of irresponsible cliques. The entire business arrangements between many workmen and employers are thus essentially vitiated, and the result is seen in the frequent interruptions which occur, and the expenditure of ill-temper which they occasion. One of the most curious facts connected with the strike is the indignation at the immigration of foreign workmen, and the attempts to prevent immigration by means of the "International." Surely it must strike the English engineer that his position and pay are necessarily insecure so long as foreign workmen, who can easily be brought to England, are paid less, and that he has a good deal of "cheek" in appealing to the foreigner not to undersell him. Why should the foreigner refuse the chance of getting the wages which are so attractive to him, merely because some Englishmen will not work unless they get more? We wonder that English engineers are not ashamed to ask so much generosity and charity from their poorer brethren, and the notion that they may ask it is itself a proof of the business ignorance which we believe is the efficient cause of most of the strikes.

UNIVERSITY TEACHING FOR WOMEN.

TO THE EDITOR OF THE ECONOMIST.

SIR,—It would be an occasion for great regret if the force of your advocacy of this movement should be in any degree lessened by a doubt as to its vitality. Will you allow me therefore to correct the impression referred to in your article of the 9th inst., that "there is some sort of doubt hanging "over the continued existence of the Hitchin College?" This is very far from being the case. The College will reassemble after the long vacation with an accession of numbers, and the whole of the accommodation available at Hitchin, including the temporary iron rooms which were added last year, will be occupied. The experience gained by actual trial having conclusively shown the necessity for ample accommodation and a more accessible position, arrangements are now in active progress for erecting a permanent building near Cambridge. The site selected, while within easy reach of the teachers, is in a high and healthy situation, at some distance from the town, and it has been made an essential point to secure space for recreation within the College grounds.

Removal to the neighbourhood of Cambridge has been decided upon after long and anxious deliberation, during which the considerations to which you refer were carefully weighed. The Committee have reason to believe that the course finally resolved upon is generally approved. As some practical evidence of this, I may mention that names of candidates for admission in October, 1872, by which time it is hoped that the College will be established in its own building, are already being received.

Funds are needed, but it will be seen by a reference to the subscription list that we are fairly on our way towards obtaining the comparatively small sum required for building, after which the College will at once become self supporting.

The Committee are assured that the scheme only requires to be more widely and thoroughly known to secure a much larger measure of support than has hitherto been received. Feeling strongly the importance of influential public recognition, I venture to thank you for the valuable aid you have given in bringing the matter under the notice of the readers of the ECONOMIST.—I am, Sir, yours obediently,

17 Cunningham place, N.W. EMILY DAVIES.

THE PUBLIC REVENUE AND EXPENDITURE.

THE following are the Receipts into and Payments out of the Exchequer between April 1, 1871, and Sept. 16, 1871 :—

REVENUE AND OTHER RECEIPTS.

	Budget Estimate for 1871-72.	Total Exchequer Receipts To Sept. 16, 1871.		Same time last year.	
Balance on 1st April, 1871—	£	£	£	£	£
Bank of England	...	5,678,915		7,633,761	
Bank of Ireland	...	1,344,520		972,887	
			7,023,435		8,606,648
REVENUE.					
Customs	20,100,000	8,862,000		9,168,000	
Excise	22,420,000	9,531,000		9,407,000	
Stamps	8,750,000	4,421,000		4,121,000	
Taxes	2,330,000	366,000		787,000	
Income Tax	8,820,000	1,353,000		1,260,000	
Post Office	4,670,000	1,962,000		2,060,000	
Telegraph Service	750,000	170,000		240,000	
Crown Lands	375,000	135,000		135,000	
Miscellaneous	4,100,000	2,298,784		1,304,049	
Revenue	73,315,000		29,098,784		28,482,049
OTHER RECEIPTS.					
Advances, under various Acts, repaid		1,015,646		1,023,435	
Money raised for fortifications		...		...	
Money raised by Exchequer Bonds		...		...	
Temporary advances not repaid		...		...	
			1,015,646		1,023,435
Totals			37,137,865		38,112,132

EXPENDITURE AND OTHER PAYMENTS.

	Budget Estimate for 1871-72.	Total Exchequer Issues To Sept. 16, 1871.		Same time last year.	
EXPENDITURE.	£	£	£	£	£
Interest of Debt	26,910,000	12,985,012		12,940,381	
Other charges on Consolidated Fund	1,820,000	804,084		1,133,333	
Supply Services voted by Parliament	43,253,000	18,974,147		16,837,061	
Telegraph Service	430,000	210,000		180,000	
Expenditure	72,433,000		32,973,243		31,090,774
OTHER PAYMENTS.					
Advances under various Acts		846,531		595,351	
Expenses of fortifications		...		...	
Exchequer Bonds and Bills, &c., paid off		132,900		25,500	
Surplus income, to reduce Debt		*739,179		1,656,121	
			1,718,610		2,276,982
Balances on Sept. 16th, 1871—					
Bank of England		1,135,769		3,354,891	
Bank of Ireland		1,310,243		1,389,485	
			2,446,012		4,744,376
Totals			37,137,865		38,112,132

* Exclusive of 60,000*l* applied to repay Bank advances for deficiency.

The following are the Receipts on account of Revenue during the week ending Sept. 16 :—

	Receipts of Week Ending Sept. 16.
	£
Customs	583,000
Excise	780,000
Stamps	172,000
Taxes	nil.
Income tax	17,000
Post Office	692,000
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	17,630
Total	2,261,630

The total receipts of the previous week were 994,202*l*.

The Exchequer issues of the week on account of expenditure were 2,330,288*l*, viz. :—

	£
Interest of debt	26,053
Other charges on Consolidated fund	25,775
Supply services	2,278,460
Telegraph services	nil.
	2,330,288

During the week the cash balances have decreased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Sept. 9	1,232,524	1,316,793	2,549,317
— Sept. 16	1,135,769	1,310,243	2,446,012
Decrease	96,755	6,550	103,305

SAVINGS' BANKS RETURN.

THE following Return shows the amounts received from, and paid to, Savings' Banks, and Post Office Savings' Banks, in the United Kingdom, by the Commissioners for the Reduction of the National Debt, during the four weeks ending Saturday, Sept. 2, 1871 :—

	Total Amount received by the Commissioners.	Total Amount paid by the Commissioners.
SAVINGS' BANKS:—	£ s d	£ s d
In money and interest credited	51,837 6 11	49,283 3 3
To transfer certificates from Post Office Savings' Banks to Savings' Banks	268 17 3	...
By transfer certificates from Savings' Banks to Post Office Savings' Banks	...	2,057 4 4
Total	52,106 4 2	51,340 3 7
POST OFFICE SAVINGS' BANKS:—		
In money and interest credited	201,128 1 2	...
To transfer certificates from Savings' Banks to Post Office Savings' Banks	2,057 0 4	...
By transfer certificates from Post Office Savings' Banks to Savings' Banks	...	268 17 3
Total	203,185 1 6	268 17 3

	£ s d
Total amount on Sept. 2, 1871, at the credit of—	
The fund for the Banks for Savings	38,187,452 10 11
The Post Office Savings' Bank fund	16,239,330 3 6
Total	54,426,782 14 5
Ditto—by last monthly account	54,223,100 9 7
Balance at 6th Aug., 1871—	£ s d
The fund for the Banks for Savings	38,186,686 10 4
The Post Office Savings' Bank fund	16,036,413 19 3
	54,223,100 9 7
alance at 3rd Sept., 1870—	£ s d
The fund for the Banks for Savings	37,354,958 18 0

COTTON CROP AND MOVEMENT FOR 1870-71.

THE New York *Commercial and Financial Chronicle* of Sept. 9 contains the following statement :—

Our statement of the cotton crop of the United States for the year ending September 1, 1871, will be found below. By a free use of the telegraph we are able to present our readers this annual review earlier than ever before. The largely increased expense thus incurred by us finds, however, full justification in the greater value an early presentation gives these figures. It will be seen that we have continued the plan adopted last year of furnishing all the details by which we arrive at the conclusions stated, so that each one for himself may test their accuracy. This we contend is the only satisfactory way of making up a crop report; and we believe there are now but few who will not admit that the overland movement prepared upon any plan other than that adopted by us is simply an allusion, no one knowing (not even the compiler) whether it is right or wrong. For a full explanation of the course of these overland shipments we would refer our readers to a subsequent part of this report.

It will be seen that the total crop this year reaches 4,352,317 bales, while the exports are 3,166,742 bales, and the home consumption 1,100,196 bales, leaving a stock on hand at the close of the year of 104,814 bales. Our table showing the whole movement for the twelve months are as follows :—The first table indicates the stock at each port, September 1 of 1871 and 1870, the receipts at the ports for each of the last two years, and the export movement for the past year (1870-71) in detail, and the totals for 1869-70 :—

Ports.	Receipts year ending Sept. 1, 1871.	Receipts year ending Sept. 1, 1870.	Exported year ending Sept. 1, '70 to Great Britain.	France.	Other F'reign	Total.	Stock. Sept. 1, 1871.	Stock. Sept. 1, 1870.
New Orleans	1146490	1142097	828052	119171	360332	1302535	25323	20896
Alabama	404673	306561	240960	...	46414	287074	5466	9743
South Carolina	350582	246284	135144	...	40506	175650	3443	1399
Georgia	726406	488204	350546	7530	106293	464369	[illegible]15	2833
Texas	321804	246284	179916	5637	35689	[illegible]1242	10490	4975
Florida	13948	22874	...	...	...	...	23	11
North Carolina	94320	59612	70	...	...	70	664	125
Virginia	342353	202898	5417	...	...	5417	425	591
*New York	*252349	*135876	606256	6365	55337	667958	38875	12984
*Boston	*15410	*21316	2667	...	338	3005	8000	4668
*Philadelphia	*18820	*12509	1380	...	...	1380	8030	885
*Baltimore	*41688	*26274	21877	...	15690	37567	860	1017
Portland	*3311	*616	475	...	...	475	...	...
Total this year	4032154	...	2367440	138703	660598	3166742	104814	...
Total last year	...	2911121	1474895	346440	357772	2178917	...	59747

* These figures are only the portion of the receipts at these ports which arrive overland from Tennessee, &c. The total receipts at New York, Baltimore, Boston, and Philadelphia, for the year ending August 31, 1871, are given in a subsequent part of this report.

By the above it will be seen that the *total receipts at the Atlantic and Gulf shipping ports* this year have been 4,032,154 bales, against 2,911,121 bales last year. If now we add the

shipments from Tennessee and elsewhere direct to manufacturers, we have the following as the crop statement for the two years:

	—Year ending Sept 1.—	
	1870-71	1869-70
	bales.	bales.
Receipts at the Shipping ports	[illegible]	[illegible]
Add shipments from Tennessee &c. direct to manufacturers	2,000	1,000
Total	[illegible]	[illegible]
Manufactured South and not taken in above	9120	[illegible]
Total consumption for the year	[illegible]	[illegible]

The result of these figures is a total of 4,352,317 bales as the crop of the United States for the year ending August 31, 1871.

Overland Movement.

Knowing the losses all have to contend with, we continue our plan of presenting the overland movement in detail. Our readers thus have thrown a point which has always been the uncertain factor in any figures, and also have before the best evidence of the correctness of our figures.

Of course all cotton grown in the South except such as is manufactured there must reach a market overland or through the Southern outports. That portion which takes the latter direction (that is, passes through Southern ports) is now and always has been easily determined on account of the admiralty kept tables which the papers of the various Southern ports have always furnished. To obtain a correct statement of the portion going overland is more difficult, and yet a moment's reflection will convince any one that no cotton can reach the North from the South except by passing up or crossing the Mississippi, Ohio or Potomac rivers. Hence we follow each of these rivers along its entire course, and counts each bale as it leaves it. Beginning at Cairo, we find that the Illinois Central Railroad takes cotton from that point, and also from the Mississippi river as known at Cairo alone. A return from that company shows that it has this year, thus carried North [illegible] bales shipped at way stations in Southern Illinois, probably the greater part of that sort, 47,000 bales. Other than this no cotton leaves or passes up the Mississippi, not including local consumption, except what is counted at St Louis, at which point during the year the receipts have reached 1 [illegible] bales. Proceeding to the Ohio, and following up the north bank, the first railroad we meet with is at Evansville, the Evansville and Crawfordsville Railroad, a detailed return from which as to shows that they have carried North from Evansville [illegible] bales. The next lines of roads are opposite Louisville, the first of which is the Louisville, New Albany, and Chicago. This road carried no cotton last year, but during the past twelve months it has taken [illegible] bales. Next we meet the Louisville, Madison, and Indianapolis railroad, including the Madison Branch, a full return from which shows that they have carried 147,000 bales. The Ohio and Mississippi branch, which was opened a year ago last May as far as Vincennes, carried [illegible] bales, and the last complete return shows 53,416 bales. From Louisville or Madison to Cincinnati there are no railroads running south from the Ohio valley system. At Cincinnati a portion of the supplies are received by the roads above specified and also by the Cincinnati, Hamilton and Dayton road, which received, we learn [illegible] bales left on the levees at Cincinnati not otherwise counted, all of which passed over the roads centering at that point, to the North or went into stock or local consumption. Above Cincinnati no railroad has taken any cotton from the Ohio river. We have returns sent us by the various roads to that effect. There is, however, a small amount of cotton crossing up the river which is not taken by any of these railroads, but does it except Cincinnati, but goes direct to some railroad centre or local consumption. We have returns from some of these mills and have not counted others, and also have made up the consumption of the mills along the Mississippi above Cairo, and take cotton from the river direct by ox team wherever. Altogether the total reaches [illegible] bales. Turning now to the East of the Alleghanies, it will be found that there is no such a transported overland—most whatever crossing the Potomac—all coming North-ward being reported at the Virginia ports. The Orange and Alexandria Railroad, the only through line connecting both with the South and Southwest, reports that not a bale of cotton has passed over their road; and the less important road from Richmond to Washington via Aquia creek, makes a similar report; and further, the road from Washington to Baltimore (the Washington branch of the Baltimore and Ohio Railroad) has carried no cotton. We thus see that the figures given above must include every bale of cotton which has come overland to the North, and hence we reach the following as the result of this movement for the year:—

	Bales.
Receipts for the year at St Louis	[illegible]
Carried North over Illinois Central Railroad [illegible]	[illegible]
— — Evansville and Crawfordsville Railroad	[illegible]
— — Louisville, New Albany and Chicago	[illegible]
— — Louisville, Madison and Indianapolis	[illegible]
— — Ohio and Mississippi Branch	[illegible]
Receipts at Cincinnati not otherwise counted	[illegible]
Shipped by points above Cincinnati, without touching at Cincinnati, and not counted by mere shipments on the river, &c	[illegible]
Total	[illegible]

Brought forward			[illegible]
Deduct receipts overland at N. Y., Bost. and Phila. exports, &c.	331,578		
Deduct shipments at N. O. North by N. O. P. RR (count dat N. O.)	5,418		
			346,996
Leaving total direct to mills (increase sent overland to Canada)			228,928

It will be seen that we have deducted from the above total 5,418 bales sent North over the New Orleans and Texas railroad, as that cotton was once counted at New Orleans. We do not, however, readily claim that it crossed the Ohio; it probably went to some Southern outport, possibly Norfolk. But as it has been once counted, it should be deducted somewhere, and this is the most convenient way to do it. With these explanations we give below the details of the crop for the two years:—

1858-59	47592	1867-68	21275		

Consumption.

The very low prices which have ruled during the past season have naturally resulted in increased takings by our spinners, not alone to supply a large consumption, but also to add to their stock in view of the probability that the next crop is to be marketed at higher rates. We are indebted to the statistical officers of the late National Association of Cotton Manufacturers for a statement of the quantity of cotton the mills now have on hand compared with September 1, 1870, and September 1, 1869, and from this statement it would appear that while in 1868-69 the amount taken by spinners was about 50,000 bales in excess of their consumption, and in 1869-70 about 33,876 bales less than their consumption; this year they have taken 80,750 bales more than they have consumed. In other words they now hold 80,750 bales more stock than they did twelve months ago. Our own summary of the movement made up from the crop figures which we have given above is as follows. It will be seen that in stating the consumption, we of necessity include the stocks at Providence and other interior points North of the Ohio and Potomac, as our system of arriving at the overland movement brings every bale which has crossed those rivers into our total crop.

Total crop of the United States, as above stated		bales	4352317
Stock on hand commencement of year (September, 1, 1870) :—			
At Northern ports	bales 19554		
At Southern ports	40493		
		60047	
At Providence, &c., Northern interior markets		10081	
			70128
Total supply during year ending September 1, 1870			4422445
Of this supply there has been—			
Exported to foreign ports during the year		3166742	
Sent to Canada by railroad direct from the West		5682	
Burnt North and South		5595	
Now on hand (September 1, 1871)—			
At Northern ports	55765		
At Southern ports	49049		
		104814	
At Providence, &c., Northern interior markets		39476	
			3322249
Total taken by spinners in the United States year ending Sept. 1, 1871			1100196
Taken by spinners in Southern States including in above total			91240
Leaving taken from the crop by the Northern mills			1008956

The foregoing statement indicates that the Northern mills have taken from this crop 1,008,956 bales. If we now apply to these figures, and also to our figures of the previous two years, the statement of increase of stock received from the statistical offices of the Cotton Manufacturers' Association, and which we have referred to above, we shall have the following as the actual consumption of the mills for the three years :—

	1868-69. Bales.	1869-70. Bales.	1870-71. Bales.
Taken by Northern mills	918806	806860	1008956
Taken by Southern mills	80000	[illegible]	91240
Total takings from crop	998806	896860	1100196
Added to mill stock during year	50000	...	80750
Reduction of mill stock during year	...	33876	...
Total consumption of mills	948806	930736	1019446

These totals show an increase in actual consumption this year of only about 100,000 bales. This however is not strictly correct, as in last year's figures some deduction should be made for a difference in Northern interior stocks, &c., as stated in our crop report of that year, which would leave this year's increase somewhat larger. The above statement furnishes a very gratifying indication of the prosperity of our cotton manufacturing interest during the season which has just closed.

Exports.

In the first table given in this report will be found the foreign exports of the past year from each port to Great Britain, France, and other ports, stated separately, as well as the total to all the ports. In the following we give the total foreign exports for six years for comparison :—

TOTAL EXPORTS of COTTON to FOREIGN PORTS for SIX YEARS.

Comparing this week's figures with those of last, these results are presented :—

DEBTOR.		francs.
Notes in circulation	Increase	350,000
Deposits at Paris and branches	Decrease	12,460,000
Treasury balance	—	18,120,000
CREDITOR.		
Coin and bullion	Increase	860,000
Discounts at Paris	—	10,350,000
— branches	—	1,517,000
Prolonged bills	Decrease	23,215,000
Treasury bonds	—	2,052,500

The National Assembly before its adjournment, which took place at midnight on Saturday, completed the examination and vote of the remainder of the Budget. It is hardly right to say examination, seeing that the same frivolous taste was displayed as in the time of the Empire. As voted, the Budget differs both in expenses and receipts from the figures given by the Committee on the Budget, and reproduced in last ECONOMIST, both being increased, particularly the former. It will in expenses be further modified before the year's end; and more than once after that, before it reaches the "definitive" stage. In receipts also it is destined to change. To the new taxes previously voted, amounting to some 400,000,000f, there have been added others on horses, carriages, clubs, railways, billiard tables, official salaries, and sales of securities, which are in the aggregate calculated to produce 50,000,000f to 52,000,000f. And others are to come, either on incomes or raw materials, or it may be on both. The new tax on sales of securities (shares, bonds) &c., is to be 50c instead of 20c per 100f of those that are what the French call "nominatif" —that is, bearing the name of the owner inscribed on them, —and 15c instead of 12c on those to bearer. This impost is disapproved by the financial community, for the reason that it will check operations. A proposition was made to extend it to Government stock, but that was rejected. The Minister of Finance took occasion of it to declare anew that the Government repudiated any idea of taxing *rente*, or of violating its engagements.

As stated last week the Committee on the Budget estimated the deficit for 1871 at 47,000,000f, or nearly 54,000,000f on counting the supplementary expenses that are to be foreseen. But M. Pouyer-Quertier in a speech on the subject expressed the conviction that by annulments of credits and increase of revenue it would not exist. Yet he estimated the Budget and other charges weighing on France in the present year at "the colossal figure of six *milliards* and some hundred millions." A far more experienced financier than he would perhaps hesitate to affirm that this sum will be fully met, as France is, so to speak, in the midst of a "great unknown." In the same speech he said too that the 325 millions obtained from Prussia for the Eastern Railway will be sufficient not only for the value of the lines taken, but to enable the company to pay part of what it owes the Government. He said likewise that after sending out of the country for the German indemnity 1,500 millions, to be followed soon by another 500 millions, it would not be prudent, however rich France was, to expedite more for the present, because the exchanges and commerce would be profoundly disturbed; but that measures would be taken for paying the three *milliards* (120,000,000f) due by 1st May, 1874. He announced moreover that of the last loan, 1,217,000,000f have been paid up, and that portions of the rest are coming in; and he spoke with complacency of the price to which it had risen at the Bourse—8f more than that of issue. Lastly, to show the Assembly that during the vacation it had no need to be disquieted about the financial situation, he stated that the Government has in the Bank at Paris and in the agency at London 280,000,000f, and that it has the power of obtaining 200,000,000f from the Bank if necessary.

The Government, by means of a Bill submitted to the Assembly, demanded to be allowed to settle the Alsace-Lorraine question on the basis of letting into France, free of duty to 31st December next, manufactured and other products of the provinces, at a quarter of the established duties to the 1st July, 1872, and at half to 1st July, 1873,—Germany according in return "reciprocity for admission into Alsace and Lorraine of articles necessary for local industry, also to evacuate six departments immediately, and to reduce the army of occupation in the others from 80,000 to 50,000 men. The public received the proposed arrangement with marked satisfaction, thinking that the paramount object of the moment is to get

the Germans out of France as quickly as possible at any price; but it did not suit the book of the Protectionists in any way, inasmuch as it would leave them exposed for iron, cotton fabrics, and other things, to the competition of two departments—a competition which they have always found it hard to bear, and relief from which they regarded as an adequate compensation for the patriotic pain they endured at seeing their country dismembered. So they argued that the pecuniary and moral advantage of having the German occupation reduced did not justify the loss the Treaty would cause in Customs duties, and the wrong it would do to French industry; and they induced the Assembly to modify it in such a way as to make it say that the manufactured products from the two provinces should "be limited in as exact a proportion as possible to the production of each in 1869, deduction made of local consumption and of exports to other countries than France;" also that French "manufactured products" should be let into the provinces on the same conditions. So worded, the Bill did not fit in with the preliminary arrangements the Government had come to with the Germans; but M. Thiers accepted the modification, thinking, no doubt, with characteristic vanity, that he could make them take it. But Prince Bismarck has protested against it in rather a vehement way. He never, it seems, thought in treating of any such restriction on exports from Alsace-Lorraine; it goes indeed against his object, which is to permit the provinces to get rid of their stocks in France, for which they were manufactured, so as on the one hand to benefit the holders, and on the other to prevent the German markets from being flooded; and though willing to admit into the provinces from France the articles—that is, the raw materials—necessary for local industry, he never dreamt of receiving manufactured products." His protest has greatly disturbed the serenity of French politicians, and caused not a little disquietude among the public. M. Thiers, however, who is obliged to be diplomatic, gives out that the affair is of no consequence—a mere matter of detail, which will easily be arranged; but telegrams from Berlin speak of it as serious, and *nous verrons*. It is to be noted that in the conditions he accepted, M. Thiers gave up completely the Protectionist ideas about which he had been higgling and haggling for months. It is also to be noted that he affirmed, in order to console the Protectionists, that under cover of those conditions German and Swiss goods would not be able to get into France free; also that they would not justify the countries with which there are treaties of commerce in invoking the "most favoured nation" clause.

Just before the adjournment of the Assembly, a report was presented by the Committee charged to examine the contracts entered into for the purchase of arms and ammunition for the war—at first by the Empire, and afterwards by the Government of National Defence. The greater part of these contracts were to be executed in England, because it was there only that purchases could be freely made. The Committee reveals scandals that are almost incredible. The contracts were given to mere adventurers, and even to women, at excessive prices, and at a moment when it was known in Paris that they could not be executed, English makers having in store nothing like the quantities demanded. The consequence was that the English market was completely disorganised by the sudden influx of demands; that not only all the stock of good articles, but all sorts of rubbish were scraped up; that by means of bribery and corruption extensively practised in France, these latter were accepted with little examination, or without examination at all; and in definitive, that the State was swindled in a fashion that was really awful. The report is too voluminous to be examined in this letter; but one fact selected out of many will give an idea of its revelations. An agent purchased in England Sniders at 95f 85c and 89f 50c each, according to length, and cartridges for them at 100f 30c the 1,000; another obtained a contract at 120f for each musket and 120f the 1,000 cartridges—the difference between the two bargains amounting on the quantities to be delivered to 970,000f. On the whole the Committee comes to the conclusion that for the contracts *executed* in England, and which fell far short of those *consummated*, the French Government, out of a disbursement of 25,600,000f, paid 31 per cent. more than it ought to have done.

The statutes of the Bank of France require the annual meeting of shareholders to be held in January. In consequence, on the 26th of that month a meeting took place, but as Paris had been cut off from all communication with the provinces since September the directors could only give an account of the operations of the first six months of 1870. Another assembly was held on 13th July, when a report on the whole year was presented. That document has just been printed, and the following is an analysis of it:—Notwithstanding the war and the siege of Paris, the total mass of operations amounted to 8,499,185,900f, the highest figure ever attained, and exceeding by 173,453,500f that of 1869. The rate of discount, which from 31st May, 1869, had stood at 2½ per cent., was on 18th July raised to 3½, on 21st of same month to 4, 30th July to 5, and 9th August to 6, at which figure it afterwards remained. The discounts amounted to 6,892,912,000f being 210,037,500f more than in 1869, but deducting Treasury bonds, they were 2,889,055,600f. This sum was represented by 2,232,142 bills, giving an average of 1,295f; and so ready is the Bank to serve petty traders, that 3,541 were of the low sum of 10f or under, 153,563 of 11f to 50f, 214,676 of 51f to 100f, the rest exceeding 100f. The number presented for discount but rejected was 27,085, amounting to 64,426,065f, but 4,796 of 6,083,431f, were only refused for irregularities, and were afterwards admitted. Under the law permitting the payment of bills to be delayed, the amount of unpaid bills of Paris and the branches rose on 21st Dec. to 733,800,000f, which was the maximum of the year. The advances on securities of Government stock, railways, &c., were 541,996,900f, being 62,027,500f more than in 1869, and the rate of interest charged was ½ above that of discount. On the 24th Dec. they stood at 107,653,000f, of which 56, amounting to 53,799,000f, were of more than 100,000f, and 7,782 of 53,854,000f were below that figure. In the advances above 100,000f are three of large amount—to the Caisse des Depots et Consignations 40,000,000f, to the Credit Agricole 3,450,000f, to the colony of Guadaloupe 1,500,000f. The maximum of coin and bullion was on 23rd June, 1,318,500,000f; the minimum, 24th Dec., 505,300,000f. The maximum of notes was, 15th Sept., 1,814,386,000f, the minimum, 26th Dec., 1869 (the Bank year begins 26th Dec.), 1,358,977,100f. The maximum of deposits was, 23rd August (on account of the national loan of 750 millions), 625,200,000f, the minimum, 27th January, 322,100,000f. In Paris the bills, &c., collected amounted to 5,128,239,475f, which was 379,285,974f less than in 1869, the maximum being, 30th July, 126,077,670f; the minimum, 26th December, 38,629,563f. The year began with bills left unpaid of 1,100,030f, and the amount arose to 2,674,462f, but on the last day of the Bank year it had fallen to 1,163,197f. On the 24th December the Bank held for safety 2,016,146 securities of different kinds, amounting to 900,406,321f, belonging to 19,371 persons. The number was 457,351, and the amount 389,870,740f less than on the corresponding date of the year preceding. In these securities are not included those on which advances were made. In the total operations of the Bank those of the branches were 4,689,899,800f, being 59,632,500f less than in 1869. This decline was in the branches of Metz, Mulhouse, and Strasburg, in which, on account of the war, little business was done in the last six months of the year. The expenses of management and the other outgoings were 7,556,286f, and the net profits 27,945,053f, in addition to which there were 8,769,548f from *rentes*. The dividend declared was 114f per share, the number of shares being 182,500.

As the second meeting was *par extraordinaire* held in July, the report remarked that the directors knew that though confining themselves strictly to the operations of 1870, the shareholders were preoccupied with the results of the six months passed since then; but that they could not legally give details. And it added—"What could we say that you do not know already as well as we do? No one is ignorant that in face of the grave events that have so profoundly agitated the country, we have honestly fulfilled our duties, by aiding by all our force commerce and industry, and by contributing to the salvation of the State. Now, whilst the State, whose credit is inseparable from ours, resolves by a solemn contract to assure to the Bank complete security, commerce and industry, on their part, strive to fulfil their engagements, and to maintain our mutual confidence. We hope that by conduct both firm and benevolent, the Bank of France will successfully accomplish the liquidation of prolonged bills. In any case the board of directors is accustomed to display foresight, and it knows that reserves must be made for all eventualities." The report concludes with these words:—"There is no reason to doubt of the present, or to fear the future; and the Bank of France, having faithfully fulfilled all its obligations, will remain powerful by its credit, honoured by its services, and more solid than ever."

The Comptoir d'Escompte has published the report presented at the meeting held on 29th July. The principal points of the document have been already given, but it may be stated that it represents the total operations of 1870-71 to be 1,770,965,493f, in which discounts figured for 583,328,337f. These figures were 1,315,640,893f, and 603,977,340f less than in the year preceding. It is startling to see the discounts decline more than one-half, but the Comptoir year comprised all the troubled period of the war, the siege, and the Commune, whereas the accounts of other banks and companies closed on 31st December only deal with part thereof. The gross profits were 7,309,839f, the net 5,526,676f, and the dividend, after deduction for the reserve, was fixed at 27f 50c, being 5½ per cent. on the 500f share.

The reaction predicted on the Bourse has cofirmed, and is expected to go farther, the market being, as the French say, "overcharged." The advance in the discount at London has had an unfavourable effect. The Italian Government makes

couleur de rose statements on its financial situation, but they do not obtain complete credit. Surprise is expressed that the Financial Commission of Spain, notwithstanding the reduction of subscriptions to the last loan, raises the pretension of retaining all the deposits received, so as to apply them to future calls, instead of returning, as is customary, the portion applicable to the subscriptions not admitted. The Credit Mobilier is growing in favour; the following are the quotations:—

	September 14.		September 21.

The demand for gold continues, and it is at a premium of 6f to 7f for the 1,000f. The want of small change is beginning to be felt, though thus far not very seriously.

M. Haussmann has been confirmed in his new capacity of president of the Credit Mobilier by the annual meeting of shareholders, which has just been held. He stated that he brought no capital to the company, but gave the shareholders to understand that he would in a short time be able to submit to them projects which, in his opinion, would revive at least partially its former prosperity. He declared against its amalgamation with the Immobilière Company, of which it is creditor to a large amount.

The conditions of the new Paris loan of 350,000,000f are formally published, and are, what has been already stated, bonds of 400f, issued at 277f, or 270f if paid at once; redemption in 75 years, with lottery prizes of 1,500,000f per annum, and quarterly drawings; 50f payable on subscription, 20f on all absent—the rest, if not paid at once, in instalments—50f in January, 75f in April, 52f in August. The subscription is to take place on the 26th and 27th. That the loan will be covered several times is not looked, and the conditions of it are, as before the end state of the country, more advantageous than any previous one; but the large deposit will shut out the herd of poor people who on preceding occasions subscribed in the hope of making a few francs by an immediate sale of the scrip. The quotation on the Bourse is 9f to 9f.

The bankers, joint stock banks, and agencies of Paris banks at Marseilles have published a collective declaration, to the effect that they will communicate to each other and to the Bank of France the names of the foreign houses that have refused to pay bills endorsed by them on the pretext that they were not bound by the delays for payment accorded in France; also to make public their names as widely as possible, and to refuse any bills bearing the signatures of those houses.

The Société Générale announces the payment from 1st October of 12f 50c on account of dividend of 1871. The sum represents interest at 5 per cent on the paid up capital.

The payment of 80f as the year's interest, 17f on the Ottoman loan of 1869, and of the 6 0/0 obligations of the drawing of Sept. 5, is to be made by the Comptoir d'Escompte from 1st October.

The Parisian Gas Company announces that "on account of arrears" the payment of the first dividend of 1871, 12f 50c, which was fixed for 9th October, is postponed to 6th Dec.

The Bank of Messrs Baring Brothers and Co. Caisse Commerciale is to pay from 1st October 10f on account of 1871/2.

The Bank for Deposits will pay from 1st October the interest on bonds of the North East railways.

A coupon of 7f 50c of interest on 540 shares of the Charentes Railway will be in payment from 1st October, and one of the same amount on those of the La Vendée railways from the same date.

The following are the quotations from the markets for the last three days per 50 kilogs. duty paid:—

Cotton.—At *Havre*, New Orleans very ordinary, 113f to 114f; Oomras fine fair, 84f to 85f.

Coffee.—At *Havre*, fine 130f ton; ditto ordinary to good, 84f; Mysore, 144f ton; Hayti, 130f; Santos, 144f and 144½; Ceylon plantation, 145f. At *Bordeaux*, La Guayra garbled, 147f; Mysore, 148f. At *Marseilles*, Rio, in bond, 73f 25c to 70f; ditto washed, ditto, 85f.

Sugar.—At *Havre*, French West India, bonne quatrieme, 55f to 57f; usine on sample, 60f to 67f 50c. At *Bordeaux*, usine, 64f. At *Nantes*, ditto second jet, 62f 50c. At *Marseilles*, Cienfuegos, 32f 50c.

Hides.—At *Havre*, Monte Video salted saladeros ox and cow, 70f 50c; Uraguay ditto, 78f; Pernambuco dry salted, 103f; salted, 70f 25c. Bahia dry, 100f; dry salted, 100f.

Wool.—At *Havre*, Buenos Ayres washed, 390f to 406f the 100 kilogs; ditto unwashed, 157f 50c to 195f; Spanish washed, 450f; La Plata unwashed, 177f 50c and 195f.

Tallow.—At *Havre*, Monte Video saladeros ox, 56f 75c; La Plata sheep, 53s 50c.

COMMERCIAL AND MISCELLANEOUS NEWS.

The Madras Trade and Navigation Returns for 1869-70 show that in the year under review the total exports and imports to and from all ports amounted to 12,531,690*l*; in 1868-9 they amounted to 12,876,215*l*; in 1867-8 they were 10,577,476*l*. The decrease in 1869-70 is spread over all the different heads save two.

Mr J. R. Scott, the Registrar of the London coal market, has published the following statistics of imports and exports of coal into and from the port and district of London, by sea, railway, and canal, during August, 1871:—

Imports.

By Sea.	Ships.		Tons.	By Railway and Canal.	Tons.	cwt.

The inland revenue of the United States for the last fiscal year 1870-71 showed a considerable falling off as compared with the returns for the previous fiscal year 1869-70, owing to changes in the revenue laws. Thus the whisky tax yielded but 46 millions of dollars, while for the previous year it was 84½ millions. The tobacco tax showed an increase, yielding 34½ millions as compared with 31½ millions the year before. The sale and beer tax maintained one million. These three with the income tax, are the chief sources of inland revenue, and the income tax fell off nearly 19 millions. The income tax on individuals fell from 36½ millions to 18½ millions; on banks it declined from 3½ millions to ½ a million; on railway dividends it declined from 2½ millions to slightly over one million; on salaries and interest the decrease was from 1½ millions to one million; on insurance companies,

from one to one-quarter of a million; and on other miscellaneous corporations, from $283,000 to $70,000. This steady decline was owing to the reduction of the tax from 5 to 2½ per cent., and also in individual incomes to the increase of the exemption. The receipts from this source next year will probably be zero, as the repeal of the income tax seems now to be regarded as a chief labour for the next Session of Congress. The tax on gas of 25 cents per 1,000 feet shows an increased yield of a quarter of a million. The sale of stamps, owing chiefly to the repeal of the stamp tax on receipts, declined $1,200,000. The licence taxes and other similar charges, owing to extensive repeals, declined about 16 millions. Altogether the inland revenue between the two years has shrunk nearly one-third, a decline which has been to a great extent made up by the increased revenue from Customs.

It is stated that the total production of pig iron in the United States in the year 1870 was 1,800,000 tons, and that 200,000 tons were imported, almost exclusively, from the United Kingdom, giving a total of two million tons for consumption.

The Bankers' Gazette.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 20th day of September, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	37,844,280	Government debt	11,015,100
		Other securities	3,984,900

In 1861, money was easy at 3½ per cent., the minimum in the open market being 2¾. Business was still very restricted owing to the American war, and the supply of capital was large. A rather gloomy account of Turkish finance had just been published by Sir Henry Bulwer—the first attempt which had really been made to give an adequate conception of the financial position of the Empire.

In 1868, the 2 per cent. period continued. The French Government had just reduced its allowances for the floating debt at short dates to 10s per cent. An insurrection, led by General Prim, and which promised to be successful, had just broken out in Spain.

In 1869, the demand for money was better for the week, the open market rate being quite up to the Bank minimum. A petition for winding-up the European Assurance Society had just been presented in Chancery, and met with an obstinate resistance from the directors. Lately there had been a panic in Vienna, owing to the excessive speculation for the rise.

In 1870, the position of the Bank was not so good for the week as had been expected, but there was no advance of the rate. The siege of Paris had at length formally commenced, an ineffectual stand having been made by the National Guard at Chatillon. The demand of Germany for Alsace and Lorraine had diminished greatly the hope of peace.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 5,481,451*l*; in 1868, an excess of 3,201,485*l*; in 1869, an excess of 2,540,274*l*; and in 1870, an excess of 740,692*l*. In 1871, there is an excess of 2,560,236*l*.

DISCOUNT AND MONEY MARKET.—At the Bank meeting on Thursday it was decided to raise the minimum rate from 2 per cent., at which it has stood since the 13th of July, to 3 per cent. The measure was almost wholly unexpected. Money has for some time been getting dearer, and early in the week, when the withdrawals of gold were seen to be continuous, and reports of still larger withdrawals in prospect were circulated, there was a growing expectation of an early advance, but a rise of 1 per cent. at once was not foreseen. There has consequently been a great deal of excitement in the money market, the causes of the change, so far as the Bank account can throw light on them, not being apparent, and a good deal of apprehension being felt as to the more or less unknown causes which have caused the Bank directors to act. There is a vague feeling that a very serious drain of gold—the alleged motive for the change—must be anticipated, and that an advance of 1 per cent. being ineffective, we may shortly have a farther rise to 4 and even 5 per cent. Prices in the open market are thus not a little irregular, almost the only certain point being that nothing is done under the Bank minimum. The demand continues very good, both at the Bank and in the open market, and dealers have no difficulty in employing all their balances at the advanced rates.

The changes in the Bank return for the week are hardly such as to account for so sudden a change. The revenue has diminished 712,000*l*, and the bullion in both departments 662,000*l*, but the reserve is still 13,711,000*l*, and the bullion 23,497,000*l*. The fact which appears to have weighed most with the Bank directors is the large increase in the other securities, viz., 1,347,000*l*, and

large withdrawals of bullion were anticipated in the current week. The state of the continental and American exchanges was also such that gold seemed liable to be going away everywhere, and with our usual autumn scarcity imminent, the Bank directors were probably justified in taking precautionary measures. We should be inclined to think that the measures already taken will prove sufficient, as there are apparently no circumstances on the continent to cause a demand for a large supply of money there at a high rate. Much of the foreign money would probably not have left us had money been dearer in Lombard street, and some of it is likely to come back. The next fortnight however will be a critical period, as there is no distant gold to arrive till the 9th or 10th of October, when 600,000*l* will come in from Australia. Everything will depend for the present therefore on the effect of the rate in turning the continental exchanges in our favour, and though it appears for the moment to have done so in part, it is perhaps too early to speculate that it will really have a decisive effect.

The principal changes in the Bank of France return for the week are an increase of 520,000*l* in the Treasury balance, and of 596,000*l* in the Paris deposits. The Paris discounts have also increased 410,000*l*. Bullion is substantially without change. The result apparently is that the effect of the payment of the indemnity on the Bank of France is for the present at an end, and the whole operation is probably nearly over.

We subjoin our usual quotations for mercantile paper having various periods to run, but subject to this remark—that the market is so unsettled as to make the quotations all but nominal. For a day or two rapid fluctuations in the open market are to be expected.

Bank bills—3 months		3	per cent.
Do 4 —		3⅛	per cent.
Do 6 —		3⅛ ¼	per cent.
Trade bills—3 months		3 ⅛	per cent.
Do 4 —		3⅛ 4	per cent.
Do 6 —		3⅛ 4	per cent.

The joint stock banks and discount houses have at once given notice of an advance in their allowances for money corresponding to the advance in the Bank rate. The allowances now are :—

Joint Stock Banks at call	2	per cent.
Discount houses at call	2	per cent.
Do with seven days' notice	2¼	per cent.
Do fourteen days'	2½	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.

Frankfort	5	3½	4	3½
Amsterdam	5	3	4½	2½
Brussels	4½	4½	4½	4
Hamburg	...	...	4½	3
St Petersburg	8	8	6	6

The Stock Markets.—This week there has been quite a panic on the Stock Exchange. On Monday and Tuesday the upward movement in all the leading securities which has lately been so striking continued—especially in English railways, the traffic returns on the Brighton and South-Eastern lines being held of good augury for the returns of the week. On Wednesday however there were signs of weakness, owing to the apprehensions which were excited about an imminent advance of the Bank rate, the weakness in several instances leading to a very serious fall. The actual advance of the rate on Thursday, though the announcement was at first received with firmness, speedily caused a panic. Dealings for a time were all but suspended, jobbers refusing to name a seller's price, though they were willing enough to be sellers themselves. The leading stocks in consequence, especially English railway stocks, fluctuated very wildly—North-Eastern, for instance, being at one time at 167, or 7½ under the best point of the week, while North-Western, Great Western, Brighton and other stocks, in which there has lately been a great advance, fell from 2 to 5 per cent., the closing prices, except in North-Eastern, being at the lowest point of the day. In the foreign and miscellaneous markets the panic was far from being so great. In foreign securities especially, the heavy bear account, to which we referred last week, had prevented so extreme a rise as had taken place in railways. There was nevertheless a general fall of 1 or 2 per cent, though the market became rather stronger at the close. To-day the panic of Thursday was continued, there being a farther fall in the leading railway securities and in foreign securities, though not so great as on the previous day. Late in the afternoon however there was a slight reaction, and prices were firmer, large buying orders in the foreign department having been received from Belgium.

The panic has furnished the best proof that a good deal of the recent buying in the markets—especially in railways—has been by weak speculators, who were quite unable to hold in the face of a rapid advance of money. In this light the advance in the rate will be beneficial, as tending to weed out the weak speculators and allow strong buyers to come in at prices which offer a certainty of a good advance. The market will now be more healthy than it has lately been, and the natural causes for an advance are so strong that we should anticipate shortly a renewal of the recent upward movement, from the rapid increase in the real value of such securities as English railways, and the continuous process of investment which may be looked for when the holidays are over.

English Government Securities.—Consols, though they have not lately advanced, were immediately affected by the prospects of dearer money and went a point below 93 in the panic of Thursday. To-day they have again been weak, and close flat at 92 13/16 ⅛.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money. Lowest.	Highest.	Account. Lowest.	Highest.	Exchequer Bills. March and June.
Saturday	93⅛	93⅛	93⅛	93⅛	10s to 15s pm
Monday	93⅛	93⅛	93⅛	93⅛	10s to 15s pm
Tuesday	92⅞	93⅛	92⅞	93⅛	10s to 18s pm
Wednesday	92⅞	93⅛	92⅞	93⅛	10s to 15s pm
Thursday	92⅞	93	92⅞	93	10s to 15s pm
Friday	92⅞	93	92⅞	93	8s to 15s pm

The following are the changes for the week, taking the latest unofficial prices for quotation :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Consols for money	93⅛ ⅜	92 13/16 ⅛	– 7/16
Ditto October	93⅛ ⅜	92 13/16 ⅛	– 7/16
Reduced 3 %	91⅛ ⅜	91⅛ ⅜	– ⅜
New 3 %	91⅛ ⅜	91⅛ ⅜	– ⅜
Bank Stock, last dividend 4½ %	...	...	... ...
India Stock, 10½ %, red. at 200 Apl. 30, 1874	207 9	207 9	... ...
Ditto 5 %, red. at par, July 5, 1880	...	112½ 13	... ...

Exchequer Bills.—6s to 12s prem.

Colonial Government Securities.—The Corporation of the City of Hamilton, Canada West, have forwarded to the City Bank the usual remittance to provide for the coupons maturing 1st proximo upon their sterling debentures. The following shows the changes for the week in this department :—

	Closing Prices last Friday.	Closing Prices this day.	Inc. or Dec.
Canada 6 %	107 8	107 6	... ...
Ditto 5 %	101 2	100 1	– 1
New Zealand 5 % Consolidated Bonds	101 ½	100 1	– ½
New South Wales 5 % Bond 1869 to 1896	103½ 4½	103 4	– ½
Nova Scotia 6 % Bonds, 1875	103½ 4½	104 5	+ ½
Queensland Government 6 % Bonds, 1884-5	109 ½	108 9	– ½
Victoria 6 %	114½ ½	114 15	... ...
Ditto New 5 %	104½ 5½	104 5	– ½

Foreign Government Securities.—As we have stated, the panic in this department was not so great as in others, owing to the rise having been checked. Between last Friday and Wednesday there was moreover a steady decline, owing to the persistence of the bear operators, so that when the panic came there was not room for a severe and sudden fall. Thus Spanish, which last Friday closed at 34 5/16 ⅛, were on Wednesday at 33¾ 34, a fall of ⅛, whereas on Thursday the fall was only ⅛. Turkish 5 per Cents., which were 46 5/16 ⅛ last Friday, were on Wednesday at 45½ ¾, a fall of nearly ¾, while the fall on Thursday was only ¼ more. Turkish 6 per Cents. of 1865 again were last Friday at 63⅜ ½, and on Wednesday at 62½ ¾, a fall of ¾, and the fall on Thursday was only ½. The fall has been quite severe enough to catch some bull operators rather heavily, but it has not taken out the whole of the recent advance, which was in reality largely due to *bona fide* purchases for investment. To-day there has been an additional fall, there being sellers in Spanish at one time at 32½; but in the afternoon there was a recovery in this and other foreign stocks consequent on heavy buying orders from Belgium. The turn in the exchanges had also a good effect, and gave more confidence to purchasers. The closing prices of the week show a considerable fall from last, but they are well above the worst point of to-day.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

ENGLISH RAILWAY SECURITIES.—The principal effects of the advance in the Bank rate were witnessed in this department, there being hardly anything to break the shock of the sudden change in money. So far from a rapid rise in the rate being anticipated, the market on Monday and Tuesday was a very strong one, almost all descriptions, and especially the Southern lines, upon good Brighton and South-Eastern traffics, and the prospect of a similar Chatham and Dover traffic, advancing. Brighton were on Monday at 70½ 71, nearly the best price they have lately touched, and on Tuesday there were strong buyers of Chatham preference at 65 to 65½—a rise of 1¼ from Saturday,—and of Chatham ordinary at 25½ ¾—a rise of 2 from Saturday. On Wednesday the market was weak, reports as to large exports of bullion to Germany being imminent having got about; but still the weakness was not such as to take out very much of the recent rise. The markets on Thursday when the rate was advanced were prepared for a sharp fall, and after a short period of firmness, there was an immediate decline of 2 to 5 per cent. all round. North Eastern, as we have stated, went to 167, a decline of 7½ from Tuesday, and of 5 for the day; North-Western to 143, a decline of 5 from Tuesday; Great Western to 103, a decline of 4½; Brighton to 67 68, a decline of 3; Caledonian to 110½ 11, a decline of 4; Great Eastern to 43½ 44, a decline of 2½; Chatham preference to 62½ 63, a decline of 2½; and Chatham ordinary to 23¼ ¾, a decline of 2. Other railway stocks fell in proportion. As we have stated, it was in fact all but impossible in the afternoon of Thursday to do business, jobbers being unwilling to buy, even at the low prices which were touched, and notwithstanding a general feeling that stocks were getting below their intrinsic value, and that a speedy rise would take place when the momentary panic was over. To-day the market continued in very nearly the same state, except to the very close. There was a farther fall in the leading stocks of 1 to 2 per cent., the fall for the week, as will be seen from our usual list, ranging from 9¾ in North-Eastern to between 1 and 2 per cent. in one or two stocks where the advance has been less speculative, as holders were more firm. Among those which have been least affected, Chatham and Dover Ordinary holds the most prominent place, the recent buying having been exceptionally strong, in consequence of the very favourable traffic returns.

The traffic returns of railways have again been very good this week, and at existing prices the stocks are probably cheaper for investors than they are likely to be again. It is barely possible that a farther advance of the Bank rate may extinguish 1 or 2 per cent. more of the recent rise, and as the market may be in suspense for a day or two, there is perhaps no need for hurrying in to buy. Still the opportunity is well worth attending to by investors, when railway property is growing so rapidly in intrinsic value as is now the case.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	115½ ½	.....	107 8	– 7½

Metropolitan District 6 %	121 3	.....	118 20	– 3

The traffic receipts on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Sept. 16 to 847,474*l*, being an increase of 57,414*l* on the corresponding week of last year. The aggregate receipts of the half-year to date are now 8,562,189*l*, being an increase of 603,668*l* on the corresponding period of last year. The principal increases for the week are—London and North-Western, 8,425*l*; Lancashire and Yorkshire, 6,952*l*; Midland, 6,128*l*; North-Eastern, 5,477*l*; Great Western, 4,229*l*; and Chatham and Dover, 3,548*l*. The following are the details of the increase in each case :—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts. Amount.	Inc. or Dec. on Corresponding week in '70.	Aggregate Receipts of Half-year to date. Amount.	Inc. or Dec. on Corresponding per. in '70.
	£	£	£	£

The first mortgage bonds of the Midland Railway of Canada will be ready for delivery in exchange for the fully-paid scrip at the offices of Messrs Fesser, Uhthoff, and Co., 12 Leadenhall street, London, on and after Wednesday, 27th September.

Messrs C. Devaux and Co. announce the payment of the Roumanian Iron Bridges dividend due 1st October, and of the drawn certificates.

American Securities were pressed for sale to-day, and Five-Twenty bonds close at a decline of ⅛ on the week. The Ten-Forty bonds are 1¼ lower, while the Funded loan was flat at 2⅛ to 2¼ dis. The following are the changes for the week :—

	Closing Prices last Friday.		Closing Prices this day.		Inc. or Dec.
United States 6 % 5-20 Bonds, exchg 4/6	93¼	⅛	93	⅛	– ¼

Pennsylvania Gen. Mort. 6 % Bonds, 1910	95	⅛	96	7	+ 1⅛
Virginia 6 % Bonds	92	6	91	3	– 1

Messrs Jay Cooke, McCulloch, and Co. are now prepared to deliver the provisional scrip receipts of the United States Funded loan in exchange for the allotment letters and deposit receipts held by the subscribers. They also notify that they will continue to receive payments in full under discount at Bank of England rate.

Joint Stock Banks.—These shares have moved steadily upwards, and to-day the market has ruled firm, there being an active inquiry for London and Westminster, which close at an advance of 1½ on the week. Union of London and Provincial of Ireland have risen 2 ; London and Provincial and Imperial, 1⅛ ; Chartered of India, Hong Kong, and Shanghae, 1 ; Alliance, ¾ ; Anglo-Austrian, Chartered Mercantile of India, City, London and County, and Standard of South Africa, ½ ; Agra, English of Rio, and Consolidated, ¼. Anglo-Egyptian and Bank of Australasia have given way ½ on the week.

Miscellaneous.—Considerable depression prevailed in this department towards the close of the week, more particularly as regards Credit and Sewage shares. General Credit and Credit Foncier show a decline of ½, London Financial ½, and International Financial ¼ on the week. National Discount shares are 1 better. Crystal Palace stock has given way 1 ; Ebbw Vale shares are ½ lower and Madras Irrigation 1. Australian Agricultural and London and Glasgow Engineering, however, have risen 1 ; and Rhymney Iron ½.

The letters of allotment and regret in Earle's Shipbuilding and Engineering Company (Limited) were posted by Messrs Chadwicks, Adamson, Collier, and Co. this evening. The total number of shares applied for was 9,600.

Telegraph Shares opened fair with firmness, but on the closing of some large speculative accounts a reaction occurred, resulting in a general and important decline. Anglo-Mediterranean stock closed at a reduction of 5, and Anglo-American of 3 on the week. British Indian Extension and French Cables shares have given way ¼ ; China Submarine and Marseilles and Gibraltar, ⅛ ; British Indian Submarine, ⅜ ; British Australian, Cuba, and Falmouth and Gibraltar, ¼. The only change for the better are ⅛ in Great Northern Extension, and ¼ in West India. Telegraph Construction shares have given way 1¼ on the week, after undergoing various fluctuations, while Hooper's Construction are ¼ lower.

Mines.—This department has not shown any great activity, nevertheless some important movements have occurred in the quotations. A further rise of 15 has taken place in Wheal Buller, while South Wheal Frances show an advance of 5 ; East Bassett and Tan-yr-Allt have risen 1. Hingston Downs and South Condurrow ½, but there is a decline of 2½ in Wheal Seton ; 1 in West Chiverton, and ¼ in Carnyon. The only feature in the foreign market is a fall of 2 in Eberhardt on the week, but United Mexican have shown weakness.

Exchanges.—The incident of the week in the foreign exchanges is the general turn in favour of this country, which appears to have been occasioned by the rise in the Bank rate. On Wednesday the quotation received by cable from New York was 107½ at which gold would go from this country to America, but to-day it is 108⅛, at which the export of gold to America would not be remunerative. The continental exchanges have also all turned this afternoon, bills on Frankfort, Brussels, Amsterdam, Vienna, and Paris being all less in demand, and with difficulty finding buyers, even at the higher rates.

The tender for 400,000*l* in bills on India were received on Wednesday at the Bank of England, when the amounts allotted were to Calcutta 355,000*l*, and to Bombay 45,000*l*. The minimum price was fixed as before at 1s 10⅜d on all the Presidencies, and tenders on Calcutta and Madras at 1s 11⅛d, will receive in full, and on Bombay at 1s 11d, about 33 per cent. These results show a further increase in the demand for means of remittance to the East.

Bullion.—The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week : —

Gold.—The demand for gold has been very active during the past week, and in the absence of supplies 401,000*l* in bars, sovereigns, and foreign coin has been withdrawn from the Bank. We have no arrivals to report. The John Elder, for the Brazils, took 25,000*l*; the Delta, for Alexandria (sovs.), took 62,000*l*; the Delta, for Galle, took 11,250*l*; the Delta, for Bombay, took 600*l*; the Delta, for Madras, took 4,400*l*. About 44,000*l* in American eagles has been shipped to New York.

Silver has been in good demand, and sales have been effected at 60⅛d to 60⅞d per oz standard. Since the rise in the Bank rate of discount this day the market has become quieter, the first-named price being about the current quotation. The Java and the Deutschland, for New York, brought 24,000*l* ; the Poonah, from Alexandria, brought 5,300*l* ; the Douro, from the Brazils (sundries), brought 31,000*l*. The P. and O. steamer Delta took 5,000*l* to Bombay ; with this exception the shipments have been exclusively to the continent.

Mexican Dollars.—Owing to the very limited supply of the old coinage, a considerable rise in price has been established, sales having been made at 60¼d per oz. The new coinage has been sold at 59½d per oz. The Peninsular and Oriental steamer, Delta," took 24,000*l* to Hong Kong and 1,000*l* to Shanghai.

Exchange on India for Banks' drafts at 60 days' sight is 1s 11⅛d to 1s 11⅛d per rupee. Tenders for the India Council bills were received yesterday. Applications on Bombay at 1s 11d received 33 per cent., and in full on Calcutta and Madras at 1s 11⅛d. The minimum, as before, was 1s 10⅜d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 9½d to 77s 10½d per oz std ; ditto refinable, 78s per oz std, last price ; United States gold coin, 76s 3d per oz. Silver—Bar silver, fine, 5s 0⅛d per oz std, last price ; ditto containing 5 grains gold, 5s 1⅛d to 5s 1⅛d per oz std, last price ; Mexican dollars, 4s 11¼d to 5s 0⅛d per oz, last price.

According to the *Gazette* return the imports of the precious metals during the week ended September 20 were :—Gold, 52,253*l*; silver, 65,694*l*. The exports were :—Gold, 680,872*l*; silver, 326,443*l*.

The sum of 892,000*l* was withdrawn from the Bank of England to-day.

Failures and Embarrassments.—The following are announced :—

Messrs Keep, Parsons, and Co., of Guildhall chambers, Basinghall street, in the Australian trade. Estimated liabilities, 120,000*l*.

Mr Charles William Ryder, merchant, trading at Liverpool as James Ryder and Sons, at Manchester, as J. C. Ryder and Co., and at Pernambuco, as James Ryder and Co. Estimated liabilities, 350,000*l*.

Coupled with the failure of Messrs Muir, Brown, and Co., at Glasgow, the above makes three considerable failures within 10 days. At a meeting of Messrs Muir, Brown, and Co.'s creditors an offer of 6s per £ was made, and a committee of investigation was appointed.

MEETINGS OF COMPANIES NEXT WEEK.

MONDAY, September 25.

City Offices, extraordinary general, St Clement's House.
Sambre and Meuse Railway, general, Brussels.
Zealand Railway, extraordinary general, Copenhagen.

TUESDAY, September 26.

Bedford and Northampton Railway, general, 2 Westminster chambers.
Weymouth and Channel Isles Steam Packet, extraordinary general, Jersey.

WEDNESDAY, September 27.

Caledonian Railway, extraordinary, Glasgow.
British Gas Light, general, 11 George yard.
Tournay to Jurbice and Landau to Hasselt Railway, general, Brussels.

THURSDAY, September 28.

Crystal Palace District Gas, general, London Tavern.
North British Railway, general, Edinburgh.

FRIDAY, September 29.

Mauritius Land Credit and Agency Company, 28 Fenchurch street.
Aylesbury and Buckingham Railway, general, Aylesbury.
Ottoman Railway, general, City Terminus Hotel.
Varna Railway, general, London Tavern.
West Somerset Railway, general, Taunton.

SATURDAY, September 30.

Certificate holders of the Foreign and Colonial Government, general.

NOTICES AND REPORTS

STOCKS.

Chilian 3 per Cent. Loan.—By the 47th redemption, bonds representing 10,500*l* have been purchased.

India 5 per Cent. Enfaced Paper.—The India Council have given notice that the 5 per cent. loan of 1856-57, amounting to 13,500,000*l*, will be paid off on the 16th of January, 1872, but that holders may receive in substitution a new issue, to be called "the Transfer Loan of 1872," bearing 4½ per cent. for seven years, and 4 per cent. thereafter, such loan not to be liable to be paid off until January, 1882.

RAILWAY COMPANIES.

Caledonian.—The following is an analysis of the revenue accounts for the half-years ended July 31, 1870 and 1871:—

	1870. £		1871. £
Gross receipts	1,002,047		1,070,843
Working expenses	484,337		503,620
Net	517,710		567,223
Add previous balance	3,088		1,177
	520,798		568,400
Deduct preference charges	432,572		435,004
Available for dividend	88,226		133,396
—on the ordinary stock at the rate of 3½ per cent. per annum	84,356	(4¼ p.c.p.a.)	129,506
Surplus	3,870		3,890

Capital Account.

	Expended. £		Received. £
Total. 31st January, 1871	22,670,745		22,543,010
During the half-year	252,680		279,730
Total, July 31, 1871	22,923,425		22,823,740

The purchase of the waggons on the line owned or leased by the traders, is being steadily proceeded with, almost 8,000 having been already acquired. The directors are endeavouring to convert a large portion of their debentures in 4 per cent. debenture stock.

Kettering, Thrapston, and Huntingdon.—The receipts for the past half-year amounted to 11,174*l*, and for the corresponding half of 1870 to 8,918*l*, showing an increase of 2,256*l*. After deducting all expenses, 4,322*l* remained, which would admit of a dividend at the rate of 5 per cent. per annum on the Consolidated A, or preferred stock of the company, and of 2 per cent. per annum on the B, or ordinary stock, leaving a balance of 161*l*.

Lancashire and Yorkshire—London and North-Western.—The terms of an amalgation have been arranged between the directors of these two companies upon the basis that the Lancashire and Yorkshire ordinary dividend shall always be ⅛ per cent. per annum above that of the London and North-Western.

Midland Great Western of Ireland.—Capital expended, 3,810,134*l*. The traffic receipts for the past half-year amounted to 159,477*l*, and for the corresponding half to 123,180*l*, showing an increase of 36,297*l*, or about 29½ per cent. To the 159,477*l* was added 3,853*l* for receipts on the Royal canal, 1,764*l* for rents, 61*l* for transfer fees, 83*l* for interest on Government stock, and 2,704*l* for dividend on Great Northern stock—total, 167,943*l*. From this was deducted 87,525*l* for expenditure on the railway and canal, and 35,911*l* for interest and Great Northern and Western rent, and loss on Athlone and Galway Railway, leaving 44,507*l*, to which was added 10,566*l*, surplus from last half-year, making 55,073*l*. Out of this the directors recommended a dividend at the rate of 5 per cent. per annum on the preference stock, and 4 per cent. per annum on the consolidated stock, amounting to 43,144*l*, leaving a balance of 4,430*l*. The company will receive 55,000*l* for the transfer of the telegraphs to Government.

North British.—The following is the revenue account epitomised for the half-years ended July 31 in 1870 and 1871:—

	1870. £		1871. £
Gross receipts	737,414		764,165
Working expenses	407,189		412,525
Net	330,225		351,640
Add previous balance	350		326
	330,575		351,966
Deduct preference charges	328,910		336,558
Available for dividend	1,665		15,408
—Edinburgh and Glasgow (ordinary) at the rate of ½ per cent. per annum	1,512	(1½ % p. a.)	15,122
Surplus	153		286

Capital Account.

	Expended. £		Received. £
To January 31, 1871	20,363,286		20,021,273
During the half-year	267,420		505,034
Total	20,630,706		20,526,307

Of the capital increase, 103,500*l* was due to the conversion of "Lien stock." During the half-year, 263,253*l* debenture stock has been issued. The earnings on the Coatbridge line are stated to have been satisfactory. The North British have agreed to work the Forth and Clyde Junction Railway for 30 years, at 50 per cent. gross receipts. The following extracts from the report show that the rivalry with the Caledonian still continues:—

After protracted opposition on the part of the Caledonian company before both houses of Parliament, the North British, Arbroath, and Montrose Railway Bill was passed. Under an agreement, this line will be worked, managed, and maintained in perpetuity by the company as part of the North British system. On the application of the North-Eastern and Great Northern companies, facilities were granted to them for passing their English and Scotch traffic over the railway; but the clauses submitted by the Caledonian, on the ground that their local traffic required protection, but really to limit the competitive powers of the new route, were refused, and provisions adopted which remove any doubt as to the company's powers to use the Montrose line for all the purposes of through and local traffic contemplated by Parliament when, in passing the Scottish North-Eastern Amalgamation Act, it recognised the necessity of a new line to Aberdeen. The Montrose railway will, along with the Tay Bridge, secure to the company's short and most effective route between the north of Scotland on the one hand, and Dundee, Edinburgh, Glasgow, and England on the other. Although the North British Company are precluded from contributing towards the undertaking, the directors individually will subscribe for shares, and they trust that the North British shareholders generally will identify themselves with a railway which will be under their control, and worked entirely in their interests. From the report by the engineer it appears that satisfactory progress is being made by the contractors with the Tay Bridge works.

North British, Arbroath, and Montrose Railway.—Capital, 170,580*l*, in 10*l* shares. This new line will connect Dundee, Arbroath, and Montrose, and will be worked by the North British in perpetuity. The North British directors having subscribed for a portion of the capital, only 150,000*l* remains for allotment. The new line will form part of the North British through route to Aberdeen.

Portpatrick.—The revenue for the half-year was 12,326*l*, and the net balance 6,818*l*. The sum divisible amounted to 5,418*l*, out of which they recommended a dividend at the rate of 2 per cent. per annum, free of income tax, being an increase of one-half per cent. as compared with the corresponding period of last year, carrying forward 1,065*l*.

Tottenham and Hampstead.—The adopted report stated that the gross receipts for the half-year had been 4,198*l*, of which 2,904*l* had been placed to the credit of net revenue. After payment of the 5 per cent. dividend on the Great Eastern Railway stock, the amount standing to the credit of the net revenue account was 11,750*l*. No substantial progress has yet been made in the settlement of the affairs of the company.

[CONTINUED FROM PAGE 1156.]

Union Pacific—Messrs Morton, Rose, and Co., announce that the coupons of this company's land grant first mortgage bonds will be paid on and after Monday, the 2nd of October.

ASSURANCE COMPANIES.

North British and Mercantile Insurance.—A dividend of 12s 6d per share is payable for the half-year.

MISCELLANEOUS COMPANIES.

Baltic Corn Association.—Capital, 100,000*l*, in 100*l* shares. Messrs Johnston, Roos, and Co's. commission business will be taken over, without payment for goodwill except out of profits.

British Chemical and Agricultural Manure, Limited.—Capital, 50,000*l*, in 5*l* shares. This new undertaking will purchase and extend the business of Messrs S. E. Crow and Co., the price for which is 12,311*l*, one half in shares. The business is the manufacture of sulphate of ammonia, sulphuric acid, naptha, benzole, anthracene, and manures. The residual products of gas works will be employed, and gas companies will be supplied with the chemicals used in their purifiers. The property, 5¼ acres of freehold land, is situated on the shore of Barking Creek.

Co-operative Coal Supply, Limited.—Capital, 50,000*l*, in 1*l* shares. The Blakelow and Greasley Side Colliery will be purchased, and coal will be delivered for cash to the shareholders residing within and near the metropolis, at a price sufficient to cover working and other expenses, including a small sum for contingencies, thus saving, it is estimated, at least 5s per ton to the consumers.

Val de Travers Asphalte.—It is annsunced that 5,000 shares in the Birmingham Val de Travers company, and 2,000 shares in the North of England Val de Travers company, making 7,000 shares of 5*l* each, fully paid, or 35,000*l*, will be distributed to the shareholders of the Val de Travers company whose names are on the register on the 12th October next.

MINING COMPANIES.

Alamillos.—Dividend declared of 1s 3d per share.

Cwm Elan Lead Mining, Limited.—Capital, 30,000*l*, in 1*l* shares; deposit 5s per share. Messrs Gunn and Co. have received applications for the unallotted portion of the share capital. The property, situated to the south of the "Van Mine" and in the same formation, is held under a lease, twenty years unexpired, at a royalty of $\frac{1}{15}$th. It is favourably reported on, and the purchase price will all be taken in shares.

Fortuna Lead.—Dividend declared of 3s per share.

Lanestosa Lead and Zinc Mining, Limited.—Capital, 24,000*l*, in 2*l* shares. It is proposed to purchase and work the lead and zinc mines of Lanestosa, in the Spanish province of Vizcaya, about 40 miles from Bilbao and ten from Limpias, the port of shipment. The purchase money is to be 8,000*l*—namely, 3,500*l* in cash, and the remainder in shares, with 75 per cent. paid up.

Linares Lead.—Dividend declared of 5s per share.

MAILS ARRIVED.

LATEST DATES.

On September 18, from INDIA, CHINA, &c., via Brindisi—Labuan, July 26; Calcutta, Aug. 19; Bombay, 22; Madras, 20; Colombo, 21; Point-de-Galle 23; Hong Kong, 4; Singapore, 13; Penang, 15; Batavia, 5; Aden, Sept. 3; Suez, 9; Alexandria, 10.

On September 18, from NORTH AMERICA, per Hammonia—San Francisco, Aug. 29; Halifax, 31; Boston, Sept. 4; Detroit, 2; New York, 5; Philadelphia, 4.

On September 19, from NORTH AMERICA, per Idaho—Boston, Sept. 5; Chicago, 3; New York, 6; Philadelphia, 5; Hamilton, 4; Kingston, 5; Montreal, 4; Quebec, 4; Toronto, 4; Ottawa, 4.

On September 20, from NORTH AMERICA, per Hibernian—Chicago, Sept. 6; Detroit, 7; Portland, 8; Hamilton, 7; Kingston, 8; Montreal, 8; Quebec, 9; Toronto, 7; Ottawa, 8; Newcastle, 6.

POST OFFICE ANNOUNCEMENT.

On the 2nd of October next and thenceforward, money orders may be obtained at any money order office in the United Kingdom, payable at any place in the United States of America. The commission chargeable will be uniform with that charged on money orders issued on Canada and the colonies generally, viz:—On sums not exceeding 2*l*, 1s; above 2*l* and not exceeding 5*l*, 2s; above 5*l* and not exceeding 7*l*, 3s; above 7*l* and not exceeding 10*l*, 4s. No single money order will be issued for more than 10*l*. The issue of money orders in the United States, payable at money order offices in this country, will also commence on the 2nd of October next.

CORN IMPORTED AND EXPORTED.

The following is an account showing the quantities of the several kinds of Corn and Meal imported into each division of the United Kingdom; and the quantities of British and foreign Corn and Meal, of the same kinds, exported from the United Kingdom, in the week ended September 16, 1871:—

	Quantities Imported into—				Quantities Exported from United Kingdom.		
	England	Scotland	Ireland.	The United Kingdm	British.	Colonial and Foreign.	Total Exported.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

The grain trade at Mark lane to-day was much depressed, and the tendency of the quotations was downwards. The quality of the English samples exhibited showed a general falling off, and prices receded 1s to 2s per quarter. Foreign wheat met a dull sale at Monday's reduction of 1s per quarter. Flour ruled dull at drooping currencies. New malting barley was quoted at from 35s to 40s per quarter. Maize and oats were lower to sell. Beans and peas were unchanged in value; linseed and rapeseed dull. The week's imports of foreign and colonial produces into London have amounted to 20,270 qrs of wheat; 2,590 barley; 54,360 oats; 740 beans; 12,850 maize; 1,010 sacks of flour.

At Liverpool to-day the wheat market was very inactive, while at Wakefield a decline of 1s to 2s per qr took place.

The Liverpool cotton market has been very dull throughout the past week, and the transactions have been on a rather limited scale, the total sales of the week amounting to 55,260 bales, of which the trade have taken 45,500 bales; speculators and exporters, 19,760 bales. The import of the week reaches 22,080 bales; the actual exportation, 8,518 bales; and to-day's stock is estimated at 467,710 bales. Quotations show an occasional decline of 1s 6d to 1s 8d per lb, except for Bengal cotton, which remains unchanged.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended September 21, 1871:—

	Imported.		Exported.
American.....bales	5,695	.....	1,830
Brazilian	5,560	.....	341
East Indian	12,084	.....	11,673
Egyptian	1,202	.....	385
Miscellaneous	1,460	.....	53
Total.....	29,001	.....	14,482

At New York on Sept. 21, middling Upland cotton was quoted at 20 cents per lb.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, August 22:—We are in receipt of advices from Liverpool by wire to the 19th inst., when the quotation for fair Dhollerah cotton was still 6¼d per lb, the tone of the market being however steadier. During the early part of the week, owing partly to the unfavourable news from home and partly to the intervention of some native holidays, business was almost at a standstill, but within the past day or two, the improvement reported in the above-mentioned telegram, slight though it is, has led to an increased inquiry among shippers, and purchases to the extent of about 2,000 candies have been reported, prices closing 3 rs to 4 rs per candy higher than for last mail. The stock of cotton in Bombay continues steadily to decrease, being now generally estimated at less than 25,000 candies, of all descriptions, a large proportion of which is very inferior in quality. Exporters have consequently been turning their attention latterly to cotton for delivery after the monsoon, and purchases of sawginned Dharwar have transpired at prices ranging from 205 rs to 209 rs per candy. A contract for Dhollerah (Joriah) has also been reported at 200 rs delivery in 3 months, but dealers as a rule are unwilling to sell forward, preferring to take their chance of the market when the cotton comes forward. We have again to report a week of almost uninterrupted fine weather, but we are glad to say that as yet no serious damage has been sustained by the crops throughout the districts. Rain is now however much wanted everywhere, and during the next few weeks the weather will be watched very anxiously. We have been favoured with the following reports from our correspondents up-country. Khaingaum—The crops are much in want of rain. From Akote the accounts are excellent. Sheegaum—The crops look well, but rain is wanted. Oomrawuttee—There has been hardly any rain during the week, but the crops are still healthy. Wurdah—The rainfall has been slight, but the crops are in excellent condition. Broach—Crops are in good condition, but rather backward. The acreage under cotton is generally much the same as last year. Tinnevelly—We have had a telegram dated 19th, quoting 7d, c and f., with few sellers.

Export of Cotton from Bombay to August 21.

	1871.		1870.
London.....bales	21,505	.....	1,570
Liverpool	6,54,534½	.....	7,63,119
Total, Great Britain	6,76,039½	.....	7,64,689
Channel for orders	37,833	.....	19,379
Continent	2,64,662½	.....	1,30,424
China	45,153½	.....	43,820½
Grand total	10,23,428½	.....	9,49,302½

Actual exports since last mail left, 12,191½ bales.

The Imperial Ottoman Bank has furnished the following report, dated Alexandria, September 5:—The whole of last week passed without any change worth noting. This week the arrival of a small parcel of new cotton of H. H. the Khedive, which will be offered at the auction of the 11th, has tended to keep our market quieter than might have been expected, considering the very encouraging advices from Liverpool. The week's business has been only small, and holders having very little stock have been very independent, and offered sparingly. Contracts are without inquiry, at 10¾d to 10¾d per lb for fair, November delivery; 10¾d per lb for fair, December delivery; 10¾d to 10¾d per lb for fair, January delivery. The following quotations are nominal:—Fully fair, 9¾d to 9¾d per lb, f.o.b.; good fair, 9¾d to 10d, ditto. Shipments from August 25 to September 7—England, 3,484 bales; France, 110; Italy, 178; Austria, 87—total, 3,859 bales.

The colonial produce markets have been without important feature this week. Sugar has sold slowly, and West India qualities show a decline of 6d on the week. The estimated stock in the United Kingdom is 158,028 tons against 215,135 last year, and the quantities of East India afloat for the United Kingdom and the continent (not including shipments from Java) is 30,300, against 31,000 and 34,500 tons in 1870 and 1869 respectively. Coffee has ruled very firm, good ordinary native Ceylon being worth 59s, and good ordinary native Mysore 59s 6d to 60s. The quantity of East India coffee afloat for the United Kingdom and continent (exclusive of Government exports for Java) is 13,700 tons against 18,220 tons in 1870, and 14,000 tons in 1869. Both China and Indian teas have maintained full rates. Rice has been in fair demand at steady currencies. The quantity afloat to the United Kingdom and Continent to September 1 is 121,000 tons against 176,800 in 1870, and 152,200 in 1869. Rice has met a more active inquiry.

The following report, dated August 21, has been forwarded by Messrs Fryer, Schultze, and Co., of Colombo:—We have to report a very dull fortnight in exports of produce. The clearances outwards with cargoes have been moderate, and as a result the aggregate of coffee shipments continues to show a large deficiency as compared with those at the same time last year, as may be seen below:—

Plantation Coffee.

	1871.		1870.
	cwts.		cwts.
To Great Britain.....	704,026	.....	785,446
Foreign ports.....	39,283	.....	48,352
Australia and India ...	14,563	.....	12,638
	757,872	.....	846,436

Native Coffee.

	1871.		1870.
	cwts.		cwts.
To Great Britain	90,845	.....	64,238
Foreign ports.....	27,545	.....	58,860
Australia and India ...	3,521	.....	2,366
	121,911	.....	125,464

Favourable advices of coffee in the home market have led to a steady inquiry for plantation parchment, of which during the fortnight fully 100,000 bushels have been sold, a good deal of which has been high-grown, at rates ranging from 12s 6d to 12s 10½d. In clean Ouvah native the transactions have been restricted by the smallness of supplies.

Messrs Southey, Balme, and Co., thus refer to the wool sales:—The attendance of buyers continues very numerous, and the competition, notwithstanding the advance in value, shows no abatement. In all washed and scoured descriptions the improvement rules fully at 1½d to 2d per lb, while half-bred and Leicester sorts, influenced by the great advance recently established in English wools, command an even larger proportionate advance. In grease wools, on the other hand, quotations show no change as compared with the best rates of July, which at that time ruled disproportionately high, owing principally to an active demand for America, which has now somewhat subsided. The present position of the market seems to be the result of necessities caused by a largely increased consumption in the face of a given supply of raw material of comparatively moderate extent, but though the actual position would therefore appear to be legitimately based, some check to consumption from the rapid enhancement in value will probably be unavoidable.

Messrs A. C. Stewart and Co., of Port Elizabeth, writing on August 15, thus refer to the Cape wool trade:—The steamship Sweden arrived in Table Bay on the 6th inst., bringing news of the lively course of the London wool sales. This has caused much excitement in our market, and there being so small a stock to select from, prices of all kinds are extravagantly high. The arrivals from the country are even more limited than before, but as more genial weather is now setting in, the carriers will be enabled to travel more quickly, and we shall soon have liberal supplies of all kinds of produce. Uitenhage scoured is much inquired for by continental buyers, one very choice parcel having been sold at 1s 7½d within the last day or two. The supply of this kind will be small for some time to come, as most of the washing establishments are temporarily closed for want of grease wool. Country scoured is in good demand, at about ½d advance on our last quotations. Fleecewashed is much wanted, but very little has come in. The American demand still absorbs all long stapled grease wools. Some very choice parcels have been sold at 7½d. Washing descriptions are very scarce. Grease—Full-grown, superior, 7d to 7¾d; fine light for scouring, 6d to 6½d; heavy and inferior, 5d to 5¾d. Fleecewashed—Superior, clean, 10½d to 11d; good average, 9½d to 10½d; inferior and heavy, 8d to 9d. Snow-white—Prime Uitenhage, scoured, 18d to 19d; second quality do., 16d to 17d; superior country scoured, machine washed, 16½d to 17d; superior country scoured, 16d to 16½d; inferior to good country scoured, 13½d to 15½d.

Messrs Kilburn, Kershaw, and Co report:—There is no change to report in the silk market since the date of our last circular (17th instant), the prices of China silk continue as nearly as possible the same and are firm, with a fair daily business doing. Canton silk is hardly so current, much of the recent arrivals of market Tsatlee having proved inferior in

quality, and in consequence difficult of sale at 16s; good and fine parcels still continue to command full rates, and are readily taken. Loong Kongs are flatter, the quantity beginning to increase, and the quality decidedly falling off. Japan and Bengals are both neglected still, the latter being most difficult of sale, owing to the refusal of the mill hands to work this silk, while Chinas are so abundant. In Japans, ordinary Mybash can only be forced to sale, and then at most irregular prices. The deliveries of all silks but Bengal are very good, being from 1st to 20th instant:—China, 2,315 bales; Canton, 846; Japan, 565; Bengal, 205—total, 3,931 bales.

Annexed is Messrs W. Moran and Co.'s indigo report, dated Calcutta, Aug. 18:—The season is now so nearly closed in Lower Bengal that there is nothing of interest for us to say; by next mail we hope to be able to give you a detailed estimate of various districts. So far as we can judge at present, the total out-turn will be very similar to that of last season, or about 25,000 maunds. From Tirhoot the advices continue pretty favourable, although their are still a good many complaints of poor produce. In Chuprah some factories have suffered from too much rain; still the out-turn is expected to be a much better one than was the case last year. In Chumparun the first cuttings are nearly all worked off, and there is at present every prospect of a very good return from the Khoonties. In the Benares and North-Western provinces there has been a continuance of heavy rain, and a good deal of plant has also been lost by a rise of the rivers; the Khoonties are yielding badly, and planters generally are far from sanguine of getting much from the Assaroo sowings, which have suffered so much from the violence of the rains, that it is doubtful whether fine weather now can do anything to improve them. Exports of indigo from Nov., 1870, to 17th Aug., 1871:—To Great Britain, 16,689 chests; France, 515; Trieste, 2,790; foreign Europe, 250; America, 2,536; Gulfs and Levant, 1,782—total, 24,562 chests.

The annexed is dated New York, Sept. 7:—The volume of trade is increasing, and the leading departments, as dry goods, groceries, boots and shoes, hardware, and the raw materials of manufactures, present an appearance of activity in striking contrast with the dull summer months. Fortunately there is an excellent basis for an exceptionally active season. The harvest proves to have been, on the whole, an excellent one, and the demand of our cereals to supply European deficiencies is very active. The cotton crop, in spite of the recent gloomy vaticinations to the contrary, is turning out a fair one. The petroleum wells are yielding bountifully, and the other leading export staples are abundant. The success of Secretary Boutwell's loan, followed by the announcement of the redemption of the old five-twenties, has given increased strength to the whole financial situation, which cannot but be felt in every department of business. Money remains easy, but the period approaches when somewhat higher rates may be expected, as a result of increased remittances to the interior for marketing the surplus crops of cereals and other staple products, but without some great and successful effort of stock speculators to create an artificial scarcity of currency, no such severe stringency as has been experienced in past seasons is likely to be felt. The gold market is firmer, while foreign exchange is abundant and easy. As regards prices of the leading staples domestic and foreign, there is little change. The principal articles of subsistence are cheap; some of them, as hog products, exceptionally cheap, which is calculated to materially increase consumption. The tonnage supply continues unusually light, and with free shipments of the leading staples, good rates prevail.

THE COTTON TRADE.

LIVERPOOL.—SEPTEMBER 21.

The cotton market has been quiet throughout the week, and closes with a slight decline in prices. The Bank rate has this day been raised to 3 per cent. Sea Island has been in fair request, particularly the lower qualities, the prices of which are rather dearer. American has been more freely offered, and has given way $\frac{1}{16}$d to $\frac{1}{8}$d per lb, the lower qualities especially being difficult of sale. New York advices to the 21st instant quote middling Upland 20 cents, costing to sell in Liverpool 10$\frac{1}{2}$d per lb, by steamer. Brazil has been in limited demand, at a partial decline of $\frac{1}{8}$d per lb in the middling, and $\frac{1}{4}$d per lb in the good and fine qualities, Egyptian has been dull of sale, and prices are quoted $\frac{1}{8}$d per lb lower. East Indian descriptions have been in limited demand, and with an increased supply offering, prices generally show a decline of $\frac{1}{8}$d per lb, with the exception of the good classes of Oomrawuttee and Broach, which, from scarceness, command full rates.

In cotton "to arrive" the transactions have been to a fair extent, but at rather easier prices. The latest quotations are, yesterday—American, basis of middling (from any port) not below good ordinary, delivery September, 9$\frac{7}{16}$d, 9$\frac{1}{2}$d: November, 9$\frac{1}{2}$d, 9$\frac{9}{16}$d; Nov.-Dec., 9$\frac{9}{16}$d: not below low middling, 10th October delivery, 9$\frac{1}{2}$d; Charleston or Savannah, new crop, not below good ordinary, Oct.-Nov. shipment, 9$\frac{1}{2}$d; New Orleans, not below strict ordinary, October delivery 9$\frac{9}{16}$d; new crop, not below good ordinary, November shipment 9$\frac{3}{4}$d; Dhollerah, fair new merchants, due 7$\frac{1}{2}$d; late June sailing, 7$\frac{1}{2}$d; fully fair, May-June sailing, 7$\frac{3}{4}$d; Oomrawuttee, fair new merchants, August sailing, canal 7$\frac{1}{2}$d. And this day, American, basis of middling (from any port), new crop, not below good ordinary, October-November shipment 9$\frac{7}{16}$d, 9$\frac{1}{2}$d; November-December, 9$\frac{7}{16}$d; Mobile, not below good ordinary, August sailing, 9$\frac{3}{8}$d per lb.

The sales of the week, including forwarded, amount to 65,260 bales, of which 10,940 are on speculation, and 8,820 declared for export, leaving 45,500 bales to the trade.

SEPTEMBER 22.—The sales to-day will probably amount to 8,000 or 10,000 bales, with a quiet market.

The above figures show:—

	bales.
An increase of import compared with the same date last year of	661,030
An increase of quantity taken for consumption of	472,200
An increase of actual exports of	277,940
An increase of stock of	19,060

In speculation there is an increase of 270,680 bales. The imports this week have amounted to 22,082 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to September 15) is 58,000 bales, against 25,000 bales at the corresponding period last year. The actual exports have been 45,500 bales this week.

LONDON.—SEPTEMBER 21.

Annexed is a portion of the circular issued this week by the London Cotton Brokers' Association:—

Since our last the market has continued quiet, and the business done on the spot has been at prices rather in favour of buyers. For arrival, the transactions show an irregular decline of $\frac{1}{8}$d to $\frac{1}{4}$d per lb.

Sales to arrive—400 bales Tinnevelly, at 7 3/16d to 7$\frac{1}{8}$d, April sailing, July to Sept. shipment, for good fair; 1,000 Western Madras, at 6$\frac{3}{4}$d to 6$\frac{7}{8}$d, June sailing, July to Sept. shipment, for fair; 100 Coconada, at 6$\frac{3}{4}$d, July shipment, for fair red; 600 Dhollerah, 7$\frac{1}{4}$d to 7$\frac{3}{8}$d, June to August shipment and sailing, for fair; 1,500 Bengal, 6d to 6$\frac{1}{4}$d, June sailing and

July to Sept. shipment, for fair; for forward delivery, 500 Dhollerah, 7¼d, October, for fair—total, 4,100 bales.

NEW YORK.—SEPT. 8.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Sept. 8. From the figures thus obtained it appears that the total receipts for the seven days have reached 9,137 bales, against 7,579 bales last week, 7,844 bales the previous week, and 7,660 bales three weeks since, making the total receipts since Sept. 1, 1871, 9,137 bales, against 11,104 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 1,967 bales. The exports for the week ending this evening reach a total of 10,193 bales, of which 10,193 were to Great Britain, none to France, and none to rest of the continent, while the stocks as made up this evening are now 35,380 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending Sept. 1.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.
New Orleans	3371	...	3371	3453	[illegible]	[illegible]
Mobile	...	...	...	...	[illegible]	[illegible]
Charleston	...	...	...	...	[illegible]	[illegible]
Savannah	...	...	...	...	[illegible]	[illegible]
Texas	700	...	700	...	[illegible]	[illegible]
New York	6822	...	6822	3826	[illegible]	[illegible]
Other ports	114	...	114	...	[illegible]	[illegible]
Total	[illegible]	...	[illegible]	[illegible]	[illegible]	[illegible]
Total same time in 1870	[illegible]	...	[illegible]	[illegible]	[illegible]	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 6,450 bales, while the stocks to-night are 10,967 bales more than they were at this time a year ago.

We have had a buoyant and, considering the small stock available, a fairly active market the past week. Holders have shown great confidence and have offered stock sparingly, while buyers, both for export and home consumption, have bought to a fair extent, and would have bought more largely if they could have found desirable stock. This upward turn in prices is due to the reports at Liverpool, probably growing out of reports of further injury to the crop and an anticipated short supply from this side, with the expectation that the early receipts will be less free than last year. There is a very strong undertone to the market, growing out of the present large consumption, which results in this extreme sensitiveness to every unfavourable rumour with regard to the crop. To-day, with less animation at Liverpool, the close here was more quiet, but steady, quotations remaining at yesterday's advance. For forward delivery there has been an active movement, and prices advanced to a point higher than prices for cotton on the spot, but at the close they were off a little. Low middling closed at 19½c for September, 19 5/16c for October, 19¼c for November, 19¼c for December, and 19¼c for January. The total sales of this description for the week are 89,500 bales, including 1,500 free on board. For immediate delivery the total sales foot up this week 12,877 bales, including 5,474 for export, 5,413 for consumption, 640 for speculation, and 1,350 in transit. Of the above, 507 bales were to arrive. The following are the closing quotations:—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary per lb	17½ @ ...	... @ ...	17½ @ ...	17½ @ ...
Good ordinary	18¼ ...	18¼ ...	18½ ...	18¾ ...
Low middling	19¼ ...	20 ...	20¼ ...	20½ ...
Middling	20¼ ...	21 ...	21¼ ...	21½ ...
Good middling	22¼ ...	22½ ...	23 ...	23½ ...

For forward delivery the sales (including 1,500 free on board) have reached during the week 89,500 bales (all low middling or on basis of low middling).

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Weekending Sept. 8, 1871.			Week ending Sept. 8, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	311	189	2764	897	1013	1328
Columbus	55	158	1471	375	554	1267
Macon	95	71	1764	498	875	1900
Montgomery	200	300	1365	223	340	1564
Selma	205	154	613	462	288	1424
Memphis	773	1267	1682	816	1097	4042
Nashville	243	341	422	48	105	2144
	1976	2481	10221	3450	4282	13663

The above totals show that the interior stocks have decreased during the week 505 bales, and are to-night 3,442 bales *less* than at the same period last year. The receipts have also been 1,483 bales less the same week last year.

The exports of cotton for the last five days of August, from New York show a decrease since last week, the total reaching 2,208 bales, against 8,631 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year:—

—*New York Commercial and Financial Chronicle.*

NEW YORK, Sept. 15.—According to Messrs Moffatt, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 13,000 bales; ditto, since 1st September, 24,000 bales. Shipments to England, 16,000 bales. Total since 1st September, 29,000 bales. Stock at all ports, 86,000 bales. Middling Upland, 9½d, cost and freight, per steamer.

NEW YORK, Sept. 19.—The receipts of cotton at all United States' ports for the last four days have been 9,000 bales. Shipments to England, 2,000 bales. Middling Upland, 9¼d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, September 21.—The tone of our market is now very depressed, and business for some days almost at a standstill. Both buyers and sellers seem anxious to curtail their operations, as there is a feeling of distrust owing to the unremunerative state of trade generally, and the prospect of dearer money adds to the prevailing stagnation of trade. The home trade demand is confined to its immediate wants both in yarns and goods. As to the demand for shipping it is of the most retail character for the present, as buyers are holding off in the expectation that the easier state of cotton and the necessity of producers to sell will shortly lead to a lower range of prices. To-day there is hardly anything doing, though producers are willing to make a concession in order to sell.

Messrs Alexr. Collie and Co. have received the following telegram from Manchester:—Our market continues dull in tone with prices tending in favour of the buyer. This is more particularly the case as regards yarns, which have declined a farthing per pound since Tuesday.

BRADFORD.—There is very little business doing in the wool market. Extreme rates are still required by staplers, who complain that it is impossible to replace stocks at the rates current in this market. Noils and brokes are still in good request, and prices are very firm. The yarn market shows little change. The great firmness of the wool market tends to the maintenance on the part of spinners of extreme quotations. There is no appreciable change in the piece market. Business for all quarters is very limited. Prices are very firm.

DUNDEE.—There have again been numerous arrivals of flax from the Baltic and Archangel during the past week, notwithstanding which the market remains firm. The inquiry for the better descriptions has been active, and a considerable amount of business has been done in these at prices in some instances slightly in favour of sellers. In the medium and lower descriptions there has been little passing, and prices of such are nominally unaltered. Tows continue in active demand, and prices of all kinds are well maintained. Jute continues quiet, but prices are upon the whole rather firmer for goods on the spot. Linens continue to be in good request, both for the home trade and for some of the foreign markets, and manufacturers are well supplied with orders. Jute goods are also in extensive demand.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, SEPT. 8.

There has been a good degree of activity in the markets for flour, meal, and grain, and prices in some particulars show a decided advance. Flour has continued to arrive but moderately; the severe losses which were incurred by millers who made early consignments to this market of flour from new winter wheat, appear to have caused a material reduction of production, and a comparative scarcity is consequently felt at the moment. The home trade had been buying freely, but their orders, as well as those from the provinces, the West Indies, and South America, were easily filled, but when English shippers wanted large lines they found it extremely difficult to procure them. To-day, a decided advance in Liverpool caused some excitement in this market, and lines of shipping extra State and Ohio were in demand at $6 to $6.10, and in some cases held at $6 25 and upward; low superfine, as well as good trade and family brands, were also in brisk request, and the sales of flour to-day were hardly less than 22,000 bbls. Rye, flour, and corn meal have been in good demand, and close buoyant. Wheat has been in brisk request for export. Receipts have been but moderate and the available supply small each day, so that shippers have been buyers for early arrival; prices are consequently higher, but the steady advance in ocean freights and the depression in sterling exchange have checked the advance and given an uncertain tone to the market. Receipts have been liberal at the west, and the visible supply is materially increased, but the receipts of spring wheat have not been large. To-day, with a decided advance in Liverpool, our market opened excited, with $1.45 paid for No. spring, and $1.60 for amber winter, but shippers again encountered higher freights and low exchange, which caused a flat closing, with nominal quotations $1.40 to $1.43 for No. 2 spring to arrive and on the spot, $1.48 to $1.50 for red winter, and $1.57 to $1.58 for amber ditto. Corn has been gaining strength, and to-day advanced 2c on an increased export demand, with some revival of speculation. There has been so little taken for Great Britain in some time past that her markets begin to feel the prospective deficiency, and we should have explained in wheat that orders for corn, though not large, are very pressing, and crowd wheat out of the freight engaged for it. To-day the demand for mixed corn was active, and it closed firm at 70c afloat, with yellow quoted at 71c to 72c, and white at 73c to 75c.

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The harvest has now been fairly completed throughout the British Isles, with the exception of the more northerly districts, where the white corn crops are still standing. The estimates of the yield vary very much, and there is reason to believe that it is greater than was at one period anticipated. The quality of the samples now on offer at Mark lane does not equal that of the early exhibits, nor is the condition so good, and much apprehension is experienced lest this falling off should become more confirmed as thrashing is proceeded with. Nevertheless, the grain trade has ruled dull throughout the week, and prices have had a downward

tendency in consequence of the limited demand from the milling trade. Sales of foreign wheat have been pressed owing to the advance in the Bank rate and to the general prospect of the money market, which intimidates holders. English wheat has given way 1s to 2s per quarter since our last report, while all descriptions of foreign are fully 1s lower. Stocks on hand are large, and are yet on the increase, the imports having been on a liberal scale; while the number of wheat-laden vessels on passage is in excess of last year, the actual number being 390 against 340 in 1870. Flour has further given way 6d to 1s per sack, in sympathy with the wheat market.

New malting barley is quoted at 36s to 42s per quarter, but transactions have been very limited. Grinding corn has sold at late rates. Maize and oats have not maintained last week's advance, and close at a decline of 6d to 1s per quarter. Beans and peas have tended downwards in price.

The following statement shows the imports and exports of breadstuffs, &c., to and from the United Kingdom during the first three weeks of the season, compared with the corresponding periods in the three previous years:—

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—**During the last eight days 85 grain** and seed-laden vessels have arrived at ports-of-call, viz.:—37 wheat, 15 maize, 6 barley, 8 rye, 7 beans, 10 linseed, 2 cotton-seed. To-day, in addition to the above, 51 are telegraphed. The floating grain trade has been quiet, and prices in general tending downwards. Wheat—At first slow sale; later an active demand ensued at 6d advance, but to-day is again quiet. Maize—**At first firmly held; later the demand** flagged. Barley—The few cargoes offering being more or less imperfect, sales have been difficult to effect. Rye—**Several cargoes have been offering, the highest price paid** has been 32s for Odessa. The reported sales are as follows:—Wheat—12 arrival cargoes: Marianopoli, 53s and 53s 6d; Ghirka, from Taganrog, 48s 6d to 50s; hard [illegible], 47s; Gheorgiesk, 52s 6d; Nicopol Ghirka, 52s 6d; Kurrah, 52s 6d; **Ghirka, from Nicolaieff, 52s and 52s 6d per** 492 lbs. Shipped or to be shipped: 24,000 qrs Marianopoli, 52s 6d, red winter, from Montreal or New York, 55s; No. 1 spring, 45s 3d per 480 lbs. net, American terms. Maize—6 arrived cargoes: Moldavian, from Sulina, 31s to 35s per 492 lbs; Bulgarian, from Varna 28s 9d; Danubian, from Ibrail, 31s; mixed, from New York, 33s 3d per 480 lbs; Odessa, 30s 6d per 480 lbs. Barley—on passage 1 cargo New Danubian, from Ibrail, 26s 6d per 400 lbs. Shipped or to be shipped—1 cargo Danubian, 25s 9d per [illegible]. Rye—3 arrived cargoes: Odessa, 32s; Nicolaieff 31s; Azow and Taganrog, 31s 3d per 480 lbs. Shipping, 2 cargoes Black Sea, 33s 6d; Odessa, 33s 6d per 480 lbs. Linseed quiet. Arrived 1 cargo Azow and Taganrog, 60s per 424 lbs. A T., and about 1,700 tons East India from Calcutta, at 61s 3d to 62s 6d per 416 lbs. Shipped, or to be shipped—1 cargo Azow and Taganrog, 61s per 424 lbs; 400 tons from Calcutta, 61s 9d per 416 lbs. Rapeseed steady. On passage: About [illegible] bags Saccharine, 70s per 416 lbs. A T., and 300 tons ordinary brown Calcutta, 67s 6d to 68s 3d per 416 lbs. Cotton-seed quiet.

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

For Report of this Day's Markets see "Postscript."

Mincing Lane, Friday Morning.

Sugar.—**There has been a very dull, market with limited sales,** although the importers have in some cases accepted easier rates, and refined remains unsettled, partly on account of the rather important contracts made in French loaves for delivery here. The demand for West India has been inactive, sales during the three days amounting to 1,369 casks. Barbadoes by auction was chiefly taken in; a portion sold at 28s to 32s 6d, and grainy, 32s 6d to 34s. The Trinidad concrete bought in last week has been disposed of at 25s 6d. Jaggery unchayed **Manila and other low brown sorts are without change, but less readily saleable than of late. At the sale of Java, held by the Netherlands Trading Company on Wednesday, prices showed slight changes. The deliveries continue rather in excess of the landings, and the stock at this port has further decreased to 72,400 tons, which compared with the** previous season shows a decrease of 31,000 tons. As regards the kingdom, **the falling off amount to about 56,000 tons.**

Mauritius.—There have not been any public sales.

Madras.—1,800 bags Jaggery at 20s 6d.

Penang.—At auction 3,296 bags Penang sold at 23s 6d to 26s for brown, and 28s to 31s 6d for low to good yellow.

Manila.—5,000 bags Taal at 21s 3d.

Java.—4,550 bags low brown part sold at 22s 6d. 171 casks from the Cape at 22s.

Foreign Cargoes.—A small cargo of Havana, No. 11, at 27s for the United Kingdom.

Refined.—Dry goods have sold at some decline. French loaves (Says) have sold largely for forward delivery at and about 33s to 33s 6d per cwt.

Molasses.—Nearly 600 puncheons have changed hands, the bulk Trinidad at 11s 6d; some Tobago at 11s per cwt.

Rum.—The market is steady, and without any change in prices to report. Leewards sold at 1s 8d to 1s 9½d; Demerara, 1s 9½d. paid. Business in Jamaica at 3s 4d to 4s 9d per gallon for common to fine quality.

Cocoa.—The market has been without alteration, and is rather quiet. At the sales this week 622 bags Trinidad, about one fourth part 4 d at previous rates; grey to middling, 65s to 75s; good, 77s to 80s. 185 bags Grenada at 52s to 56s; low quality, 47s to 48s. 150 bags Surinam were bought in at 50s to 60s. Privately a few small sales have been made in Grenada and Guayaquil, the latter at 52s to 57s per cwt.

Coffee.—At the sale of the Netherlands Trading Company held yesterday some advance upon values was obtained. Good ordinary Java quoted about 67 to 67½ cents. Since the previous sale this market has seen several alterations, consequently the result of the above sale will not cause any further change. 1,852 casks 328 barrels and bags plantation Ceylon, by auction all sold at last week's rates; dull and grey, 68s to 70s; colory, low middling to middling, 69s to 77s; good to fine, including bold, 77s 6d to 84s. 1,485 bags native were chiefly disposed of, besides several parcels by private contract; good ordinary to real good ordinary, 70s to 83s; bold, 69s to 69s. 164 casks 115 bags and 633 **mats 3,777 bags East India sold, including Coorg, at 63s 6d to 70s, and** bold at 70s 6d to 77s; a few lots Mysore at 87s to 93s for good to fine; native kinds, 59s to 64s. 300 bales and half-bales Manila were partly disposed of; mixed short and long berry, 58s to 62s 6d. 1,045 bags Manilla part sold at 63s to 63s 6d for good yellow. 256 bags Singapore realised 63s to 63s for good yellow and brown Bantyms. A few lots Jamaica at 64s to 67s for pale to middling colory. 4,200 bags Costa Rica sold steadily at 61s 6d to 66s 6d for pale, and 67s to 70s for low

middling to superior colory. 662 bags African at 54s to 56s. 619 bags foreign descriptions were partly disposed of: Guatimala, 61s 6d to 64s 6d; Santos, 63s 6d; washed Rio, 60s. By private contract business has been done in native Malabar, &c., at 58s 6d to 59s 9d per cwt. The stock is nearly on a par with last year, but the quantity afloat from Colombo now much smaller. Export deliveries this season show 8,100 tons increase.

TEA.—The market has been without further alteration this week, and is now steady. At the public sales, comprising 13,279 packages the new season's red and black leaf congou without reserve obtained full prices. Some common Foo-Choo congou sold at 11¼d to 11½d; Canton scented orange pekoe, 1s 1d to 1s 6½d. Moyune green sold at firm prices, from 1s 3¾d to 2s 10¾d per lb. Fine grades are occasionally ⅛d per lb dearer. Deliveries continue good, but the supply afloat is larger than last year.

RICE.—There has not been any improvement in the demand this week. A floating cargo of Rangoon has sold at 10s 3d for the continent and part of a cargo at 10s 3d, one of broken Rangoon at 8s 9d. On the spot a few parcels White Bengal at 10s 3d to 11s; Madras, 10s 1⅛d to 10s 4½d; Bassein and Arracan, 10s 1½d to 10s 3d; also some sales of White Bengal, ex quay, at 10s 3d to 10s 7½d; and Ballam, ex quay, at 9s 7½d. At auction 500 bags Ballam from the Cape sold at 10s 3d per cwt.

IMPORTS and DELIVERIES of RICE to Sept. 16, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imports .....tons	57000	37900	56000	48550
Deliveries	77570	52230	44750	38850
Stock	32600	35150	43930	26270

SAGO.—The sound portion of 1,258 bags small grain went at 14s 6d to 15s 6d for grey to fair, with sea-damaged in proportion. 678 bags bold were partly disposed of at 16s 9d for low, and 18s 6d per cwt for good quality.

TAPIOCA.—3,160 bags were chiefly bought in. A few lots good Singapore sold at 2¼d per lb.

BLACK PEPPER.—Prices have further advanced ⅛d to ¼d per lb. At the public sales yesterday, 774 bags Singapore sold at 6⅜d to 6½d, one lot 6⅝d, and grey at 6¼d to 6⅜d. Of 1,039 bags Penang, a few lots sold at 6½d to 6⅝d for West coast, the remainder being held at 6½d. 1,798 bags Malabar brought 6½d to 6⅝d for half heavy greyish to good brown; a few lots superior bright 6¾d to 7d. 99 bags good brown Tellicherry sold at 6⅜d. Privately, Singapore is now selling at 6½d; Penang at 6⅝d per lb.

WHITE PEPPER.—Several parcels changed hands privately up to 10¾d and 10⅞d for Singapore, but at yesterday's sales a further advance was demanded, and 429 bags part sold at 10⅞d, and one lot 11d. 33 cases Tellicherry sold at 1s 5½d to 1s 6½d for fine bold white, 1s to 1s 2d for Coriander kind, and 11¼d per lb for very low ditto.

OTHER SPICES.—Nutmegs continue in good demand, with sales by private contract at last week's advance. 35 cases Penang by auction chiefly sold: 68's, 3s 8d to 3s 9d; 88's to 70's, 3s 1d to 3s 5d; 110's, 3s. 18 cases Penang mace: low and broken, 3s 10d to 3s 11d; common to fair red, 4s 3d to 4s 5d. 414 bags pimento part sold at firm prices, from 2½d to 2¼d. 4 casks good Amboyna cloves realised 6⅝d. 51 bags low taken in for the sound portion. 176 bags fair cinnamon chips realised 4½d to 4¾d. 30 bales spurious cinnamon, 1½d to 4d per lb. 415 barrels Jamaica ginger sold steadily at 42s to 49s for low to ordinary, and 51s to 91s for good ordinary to bold, with a few lots fine at 100s to 150s. 643 cases Cochin realised last week's prices. Ordinary rough, 46s to 48s; rather bold ditto, 56s; part scraped, middling, 60s to 65s; one lot rather bold, 95s. 500 bags dark bold rough Malabar kind sold at 34s to 35s per cwt.

SALTPETRE.—The market is firmer; fine Bengal scarce, and worth 30s. During the week about 1,300 bags have sold at rather higher prices: refraction, 8¼ to 7, 28s 9d to 29s, chiefly for cash. 240 tons for arrival at 28s 9d, usual conditions, and 26s 6d per cwt without allowance unless over 15 per cent. refraction.

IMPORTS and DELIVERIES of SALTPETRE to Sept. 16, with STOCKS on hand.

	1871.	1870.	1869.	1868.
Imported .....tons	8540	7620	7740	5660
Total delivered	8120	10640	7350	7380
Stock	2800	1810	4580	6420

Deliveries last week 177 tons.

COCHINEAL.—The sales have gone off well at full prices, and of 1,313 bags brought forward about 760 bags sold. 883 bags Teneriffe: blacks, 2s 6d to 3s 1d; good to fine, 3s 2d to 4s 6d; silvers, 2s 6d to 2s 8d. 397 bags Honduras: silver, 2s 4d to 2s 9d: black ordinary, 2s 10d to 3s.

INDIGO.—The market is firm, and declarations for the sales on the 9th inst. now amount to 10,800 chests.

OTHER DRYSALTERY GOODS.—There is a better demand for gambier. Business has been done at 16s 1½d to 16s 4d¾, ex ship. 975 bags Madras turmeric sold at 18s to 20s 6d. Cutch quiet. 522 boxes by auction part sold at 19s to 19s 6d for sea-damaged. Sound bought in. Privately sales of good at 21s 9d. Myrabolanes sold at 14s to 15s 3d. China galls, 50s per cwt. 81 chests lac dye were bought in. Business has been done in safflower by private contract at full prices.

SHELLAC.—196 chests sold without material alteration in prices. Good orange, 6*l* 17s 6d; garnet, 112s 6d to 115s per cwt.

METALS.—The chief feature has been the alterations in tin. Several sales of Straits have been made in the market at 132*l* 10s to 133*l*, including some afloat. 300 tons sold by tender on Wednesday at 130*l* 10s to 131*l* on the spot, and 131*l* 15s to arrive. Much of the business has been speculative. English is firmer. Several sales of spelter have been made at 18*l* 2s 6d to 18*l* 10s, and fine at 18*l* 15s for Silesian, and the market shows an improving tendency. Copper in moderate demand. Sales of Chili, &c., at 68*l* to 69*l* per ton. The Liverpool market is firm. Quicksilver, 10*l* 15s to 11*l* per bottle. Scotch pig iron has been rather weaker in price, partly through the rise in the value of money. This morning's quotation is 60s 7d to 60s 9d per ton.

HEMP.—Manila is held for a further advance. 1,815 bales by auction were bought in at 50*l* to 58*l* for the sound portion. Transactions by private contract have been upon a small scale. Clean Petersburg steady at 33*l* per ton.

JUTE.—The market has been quiet but firm, and the shipments continue heavy. Contracts have been made for arrival at about former prices up to 26*l* 5s, but the large quantity by auction on Wednesday prevented much business privately during the week. 15,282 bales about one-third part sold, at and afterwards at irregular and for common to middling at rather lower prices. Low to middling, 18*l* to 23*l*; fair to good and fine, 23*l* 10s to 26*l* 10s per ton. Trade in Dundee is without much improvement as regards jute.

LINSEED.—A large business reported in Black Sea cargoes at 60s to 61s, but many arrivals have flattened the market, and 59s 3d accepted for seed off the coast. Calcutta has sold freely at 61s 6d to 62s 6d to arrive. Present value on the spot, or close at hand, about 63s per quarter.

OILS.—Prices of common fish oils are nominal. Pale southern, 32*l* 10s; seal, 33*l*; cod, 34*l* 10s. Small sales of sperm at 81*l* per tun. A large business in linseed oil; spot or very early delivery, 34*l*, or 33*l* 10s; October to December, 33*l*; first four months, 32*l* 10s to 32*l* 15s. Palm oil steady but quiet at 31*l* to 37*l*. Cochin cocoa-nut has opened at high prices, viz., 49*l* to 51*l*. Ceylon dull at 38*l* 10s to 39*l*. English brown rape firmer at 43*l* 10s. For delivery in the first four months of next year 44*l* paid; refined quoted 45*l* 10s to 46*l*; fine foreign, 49*l* 10s per ton. Olive firm, but not very active. Mogadore and Malaga have sold at 48*l* 10s and 50*l* per tun respectively.

PETROLEUM has become quiet. American refined, 1s 7d; last three months, 1s 6¾d per gallon.

TALLOW.—During the week the market for foreign has been rather quiet, but is now firmer. Quotations have varied slightly since last week. Present value of Petersburg: old, 44s 3d; new, 45s: October to December, 45s; January to March, 45s 6d to 45s 9d; Manila, 46s per cwt. About 2,000 casks are declared for sale to-day, chiefly Australian.

PARTICULARS OF TALLOW—Monday, Sept. 18 1871.

HIDES.—At the sales yesterday good qualities sold at full prices. Common were less in demand, but no general change in prices occurred. Buffalo and tanned hides without change. The total quantity offered was 158,315 kips, 18,859 tanned, and 10,077 buffalo; and the quantity bought in was 38,900 hides.

POSTSCRIPT. FRIDAY EVENING.

SUGAR.—The market is flat, and closes about 6d lower for the week. Sales of West Indian 692 casks. For the week 2,388 casks. Barbadoes by auction to-day, part sold on former terms. Privately 9,000 bags Manila sold at 20s 9d to 21s 3d for Taal. A floating cargo of Cuba sold at 26s: one of Havana, No. 10½ to 11, at 26s 6d; 8½, 24s 6d per cwt for the United Kingdom.

COFFEE.—The sales went off with spirit. 684 casks 199 barrels and bags plantation Ceylon nearly all sold, at rather higher rates; 404 bags very good ordinary native, at 59s; 50 casks 72 barrels Jamaica ordinary, 60s to 63s 6d: 365 cases East Indian sold at chiefly 64s 6d to 75s 6d for Naidoobatum, and 57s 6d to 63s 6d for native kinds.

PEPPER.—Black firm at the advance. White Singapore, 11d per lb.

SALTPETRE.—1,100 bags Bengal, refraction 6 per cent., at 29s 6d to 29s 9d per cwt.

TALLOW.—1,673 casks Australian by auction sold 6d to 1s dearer. Mutton, 43s 6d to 44s 9d; beef, up to 43s 3d per cwt. 174 casks South American bought in.

ADDITIONAL NOTICES.

GREEN FRUIT.—The report of Messrs Keeling and Hunt states that Lisbon grapes continue to arrive per steamers, and meet with a ready sale, shipments being limited. Malaga lemons in request. Sicily cleared off the market. Brazil and cocoa-nuts in moderate demand.

DRY FRUIT.—In currants a large trade has been done on a falling market throughout the week, and though a few barrels of very low were done at 23s, there is no quotation below 24s. This quality, however, is not taken freely by the trade, and fruit a shade better is preferred. Fine sorts are not in demand. Valencias are steady, but large arrivals are at hand, and may cause easiness. Fine samples are scarce. Figs and Sultanas do not meet with much demand.

ENGLISH WOOL.—Prices very firm.

COLONIAL WOOL.—The sales continue to progress with great firmness and spirit, at fully opening rates.

FLAX.—Market firm.

HEMP.—Market very firm both for Russian and Manila, and higher prices again paid this week.

SILK.—Market active, prices firm.

TOBACCO.—The has been rather more activity in the North American tobacco market, and although the sales actually effected have not been large, there appears to be a revival of inquiry for parcels of substance, and especially for Western strips. Such descriptions are very scarce, and holders do not show any disposition to part with such except at full prices. In other growths there has been a good business done, at top rates.

LEATHER.—The trade in leather during the past week has been brisk, but limited by the small stock on hand. On Tuesday there were larger arrivals of fresh goods than for some weeks; the attendance of buyers was small; no alteration to quote in prices, except for foreign butts, which made ½d per lb advance. The goods most in demand were crop hides of all weights, stout foreign butts, English butts of middle and heavy weights, dressing and shaved hides, English and Spanish horse hides, calf skins, and prime English shoulders.

METALS.—The week has been quiet for the most part. Copper has ruled firm, whilst little has changed hands. Iron is very firm in prices, with tendency to go higher. Tin shows great firmness, at slightly advanced rates. Spelter has been a little more inquired for, and some business has been reported. Lead and tin plates are steady.

METROPOLITAN CATTLE MARKET.

MONDAY, Sept. 18.—The total imports of foreign stock into London, last week amounted to 17,756 head. In the corresponding week in 1870, we received 9,932; in 1869, 13,178; in 1868, 8,890; and in 1867 15,[illegible]4 head.

The cattle market to-day has been fairly supplied with beasts, owing to the liberal receipts from abroad. The trade has been steadier, and influenced by the cooler weather, prices have acquired a hardening tendency. Runts and Herefords have been in request at full currencies, in fact, choice meat generally, has met a fair sale. The best English breeds have made 5s 8d to 5s 10d, and the best foreign 5s 2d to 5s 6d per 8 lbs. Only a moderate supply of sheep has been in the pens, but the quality has been good. Sales have progressed quietly, at about late rates. The best Downs and half-breds have been disposed of at 6s 8d to 6s 10d per 8 lbs. Calves have been disposed of at the rates previously current. Pigs have been unaltered in value.

SUPPLIES ON SALE.

	Sept. 19, 1870.	Sept. 18, 1871.
Beasts	3,730	4,830
Sheep	20,340	20,630

Lamb, 6s 0d to 6s 8d.

HOP MARKET.

BOROUGH, Friday, Sept. 22.—Hops of the new growth are taken off freely at fully the late advance. Yearlings attract a fair amount of attention, and in some instances are dearer. Mid and East Kents, 9/ to 2/ 12s; Weald, 7/ 10s to 9/ 9s; Sussex, 7/ 5s to 8/ 8s. Yearlings—Mid and East Kents, 60s to 130s; Weald of Kents, 60s to 105s; Sussex, 60s to 95s; Farnham and country, 90s to 120s; olds, 20s to 30s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Sept. 22.—Moderate supplies have been on offer. The trade has been quiet at our quotations Regents, 70s to 85s. Shaws, 60s to 70s; Kidneys, 80s to 110s; Rocks 60s to 70s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 22.—The East India wool sales, which commenced on Tuesday and were brought to a close this evening, have gone off satisfactorily, and last July rates have been fully maintained, with here and there a slight advance. The miscellaneous descriptions, comprising about 18,500 bales, will be offered here from the 26th to the 29th instant.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 22.—With a fair attendance at this market to-day wheat has met a tolerably good demand at last Tuesday's rates. Indian corn was slow of sale, and 6d lower since Tuesday. Flour and all other articles remained unchanged. The market has been quiet.

MANCHESTER, Friday, Sept. 22.—Since last Friday the weather has assumed of the most favourable character for securing the northern harvest, and in the southern counties threshing is going on freely under favourable circumstances. Wheat gives way in price, and with only moderate offers the demand is not very active. Best samples have reached 1s per 70 lbs, and common qualities 2s to 3s. Fine barley ready for delivery and quite as dear.

The Gazette.

BANKRUPTS.

TUESDAY, Sept. 19.

[illegible] Kerr, Buccleuch Cottages, [illegible], gentleman.
[illegible] Charles Mould, Chatham, Sussex, surgeon.
[illegible] Bradford, Hudderfield, yarn spinner.

HUBBUCK'S PATENT WHITE ZINC PAINT

Is the most durable and beautiful paint known, does not stain or discolour with the atmosphere of large towns, and by these properties, which is patented, is cheaper than White Lead.

It is especially adapted for painting iron, as, by virtue of a semi-galvanic action, it enters the pores and forms an amalgam of the two metals, which protects the iron from decay or incrustation. It cannot be used instead of Red Lead, which is proved to be destructive to Iron exposed to Salt Water.

ADULTERATIONS.—Some Paint Grinders have been selling Zinc Paint adulterated with Sulphate of Baryta, in proportions varying from ten to twenty per cent. No workman can produce good work with such material. Those who have obtained the Patent White Zinc Paint from Grinders who have not adulterated it, will never subsequently use any other Paint for their best work.

Each Cask of Pure White Zinc is stamped—

"HUBBUCK, LONDON, PATENT."

THOMAS HUBBUCK and SON WHITE LEAD OIL, PAINT and VARNISH WORKS, 24 LIME STREET.

"The genius remains and all those connected by affection have to be aware for many successive patents. A considerable remuneration has been obtained, as patenting from the starting to completion, several years elapsed in months. The reason to encourage men to extend to the inventors patent from paint, and the lungs drag in the leaden vapour."—Morning Herald, September 14, 1850.

CARSON'S PAINT,

HOLLOWAY'S PILLS.—

Chronic Inflammation.—In many persons suffering from some disease or a description of illness is unconsciously brought on by undergoing at once a considerable change in the habits of life, as in the transition from the country to the town. The recommendation to take Holloway's pills for the cure of disordered digestion will be found very applicable by all who give them a single trial. No traveller will be safe without them, as they will correct any tendency to sickness arising from change of water, food, or climate. No other medicine is so effectual in preventing fever and ague, and bilious and other disorders, as these purifying pills, which, if taken on the first approach of any of these complaints, will speedily remove them. Sold by all Medicine Vendors throughout the World, and at Professor Holloway's Establishments, 244, Strand, near Temple Bar, London; and 533, Oxford Street, near the Pantheon.

Threadneedlestreet, London, 1871.

REPORT OF THE DIRECTORS OF THE

LONDON BANK OF MEXICO AND SOUTH AMERICA (Limited),

Presented to the Shareholders at the Ordinary General Meeting, held at the Company's Offices, 144 Leadenhall street, London E.C., on Tuesday, the 19th September, 1871, at 12 o'clock precisely.

The Directors, in submitting to the shareholders the accompanying audited balance sheet and profit and loss account, for the half-year ending the 30th June last, have the satisfaction to report that, after paying charges, deducting rebate, and making provision for bad and doubtful debts, there remains an available balance of £22,126 11s 4d, including £2,434 0s 10d brought forward from last half year.

The Directors recommend that the above sum of £22,126 11s 4d be appropriated as follows:—

	£	s	d
Dividend for the half-year at the rate of 9 per cent. per annum, being eighteen shillings per share, free of income tax	16,210	16	0
Reserve fund (thereby making it £20,000)	3,000	0	0
Leaving a balance of	2,915	15	4

to be carried forward to the next half-year, subject to reduction by the payment of income tax.

It is with the deepest sorrow that the Directors have to record the death of their highly-esteemed Chairman, the late F. W. Russell, Esq., M.P., whose loss they feel confident the shareholders will regret equally with themselves.—By order of the Board,

WM. THOS. MORRISON, Manager.

London, 6th September, 1871.

The Dividend Warrants will be issued payable on and after the 26th instant.

GENERAL BALANCE SHEET, 30th June, 1871.

This day is Published, No. IX., New Series, Price 8d and 8½d,

THE INVESTOR'S MONTHLY MANUAL.

The INVESTOR'S MONTHLY MANUAL for September gives the Highest, Lowest, and Latest Prices of Stocks, Shares, and other Securities during the Month, the mode in which the Dividend on each case is payable, the last four Dividends, &c. It also contains a Financial Record of the Month, New Capital Created and Called, Table of Railway Traffic Receipts, Notices and Reports of Stocks, Railways, Banking, Finance, Insurance, and Miscellaneous Companies, New Companies and New Capital. Prices made up to September 27.

Advertisements for the next Number, to be published on October 28, must be sent, to insure insertion, on or before October 20.

OFFICE—346 Strand.

THE PRESENT STATE OF THE GERMAN MONEY MARKET, AND ITS PROBABLE EFFECT IN ENGLAND.

We have had the opportunity of inquiring on the spot as to the present state of the German money market, and as to its past and probable future effect on us, and the following is the result:

Everyone imagined that the payment of the indemnity by France to Germany would cause a rise in the value of money both in England and in most other places. We ourselves showed that the effect of all great shiftings of money was to make money temporarily inefficient, and therefore, other things being alike, to make it dear. But what was not expected either by us or, as far as we know, by anyone, was that the payment of this indemnity would cause, or at any rate be contemporaneous with, a rise of the value of money in Germany, and that it would be that rise in Germany which should augment the value in other countries. It was naturally expected that the payment of this large sum *to* Germany would not make money dearer *in* Germany. Yet this is what has really happened, and the reasons of it are very curious.

A very large sum has been paid to Germany by France, both in gold and silver, and strangely enough, by different causes, a great part of the sum paid in both metals has been rendered useless. First, of the gold the German Government have kept a large part in their Treasury. It is estimated by good authorities, though there is no exact information, that it holds in gold coin—including anything it may have paid to the subordinate Governments, and which they still hold—

	£
English sovereigns	5,000,000
Napoleons and other gold coins	15,000,000
	20,000,000

The German Government has a very large debt running at 5 per cent., which it has the option of paying off at the end of the year, and it must have then a large sum in hard cash to pay it. Therefore it now retains that sum, and it prefers to keep it in gold.

This immense sum is therefore so much withdrawn from the money market, and it is only wonderful that its withdrawal has not produced a greater effect. If it had been withdrawn at a time when banks were poor and specie was scarce, it would have produced an immense effect. In 1864 and 1865 it would have caused a panic.

Secondly, as to the silver. This the German Government has paid away, and therefore it might be expected to be of some use in the money market; but in fact it is not so. The silver money paid by France was principally in five-franc pieces, and these are not identical with German thalers or gulden. But till very lately the Frankfort banks had been in the habit of taking them in exchange, both for thalers and gulden, at the fixed conventional rate of 2 gulden 20 kreutzers, so that they were in fact money. But the branch bank of Berlin at Frankfort, acting under Government authority, has lately refused to take them at that rate, and the Government itself will not take them either. Good observers estimate that 3,000,000*l* of such five-franc pieces are held in various German banks, and the effect of the resolution of the Berlin Bank and of the Government is to make that vast sum useless as money. It has become an article of merchandise. No man who holds it can reckon on anyone taking it without a bargain. It is not a legal tender—its receipt is only optional. In consequence the Frankfort and other banks which held this as a part of their reserve find it all at once useless in that respect, and themselves in consequence so much the poorer; and naturally the rate of interest has therefore risen.

The effect was greater, because just at this time money usually goes from the great cities of Germany on loan to the agricultural classes on the continent. This is analogous to our payments at the close of the quarter, and to those movements of currency "West," of which we read so much in accounts of the American money market. It is a payment from the banks to the non-banking classes, and as those classes keep the sum so received in their pockets, it is so much sub-

tracted from the usual resources of the money market. Ordinarily therefore money becomes dear just at this time, and the consequence of the sudden inutility of the five-franc pieces held by the banks as a reserve is that it is still more dear.

In effect it may be said that though the French indemnity has been paid *to* Germany, very much of it has not been received *by* Germany, since it is either kept locked up in the State Treasury, or held by the banks in a form which used to be useful to them but now has ceased to be so.

The reasons of the German Government for the policy which is thus confusing the money market are peculiar. First, they wish to keep a large sum in hand, because they have a corresponding sum in bonds which they have the option of paying off at the end of the year, and because they mean to exercise that option. And they prefer to hold it in gold rather than in silver, because they contemplate getting rid of the present discordant and most inconvenient systems of German silver money, and substituting for them a good system of money with a gold standard as soon as it is ascertained what that new system should be. The German Government has not indeed been barbarous enough to lock up this vast sum absolutely for this distant purpose; it is willing to lend it at 3½ per cent. on proper securities, and to pay off its own 5 per cent. bonds, due at the end of the year, at a discount of 3 per cent. But neither of these options suit the public. First, as to the lending: the securities required are either its own stock or first-rate German bills, or, in its opinion, other absolutely indisputable securities. But these securities are not to be had in great quantity. Germany is happily not a largely-indebted country, and its stock is firmly held by *bonâ fide* investors, and could only be purchased from them at a very great advance in price, if it could be purchased at all. German bills being mostly based on German home-trade are —first-rate ones—likewise limited in quantity. And the rate of interest to be obtained in the open market is not yet nearly sufficient to make it worth the while of the banks who hold those bills to borrow on them from the Government at 3½ per cent. Practically the holders of the securities on which alone the Berlin Government will lend do not at present think it expedient to borrow on them from that Government at the rate it has fixed. And unless there is a considerable change in the German money market, it is not likely that they will think it expedient. Nor are the holders of 5 per cent. German bonds willing to take a discount of 3 per cent. They are regular, quiet people, who, like the holders of Consols, do not wish to be much troubled. They are receiving their 5 per cent., and they mean to receive it steadily to the end. Buyers on speculation could not obtain these bonds except at a great augmentation of price, which, as the bonds are so soon to be paid off at par, the buyers could not afford. In consequence, this large sum of 20,000,000*l*, if the estimate we have heard be right, remains locked up in the German Treasury, where no use is made of it, though it is much wanted elsewhere.

As to the silver, it is not so easy to say what the exact motive of the Berlin Government is. Probably they think that the number of five-franc silver pieces in Germany would be an impediment to the change from the silver to the gold currency which they meditate. Every traveller in Germany will also say that the country does not want more kinds of silver coin; every great country ought only to have one set of coins in each metal, but owing to the former divisions of the country, the number of such currencies is perplexing. If the object of the Berlin Government was to prevent any new aggravation of the present complexities of the German silver currency, their object would be good, whatever we might think of the means. In any case, however, they have acted with unnecessary suddenness. Both they and the branch Bank of Berlin at Frankfort should have given notice weeks or months before that they were going to destroy the fixed arrangement that made five-francs "money," and not have deranged the money markets of Europe by a sudden act.

But in fact the entire policy of the Berlin Government is wrong. It ought to have eased and aided the payment of this part of the indemnity as much as possible. It has still much to receive of that indemnity, and it is always the last instalment which gives most trouble, and which it is most difficult to obtain. But now it is throwing difficulties in the way. The notion of keeping 20,000,000*l* hoarded up in gold, or its objection to lend it save on very special securities, is mischievous. A large part of that great sum ought to be in the Bank of England, ready to meet the demands which the French are making upon us. England has, or rather English houses have, undertaken to lend France a part of the indemnity; we are under acceptance for it, and if the money market were in its ordinary state, and possessed of its customary resources, the mere movement of its funds would scarcely cause a ripple upon its surface. But if the Berlin Government will lock up the gold it receives, and will only lend it upon certain special securities which are not obtainable in large quantities, the effect on the money market may be serious. We are set to "make bricks without straw." We have undertaken engagements to pay gold, relying on being able to obtain the amounts of gold ordinarily circulating in the market, and on a sudden the Berlin Government—the Government to which we are to pay that gold—absorbs, and says we shall not have, our usual stock.

We do not at all mean to speak disrespectfully of the Berlin Government. It is no disgrace to them that they did not at once act rightly in a case for which there is no precedent. There never was anything like so much hard cash paid and to be paid by one nation to another as France has now paid and is now to pay to Germany. So much actual money was never, by such short payments, received by any Government as Germany has now received, and so much foreign coin was never accumulated in any country as there is now accumulated of French coin in Germany. And this entails on the recipients these obligations:—

First. That they should not withdraw any large sum from the money market. If they do so, they will certainly augment the difficulties of their debtor, who has still much to pay them; and they will cause ruin to many private persons, and grave embarrassment to the money markets of the whole world, which no civilised Government would think of causing, unless after the most careful consideration and except for the most serious equivalent. In theory it would be best that the Government should deposit their coin in banks (taking good security from them) and letting them lend it out as they thought most expedient. In the United States, where the Government has no banker and keeps its own cash, we well know how much dislocation is caused when large sums are paid into the Treasury. The money market has unceasing jerks in consequence, and so it will be in Germany now on a greater scale, because the sums at the disposal of the Berlin Government are so huge. At any rate, either through the aid of banks, or in some other way, the Berlin Government ought to lend out as easily and readily as is compatible with safety the money it has received, in order to be able more easily and with less of convulsion to receive the money it has still to get.

Secondly. The Berlin Government ought to make French coin as useful as possible, and not as useless as possible,—the principal aim should be to help its heavily-involved debtor to discharge her immense obligations. For the creditor to hurt the pecuniary resources of his debtor is recognised folly, yet that is the effect of rendering French currency in any way useless. So far from the Berlin Government now wishing five-franc pieces to be exceptionally inefficient, it ought to try to make them exceptionally efficient. It ought to make a tariff, and let five-franc pieces, and probably Napoleons also, circulate at an agreed and fixed rate. This will help France and help the money market, and Germany has at this moment much to receive from France and from the money market.

Unless some plan of this kind is adopted, the pressure on the money market will become serious. In the first place, it will fall on England, because England has undertaken to lend to France for a time so much of the indemnity. As we have said before, the money now foolishly hoarded in the Berlin coffers ought to be in England—or to be, at any rate, accessible to Englishmen—in order to effect the payments on account of the French debt which are now in course of being made. If this resource is still withheld from us, we must raise our rate, and this will bring us money from Germany and the rest of the world, as we have always found before. If the Bank of England should raise its rate to 6 or 7 per cent., large sums in bills would be taken in Germany, and the German market would then be much straitened, just like the English. And if the Berlin Government persevere in their mistaken policy, the Bank of England will have to raise its rate most rapidly, so as to secure for itself resources

sufficient to keep the engagements which Englishmen have undertaken to perform.

MR GLADSTONE ON HOME RULE FOR IRELAND.

THE Prime Minister's speech at Aberdeen cannot at any rate be charged with that tendency to intellectual hesitation and finesse which is the favourite taunt of his opponents. In speaking of the Irish cry for Home Rule, Mr Gladstone drew no fine distinctions, and came to no ambiguous conclusion. He asked if the United Parliament was to be broken up because it could not or would not do justice to Ireland, or only to please the Irish fancy. If the former were alleged, the answer was that for the last three years the United Parliament has been eagerly engaged in doing for Ireland what it would hardly have done for either England or Scotland—no doubt because neither England nor Scotland stood in need of the measures granted as Ireland did,—but none the less did this sufficiently demonstrate the perfect willingness and capacity of the United Parliament to redress all real Irish grievances. If the latter were alleged, that the Irish do not *choose* to take even good government from the hands of a United Parliament, then the answer is that on that head the Irish have only the right to vote with the other members of the Union; the whole Union has a right to decide what is in this respect for the common benefit, and unless any party can allege that their individual interests are trampled on by the Union, the whole Union has a right to say whether union or separation will best promote the interests of all. And this in point of fact, as everybody knows, Great Britain has long ago decided. In Mr Gladstone's own vigorous words—"Can any sensible man, "can any rational man, suppose that at this time of day, in "this condition of the world, we are going to disintegrate the "great capital institutions of this country for the purpose of "making ourselves ridiculous in the sight of all mankind, and "crippling any power we possess for bestowing benefits "through legislation on the country to which we belong?"

That is clear, forcible language, which may, we hope, have the effect of showing the Home Rule party in Ireland that while Ireland may gain almost anything that is reasonable and just from the Imperial Parliament, she will not gain the repeal of the Union for which that party is now crying out, and which would be indeed in many respects far more mischievous to British interests, and perhaps even to Irish interests, than absolute independence.

Indeed it is hard to conceive anything more mischievous than the opening of an indefinite, and indefinitely increasable, number of debatable issues between Great Britain and Ireland, such as would be not merely suggested but forced on the public by the division of duties between an Irish and British Parliament. It is difficult enough to divide the sphere of properly municipal or country from properly central and Parliamentary powers, and almost impossible to do so beneficially without giving Parliament an absolute overriding power in case of conflict. But this difficulty would not only be enhanced a thousand times by the great importance, unity, and national coherence of an Irish Parliament, but it would be quite impossible to give the Imperial (or as it would then be, Federal) Parliament a power to override the decisions of an Irish Parliament without provoking something like a rebellion on every separate occasion. It may be said perhaps that this difficulty has never been felt in the United States, where the State powers and the Federal powers are divided by a hard and fast line, which neither State nor Federation have the power to overleap. But in point of fact the difficulty has been felt and felt very keenly, and though not for precisely the same reasons as it would be felt in this case, yet for a similar class of reasons—namely, because the genius and policy of a certain group of the States diverged very widely from the genius and policy of the remainder. The Secession war was in fact a State revolt against the Central power, and though that Secession was due not to race, but to a "domestic institution" of a most potent and mischievous kind, yet difference of race and religion conjointly are certainly quite capable of producing as great a chasm of feeling between the different members of a Federation as is any difference in "domestic institutions." Only consider for a moment what an Irish Parliament would be disposed to feel if it found itself compelled to impose taxes for a war in which the sympathies of Ireland were directly opposed to the sympathies of Great Britain, or were even hindered from imposing taxes for some purely Irish object by the weight of the taxation for Imperial purposes which it disapproved. Is it even conceivable that such a Parliament could long exist without becoming a centre of the fiercest disloyalty and even treason? Or put aside questions of finance, and look only at ecclesiastical policy. Would not it be very probable that one of the first efforts of Ireland's separate Parliament would be to re-establish a Church in Ireland, but not this time a Protestant but a Catholic Church—an effort which would probably give rise to civil war unless England interfered to thwart the wish of the Catholic party, in which case the danger of a violent disruption would arise again from another cause? It is in fact as plain as common sense can make it to all who look at the condition of Ireland with impartial eyes, that "Home Rule" would be but the first step in a series of virulent disputes as to the political relations of the two islands, which could hardly end except in separation, or reconquest with all the evils that that would bring in its train. The Home Rule party would certainly be imprudent, but they would be far more logical, if they were to raise a cry at once for an independent Irish Republic.

THE ALTERED CONDITIONS OF THE NEWSPAPER PRESS IN LONDON AND THE COUNTRY.

THE effect of Railways and Telegraphs, coupled with the repeal of the advertisement, stamp, and paper duties, has during the last ten years silently accomplished a radical change in the relative importance and functions of the Newspaper Press in London and the large towns and the country generally. In England, the main purpose of a newspaper is happily to collect and distribute "news;" to tell its readers the largest number of facts useful, important, and interesting, and to leave those facts to produce their own impression on the reader. In only a small degree do we tolerate discussion and disquisition as the chief function of a newspaper, and in this consists the real superiority of our Newspaper Press over that of the continent—especially over that of France. In France, a newspaper in most cases is a mere political pamphlet, depending solely on smart writing and sensational theories. Before Telegraphs the centre of news was London, and the London papers—especially the dailies—had a sort of monopoly, or at least a distinct priority, and even in the largest provincial towns a Daily Local Paper was practically impossible. But the Telegraph has now been so organised as to put most of the leading Country Papers in a position as good as the London dailies. In all the large and in many of the medium towns you may now have delivered at your house, by eight in the morning, a local paper, with all the foreign telegraphic news up to the preceding midnight, with reports of the London and other markets to the close of business on the previous day, and with all the London and Parliamentary news to within three or four hours of the time when the paper is actually published. The London paper of the same morning is by this acceleration in a large measure superseded. It can add but little to the facts, and it is only of interest as the organ of a party or sect, and even in that capacity it is being rapidly superseded by the perfection to which most of the large Provincial Daily Papers have brought what is called their "London Letter"—that is to say, a column or more of pure news and gossip collected by some professional man of letters "about town." Indeed so effective has this kind of correspondence become that, in numerous instances, the first hints or statements of important measures or changes have been brought before the public in the London Letter of some distant Country Paper.

To complete the work of the Telegraph came the Railways, with their cheap and expeditious facilities for distribution. The Country Papers have turned this advantage to immense account. You may buy the Manchester morning papers, for example, at the distance of at least a hundred miles from the place of issue as early as nine o'clock, and the same remark applies to Leeds, Newcastle, Hull, Edinburgh, &c. In this way the leading Country Centres provide the less populous districts to the exclusion of the London Press.

The removal of the penny stamp, and the abolition of the advertisement and paper duty, completed the revolution by enabling the proprietors to establish a Penny as the uniform price of the provincial dailies, and in this way convert into readers of daily newspapers an immense class whom twopence or any higher sum would exclude entirely. Under these conditions the mere trade of a newspaper as a vehicle of news is

the country has for some years been a prosperous one; and so prosperous indeed, that latterly many of the best known provincial papers have made provision for the highest kind of political writing in their leading columns, and of literary criticism in a special department set aside for it. The Provincial Press is now therefore fairly on a level with its London competitors. Some of these latter may still have a certain advantage in the excellence and extent of their Foreign correspondence, but even there the Country Papers are beginning an invasion. Many of them have regular foreign letters, and they do not hesitate to send out their own special men on important occasions—such, for example, as the late War, or even the late Military Manœuvres.

The general effect of the change is decidedly beneficial. There is now real independence of discussion and criticism all over the country. The tone and the conclusions are no longer copied from, or inspired by, London,—and while it may be true that from the necessities of modern life there is a tendency to a greater extent of centralised Administration in London, it is equally true that at no former time has there been so great a force of independent and intelligent provincial and local Opinion as at present.

The greater diffusion of education is of course the prior indispensable condition. It is no use painting pictures for blind people, or writing newspapers for those who cannot read, and who are destitute of intelligent curiosity. The educational measures of the last forty years are beginning to tell with extraordinary power not only on the demand for newspapers, but also on every subject on which intelligence and intellect can act. Instead of merely hundreds of persons occupying themselves in observation, reasoning, and speculation, and pretty much in the same grooves, and subject to the same previous predilections, there are now hundreds of thousands, and the motives and aims are as different as the varieties of social condition. We see the results in the novel and startling, and sometimes absurd, doctrines and schemes which are put forward; but still more in the force and decision with which public opinion pronounces itself on any definite and practical subject—such, for example, as the Irish Church, the late events in France, or the Alabama Treaty.

The future scope of the London Daily Press will, for the reasons assigned, become less and less national and more and more merely Metropolitan, and in order to guage the public sentiment on any particular subject, it has already become indispensable to watch the course of the principal Country Papers. But while the limits and influence of the London Daily Press will become smaller, it is probable that the influence of the London Weekly Papers which devote themselves wholly to discussion and criticism, whether on general or special topics, will become more confirmed. So far no large provincial town has succeeded in setting up and maintaining a weekly paper composed wholly of political and literary essays. The manifold and elaborate literary co-operation required for such an enterprise are to be found only in London, and are likely for some time to come to be found more and more collected there. And the scope for these Essay Newspapers is far greater than formerly—always supposing that they have the wit to keep up a close alliance with practical aims and topics—for mere dialectics have happily no chance in this country. There is indeed a strong natural tendency to extend the division of labour in journalism. The Drapers, Grocers, Coal-owners, Iron-makers, Wool-dealers, &c., have all their special weekly papers. The religious sects of course carry the warfare and polemics of the pulpit into a legion of special prints, of all degrees of violence and moderation—from those which deal in prophecy to those which write in prose. In like manner, and for similar reasons, the future of the monthly magazines is an expanding one; and if the large reviews which are now "quarterly" could discover some means of appearing more frequently and at a lower price—say, half the present rate of six shillings—there is a considerable field open to them. As society advances there must be an increasing number of subjects and problems which cannot be properly handled in a daily, weekly, or even monthly publication; and to these the old reviews may well address themselves, but in a style less ponderous and dull than they have unfortunately exhibited of late years.

The extent to which daily and periodical writing has already created a new profession, and absorbed a large part of the intellect of the time, is beyond belief, except to those who have special means of knowing the facts. The institution which is in greatest peril from the now pervading and powerful engine of Journalism is the Pulpit. In Latimer's days Paul's Cross performed the office of the leading journal of the time, and until within the last fifty years preachers were generally better instructed in one way or another than the majority of their hearers. But the case is now being rapidly reversed. Tests and technical theology have thrown the preachers into the rear, and to their great astonishment they have now to deal with congregations whom a popular press has fully informed beforehand of the merits and history of nearly every topic which the pulpit can take in hand. A man of eloquence and genius can always infuse life and interest into any subject, but the ordinary didactic and perfunctory preachers will find themselves under greater and greater disadvantages, and after various devices of denunciation and resistance they will either accommodate themselves to the requirements of the time, or become as obsolete as the Schoolmen.

RAILWAY COMMUNICATION WITH INDIA.

To bring England nearer to her Empire in the East is a magnificent and fascinating ambition, and we cannot wonder that for a quarter of a century or more, since in fact the political, commercial, and military value of railway communications have been perceived, the project of joining India and Europe by direct railway communication has been brooded over by statesmen, soldiers, merchants, and engineers. Nothing is easier than to take up the map and to trace half-a-dozen different routes through Western Asia, each with its own peculiar advantages; but the practical difficulties in the way of the adoption of any are so great that we should almost pronounce them, for our time at all events, insurmountable. We do not speak merely of engineering difficulties, which the progress of the art may attenuate or remove, but of political and financial complications involved in every one of these schemes, and seemingly not in the least likely to diminish with lapse of years. A Committee of the House of Commons, under the presidency of Sir Stafford Northcote, has been investigating the subject of "Railway Communication "between the Mediterranean, the Black Sea, and the Persian "Gulf," a branch of the larger question. The inquiry is to be resumed next Session, but meanwhile we have the evidence of a number of gentlemen, including Sir Henry Rawlinson, General F. R. Chesney, and Sir John Macneill, which gives some opportunity for judging of the possibility of carrying out any of the plans proposed.

What is commonly known as the Euphrates Valley scheme, contemplates nothing more than the union of the Mediterranean with the Persian Gulf by a line of railway starting from a Syrian port, either Alexandretta (Scanderoon), a thriving but unhealthy town on the north side of the Bay of Issus, or Seleucia (Suédia) on the south side, a place with no convenient harbour and now deserted, but healthier than the former. Between the port and Aleppo there is a difficult bit of engineering work to be done in bringing the line over the Bailan Pass, 2,100 feet above the level of the sea; the maximum gradient necessary would be 1 in 13. Beyond this there would be no obstacle to get over; the line would run down the valley of the Euphrates to Bussorah. But it would not stop there nor at the mouth of the river. It would turn some distance along the west side of the Gulf, having its terminus at Grain, a fine harbour, whence the steamers would start for Kurrachee. The entire length of this line is a little under 1,000 miles, and the estimated cost is 8,210,000*l*. Another plan similar to this, but more extensive, has been proposed by the Turkish Government, which has offered a concession for it, but nothing has yet been done to carry it out. It would start from Scutari and cross the centre of Asia Minor, striking Aleppo, and thence pursuing the route just described. Yet another plan, taking Scanderoon again as the starting point, would make a detour northwards to Diarbekir, and follow the course of the Tigris down to the Gulf. We are not in possession of estimates for the latter schemes, but they would be decidedly more costly and difficult than Mr Andrews' plan. But there are other plans quite different from these, and far more ambitious—plans for the construction of a great through route from Europe to India. One described by Sir Henry Rawlinson, starting from Constantinople, and passing along the south coast of the Black Sea as far as Erzeroum, would next cross the Persian frontier, pass through Tabreez and Teheran, and keeping nearly due east as far as Meshed, would turn in a southerly direction, thence to

Herat, and so on to Candahar, and would enter India by the Bolan Pass, which is quite available for a railway. Another plan similar to this has been propounded in a recent pamphlet by Messrs Low and Thomas. It embraces the whole distance from England to India. Starting with an assertion of the practicability of a submarine tunnel between Dover and Calais, this scheme proposes to make use of existing lines as far as Trieste; thence to run a line along the eastern coast of the Adriatic, to a point nearly opposite Brindisi, to strike eastward through Turkey, passing Salonika, and on to Constantinople. From Scutari the line would turn south-eastward as far as the Gulf of Adalia on the Mediterranean, and thence proceed to Aleppo. Down the Euphrates Valley this line would not greatly differ from those already described, but from Bussorah it would run along the eastern coast of the Persian Gulf, and by the shores of Beloochistan to the Indian frontier. If Sir H. Rawlinson be correct in saying that between Bussorah and Kurrachee there is "such a very scant population as to be hardly worth naming," it would be idle to look for local traffic on this part of the line, and we know that through traffic on a long railway of this kind can never be made to pay. The estimated cost of the scheme is forty-one millions, and by calculating on a speed of fifty miles an hour, nearly twice as great as the average rate that Mr Telford Macneill allows for the trains on the Euphrates line, it is estimated that the journey may be done between London and Kurrachee in a little more than five days.

Other schemes might be mentioned—such as a line from Trebizond, or some other Black Sea port, to Teheran, and thence by Herat to India; or a line connecting the Black and the Caspian Seas, and starting from Astrabad to Meshed, and thence by the former route to India. This latter would place a powerful weapon of offence in our hands if we were ever to engage again in a war with Russia. But the military question is really not worth while considering. And as commercial facilities, any of the lines we have sketched would be of secondary importance. The gist of the matter lies in its finance, though there is a political obstacle that would bring us to a halt, even if we were to get rid of the money question. It is idle to project schemes which depend for their fulfilment on obtaining upwards of forty millions of money, to be expended in semi-barbarous countries, and with a doubtful prospect of creating a trade. Who is likely to lend forty millions, or the better part of it, on the security of the Turkish Government? and if the money is to be supplied by other nations, as Messrs Low and Thomas suggest, how can the rights of the shareholders be secured? It is easy to suggest a guarantee, to be jointly entered into by the nations interested in the traffic; but it is plain that the burden of such a guarantee would fall upon England chiefly. Suppose some refractory Arabs were to seize or destroy a part of the Euphrates line, and to set the Sultan's Government, as they might well do, at defiance, what help could Austria give us in redressing the wrong and protecting the railway property? The result would be that we should be compelled to establish a sort of protectorate over all the line, as far at least as the limits of Europe. And it is gravely proposed to accept this unnecessary and exacting charge at a time when we find the present burdens of Empire almost too grievous to be borne, and our means of bearing them inadequate. It would be wise therefore to weigh all the consequences before undertaking any extensive project for the connection of England with India by rail. At all events it would be prudent for the present to confine our endeavours to a limited part of the task, which is too gigantic possibly to be grappled with by a single generation. The Euphrates Valley line is a reasonably promising project, and does not demand the outlay of too much money. Yet it would be well to consider whether the gain in time by this route—a matter of five or six days only compared with the Suez route—compensates in regard to goods traffic for the delay and loss of breaking bulk at Scanderoon and at Orfah, and whether, as a mere passenger line, the scheme could be made to pay.

BUSINESS NOTES.

The Harvest.—Among the most important estimates of the harvest must be considered that of Mr Caird, who has frequently made elaborate studies of the subject with the help of the Agricultural Returns. In a letter which has been published, he states:—

> The acreage given in the Agricultural Returns lately published, with the addition of the figures of 1870 for Ireland and the islands, shows a total of 3,850,000 acres. Upon this, after deducting seed, I estimate the produce available for consumption at 11,000,000 quarters.
>
> The annual consumption may now be taken at 22,000,000 quarters, which would therefore show the imports required to be 11,000,000 quarters. But, owing to the comparative lateness of this harvest, the probability is that more than eleven and a half months' consumption will be needed to meet the harvest of 1872, so that the foreign supply required may thus be reduced to very little over 10,000,000 quarters.
>
> I am disposed to think this a liberal estimate of our foreign requirements. During the last ten years it has only once been exceeded. For 1867, which was the worst crop of the ten, and certainly inferior to that of the present year, the import of foreign wheat within the harvest year was 9,793,000 quarters. It exceeded 10,000,000 only in 1870, and that after an average home crop, but with consumption, no doubt, stimulated by the low price of 46s, which was the average of the year ending the 30th of June, 1870. The price is 10s higher now, and if for the current year this should be maintained or exceeded, the consumption will thereby to a moderate extent be economised.

Mr Caird, reviewing all the circumstances, concludes that there is no reason to anticipate a much higher price for wheat during the coming season than is now ruling. We give his estimate as one of the most impartial and authoritative which has yet been published. The subject has excited a keen controversy, and we do not remember a season in which the estimates of the harvest and its effect on prices were so contradictory. Mr Caird's is one of the most sanguine, but the state of the market appears to confirm his view of the sufficiency of the present price to bring in an ample supply during the season, while the very latest accounts appear to indicate a much better average yield than had been anticipated. We shall undoubtedly have a larger sum than usual to pay for foreign corn, but it is hardly probable we shall require to pay so much as alarmists fear.

Sewage Companies.—The grant of a settling day to the "Native Guano Company" and its admission to the official list have occasioned some discussion on the objects and status of such companies, and they have just formed the subject of a correspondence in our own columns. It is not astonishing that among capitalists they should have excited some attention. It is sufficient that the 5*l* shares of the Native Guano Company have been for some time at 40 42, or about 700 per cent. premium, and the 10*l* shares of the rival Phosphate Sewage Company have been at 100 per cent. premium. It is naturally inferred that as in the case of the Asphalte Companies such premiums would not exist without a reason. Some of the reasons are very obvious. Both companies have evidently had considerable success in persuading Boards of Health that their proposed methods of purifying sewage are not only worth examining into, but are very nearly complete successes; while the Native Guano Company produces an article from the sewage, which really sells in larger quantities than it has yet been possible to supply at 3*l* 10s per ton—more than 100 per cent. profit. Lately the same company has persuaded the Metropolitan Board of Works to permit the Metropolitan sewage to be experimented upon at Crossness, and the experiments are still in progress. It is argued that there must be "something in" a process which has commanded so much serious attention, and that the profits of the patent, when the product is so valuable in the market, must be very large. We should be inclined to recommend however the utmost caution in investing in such companies. What they profess to do is a thing greatly wanted, but the objections of Mr Hope, who has had so much to do with sewage, appear to us unanswerable, and have not been answered. The sewage, he says, is *not* purified by the processes in question in the sense required by the Rivers Pollution Commission, which represents the public interest in the matter. Though the sewage is "clarified" and looks all safe to the unscientific eye, it is in reality impure—that is, the organic matter in solution remains, and the clarified liquid cannot freely be passed into rivers and water courses. This is the conclusion of the Commission which inspected the Native Guano Company's process at Leamington, and no one who tests it can doubt its soundness, the fact being that to purify sewage which contains organic matter in solution is a "chemical" process which the Native Guano Company mixture does not and cannot effect. Chemists perceive at once that it is nonsense. The promoters of the company allege that there has always been something wrong with the works in which the experiments were tried, but if

the process was really a chemical one nothing would be easier than to conduct a laboratory experiment with every condition perfect, and submit the result to the Rivers Pollution Commission, or a committee of chemists; but this has not been attempted. Then as regards the value of the residual product there appears to be one fatal objection: *the* valuable element in sewage is that very organic matter in solution which the company hardly touches, so leaving the sewage impure. Dr Voelcker, who has analysed the company's products, values the fertilising elements they contain, *when separated*, at about 33s per ton, but the actual product itself, with all its useless ingredients, at 5s per ton. The agricultural chemists, it may be said, are wrong, as is proved by the market value of the manure, but it is not difficult or unusual, we fear, for very poor manures to succeed for a time, and the company's product would certainly stand higher in our estimation if agricultural chemists were of opinion that it was worth the market price. These remarks apply specially to the Native Guano Company, which has been most tried; but the Phosphate Sewage Company works in a similar groove, and hardly, we fear, contains the elements of any greater success. But how do we reconcile such facts with the favour these companies have met with? We must confess there is some mystery in the matter. We can only suppose that local authorities and business men are unscientific, and have been misled by appearances, and this is at least more likely than that the Native Guano Company's process accomplishes results which chemists declare it does not.

Sensible Advice on the Strikes.—An interesting pamphlet, by a lady, which we understand has been largely circulated among the workmen in Newcastle and the neighbourhood,* has just come into our hands, and deserves some notice as an able popular exposition of some of the facts connected with trade which are too often lost sight of in vague talk about the relative rights of labour and capital. The pamphlet exposes very cleverly many of the most common delusions in which strikes originate, and which are sometimes so plausible as to take in philosophical radicals with communistic sympathies. Among the more happy hits, we may notice the exposure made of the absurdity of the outcry against the underselling of English workmen by foreign labour. "What right have you to tell others that they shall not be "content with something because it did not satisfy you? "How would you like if you saw a loaf marked 6d in a "baker's shop, and you wanted to go in and buy; how would "you like if a rival baker placed himself in the doorway "and declared you should not buy the loaf under 7d, which "was what he charged?" This is an exact statement of the attitude of the Newcastle engineers towards the foreigners who come to take their place. The Newcastle masters go into the foreigner's labour shop, but the engineers who have struck exclaim vehemently against the foreigners who are willing to sell their loaf—that is, their labour—for less than what they wish to charge. The unreasonableness and absurdity of their attitude are so glaring that they must at last perceive it; but if a pamphlet like the present will not convince them, they must be literally "argument-proof." Another of the delusions exposed is the exaggerated idea which workmen are apt to entertain of the amount of a master's profits. They see the immense income at times of a few large employers, but they forget the occasional and more than occasional losses, and above all, they do not see that the concentration of capital which offends them does not increase the percentage of capitalist's profit but diminishes it, that they are not "exploited" by the huge capitalist, but are relatively gainers by his operations. We cannot do better than quote the words in which the pamphleteer puts this point:—

> The wealth of the great employer troubles you, and you fancy that he cannot acquire so much without taking something that should come to you. This is not the right way to look at it; but rather consider which is most useful to you—the small employer, with very moderate earnings, or the great employer, with large gains. In the time of small employers, before there were large capitals and large establishments, a master might have some twenty men under him. Now, the master had to live on the sale of what these twenty men could produce for him, and it therefore became a matter of life and death with him to keep their wages low, and get as much work out of them as possible. If we take a great employer of the present day, who has four thousand men under him, he will fill the place of just two hundred of the small masters with twenty men a-piece, and you will easily perceive that the earnings that went separately before to the two hundred small masters will now come collectively to the great employer and his staff. Assuming that the average earnings of the small masters were 250*l* a-year each, we have a sum of 50,000*l* a-year to come to the great employer and his staff, who occupy the palaces of the two hundred small masters. I am not here allowing anything like the proportionate interest on capital—for the small masters had so much very less capital proportionably invested in their undertakings. And yet you find it hard that one man, for whom so many of you work, should make such enormous gains, while you were quite content that the small master should make his 250*l* a-year. But the small master making 250*l* a-year would need almost all he earned for the support of himself and his family, and would lay by the rest as a provision for his old age. His profits were so small that he had no surplus sufficient to enable him to enlarge his works or put up better machinery, and so he could do nothing to increase the powers of production, or advance your prosperity. The great employer, on the other hand, cannot benefit himself without benefiting you; the chief portion of his immense gains are invested each year in adding to his works; in taking on more hands to fill them; in putting up improved machinery, which simplifies and lightens your duties; and in experimenting with some of those new and wonderful inventions that so multiply our powers of production, but which are so costly, that, but for his wealth and enterprise, they could never have been constructed or tried.

This is admirable and quite unanswerable; were economic reasoning at all in the grain of our working men, a little argument like this should be quite enough to put an end to the strange notions formed as to the tyranny of capitalists. The accumulation and concentration of capital for great enterprises have in reality been largely instrumental in improving the condition of the masses of the community, and it is not in their nature to do the workman any injury. We trust the pamphlet will have a wide circulation among the working classes generally as well as in Newcastle, and that it may come into the hands of some of those theoretical socialists who make a parade of their sympathy with the working-classes, because they happen to share some of those mischievous errors which an imperfect and prejudiced study of their position is apt to engender among discontented workmen.

The Profits of Shipowning in the North.—In connection with the strikes in the North some remarkable statements have been made as to the profits of shipowning there, which is to some extent, by the demand created for new ships and machinery, the cause of the great prosperity of the Northern engineering trade. We have before noticed similar statements, but the facts show so well the suddenness with which great profits sometimes come into a particular business, and the rapidity with which it is extended, that we may again call attention to them. The statement made by the local reporter of the *Times* this week is as follows:—

> At Sunderland marine engine-building is a comparatively recent trade, but it has assumed very large proportions, and is growing every month. With the help of some of the best strike hands the Sunderland shops are turning out a large amount of excellent work, and are fitting up a large number of new steamers with engines. Orders for marine engines have to be given well in advance. At present orders are being given for engines which will not be needed for steamers until April or May in next year. Within the past year and a half or two years, from a million and a half worth of new iron steam shipping has been built for Tyne owners, and before next year at this time it is quite likely that two millions' worth of new iron steam shipping property may belong to this river. It is nearly all held by partnerships and in shares, but with unlimited liability. The rates of dividend upon the immense property recently created in iron shipping have ranged from 20 to 40 per cent. per annum. A new steamer, indeed, very rarely yields a dividend below the first named sum unless she has been unfortunate.

The correspondent goes on to add that the astonishing success of the business is due to the improvements which have been made in the construction of steam engine on the vapour-heating principle, which results in great economy of fuel; but whatever be the cause, the fact that when profits of such magnitude come to be made, no matter how suddenly and unexpectedly, the business immediately expands, is itself exceedingly noteworthy. It is characteristic indeed of the English monetary system that such extensions can take place. Not only is there a large quantity of annual savings ready to be poured into new enterprises, but the banking system is so developed and centralised that the banking deposits invested in trade by means of the discount of commercial bills are easily made available for the trades which happen to be most profitable. No sooner then is there a real discovery of an unusual opportunity of profit in a particular business than capital begins to flow into it, and we perceive such a phenomenon as that which has lately been witnessed in the North. The magnitude of the profits will perhaps surprise some people as quite exceptional in modern shipowning, but we believe that the statements we have quoted are in no way exaggerated.

* The Rights of Labour, &c. By a Lady. Edinburgh: Edmonston and Douglas.

THE PUBLIC REVENUE AND EXPENDITURE.

The following are the Receipts on account of Revenue during the week ending Sept. 23 :—

	Receipts of Week Ending Sept. 23.
	£
Customs	448,000
Excise	360,000
Stamps	166,000
Taxes	10,000
Income tax	14,000
Post Office	100,000
Telegraphs	nil.
Crown lands	nil.
Miscellaneous	20,216
Total	1,118,216

The total receipts of the previous week were 2,261,630*l.*

The Exchequer issues of the week on account of expenditure were 403,014*l.*, viz. :—

	£
Interest of debt	nil.
Other charges on Consolidated fund	3,014
Supply services	400,000
Telegraph services	nil.
	403,014

During the week the cash balances have increased as follows :—

	Bank of England.	Bank of Ireland.	Total.
	£	£	£
Balances on Sept. 16	1,135,769	1,310,243	2,446,012
— Sept. 23	1,650,889	1,490,725	3,141,614
Increase	515,120	180,482	695,602

Agriculture.

AFTER THE HARVEST.

We may now take a survey of the results of the harvest, and the general position of the English farmers, with a fair hope of arriving at correct conclusions, so far as is possible on subjects so complex. As to the wheat, the general opinion certainly is that the yield will prove deficient, and various threshings have been cited as corroborating that view; on the other hand, there have been so many instances in which the yield has more than answered the anticipation, as in some degree to modify the current notion of a large aggregate deficiency. That the corn has been well got in, free from sprouting, and generally in good condition is admitted, while the bulk of straw is very considerable. Probably the most correct statement as to the yield will be found to be something of this kind—viz. that in proportion to the straw the yield will in average farming prove deficient; but that taking the bulk of straw there will not be a great actual deficiency. At all events the grain will be fit for immediate use. The gradual downward tendency of prices for wheat, which was going on before the advance of the rate of interest by the Bank of England had checked speculators, also serves to confirm that view. That farmers with their actual crop and probable prices will find their wheat fairly remunerative is, we believe, a reasonable conclusion. Barley is generally a good crop, and oats, though not so universally good as barley, are for the most part very abundant. Peas and beans have grown with remarkable luxuriance this year, and even if the yield be only moderate in proportion to the straw, the pulse crops are certainly beyond the average. In the general economy of the farm, and in relation to stock (now so profitable to farmers) the great abundance of all kinds of straw of the present season is a true boon to farmers. This will supply some of the defects in quality of their hay, which though abundant was not in general well saved. Another point of remark is the immense luxuriance of the after grass. Few recollect so much. In this respect the contrast with last year is extreme, and unless the coming winter should prove severe, the stock will be maintained on the meadows and pastures with far less help from the manger and rack than in ordinary open seasons. Indeed the abundance of keep has so forced up the prices of store stock that at present few purchases of store stock can be made without considerable risk. The prices for fat stock are extreme, and are likely to continue high, as the supply is decidedly insufficient to meet the current demand. Perhaps nothing could better illustrate the advantage, nay the necessity, to farmers of possessing some reserve of capital beyond that actually employed on the farm. For instance, the great majority of farmers were last year compelled by want of keep to sell off very much of their cattle and sheep at loss, whereas had they kept them on by outlays entailing much immediate loss, they would have found themselves during the present year in the position of having a heavy stock of the most profitable description. Again we may note, as we have often before done, that farmers, whose land is in high condition, have very little to complain as to the yield of their wheat.

In a review of the wheat crop of 1871, Mr Lawes, of Rothamsted, shows that on land dressed with farm manure the crop of 1871 produced 39 bushels per acre, the average of twenty years previous being only 35¼ bushels. On land not manured this year's crop was 9¾ bushels, against an average of 14½ bushels per acre for twenty years. Thus the value of high culture becomes, in such a season as the present, most obvious. The scarcity of hands has caused much delay in getting in the harvest, and has proved to the farmers the importance of machinery, and the necessity of retaining on their farms a greater number of permanent workmen, as well as men who are skilled in all the various kinds of farm work. The prevalence of foot and mouth disease amongst cattle and pigs has been the greatest drawback of the present autumn. The loss of produce from this cause amongst dairy cows has been very great, while the condition of all cattle attacked by the complaint has been seriously lowered. There can be no doubt that the spread of this disease is mainly caused by the culpable negligence of butchers and dealers, and in a less degree of farmers themselves. We do not believe that it is derived from imported cattle, but that it is probably the result of the low condition to which many of the cattle were reduced during the summer and autumn of 1870 and the past winter, followed by the abundant pasturage of the present season.

Foreign Correspondence.

(FROM OUR OWN CORRESPONDENT.)

PARIS, Sept. 28.

The returns of the Bank of France for this week, last week, and for the week ending 8th September, 1870, are as follow :—

	Sept. 28, 1871.	Sept. 21, 1871.	Sept. 8, 1870
DEBTOR.	f c	f c	f c
Capital of the bank	182,500,000 0	182,500,000 0	182,500,000 7

Total	3,[illegible] 48	2,911,[illegible] 25	2,[illegible] 93

Comparing this week with last, the principal results are these :—

	Branch	France
Notes in circulation	Decrease	[illegible]
Treasury balances	—	[illegible]
Deposits at Paris and branches	Increase	271,[illegible]

Creditor.		
Coin and bullion	Increase	5,910,000
Discounts at Paris	—	143,983,000
— branches	—	42,114,000
Prolonged bills	Decrease	6,655,000
Treasury bills	—	35,000

The augmentations in the discounts and deposits are extraordinary, but they are explained by the operations to which the Paris loan has given rise, and are therefore only, so to speak, accidental. The changes in the items "sundries," compared with last week, are also owing, it is understood, in a great degree to the same cause—the form of bookkeeping requiring certain transactions to be recorded under that head. The increase in the coin and bullion, and the decline in the circulation, are favourable incidents, that will not fail to be noticed. The diminution in prolonged bills, though not considerable, is also favourable.

The arrangement made by M. Thiers for obtaining the guarantee of London bankers to French paper is not, at the present moment, at all certain to have the result he anticipated; and it so has been concluded in vain. His notion was (see the speech he delivered on the eve of the adjournment of the Assembly) that the Prussians would take 500,000,000f of the amount guaranteed at London as equivalent to payment in cash; and that consequently they would evacuate at once six of the departments they occupy—the said sum being, under the Treaty of Peace, only due in May next, when evacuation was compulsory. The Prussians consented to accept the paper provided concessions were made on the admission of the products of Alsace-Lorraine; but those conditions have been hampered by the National Assembly. Why then should the Germans take the paper? It will only be cash months hence, and *en attendant* by taking it, they would lose both the territorial pledge they hold, and the expense of maintaining their troops which now occupy the territory. Such is the real situation; and the statements that M. Thiers causes to be made in the press and in telegrams, that "the negotiations are going on well," that "the difficulty only consists in the words to be employed" (*la redaction*—as if any sort of *redaction* could make black and white agree, or 2 and 2 become 5), and other nonsense to the same effect. He does this to deceive the French, accustomed to be deceived by their Governments; and it has produced among them the impression that the Prussians must take the paper and go, whether the Alsace concession be accorded or no. He does it too to influence foreign exchanges; but they are more wary than the French. As however he is dealing with people who are wiser and stronger than he, the result will be that he will have to consent to what pleases them, and nothing less, or that they will decline to receive his paper. In the latter case, he will have subjected the country to the expense of buying first-rate signatures in London, which, as may be imagined, is not inconsiderable (precise figure not known) without advantage; thus he will have proved that his skill as a Finance Minister is no higher than his science as an economist.

At London the amount of paper guaranteed by English brokers is stated to be 750,000,000f (30,000,000*l*); here it is put at 650,000,000f. At London, it appears to be believed that the paper bears no other signatures but theirs, but here it is said to be endorsed likewise by the Credit Foncier, the Comptoir d'Escompte, the Credit Lyonnais, the Credit Industriel, the Caisse des Depots, the Banque de Paris, the Banque des Pays Bas, Messrs Stern, and a great many other houses; also, for a certain sum (125 millions, *dit on*) by Messrs de Rothschild.

The subscription to the new Paris loan, which took place yesterday and on Tuesday, was a great success. All the banks, "credit companies," and money changers called on the public, by placards and circulars, to subscribe; and in all the mayoralities of Paris, including the ruins of the Hotel de Ville, subscriptions were received. In the country tax-gatherers and bankers were authorised to accept subscriptions; and even at Brussels and Amsterdam, and in Italy, subscriptions were, by authority, opened also. At the Hotel de Ville persons were admitted to subscribe for one obligation, in the mayoralities for any number above one, and in all these places there were during the two days *queues* of people waiting to inscribe their names and deposit their money. The *queues* were certainly not so long as in the time of Haussmann, but they were considerable nevertheless, and each person had to deposit 50f per bond, which was a much larger sum than he exacted. As to the banks and money changers, some of them would accept no subscriptions for less than 20 bonds, and others for less than 10. To what figure the total subscription has amounted is not for the present precisely known, but it is immense. An authority of the Hotel de Ville calculated it in my presence this morning between 14 and 15 *milliards*. But this is of course only on paper. A great many of the subscribers for small amounts had no other object than to realise a few francs, and they hurried to the Bourse to sell at once at the premium attained the certificates given them; a still greater number signed for hundreds, or scores, or tens of bonds, with the desire of getting only a few. The total subscriptions of some of the banks are extraordinarily large; that of the Comptoir d'Escompte is understood to cover the whole loan; that of the Credit Lyonnais to be between 50,000,000f and 60,000,000f; that of the Bank des Depots of nearly the same amount; and so on. The stockbrokers are said to have subscribed 1,200,000,000f for themselves and clients. The loan has already been admitted to quotation on the Bourse, and to-day it has been done at a premium of 8f 75c for cash, 8f 25c for time.

The success of this new Paris loan, like that of those that preceded, lies in its being accompanied by a lottery, which gives the holders four yearly chances of winning from 1,000f to 100,000f. For the chances the French people produce their money in abundance, and accept a moderate rate of interest—12f a year for 277f or 270f paid at once. Without the chances they would in all probability not have subscribed the amount required at double the interest. Thus whilst pleasing them the city makes a profitable operation for itself. In utilising the lottery mania, the city is held by some persons to be guilty of immorality by encouraging a spirit of gambling; but not a few eminent authorities, and at their head M. Michel Chevalier, maintain that in what it does there is no gambling. In play, say they, a man either loses absolutely a certain amount of capital or wins considerably: in these lottery loans he loses no capital, and gets a fixed interest, the greater part in cash, the rest in the chance of winning a given sum, And the said chance they liken to that which attends ordinary commercial transactions in sugar, coffee, or other products. They say moreover, that whereas gambling has a demoralising effect, these lottery loans have precisely the contrary, inasmuch as they promote economy among the working classes more than savings banks or other investments do,—the possibility of receiving a large sum in a lump, or even of becoming rich, being a great temptation to them. If these views were to obtain favour in England, they would lead to an alteration of our lottery laws, and would thereby enable railway and other companies, and even the State itself, to lighten their financial burdens, without any injustice to their creditors.

The Bourse is much preoccupied with the new tax on the sale of securities. The calculation has been made that with the *decimes* to which it is subjected it will, on being added to interest of money and new brokerage, make the charge for 25 shares of 1,000f purchased in speculation 256f 25c, and that supposing the operation to be continued from month to month there will be at the end of the year 3,075f paid, which sum will be more by 1,575f than the said shares may be expected to produce. On such conditions it is considered evident that speculation will be greatly hampered, not to say rendered impossible.

A fall from the prices of last week had been expected on the Bourse, but it has not yet taken place. The conviction, however, still is that the market is burdened beyond its strength, notwithstanding the support it receives from great bankers and speculators. The new increase in the rate of discount at London has caused a bad impression, though the Bank of France, having suspended cash payments, is under no obligation to imitate it. Of late dealings in Bank shares have been active, and they have advanced considerably. The following are the quotations of the week:—

	September 21.		September 28.

The demand for gold has declined. The premium on bullion to-day was 3 to 4 the 1,000f; that on silver 18 to 20; English sovereigns 25 to 27½.

The mints, and particularly that of Paris, are displaying much activity just now. The latter has produced 25,000 pieces of 20f a day.

The Government makes known that up to 23rd September the sums paid to Germany on account of the indemnity, and for which it holds receipts, were 125,000,000f in French bank-

notes (the Treaty of Peace stipulated that they should not be accepted); 722,349,855f in bills; 109,001,502f in French gold; 63,016,693f in 5f silver pieces; 45,823,460f in German money and notes; 6,794,343f in English and other notes.

In its new territory of Alsace and Lorraine, the Prussian Government refuses Bank of France notes, and yet two Tribunals of Commerce have declared them a legal tender.

The accounts of the Credit Mobilier for 1870, presented in the meeting mentioned last week, have been published. They show that at the end of that year the loss sustained by the "institution" was 24,766,058f. The sums due from the Immobiliere Company were 52,078,071f for advances, and 3,922,134f for interest. The receipts in the course of the year from investments, commissions, &c., were 3,745,045f; the expenses of management, &c., 560,116f.

The shareholders of the Credit Commercial of France, which, notwithstanding its title, is a Swiss company, have held their annual meeting in Paris. The report of the directors stated that on account of the war, the operations of 1870 presented "an absolute want of profits," but that nevertheless, in compliance with the wish of the shareholders, the coupons of interest of October, 1870, and April, 1871, had been paid out of capital, and it expressed confidence in the future.

An official return shows that the quantity of beetroot sugar made from the commencement of the season, 1870-71, to the end of August was, including stock in hand, 311,146 tons, which was 11,122 more than in the corresponding period of the year preceding. The quantity taken for consumption, export, &c., was 290,854 tons, being 8,796 tons more. In the entrepots the entries were 145,481 tons, and the discharges 141,339.

The cost of executing the Mont Cenis tunnel was estimated at 41,500,000f, but is really nearly 75,000,000f. The money has been furnished by the Italian Government, but France is to contribute 28,000,000f, and the Upper Italy Railway Company 20,000,000f.

The Austro-Hungarian Government is to proceed at Paris, through Messrs de Rothschild, to the exchange of the new securities of the new debt for those of the old debt. The operation is to be effected from 1st Oct. to 30th Nov.

The Orleans Railway Company announces the payment from 1st October of 20f per share—15f as interest, 5f on account of dividend.

The Lyons and Mediterranean Railway Company is to pay from 1st October the half-year's interest on its 3 and 5 per cent obligations, and on those of the companies with which it is amalgamated.

The Eastern Railway will pay from 1st October the interest on the old Strasburg to Bale debentures.

The Messageries Maritimes (ex-Imperiales) pays from 1st October 15f as interest on its 6 per cent. bonds, and 12f 50c on those of 5 per cent.

The South of Austria and Upper Italy Railways Company announces the payment from 1st October of the half-year's interest on the bonds of Series X, falling due on that day.

The Mediterranean of Italy Railways is to pay from 1st October the half-year's interest on the bonds due on that day.

The North of Spain Railway is to pay from 2nd October a coupon of interest on priority obligations.

The market reports of the last three days give the following quotations per 50 kilogs, duty paid —

Cotton.—At *Havre*, New Orleans, very ordinary, 113f to 114f; Commercial [illegible] 84f to 86f.

Coffee.—At *Havre*, Rio, 134f to 138f; Rio, 135f; Santos, 135f; Maracaibo [illegible] 79f; Cape [illegible] 79f; Ceylon [illegible] 67f and 68f; Wynaad [illegible] 84f; Mocha, 142f 50c; Mahdhar, 96f. At *Bordeaux*, Wynaad, 130f. At *Marseilles*, Rio 130f.

Hides.—At *Havre*, Monte Video salted saladeros ex, 79f 50c and 80f; new, 77f 50c; Buenos Ayres mataderos ex, 1871 50c.

Skins.—At *Nantes*, Buenos Ayres mataderos, 90f.

Wool.—At *Havre*, Monte Video unwashed, 210f to 225f the 100 kilogs; Buenos Ayres ditto, 175f to 205f; Entre Rios, 215f; sheepskin, Monte Video matadero, 150f to 155f.

Oil-seeds and Seeds.—At *Marseilles*, Coromandel, 50f the 100 kilogs; Pondicherry, 70f 75c.

Tallow.—At *Havre*, Monte Video salted saladeros ex, 56f 50c.

COMMERCIAL AND MISCELLANEOUS NEWS.

The factory inspectors report 2,579 wool, cheddy, and worsted factories in the United Kingdom at the close of the year 1870. There were [illegible] 440,818 cleaning machine mules and 207,505 standing, 6,281,043 [illegible] spindles running and 44,043 standing; 102,172 power looms running and 2,817 standing. The number of power loom weavers was 76,886. The amount of motive power was 181,466 steam and 14,406 water. There were employed in these factories 12,114 females under 13 years old, and 114,346 above that age; 1,742 males under 13, 20,674 between 13 and 18, and 72,252 above 18. The totals are 108,143 males, and 199,260 females—making in all 307,403 persons. 126,126 were employed in wool factories, 109,017 in worsted, 4,410 in cheddy, 67,979 in England and Wales, 22,908 in Scotland, and 1,505 in Ireland.

The Cotton Commission has reported to the Bombay Chamber of Commerce that the crop in Central India and the Berars is far from promising, though the latest telegrams from the districts report a little more favourable weather. The cotton sowing season in Central India begins with the setting in of the Monsoon, immediately after the first downpour of rain, but for successful sowing the rain must be followed by fine weather, and the ground not be too wet. So far the conditions necessary for a good crop have not been forthcoming. In many cases the rainfall has been very heavy, without the required interval of fine weather, and up to late dates the position of the cotton growers was doubtful in many parts of the cotton-growing districts. The late telegrams indicate a general improvement. The area now under cotton cultivation in the Central provinces is about 768,986 acres, and in the Berars 1,489,427 acres. From the Nagpore district about 30,000 bales of 400 lbs each are exported, from the Jubbulpore and Nerbudda districts 15,000, from East Berar 80,000, and from West Berar 140,000 bales, the outlet in nearly all cases being Bombay, with an evident setting-in to the Suez Canal. The tea season is likely to be a fair one, though not quite equal to that of last year. There has been a falling off in the strength of tea, though the quantity is kept up. The Calcutta sales for good teas have been all that the planters could reasonably desire.

The quarterly statement issued by the Poor Law Board shows that in England and Wales the number of persons in receipt of relief from the rates decreased from 998,484 at the end of the last week of March to 924,263 at the end of the last week of June, a decrease of 7·4 per cent. It must be borne in mind that these numbers, and also those which follow, do not include paupers in lunatic asylums and vagrants, two classes constituting rather more than 3 per cent. of the total pauperism. The number of paupers in England and Wales at the end of June, 1871, was 1·5 per cent. less than at the corresponding period of 1870, and 1 per cent. less than at the same period in 1869; in the Metropolis the decrease was 4·2 per cent. and 1·6 per cent., as compared with 1870 and 1869, the number at the end of June, 1871, being 123,898. In the North-Western division (Lancashire and Cheshire) the number in June, 1871, was 86,997, being as much as 7·1 per cent. less than in June, 1870. In Yorkshire the decrease was 2·1 per cent., the number falling to 67,171. The West Midland division shows a decrease of 1·6 per cent., as compared with June, 1870; the North Midland, a decrease of 0·9 per cent.; the South Midland, 0·6 per cent.; the Welsh 0·3 per cent. The South-Eastern division shows an increase of 0·9 per cent., as compared with June, 1870; the Eastern, an increase of 0·6 per cent.; the South-Western, 0·4 per cent.; the Northern, 0·3 per cent. In most parts, it will be observed, the changes are slight; the important point in the return is the material improvement in the manufacturing districts and in the Metropolis.

The following is a return of the number of paupers (exclusive of lunatics in asylums and vagrants) on the last day of the third week of September, 1871, and of the corresponding week in 1870:—

	Paupers.				
	Indoor.	Outdoor.		Total.	
	Adults and Children.	Adults.	Children under 16	3d week Sept., 1871.	Corresponding Total in 1870.

BANK RETURNS AND MONEY MARKET.

BANK OF ENGLAND.

AN ACCOUNT pursuant to the Act 7th and 8th Victoria, cap 32, for the week ending on Wednesday, the 27th day of September, 1871.

ISSUE DEPARTMENT.

	£		£
Notes issued	35,302,760	Government debt	11,015,100
		Other securities	3,984,900
		Gold coin and bullion	20,302,760
		Silver bullion	...
	35,302,760		35,302,760

BANKING DEPARTMENT.

	£		£
Proprietors' capital	14,553,000	Government securities	14,046,856
Rest	3,477,923	Other securities	27,557,700
Public deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and dividend accounts	6,193,442	Notes	10,260,765
Other deposits	22,989,597	Gold and silver coin	187,328
Seven-day and other bills	543,672		
	47,957,635		47,957,655

GEORGE FORBES, Chief Cashier.

Dated the 28th September, 1871.

THE OLD FORM.

The above Bank accounts would, if made out in the old form, present the following result :—

Liabilities.	£	Assets.	£
Circulation (including Bank post bills).....	25,556,647	Securities	37,327,542
Public deposits.....	6,193,482	Coin and bullion	21,090,088
Private deposits	22,989,578		
	54,739,707		58,417,630

The balance of Assets above Liabilities being 3,677,923*l*, as stated in the above account under the head Rest.

FRIDAY NIGHT.

The preceding accounts compared with those of last week exhibit—

	Increase.	Decrease.
	£	£

The following is the official return of the cheques and bills cleared at the Bankers' Clearing-house :—

	Week ending Sept. 27, 1871.	Week ending Sept. 20, 1871.	Week ending Sept. 28, 1870.
	£	£	£
Thursday	12,420,000	34,412,000	7,710,000
Friday	14,133,000	18,172,000	9,233,000
Saturday	14,811,000	16,199,000	11,289,000
Monday.....	10,103,000	15,352,000	8,066,000
Tuesday	15,181,000	13,571,000	9,503,000
Wednesday	12,411,000	13,668,000	8,450,000
Total.....	79,059,000	111,374,000	54,251,000

GEORGE DERBYSHIRE, Chief Inspector.

Bankers' Clearing-house, September 28th, 1871.

The total since the 4th of January, 1871, is 3,365,115,000*l*, compared with 2,876,800,000*l* for the corresponding period last year, showing an increase of 488,315,000*l*.

Subjoined is our usual table, affording a comparative view of the Bank returns, the Bank rate of discount, the price of Consols, the price of wheat, and the leading exchanges, during a period of four years, corresponding with the present date, as well as ten years back, viz. :—

At corresponding date with the present week.	Oct. 2, 1861.	Sept. 30, 1868.	Sept. 29, 1869.	Sept. 28, 1870.	Sept. 27, 1871.
Circulation, including bank post bills.....	£ 21,836,846	£ 25,012,826	£ 24,275,956	£ 24,211,785	£ 25,556,647

In 1861, money was more in demand, owing to the preparations for the 4th of the month, but there was no change in the rates, though the Bank of France had just raised its rate from 5½ to 6 per cent. A joint expedition to Mexico on the part of France, England, and Spain had just been organised.

In 1868, there was a little pressure at the close of the quarter, but money was still easy at 2 per cent. The Spanish insurrection had proved successful, the Royal forces having been completely defeated at Alcolea, near Cordova. The Revenue Returns of the quarter were very unfavourable, and a disappointment in the Government's calculations at the end of the year was anticipated.

In 1869, there was some tightness in the money market just at the close of the quarter, but no change in the rate. The stringency was partly caused by the demand of gold for New York, owing to the operations of a gold ring, which had locked up the available supply in that city.

In 1870, the Bank rate was reduced from 3 to 2½ per cent., the accumulation on account of the suspense caused by the war continuing. M. Favre's mission to the German camp to plead for peace had failed on account of the Germans demanding a cession of territory, and the French refusing to accede to it.

The amount of the "other" deposits, as compared with the "other" securities, showed, in 1861, a deficiency of 5,601,552*l*; in 1868, an excess of 2,368,425*l*; in 1869, an excess of 524,485*l*; and in 1870, an excess of 1,035,328*l*. In 1871, there is an excess of 152,392*l*.

Discount and Money Market.—At the weekly meeting on Thursday, the Bank of England again raised its rate 1 per cent., so that from 2 per cent., at which it stood ten days ago, it is now 4 per cent. The rise was preceded all through the week by a very sharp demand for discount, the effect on the Bank account being that the private securities, which were 16,433,000*l* on the 13th of September, were 22,837,000*l* at the date of the last account—an increase of 6,404,000*l* in a fortnight. This shows the extent of the demand which the Bank has had to meet. Yesterday and to-day the severity of the demand continued, dealers in the open market steadily refusing to work under the Bank rate. To-day there has been a great deal of pressure, in consequence of the requirements of the Stock Exchange settlement being very large, though as these requirements have been satisfied a diminution of the pressure is now expected. There is still anxiety about the extent of the current demands in the present state of the market, but the position of the exchanges is believed to give room for hope that the German Government is for the moment holding its hand, and that the next week or two at least may be tided over without a farther disturbance of the money market. The quotations in the open market are still above the Bank rate, nothing being done under 4 per cent. The chief symptom of ease is a little unwillingness on the part of borrowers to give the terms demanded for long-dated paper, but the discount houses as yet hold out firmly for the rates which we quote below.

The changes in the Bank account are certainly very remarkable. So large an increase as 6,404,000*l* in the private securities in a fortnight—about 4,000,000*l* since the rate was raised to 3 per cent—could not but change radically the position of the Bank, and this has actually been the case. The reserve from 13,711,000*l*, at which it stood the previous week, has fallen to 11,000,000*l*, and the stock of bullion in both departments is 21,000,000*l* only, instead of 23,500,000*l*, which was the figure the previous week. Though it is quite true that a large part of the new discounts is probably only precautionary,—and at least 2,640,000*l* remain in the Bank in the shape of increased deposits,—still the Bank is greatly weakened, as the public have acquired an increase of power to trench upon its weakened reserve. As the reserve is only 11,000,000*l*, thus approaching the minimum of 10,000,000*l*, which should be maintained, it became clearly necessary to advance the rate, even if the new discounts should be purely of a precautionary nature. As we explain elsewhere, everything will now depend on the action of the German Government. Our home demands are certainly large, but nothing apparently which could not have been easily met, and it is only because there is this unusual German demand that there is any difficulty. We are disposed to share the feeling in the market that the danger of a crisis has passed away for the moment, as the German Government has ceased selling its drafts on London; but it is obviously quite possible that the crisis may return very soon, and it will be important to remember that a large amount of acceptances to the German Government will mature in November, when it will have increased power over our resources. There is no large amount of gold reported to arrive before that, and it will be necessary to watch carefully therefore the course which the German Government may follow during the next few weeks.

We subjoin our usual quotations for mercantile paper having various periods to run, subject however to the remark which we made last week as to the unsettled state of the market. As regards long-dated paper especially, it can hardly be considered that there is a steady price.

Bank bills—3 months	4		per cent.
Do 4 —	4¼	¼	per cent.
Do 6 —	4½	¾	per cent.
Trade bills—3 months	4	½	per cent.
Do 4 —	4½	¾	per cent.
Do 6 —	4¾	5	per cent.

The joint stock banks and discount houses have at once given notice of an advance in their allowances for money

corresponding to the advance in the Bank rate. The allowances now are :—

Joint Stock Banks at call	3	per cent.
Discount houses at call	3	per cent.
Do with seven days' notice	3½	per cent.
Do fourteen days'	3¾	per cent.

The discount quotations current in the chief continental cities are as follows :—

	Bank Rate, per Cent.		Open Market, per Cent.	
	1870.	1871.	1870.	1871.
Paris	6	5	5	4½
Vienna	6	5	5	5
Berlin	5	4	4	3½
Frankfort	5	4½	3½	4
Amsterdam	4½	3	4	2⅝ 3
Brussels	4½	4	4½	3½
Hamburg	...	...	2⅝	4
St Petersburg	8	8	6	6

THE STOCK MARKETS.—The week has witnessed a complete change in the aspect of the stock markets compared with the appearance at the close last week. When we wrote the panic occasioned by the advance of the Bank rate was not quite at its worst, a further fall in English railways taking place just at the close on Saturday, ranging between 2 and 4 per cent. all round; but since Monday there has been a steady upward movement. Prices are already at a medium point between the high level at which they stood a fortnight ago, and the extreme point of panic depression, with a strong upward tendency. The reasons are that in English railways, to which the panic was almost exclusively confined, the account has shown an unexpected amount of strength in the purchase. The amount of stock flung on the market did not prove to be very large, and as the bears had oversold for the fall there was even backwardation to pay as the account progressed. The account for the rise had also been strengthened by the strong purchases which were made at the lower prices and the amount of stock which has thus been taken off the market. The same explanation applies in a less degree to the foreign market, the slight fall in prices having at once been taken advantage of by investors. The panic, such as it was, was occasioned, we believe, by a very temporary cause, the sudden calling in of its loans on the Stock Exchange by a large institution which held a great deal of German money. This gave rise to an apprehension in some quarters that money would soon not be had on any terms, and hence the violence of the momentary disturbance. As the negotiation of the account showed that there was still plenty of money to be had at a price, holders acquired increased confidence, and the strength of the new purchases had its full effect. The current belief now is that a further advance in the Bank rate will have as little effect as the advance on Thursday, as the scarcity of money will at most be temporary, and will be followed soon by cheaper rates. With money getting dearer, however, speculation ought to be moderate and the advance in all descriptions of securities, which we still anticipate, especially in securities like the stock of English railways, which improve so rapidly in real value, ought for that reason to be more solid.

In spite of the panic, new undertakings still continue to be announced, and as soon as there is a little more ease in the money market we shall no doubt have an abundance of new claimants.

ENGLISH GOVERNMENT SECURITIES.—The effect upon Consols of the advance in the Bank rate has naturally been an adverse one. With money at present rates it is not likely that holders of Consols will increase the amount of their holdings and the permanent cause which keeps Consols from rising—the transfer of Consol money to debenture stocks and similar securities—is as potent as ever. The lowest point touched during the week was 92½, and the closing price to-day is 92¾ ⅝—a fall of ⅛ from last week.

Subjoined is a list of the highest and lowest prices of Consols every day :—

CONSOLS.

	Money		Account		Exchequer Bills.
	Lowest.	Highest.	Lowest.	Highest.	Month and June.
Saturday	92¾	92¾	92¾	92¾	5s to 6s prm.
Monday	92½	92½	92½	92½	5s to 6s prm.
Tuesday	92½	92½	92½	92½	5s to 6s prm.
Wednesday	92½	92½	92½	92½	5s to 6s prm.
Thursday	92½	92½	92½	92½	5s to 6s prm.
Friday	92½	92½	92½	92½	5s to 6s prm.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

Ditto New 5 %	104	5	103¾	4¼	–	⅛

FOREIGN GOVERNMENT SECURITIES.—The fluctuations in this department have not been very great. As we stated last week, the panic at no time was so great as in English railways, and though prices have not yet recovered to the level at which they stood ten days ago, the closing price of last week has, since Monday, been steadily maintained and exceeded—the closing prices of to-day, as will be seen, being generally at an improvement of about ½ to 1 per cent. over last week's. Spanish still continues the favourite stock at the moment in this department, but attention is likewise given to South American securities. French stocks have also improved a good deal this week, as they have been even more favourably affected than the others by the closing of the operations connected with the subscriptions of the City of Paris loan. The loan is stated to have been applied for seven times over, and a temporary stringency was produced by the deposits with applications, but the stringency thus caused will be at once removed by the return of the deposits on the amounts for which no allotment is given to the extent of 75 per cent. To-day the market has again been good, notwithstanding the little business which it was possible to transact on a busy settling day, and after a slight reaction in the early part of the afternoon, the closing quotations are at the best point of the day, with a buoyant market. The good feeling is largely due to the completeness with which the continental exchanges have now turned in our favour, reassuring operators as to the probable ease of the money market for the next few weeks.

The closing prices of French securities are :—Rente, 55 5/16 to 55 7/16 ; New loan, 8¾ to 8⅞ ; Morgan loan, 100⅝ to 101—a rise of 5/16, 1 1/16, and 1 respectively on the closing prices of last week.

The following are the changes for the week, taking the latest unofficial prices for quotation :—

ENGLISH RAILWAY SECURITIES.—The changes this week have been very remarkable. On Saturday the panic feeling appeared to continue, and prices at the close touched

the very lowest point that has been reached. London and North-Western were at 139¼ ⅜, Great Western at 97 98, Caledonian 104 105, North-Eastern at 160 2, Chatham and Dover Preference at 59 60 and Ordinary at 21¼, Brighton at 62 63, and other stocks in proportion. The doubt appeared to have arisen whether there would not be a large compulsory closing of speculative accounts at the settlement, and sales were accordingly pressed. This expectation was however partly based on the expectation of an advance of the Bank rate to 4 per cent., on Monday followed by a rise to 5 on Thursday. When it appeared on Monday therefore that rather too gloomy a view had been taken of the money market, there was an immediate recoil, the bears begun to buy back, and large investment purchases began. The improvement thus commenced continued with some sharp fluctuations until Wednesday, the first day of the account, when in spite of the anticipated rise of the Bank rate on Thursday a farther advance took place, consequent on the progress of the account showing that there was a scarcity of stock for delivery. On Thursday after rather a depressed feeling in the morning there was another sharp advance after the Bank rate was put up, markets continuing buoyant till the close, and the stocks in most favour being Chatham and Dover, North-Eastern, London and North-Western, and Great Western. To-day the business done, which has been considerable notwithstanding the settlement, is marked by the same cheerful feeling, and there is a rise all round of between 1 and 2 per cent. compared with Thursday, the stocks in most favour being still those which we have just specified. Early in the afternoon there was a slight reaction from the quotations at one o'clock, but at the close there was another rally of prices, and the market closes at about the best point of the day.

We have again to repeat the remark which we made last week, that the present opportunity is a most favourable one for *bona fide* investment. High as the level was to which prices were recently carried, in part by speculative buying, the best judges of railway property would not have hesitated to recommend investment at these prices, if it was not possible to get the stocks cheaper. The trade of the country is both sound and increasing, so that a farther addition to railway business for a good many months to come is assured, while year after year the property must increase steadily in value—most of the evils which have hitherto made English railways less profitable than they ought to be being removed. If an investor had bought therefore at the recent high prices, he might, as a rule, have been sure of receiving a good immediate return for his money, with the prospect of a rapid increase both in the annual income and capital value of his investment. An unexpected crisis on the Stock Exchange has suddenly lowered values from 5 to 7 per cent., if not more, so that an investor's margin of safety has been a good deal increased. It is hardly likely that this increased margin will long be suffered to exist, when the savings of the country are so large as they are. The traffic returns of the week are again unusually good, and there is yet no sign of a check to the prosperity on which railway profits depend.

The following shows the principal changes in the quotations of ordinary stocks, comparing the latest unofficial prices :

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
Caledonian	107 8	.....	107 8xd	+ 2½

The traffic returns on eighteen railways of the United Kingdom, of which a list is subjoined (including the principal railways), amounted for the week ending Sept. 23 to 852,630*l*, being an increase of 62,224*l* on the corresponding week of last year. The aggregate traffic to date is now 9,414,819*l*, an increase of 665,894*l* on the corresponding period of last year. The principal increases for the week are—London and North-Western, 9,425*l*; North-Eastern, 6,787*l*; Midland, 6,295*l*; Lancashire and Yorkshire, 5,356*l*; London, Chatham, and Dover, 4,256*l*; Great Western, 4,842*l*; South-Eastern, 4,685*l*; Caledonian, 3,082*l*; and London and Brighton, 2,858*l*. The following shows the details of the increase in each case for the week, and for the whole period :—

RAILWAY TRAFFIC RETURNS.

	Week's Receipts. Amount.	Inc. or Dec. on Corresponding week in '70.	Aggregate Receipts of Half year to date. Amount.	Inc. or Dec. Corresponding per. in '70.
	£	£	£	£
Bristol and Exeter	9,785	+ 696	114,817	+ 2,188

Madras 5 %	107 ⅛	.....	107 ⅛	. ...

AMERICAN SECURITIES.—The fall in this department was somewhat heavy early in the week, but a recovery subsequently took place, and United States' bonds leave off at only a slight decline. Erie shares are ⅛ better. We give our usual table of fluctuations below :—

	Closing Prices last Friday.		Closing Prices this day.	Inc. or Dec.
United States 6 % 5/20 Bonds, exchng. 4/6	93 ½	.....	92½ 3	— ⅛
Ditto 1865 Issue	93½ ⅛	.....	92½ 3	— ⅛
Ditto 1867 Issue	91½ 2½	.....	91½ 2	— ⅛
Ditto 5 % 10/40 Bonds, exchange 4/6	89½ 90	.....	89½ 90	... ...
Atlantic and Great Western Consol. Bonds	41½ 2	.....	41½ 2	... ...
Erie Shares	24 ½	.....	24½ ⅝	+ ⅛
Illinois Central Shares	109 10	.....	108⅛ 9½	— ⅛
Massachussets 5 % Sterling Bonds, 1900	94½ 5½	.....	94½ 5½	... ...
Panama General Mortgage 7 % Bonds, 1897	75 8	.....	75 8	... ...
Pennsylvania Gen. Mort. 6 % Bonds, 1910	96 7	.....	96 7	... ...
Virginia 6 % Bonds	51 3	.....	51 3	... ...

JOINT STOCK BANKS.—The advance in the rate of discount has created a favourable impression with regard to bank shares, and the movements have been in the upward direction. Chartered Mercantile, City, London Joint Stock, London and County, and London and Westminster, and Oriental are ⅛ better on the week; Imperial, 1; and Alliance, ¼. Union of Australia have given way 1, and English and Scottish Chartered ½.

MISCELLANEOUS.—The fluctuations in this department have not been important, business having been much restricted throughout the week. In credit shares there is a decline of ⅛ in General Credit and ⅛ in London Financial, but International Financial show a rise of ⅛ on the week. London Tramways have given way ¼, and North Metropolitan ½.

London and Glasgow Engineering, Native Guano, and Peninsular and Oriental Steam are 1, and Rio City Improvement ¼ lower, but Royal Mail Steam shares have risen 1.

A prospectus is issued this evening of the New Sombrero Phosphate Company, Limited, capital, 130,000*l*, in 13,000 shares of 10*l*, to be fully called up on 1st November next. The object of the company is to purchase the Island of Sombrero in the West Indies, and work its deposit of phosphate of lime—the property having belonged to a similar company now in liquidation, but which is stated to have failed for want of capital. The prospectus contains estimates of the business done in the liquidation, and a clear annual profit of 40,000*l* is anticipated, of which 9,000*l* will be appropriated to the redemption of the shares with a bonus, so as to repay the shareholders their capital in 14½ years when the concession expires, and the remainder will suffice for a 24 per cent dividend.

Telegraphs.—The dealings in this department have not been on an extensive scale, but we note several favourable alterations in the quotations. Anglo-Mediterranean stock have advanced 3; British Australian shares and British Indian Extension are ¼ better; China Submarine, Falmouth and Gibraltar, Marseilles and Algiers, and French Cables, ¼. Great Northern China Extension shares have given way ¼. Telegraph Construction have risen 1, and Hooper's Construction, ⅜.

Mines.—Considerable animation has prevailed in the mining share market, the principal feature being the heavy sales of Eberhardts, which close at a fall of 7 on the week. In the home market, East Lovells have risen 3; Tin Croft 2; Wheal Buller 7½; South Wheal Frances 2½; South Condurrow ¾; Wheal Granville 1; Great Laxey and Tankerville ½. On the other hand, Marke Valley shares have given way ¼; Van and Wheal Seton 2½; and West Chiverton 1.

Exchange and Bullion.—The movements in these markets have lately been very important, and are very closely connected. For some time, until about ten day ago, when the Bank rate was raised, continental exchanges were very much against London, and the upshot was an immense withdrawal of bullion, which the raising of the Bank rate was hardly in time to check. Since last Thursday week, however, the raising of the rates for money here, and perhaps the expectation of still dearer money, have had an almost magical effect on the exchanges, which have now quite turned in favour of London. This has been very conspicuous to-day, when there has been a great advance of the exchange rates between London and the chief continental centres—Paris, Berlin, Frankfort, Amsterdam, Hamburg, and Brussels. Bills on these cities were freely offered to-day on the Exchange here, and according to the latest information from the other side bills on London have there been in demand. The increase of the rates is possibly the reason why the German Government has ceased for the moment to sell its drafts in London, but in whatever way the advance in the Bank rate has acted, its success for the time appears to be unequivocal. The great and sudden rise in the Paris exchange is especially a proof of the powerful and instantaneous effect of such changes. A few days ago money was wanted in Paris for the subscriptions to the Paris loan; but the loan being six or seven times subscribed, and about 75 per cent. of the deposits, which were very large, being returned on allotment money is again more plentiful in Paris, and there is a large demand for bills on London to employ the surplus money profitably. The dearness of money here is thus having its intended effect, and a change in the opposite direction can only be caused by a renewed advance of the rates for money on the continent.

It will be observed that the exchange is equally in our favour in places where there is a gold and where there is a silver currency. Silver is quite a drag on the continent, in consequence of the measures of the German Government, and it tends to come to England, notwithstanding an already abundant supply at a low price here. The exchanges where there is a gold currency are not yet quite so much in our favour.

The following is taken from the circular of Messrs Pixley, Abell, Langley, and Blake, on the transactions in bullion during the week:—

Gold.—We have no arrivals to report, but the demand for Germany having been great, no less than 2,026,000*l* has been withdrawn from the Bank, and 180,000 sovereigns have also been taken thence, for Alexandria chiefly. The shipments are:—73,450*l* (in sovereigns) per Peninsular and Oriental steamer Mongolia, for Alexandria; 600*l* (in sovereigns) per Peninsular and Oriental steamer Mongolia, for Bombay; 30,000*l* per New York, for New York; 39,000*l* per Cambrian, for the Cape; 6,000*l* per Magnet, for Oporto. The Peninsular and Oriental steamer, due about 7th October, will bring about 500,000*l* in Australian gold, it is supposed, but details are not yet known.

Silver.—Our market has been lower in price, owing to the rise of the Bank rate of discount and its influence on the Exchanges, the demand of late having been exclusively for the Continent. Our present nearest quotation is 60⅜d per oz standard, with little business. The Massilia brought on 24th inst. 90,000*l* in spec silver from China, and the Peninsular and Oriental steamer, due on the 7th proximo, will also have some on board. A large amount of bar silver is also on its way from Stettin. About 56,000*l* in bars and coin has arrived from the United States since the date of our last circular. There is no inquiry for the East.

Mexican Dollars.—Our market is inactive, and it is unlikely that the prices ruling of late will be maintained; these were for the old coinage, 60½d, and for the new, 59½d per oz; the quotation for the latter will probably be governed, in the absence of any exceptional demand, by the price of bar silver. Some limited amounts have come to hand from the United States, and a large quantity is reported to be on board the West India steamer due to-morrow.

Exchange on India for Banks' drafts at 60 days' sight is 1s 11⅛d per rupee.

Quotations for Bullion.—Gold—Bar gold, 77s 9½d to 77s 10d per oz std; ditto refinable, 78s per oz std, last price. Silver—Bar silver, fine, 5s 0⅜d per oz std, last price; ditto containing 5 grains gold, 5s 1⅛d per oz std, last price; Mexican dollars, 4s 11½d to 5s 0½d per oz, last price.

We are indebted to Messrs I. Allard and Co., of Paris and London, for the following telegram, giving to-day's exchange and bullion quotations in Paris, which will be especially interesting at the present moment:—

EXCHANGE, Paris, 29th September.

THURSDAY, October 5.

Bahia and San Francisco Railway, general, London Tavern.
East London Waterworks, general, 16 St Helen's place.
Price's Patent Candle, general, London Tavern.

FRIDAY, October 6.

Commercial Gas, general, London Tavern.

NOTICES AND REPORTS

STOCKS.

Russian Four per Cent. Nicolas Loan.—1,040 bonds of the first issue and 966 bonds of the second issue, representing respectively 20,800*l* and 19,320 each, have been drawn for redemption at par on the 1st November.

Turkish Six per Cent., 1854.—Messrs Dent, Palmer, and Co., notify that the half-yearly dividend, due on the 10th prox., will be paid at their office; also that the bonds drawn for redemption in July last, amounting to 71,900*l*, will be paid off at par.

Virginia State Sterling Bonds.—Messrs Barings announce—"The coupons on the new and also on the old bonds, due up to and including 1st July, 1871, which have not been paid, must be forwarded to Richmond, Virginia, to be funded. There will be issued, against the surrender of the coupons, a certificate in the name of the owner, and two-thirds of the interest, as due thereupon, is to be paid by the State, through Messrs Baring Brothers and Co., one-third remaining unpaid until a settlement shall have been made between the States of Virginia and West Virginia.

RAILWAY COMPANIES.

Bahia and San Francisco.—The traffic for the half-year ended the 30th of June, as compared with the corresponding half of 1870, showed an increase of 3,275*l*. The result of the half-year's working showed that 86,520*l* had been received, including the guaranteed interest (63,000*l*), and 23,071*l* expended, leaving a balance of 63,448*l*. The directors recommended a dividend of 3½ per cent. for the half-year. His Excellency the Vice-President of the province of Bahia was interesting himself about the roads, and had made a grant for the improvement of the road to Bom Jardin, an important district for tobacco and sugar. The surveys for the prolongation of the railway, to the River San Francisco, near the town of Joazeiro, it appeared had been ordered by the Minister of Public Works. The length of the extension was about 270 miles.

Devon and Cornwall.—The Okehampton section is ready, and will be opened on the 2nd October, and the works on the Lidford section are progressing.

Great Western of Canada.—The directors announce a dividend at the rate of 5½ per cent. per annum for the half-year, as compared with 4 per cent. this time last year.

Isle of Wight Newport Junction.—The issue is announced of 28,000*l* six per cent. mortgage debentures, secured by a first charge on the railway, 9½ miles long, 8½ of which will be ready to open in the course of this year, and the whole early next spring. The subscription is invited on the part of the contractor by the English and Foreign Credit Company, Limited.

BANKS.

Commercial of Sydney.—The report submitted at Sydney on the 21st of July showed an available total for the half-year of 48,583*l*, out of which a dividend and bonus, together equal to the rate of 17 per cent. per annum, were declared, and 10,000*l* was added to the reserve (thus increased to 140,000*l*), leaving 4,583*l* to be carried forward.

FINANCE, CREDIT, AND DISCOUNT COMPANIES.

Mauritius Land Credit and Agency.—Year's net profit, 7,766*l*. The usual dividend at the rate of 10 per cent. per annum is declared, 1,000*l* is added to reserve, and 2,119*l* is written off on account of exchanges and debenture expenses.

MISCELLANEOUS COMPANIES.

City Offices.—A dividend of 3s per share for the half-year was declared at the meeting.

City of Paris New Loan.—This new issue has been subscribed for many times over. It is for 350 million francs, or 14,000,000*l*, subscriptions being received in Paris, Brussels, and Antwerp. The total is divided in 1,296,297 obligations, reimbursable at 400f in 75 years, yielding 12f interest annually, payable half-yearly. The price of issue is 270f for those fully paid up, and 277f for the scrip.

Crystal Palace District Gas.—At the meeting the usual maximum dividend at the rate of 10 per cent. per annum was declared.

Italian Irrigation.—680 bonds have been drawn for redemption on the 1st January, 1872.

Langdale's Chemical Manure, Limited.—Capital, 250,000*l*, in 25,000 shares of 10*l* each. This company is formed to purchase (for 90,000*l*, in shares), and carry on the Chemical Manure Manufactory of Mr S. Langdale, situate at the Mushroom wharf, Newcastle-on-Tyne. The business has been established upwards of 21 years, and reached during the past year a sale of more than 30,000 tons. The increase during the last few years has been at the rate of above 5,000 tons per annum. The prospectus states:—"The works are considered one of the most complete of their kind in the Kingdom, are nearly new, having been remodelled and built within the past six years, and are fitted with the most modern and improved machinery. Mr Langdale has agreed to guarantee that the yearly net profits shall yield a minimum dividend of 10 per cent. per annum on the paid-up capital for the first five years, and to deposit as security for this purpose 50,000*l* of his fully paid-up or vendor's shares. He has also entered into arrangements for his services as Managing Director for that period."

Lower Assam.—A call of 5s per share is payable on the 16th October.

Phœnix Gas Light and Coke.—The half-year's gross revenue was 129,815*l*, and the net balance 44,477*l*, which, added to the undivided balance of 30,460*l*, made a total of 74,937*l* to the credit of profit and loss account, out of which the directors recommend the usual dividends, leaving 38,937*l*. Capital expended, 909,325*l*. The report states—"The directors have entered into negotiations with the South Metropolitan Company and the Surrey Consumers' Gas Company for the purpose of amalgamating, and have agreed upon a basis with them for such purpose, subject to the approbation of their several proprietors."

Rio de Janeiro City Improvements.—A dividend has been announced at the rate of 5½ per cent. per annum.

Tower Subway.—The traffic is stated to be steadily increasing. A dividend at the rate of 4 per cent. per annum has been declared.

United Limmer and Vorwohle Rock-Asphalte, Limited.—Capital, 200,000*l*, in 20,000 shares of 10*l* each. This undertaking will purchase the leases of the whole of the asphalte quarries situated at Limmer and Vorwohle, in Hanover and Brunswick, which have from 15 to 25 years to run. The supply is stated to be inexhaustible, and the quarries the only ones existing throughout the German Empire. The purchase price is fixed at 165,000*l*, of which 65,000*l* will be in shares, and upon a supply of only 50,000 tons annually, the company anticipates a profit of 60,000*l*. The existing "Limmer" Company is quoted at a high premium, and has been granted a monopoly for the use of the asphalte raised by this undertaking throughout the United Kingdom.

MINING COMPANIES.

Braganza Gold Mining, Limited.—Messrs George Burnand and Co. invite applications for 14,000 unallotted shares. This undertaking was originally formed with a capital of 50,000*l*, in shares of 1*l* each, to purchase and work the Morro Tabao Freehold Gold Mine, situate close to Itabira do Campo, in the centre of the Brazilian gold deposits, and about midway between St John del Rey and Don Pedro mines.

Exchequer Gold and Silver Mining, Limited.—Capital, 60,000*l*, in 1*l* shares. 15,538 shares as yet unallotted have been advertised for subscription at par, the whole 1*l* per share being payable on application. It is stated that the mine has now been brought into a paying condition, and that the money now obtained will be expended in erecting additional crushing and milling machinery. The property is extensive, and is situated on Silver Mountain, California.

Sierra Buttes.—A dividend of 2s per share has been declared.

Wearde and St Germain's Amalgamated Stone Quarries, Limited.—Capital, 20,000*l*, in 2*l* shares. First issue, 10,000*l*. This company is formed for the purpose of working a series of valuable blue elvan granite and other road stone quarries, situate close to the river St Germain's, near Saltash and Plymouth. The quality of the stone is equal to Guernsey or any other road stone in the market, and can be produced at such a price as will enable the proprietors to compete successfully with the Guernsey quarries in the London market.

The Commercial Times.

POST OFFICE ANNOUNCEMENTS.

On the 1st of October next, and thenceforward, the postage on letters for Sweden, whether forwarded *viâ* Denmark, or by Swedish mail packet direct from Hull to Gothenburg, will be reduced from sixpence the half-ounce to fivepence.

On the 2nd of October next, and thenceforward, the rates of commission to be charged in this country on money orders drawn on any place in Belgium will be made uniform with those chargeable on money orders drawn on North Germany, Switzerland, and Denmark, viz.:—On sums not exceeding 2*l* 9*d*; above 2*l* and not exceeding 5*l*, 1*s* 6*d*; above 5*l* and not exceeding 7*l*, 2*s* 3*d*; above 7*l* and not exceeding 10*l*, 3*s*.

Owing to the later despatch from this country of the mail packet for Halifax, Nova Scotia, announced in notice No. 41, and the consequent alteration in the branch service from Halifax to Bermuda, the extra despatch to Bermuda by West India packet from Southampton for St Thomas already notified for the 18th of December will not take place, as a mail sent by the subsequent packet from Queenstown would arrive earlier. On the other hand, letters for Bermuda may with advantage be forwarded by the West India packets leaving Southampton on the 2nd of October and the 2nd of November next. Correspondence for Bermuda intended to go by the West India packets must be specially addressed "*viâ* St Thomas."

AVERAGES OF GRAIN.

The following is a statement showing the quantities sold and the average price of British Corn (the produce of Ireland, as returned from the Inspectors and Officers for Ireland mentioned in the Act of the 27th and 28th Victoria, cap. 87, in the week ended September 23, 1871:—

	Quantities Sold.	Average Price.
	Qrs. Parts.	s. d.
Wheat	20,731 3	57 7
Barley	3,[illegible] 3	35 6
Oats	2,[illegible] 7	23 5

COMPARATIVE AVERAGES OF GRAIN.

The following is a comparative statement showing the quantities sold and the average price of British Corn (imported separately, as returned from the Inspectors and Officers of Revenue mentioned in the Act of the 27th and 28th Victoria, cap. 87, in the week ended September 23, 1871, and in the corresponding week in each of the years from 1861 to 1870:—

	Quantities Sold.			Average Prices.

COMMERCIAL EPITOME.

FRIDAY NIGHT.

There was more firmness in the grain trade to-day, owing to the prevalence of wet weather. A fair demand prevailed for consumption, and there was a good speculative inquiry, and both English and foreign wheat advanced 1*s* per quarter. Flour rose 6*d* and 1*s* per sack and barrel. Maize and oats ruled quiet, while barley, beans, and peas were nominally unchanged in the absence of important business. This week's imports of foreign and colonial produce into London has amounted to 29,180 qrs of wheat, 12,820 barley, 64,130 oats, 710 maize, 3,800 beans, 190 peas, 630 sacks and 2,680 barrels of flour.

The transactions of the past week in the Liverpool cotton market have been to a fair extent, the total sales of the week reaching 65,840 bales, of which the trade have taken 52,310 bales, speculators and exporters, 13,530 bales. The week's imports amount to 16,043 bales, the actual exports to 8,525 bales, and to-day's stock is estimated at 423,880 bales, showing a reduction of about 45,000 bales upon the previous week. All descriptions of cotton on the spot have firmly maintained the quotations of last Friday; arrival cotton is ¼*d* per lb dearer.

The following return shows the quantities of cotton imported and exported at the various ports of the United Kingdom during the week ended September 28, 1871:—

	Imported.	Exported.
American.....bales	9,387	1,051
Brazilian	3,912	126
East Indian	7,915	7,350
Egyptian	415	307
Miscellaneous	2,900	848
Total	24,529	9,682

At New York, on September 28, middling Upland cotton was quoted at 19¾ cents per lb. The shipments for Bombay for the week ended September 25 were 14,250 bales, and fair Dhollerah was then quoted at 216 rupees.

We extract the following from Messrs W. Nicol and Co.'s circular, dated Bombay, August 29:—The English telegrams to hand for some days after last mail left reported continued dullness in the Liverpool market, quotations being, however, unaltered, say 6¾*d* for fair Dhollerah cotton. This was followed on the 23rd instant by a reaction, in consequence of renewed unfavourable reports of the American crop, and Reuter's message of that date advances quotations to 7*d* for ready Dhollerah, and 7 1/16*d* for June shipment via the Cape, with a very active demand. Our latest telegrams are dated the 26th, when the market is reported quiet, but steady at about the same level of prices. The purchases reported here during the week aggregate about 4,000 bales of all descriptions, including about 2,000 bales of sawginned Dharwar for delivery all November at prices ranging from 210 rs to 215 rs per candy. Prices at the close are quoted 5 rs to 8 rs per candy higher all round, but in the reduced state of stocks quotations are in many cases quite nominal. We regret to have to report a continuance of dry, unseasonable weather, only one or two slight showers having fallen during the week, and while in Bengal and throughout Northern India the rainfall has been excessive, there seems reason to apprehend that the Monsoon on this side will be much below the average. From the dis-

tricts we are glad to say our accounts as to the cotton crop are still on the whole favourable, although cereals have in many places almost entirely failed. Berars—The manager of the Mofussil Company, who has just passed through these districts, telegraphs this morning—"Crops still healthy, but rain much wanted." Broach—Our correspondent, writing yesterday, says—"The crops are making fair progress, but we are still very much in want of rain." Tinnevelly—We have a telegram of yesterday's date quoting 7¼d, c and f.

EXPORT of COTTON from BOMBAY to August 28.

	1871.	1870.
London.. .....bales	21,505	1,570
Liverpool	655,722½	772,903

Continent	264,206½	130,614
China	45,153½	43,820½
Grand total	1,023,920½	959,286½

Actual exports since last mail left, 1,392 bales.

The colonial produce markets have shown firmness this week, and sugar is a shade dearer. The stock in the United Kingdom is estimated at 155,500 tons, against 213,080 tons in 1870. Coffee has sold freely at very full prices. The quantity of East India afloat for Great Britain and the continent (not including Government exports from Java) is 15,800 tons, against 18,600 last year. Rice has ruled firm, and there has been more inquiry for parcels afloat; the quantity on passage is 118,500 tons, against 165,500 in 1870, and 122,200 in 1869.

The annexed is dated Havana, September 6:—Owing to the continuance of rather unfavourable advices from abroad, the market for sugars has been comparatively inactive since we issued our last report on the 5th ultimo. The majority of planters and holders showed little or no inclination to sell at a reduction, keeping back their stock in the expectation of being able to realise higher prices later in the season; some of them, however, submitted to the lower offers of buyers, and thus only a limited number of transactions, principally in low-graded descriptions of poor and defective quality, has been effected on the basis of 10½ rs and 10¾ rs for No. 12, whereas good dry sugars are difficult to be obtained even at 11 rs. Quite lately rather more cheerful news from the United States has again imparted a firmer tone to the market. Derosne sugars are scarce, and obtain from 11¼ rs to 11½ rs for No. 12, according to quality. Bright yellows and sugars of unexceptionable quality are becoming exceedingly scarce, and readily command from ¼ rl to ¾ rl above the last-named figure. We place our general quotations as follows:—Nos. 7 to 10, 24s 2½d to 26s 3½d; 11 to 12, 26s 9¾d to 27s 4d; 13 to 14, 27s 10½d to 28s 5d; 15 to 17, 28s 11½d to 30s; 18 to 20, 30s 6½d to 32s 9d; whites, inferior to superior, 32s 9d to 37s 2d. The stock here and at Matanzas amounts to 255,139 boxes, against 229,060 boxes in 1870. Molasses sugars have been in moderate demand at from 7¾ rs to 8¼ rs for Nos. 8 and 10 in boxes, equal to 21s 7d to 22s 7½d: in hhds there are none left for sale. Muscavadoes—The transactions in this kind of sugar have been of little importance, owing to the greatly-reduced stocks at outports, as well as in our market; we quote from 10 rs to 10½ rs for fair to good refining descriptions, equal to 24s and 25s 0½d. Melado of good quality is very scarce; we quote nominally from 6 rs to 6½ rs per arrobe. The exports from here, Matanzas, Cardenas, and Sagua la Grande, during the last month, were distributed as follows:—To the United States, 36,406 boxes 5,083 hhds; Great Britain and a market, 5,615 boxes; Belgium, 600 boxes; Spain, 16,907 boxes; Central and South America, 10 boxes 1 hhd—total, 59,538 boxes 5,084 hhds, against 76,875 boxes 10,531 hhds same month last year; and the aggregate of exports from the above-mentioned ports sum up to 891,822 boxes 233,647 hhds, against 1,476,206 boxes 334,708 hhds in 1870. The Crop—As far as can be calculated upon the deficiency of this crop will amount to 30 per cent. The prospects for the next crop continue to be promising, the weather being highly beneficial to the growing cane.

Annexed is Messrs William Moran and Co.'s indigo report, dated Calcutta, Aug. 25:—By the present opportunity we have the pleasure to give the figures of last year's crop, and also our estimates of the present one. With reference to the former, we beg to remark that the falling off, as compared with our estimates, was caused by the almost utter failure of the Khoontie crop in Tirhoot and Chuprah, and the poor result of the season in the Benares and North-Western provinces. As regards our estimate of the present crop, the figures given for Lower Bengal are as correct as it is possible to make them until actual invoices are received. Should the Khoonties prove a success in Tirhoot, Chumparun, and Chuprah, their out-turn should reach 50,000 maunds, but the last advices from Chuprah are rather less favourable, owing to too much rain. In giving a probable total of 22,000 to 25,000 maunds for Benares and the Doab, we must state that it is extremely difficult to get any detailed estimates so early in the season, and we have no means of getting any authentic information as to what the native cultivation is likely to yield; we can only give a rough guess at the total, from various planters' ideas in the different districts as to how they are likely to fare as compared with last season; so far, the reports from all the Benares provinces are extremely unfavourable owing to the excessive rain and high inundations, and the advices from the Doab are all to the effect that the out-turn is likely to fall short of that of last season. Taking into consideration the heavy deduction we have made on last year's out-turn (which was but a poor one) it is possible that with fine weather for the rest of the season, we may have to increase our estimate later on, whereas we scarcely think it will fall below 22,000, should the weather for the future continue as adverse as at present. The demand for indigo to "arrive" has continued during the past week, and the following sales are reported:—C. and B. D., Doudpore, Tirhoot, about 700 mds., at 305 rs per fy. md.; W. S. O., Ottur, Tirhoot, about 600 mds., at 310 rs; M. and S. D., Dowlutpore, Tirhoot, about 1,000 mds., at 300 rs; H. M. O., Ourungabad, Moorshedabad, ½, or about 450 mds., at 305 rs per fy. md. The quantity disposed of up to date is about 19,000 maunds.

Stock in Calcutta, about 2,600 mds, chiefly composed of odds and ends, dust, washings, &c., bought at public sale for local use and re-manufacturing purposes.

The annexed is dated New York, Sept. 16:—Business in the general merchandise markets continues upon a liberal scale, though it was somewhat curtailed yesterday by the advent of the equinoctial storm. The domestic trade of the country, resulting from a necessary exchange of commodities, is in a more satisfactory condition than it has been for several years. The resources of all sections have been well developed during the current year, and their consumptive wants are correspondingly large; and with such favourable conditions for commercial activity, we find that all our interior lines of communication are burdened with large quantities of freight in transit. The condition of the export trade is also quite satisfactory, despite of some drawbacks. The exports of the leading farm products continue large. Of wheat, the shipments for the past few weeks have rarely, if ever, been equalled, while the aggregate outward movement of the various domestic products has been sufficient to call into requisition not only most of the available tonnage here and at neighbouring ports, but many vessels have been chartered to arrive. This state of the market has naturally resulted in comparatively good rates of freight, though they are not nearly so high as we have known them in ante-war times, when the expenses of ships were not more than one-half what they now are. The new cotton crop will soon begin to go forward to Europe in considerable quantities, and thus favourably affect the foreign exchanges. Although cash gold continues in limited supply, owing to the large hoard in the Treasury and the pressing wants of importors for the payment of duties, yet, as the export of specie is held in check by the abundance and the relative low price of exchange, the stock of gold in the banks and commercial channels must soon begin to accumulate, when it is reasonable to suppose gold will react to a lower point. On Thursday the Treasury department sold four millions instead of two, as advertised, which had the effect to momentarily depress the price, yet the floating supply was so light that the "bull" combination met with little difficulty in bringing the market up to where it was before. Through the

increased sale by the Treasury department, the legal reserve of the banks will be considerably strengthened, while the foreign exchange market has been measurably relieved from the depression which has resulted from the scarcity and high rate of cash gold. Altogether the condition of the market is healthier than it was in the early part of the week. The money market remains easy, the leading rate for call loans being 3 per cent., with exceptions at 2½ and 4 per cent. Discount rates for prime business paper remain 6 to 7 per cent.

THE COTTON TRADE.

LIVERPOOL.—SEPTEMBER 28.

The cotton market was quiet in the early part of the week, and in some instances prices were barely maintained. Since Tuesday the demand has increased, with a firmer tone; and although the Bank rate has been raised this day from 3 to 4 per cent., the quotations of last Tuesday are generally supported. Sea Island has been in moderate demand, without change in prices. American, after some slight decline, has again become firm, and the quotation of middling fair Orleans is advanced ⅛d per lb. New York advices to the 28th instant quote middling Upland 19¼ cents, costing to sell in Liverpool 10d per lb, by steamer. In Brazil a fair business has been done, and the only change to notice is in **fair Pernam and Ceara, which are ⅛d per lb lower.** Egyptian has been in moderate request, and prices are slightly in favour of the buyer. East Indian descriptions have been in moderate demand and holders continue to supply the market freely. The higher grades command full rates, but in the middling fair and lower qualities a decline has been submitted to of ⅛d per lb.

In cotton "to arrive" and for future delivery, the business has been to a fair extent. The latest quotations are, yesterday —American basis of middling (from any port) not below good ordinary, November delivery, 9⅛d; October-November, 9⅛d; new crop, October-November shipment, 9⅛d; New Orleans, **not below good ordinary, delivery October, not before 20th,** 9⅛d; November, not before 15th, 9⅛d; new crop, November-December shipment, 9⅛d; Pernam, basis of fair, mutual **allowances, October shipment, 9d; Maceio, basis of fair, mutual allowances, October shipment, 9d; Dharwar, fully fair, August** sailing, 7⅛d; Dhollerah, fair new merchants, sailing June, 7⅛d; **late June, 7⅛d; August, 7⅛d. And this day, American, basis** of mid fair New Orleans, not below good ordinary, delivery **October, 9 1/16d, 9⅛d; October-November, 9 1/16d; Savannah, not** below good ordinary, November delivery, 9 1/16d; Broach, good fair new merchants, madapollam-ginned, June sailing, 8⅛d; Dhollerah, fair new merchants, June sailing, 7⅛d; Oomrawuttee, fair new merchants, June sailing, 7⅛d per lb.

The sales of the week, including forwarded, amount to 65,840 bales, of which 7,780 are on speculation, and 6,050 declared for export, leaving 52,010 bales to the trade.

SEPTEMBER 29.—The sales to-day will probably amount to fully 12,000 bales, with a firm market.

In speculation there is an increase of 276,430 bales. The imports this week have amounted to 16,043 bales, and the quantity of American cotton reported at sea for Great Britain (including cable advices to September 22) is 55,000 bales, against 28,000 bales at the corresponding period last year. The actual exports have been 8,525 bales this week.

NEW YORK.—SEPT. 15.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening, Sept. 15. From the figures thus obtained it appears that the total receipts for the seven days have reached 12,561 bales, against 9,137 bales last week, 7,579 bales the previous week, and 7,844 bales three weeks since, making the total receipts since Sept. 1, 1871, 21,860 bales, against 33,822 bales for the same period of 1870, showing a decrease since Sept. 1, this year, of 12,022 bales. The exports for the week ending this evening reach a total of 15,815 bales, of which 15,815 were to Great Britain, none to France, and none to rest of the continent, while the stocks as made up this evening are now 85,228 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:—

Week ending Sept. 15.	Exported to		Total this week.	Same week 1870.	Stock.	
	Great Britain.	Continent.			1871.	1870.

Total since Sept. 1	30346	84	30430	10903	...	...

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 11,975 bales, while the stocks to-night are 29,975 bales *more* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to Sept. 8, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph:—

Ports.	Receipts since Sept. 1.		Exported since September 1 to				Shipments to Northrn. Ports.	Stock.

Notwithstanding Liverpool was dull and slightly off the early part of the week, and has since then furnished but little support to prices here, our market has been strong all the time, and quotations for spot cotton close ¼c higher than last Friday. This continued strength is due to a general belief among the holders that prices are not high considering the present unfavourable prospects with regard to the crop. And yet the feeling, on the whole, appears to be conservative, there being an indisposition among many holders to force up the market so long as there is so much doubt respecting the future, lest the high rates would induce very free receipts and result in an unfavourable reaction. So long, however, as the arrivals at the ports continue so limited, sufficient outlet is quickly found, without lowering prices, to keep the stocks down, and while the stocks remain at the present low figure they are easily managed. Still the demand continues limited, and the close to-night was very quiet. For future delivery the movement has been more active, and prices show a greater improvement, rates being about ⅜c to ½c above last Friday. Low middling closed to-day at 20⅜c for September, 19⅞c for October, 19⅞c for November, 19⅞c for December, 20c for January, and for March, 20½c. The total sales of this description for the week are 71,550 bales, including 100 free on board. For immediate delivery the total sales foot up this week 9,515 bales, including 2,403 for export, 4,625 for consumption, 615 for speculation, 1,869 in transit. Of the above 125 bales were to arrive. The following are the closing quotations:—

	Upland and Florida.	Mobile.	New Orleans.	Texas.
	c c	c c	c c	c c
Ordinary.....per lb	17½ @ ...	17½ @ ...	17⅝ @ ...	17⅝ @ ...
Good ordinary	18⅜ ...	18¾ ...	18¾ ...	18⅞ ...
Low middling	20¼ ...	20¼ ...	20⅜ ...	20⅜ ...
Middling	21¼ ...	21¼ ...	21⅜ ...	21⅜ ...
Good middling	22¾ ...	23 ...	23½ ...	23½ ...

For forward delivery the sales (including 100 free on board) have reached during the week 71,550 bales (all low middling or on basis of low middling).

GUNNY BAGS, BAGGING, &C.—During the past week cloth has sold slowly in a small way, but prices are steady as last quoted. The feeling among holders is decidedly firmer, and even for a round lot the probability is that our inside price could not be shaded. Sales are 400 bales India on spot at 15¾c. Borneo is quoted at 17½c to 18c; domestic rolls, 18c; Dundee, 1¼ lbs, 14½c; 1¼ lbs, 17c; and 1½ lbs, 19½c. Bags are quite dull and the feeling uncertain, prices nominally 14½c for 440. Hemp has ruled firm, but only moderately active for Manila. Sales are 3,700 bales to arrive at 13 to 13¼ gold 60 days. Jute is dull, and without further business reported; prices are entirely nominal. Jute butts have been quiet, but meet with some inquiry at the close, and we note sales of 1,800 bales on spot at 3 1/16c and 600 bales at 3⅞c to 4c currency.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports, receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:—

	Week ending Sept. 15, 1871.			Week ending Sept. 15, 1870.		
	Receipts	Shipments.	Stock.	Receipts	Shipments.	Stock.
Augusta	722	328	3098	1997	1997	1339
Columbus	230	279	1122	1104	786	1585
Macon	218	191	1791	1422	1380	1940
Montgomery	474	363	1618	1044	1121	1437
Selma	562	433	742	470	70	1820
Memphis	829	1153	1358	701	1933	2810
Nashville	104	262	264	200	337	1997
	3139	3009	10291	6938	7624	12975

The above totals show that the interior stocks have decreased during the week 70 bales, and are to-night 2,684 bales *less* than at the same period last year. The receipts have also been 1,483 bales less the same week last year.

The exports of cotton this week from New York show an increase since last week, the total reaching 7,924 bales, against 2,208 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1871; and in the last column the total for the same period of the previous year:—

—*New York Commercial and Financial Chronicle.*

NEW YORK, Sept. 22.—According to Messrs Moffatt, Davidis, and Co.'s report, the week's receipts of cotton at all United States' ports have been 21,000 bales; ditto, since 1st September, 45,000 bales. Shipments to England, 4,000 bales. Total since 1st September, 33,000 bales. Stock at all ports, 90,000 bales.

NEW YORK, Sept. 26.—The receipts of cotton at all United States' ports for the last four days have been 17,000 bales. Shipments to England, 2,000 bales. Middling Upland, 9½d, cost and freight, per steamer.

MARKETS IN THE MANUFACTURING DISTRICTS.

MANCHESTER, Sept. 28.—The past week has been characterised by extreme inactivity, and prices are farther in favour of buyers. Our market has not had time to recover from the distrust caused by several large failures when the money market became tight, which caused two successive advances of 1 per cent. each to the Bank rate—the minimum now standing at 4 per cent. The dearness of money, coupled with the generally unremunerative state of trade both in this district and in our large Eastern markets, cause buyers to confine their operations within narrow limits, so as to be well prepared for any contingency. Yarns, both for the home trade and shipping, are very dull, and we hear of some spinners having accepted very low rates indeed. Cloth is equally stagnant with yarns, and in no branch is there any activity; prices are weak and irregular. Production on yarns has not sensibly decreased, and stocks as yet are by no means heavy; but in cloth stocks are becoming rather burdensome, and as a corrective the stoppage of looms has been resorted to in many places.

Messrs Alcar Calle and Co. received the following telegram from Manchester yesterday:—A firmer tone exists, and buyers are making offers more freely, but at prices below producers' quotations, little actual business is therefore going on to-day.

BRADFORD.—The wool market remains very quiet. The transactions are very few, and confined chiefly to lustre and demi-lustre sorts. Staplers are still asking extreme rates, though prices are hardly tested. There is a fair amount of business doing in noils and broken. The lower descriptions have a softening tendency. The same apathy prevails in both the yarn and the piece market. The transactions are very limited. In the piece market the extreme rates of manufacturers are not yielded except under absolute necessity.

LEEDS.—There has not been so much activity in the cloth markets, and as the season is now far advanced purchases are being made with greater caution, and parcels leaving the halls are neither so large nor so numerous. The demand is of a diversified character. The inquiries for tweeds are by no means brisk. White tweeds are also in limited request, having been transferred only in small quantities.

BIRMINGHAM.—Business of considerable importance was transacted at the preliminary meeting of the South Staffordshire ironmasters, and Mr J. P. Hunt, chairman of the association, took the chair and there was a large and influential attendance. One of the first questions before the meeting was the future constitution of the association, the old one, established seven years ago, having expired with the panel of the Queen then elected. At the subsequent open meeting on Change a fair amount of business was done, at an average advance of 10s per ton.

CORN.

AMERICAN GRAIN AND FLOUR MARKETS.

NEW YORK, SEPT. 15.

We have had a buoyant market for flour and grain during the past week, due to better foreign advices, some falling off in receipts and growth of confidence in the future among holders and receivers but the close is flat. Flour has continued to show a comparatively moderate supply—not sufficient to prevent of any accumulation of stock—and there is still complaint of scarcity of full lines of shipping extras. Liverpool advices have quoted a considerable advance, and the local trade has been buying freely, upon which prices show a further advance of 25c to 30c per bbl, and are now fully one dollar higher than the lowest prices of August. To-day, with dull accounts from abroad and rain falling the market was dull, and prices weak, leading shipping extras being quoted at $6.30 to $6.50. Wheat has been buoyant, with prices showing an advance of 7c to 10c per bushel; the most decided improvement being in red and amber winter, which is wanted for the continent. There has also been latterly an increased demand for white wheat. Spring wheat has not been in sufficient supply to attract attention. Yesterday the highest prices of the current crop year were paid:—New No. 2 Milwaukee, to arrive, $1.50; red winter Ohio, $1.58; amber Michigan, $1.65, and prime white, $1.70 to $1.72½, with some white Canada, in bond, at $1.67. The receipts of the week show a considerable falling off as compared with the previous week, but are still 30 per cent. in excess of last year, while the quantity in sight has increased to nearly seven million bushels, against something less than nine million bushels at this date last year. The total receipts of grain at the West for six weeks ending Sept. 9 show an increase of nearly 50 per cent. over the corresponding period of last year; but the export demand is very great, limited apparently by nothing but the capacity of the means of transportation. To-day, with a decline in Liverpool, and nothing to counteract its effect, prices fell off 2c to 3c, and the close was dull: No. 2 spring, $1.44 to $1.47 in store and afloat; No. 2 Toledo, $1.56; amber Michigan, $1.62 and white ditto, $1.67. Corn has experienced a marked advance. The advance abroad, attended with liberal shipping orders and some falling off in receipts at the West, have stimulated speculation. On Wednesday one shipper took a quarter million bushels, mainly at 71c, but the advance since has somewhat checked the export demand. To-day the market opened with sales of Western mixed at 73½c to 73¾c, in store and afloat, but at the close there were no buyers at over 72½c in store and 73c afloat. Yellow and white corns have been in more demand. The movement in breadstuffs at this market has been as follows:—

LONDON MARKETS.

STATE OF THE CORN TRADE FOR THE WEEK.

MARK LANE, FRIDAY EVENING.

The rain has greatly interfered with the completion of the harvest in the northern districts, but there is very little outstanding, while in the southern districts the preparations for the autumn sowing have been rather facilitated by the copious rainfall. The most serious feature in the agricultural outlook is the spread of the potato disease, which will probably lead to the yield being forced upon the market as early as possible. Supplies of home-grown wheat on sale have been on the increase, but the condition has deteriorated in consequence of the unfavourable change in the weather. To-day factors were enabled to realise an advance of 1s per quarter on both English and foreign wheat, there being a good consumptive demand, coupled with a revival of speculation. The number of wheat-

laden vessels on passage, though in excess of last year, is not very great, but the export inquiry has ceased, except for choice seed grain. Flour has advanced 1s per sack on the week.

Oats have shown comparative firmness during the week, but closed with more dulness. Maize has met a fair inquiry, at very full currencies, but beans and peas are nominally unchanged. Supplies of barley have been on the increase, but there has been little doing in any description.

The following statement shows the imports and exports of cereal produce to and from the United Kingdom since harvest, viz., from August 26 to the close of last week, compared with the corresponding period in the three previous years:—

IMPORTS.

	1871. cwts.	1870. cwts.	1869. cwts.	1868. cwts.

Mr George Dornbusch thus reports the state of the floating grain and seed trade:—During the last eight days 114 grain and seed-laden vessels have arrived at ports of call, viz:—50 wheat, 25 maize, 6 barley, 9 rye, 11 beans, 5 linseed, 2 rapeseed, 1 cottonseed, 1 milletseed, 1 oilcake, 3 sundries. The floating grain trade has increased in steadiness, and prices of fine cargoes have been tending upwards. Wheat—Fine cargoes 1s to 2s dearer,—secondary slow sale. Maize—For the few fine cargoes offering an advance is asked. Barley also in improved demand for fine cargoes. Rye—Good cargees 6d to 1s dearer; inferior neglected. The reported sales are as follows:—Wheat—38 arrived cargoes: Berdianski, 54s, Marianopoli, 53s to 55s; Rostoff, Ghirka, 51s; winter ditto, 48s 6d and 49s 6d; new coast ditto, 51s 6d and 53s; Ghirka from Taganrog, 47s 6d and 49s 3d; ditto from Odessa, 52s and 52s 9d; ditto from Nicolaieff, 51s 9d to 53s 9d; Kerstch, 51s; Ibrail, 44s 6d; Sandomirca, 57s 9d; winter Barletta, 60s 9d per 492 lbs; Saide from Alexandria, 48s 3d; No. 1 spring, 55s 6d; and N.R.W. from Montreal, 58s per 480 lbs. On passage 1 cargo spring from New York, American terms. Shipped or to be shipped, 5 cargoes, Nicolaieff, 53s per 492 lbs, and No. 1 spring from New York and Philadelphia, 56s 6d and 57s per 480 lbs London terms. Maize—24 arrived cargoes: Galatz, 29s 9d to 34s 3d; old ditto, 35s per 492 lbs; Ibrail, 29s 3d to 31s 6d; Wallachian, 27s 9d to 30s 6d; Bulgarian, 27s 6d to 31s 6d; Wallachian, 28s; Danubian, 27s; Yeisk, 28s 6d, prime mixed, 32s 9d per 480 lbs. Maize and barley—1 cargo from Odessa, 31s per 492 lbs, and 26s 6d per 480 lbs. Barley—6 arrived cargoes: Azow, 26s 9d; Nicolaieff, 27s 6d; Wallachian, 27s 6d; Danubian, 27s 3d; Enos, 27s 6d; Danubian, 27s 9d per 400 lbs. Rye—5 arrived cargoes: Azow, 30s to 32s 3d; Nicolaieff, 33s and 34s 4½d per 480 lbs. Linseed in active demand at 1s advance on the week. The sales are—8 arrived cargoes: Azow from Taganrog, 59s to 61s per 424 lbs; 850 tons E.I. from Calcutta, 63s per 410 lbs. On passage, about 6 cargoes: Azow from Taganrog, 60s to 61s per 424 lbs; 350 tons E.I. from Calcutta, 62s to 62s 9d; and 1,000 bags from Bombay, 64s per 410 lbs. Shipped or to be shipped, 2 cargoes Azow, from Taganrog, 60s 6d; 900 tons East India, from Calcutta, 62s 3d; 20 tons mixed ditto, 56s 9d per 410 lbs; 2,000 Kamschatka, from St Petersburg, 58s 6d per 424 lbs. Rapeseed steady. Arrived, 1,800 qrs Azow, from Taganrog, 54s 9d per 424 lbs; and 150 tons ordinary brown Calcutta, 67s 6d per 410 lbs. On passage, 400 tons ditto, 67s 9d to 68s 1½d per 416 lbs. Shipped or to be shipped, 200 tons ditto, 68s 3d per 416 lbs. Cottonseed unaltered.

COLONIAL AND FOREIGN PRODUCE MARKETS

TRANSACTIONS OF THE WEEK.

FOR REPORT OF THIS DAY'S MARKETS SEE "POSTSCRIPT."

MINCING LANE, FRIDAY MORNING.

SUGAR.—The market shows rather an improving tendency. A large amount of business has been transacted in West India at rates for refining sorts which could not be obtained last week, the sales in three days amounting to 4,584 casks. The Barbadoes by auction was chiefly bought in. Importers now generally require rather higher rates. Low brown descriptions attract attention, and there are not further sellers upon former terms. Grainy sorts meet with more inquiry. Refined sugar has recovered from the depression existing last week, with a steady business passing. The wet weather is not favourable to the beet crops, and prices have advanced on the continent. Since last week the general statistics of sugar have not experienced any material change, the stocks remaining relatively small and the deliveries steady.

Mauritius.—Towards the close of last week 5,500 bags fine crystallised sold at 35s 9d.

Bengal.—1,171 bags Gurpatta were disposed of at and after the sale at 28s 6d to 31s for low to middling yellow.

Penang.—8,205 bags, rather more than half sold: soft bright yellow and white, 33s to 35s; one lot grainy yellow, 36s 6d; low yellow, 28s to 29s 6d; brown, 24s to 28s. 500 baskets very low brown, by private contract, at 20s per cwt.

Madras.—1,500 bags Jaggery at 20s 9d.

Natal.—671 bags were bought in.

Java.—4,200 bags low brown syrups were taken in at 22s 6d.

Manila.—12,000 bags have been disposed of: clayed at 23s to 26s; unclayed at 21s 3d for Taal.

Beet.—2,680 bags Austrian sold at 28s 6d to 30s 6d.

Refined.—The demand has rather improved, and a steady business done in dry goods at firmer prices. Common to middling qualities at 39s to 40s upwards. Pieces meet with more inquiry. 5,206 loaves Dutch refined sold by auction at 39s 6d to 40s 6d per cwt.

MOLASSES.—Sales amount to 130 puncheons West India: Demerara, &c, 11s to 11s 6d; Antigua, 13s.

RUM.—There has been a steady demand during the week, the sales including about 300 casks Mauritius at 1s 4½d to 1s 5d, and some Demerara at 1s 11d. Last week good Penang sold at 1s 6d proof. The business in Jamaica has been chiefly at 3s 4d to 3s 6d per gallon.

COCOA.—Recent very large deliveries have caused a reduction in the total stock to 34,800 bags. The market is quiet, but prices remain without alteration for the small quantity sold. Of 298 bags Trinidad, by auction, a few lots found buyers at 69s to 90s for greyish to good red. 174 bags Grenada part sold at 50s 6d to 58s 6d, a small quantity of superior at 60s 6d to 64s 6d. 239 bags foreign were bought in. 45 bags African sold at 41s 6d to 42s 6d. Privately business in Surinam at 64s to 65s per cwt.

TEA.—The market is steady, last week's prices being well sustained for new season's teas in the absence of fresh arrivals. A few small public sales have taken place without leading to any material change in prices. Owing to the active demand for India tea last referred to the bulk of the quantity advertised for sale on Tuesday was disposed of by private contract. Only 500 packages sold in the room at full prices, excepting for Pekoe, Souchong, and medium Souchong, which are at present neglected.

COFFEE.—Rather higher rates were paid at one time, but could not in all cases be obtained at yesterday's sales for plantation Ceylon. The total quantity of these kinds by auction during the week amounted to 2,431 casks 348 barrels 1,269 bags, which chiefly sold: low middling to middling, 67s to 75s 6d; good middling to fine, 76s to 86s 6d; grey and pale, 64s to 74s for low middling to bold. 2,772 bags native realised very full prices: good ordinary, 59s to 59s 6d; bold chiefly at 62s to 62s 6d; French kind, 59s to 61s. 1,115 cases 3,112 bags East Indian: Coorg and Wynaad, 68s to 72s 6d; superior and bold, 73s to 80s 6d; Neilgherry, 65s to 85s 6d. Native sorts part sold at 63s 6d to 64s for

superior, but most of the ordinary quality was bought in. Privately business at 60s for some landing. Of 1,085 bags Manila one pile of pale quality realised 60s. 279 bags Singapore were partly disposed of at 52s to 53s 6d for low quality. 107 casks 312 bags Jamaica: ordinary mixed qualities, 59s to 61s 6d. 517 bags Costa Rica: ordinary and mixed, 61s 6d to 64s. 590 bags Rio, 55s 6d to 59s. 1,442 bags Guatemala, 59s to 64s: a few lots good, 68s to 68s 6d per cwt. The total stock here is nearly 2,000 tons less than at the same date last year, and the supplies afloat from Colombo now show a very material diminution.

Rice.—The transactions of the week have been large, and in many instances at higher prices. Six floating cargoes of Necrancie Arracan have sold for the continent at 9s 9d to 10s; one of Rangoon at 10s 4½d; one Bassein at 10s 3d, ex quay, for London. Several contracts made in other kinds afloat. Bulam and low Bengal, at 9s 9d to 10s. 400 tons Madras, at 10s to 10s 1½d ex quay. Sales of Bengal on the spot, 10s 6d to 11s 7½d per cwt. There have not been any public sales during the week.

Imports and Deliveries of Rice to Sept. 23 with Stocks on hand.

	1871.	1870.	1869.	1868.
Imports.....tons	68850 ...	47350 ..	55720 ..	5078
Deliveries	70300 ..	54330 ..	46000 ..	39050
Stock	38250 ...	37740 ...	44370 ...	27750

Sago.—This article remains dull. 978 bags by auction were chiefly bought in; a few lots selling at 16s per cwt for good small grain.

Black Pepper.—There has been a good deal of speculative business done during the week, and the latest sales establish a further advance. Penang, 6¾d to 6¾d. Singapore, 6¾d; closing yesterday at 7d per lb. Contracts have been made during the week at various prices, for delivery and to arrive, including Penang afloat at 6¾d to 6¾d. 226 bags sundries Batavia by auction realised 6¾d. 1,011 bags Malabar, 6¾d to 7¼d per lb, for grey ish to good and dusty.

White Pepper is firm. Sales have been made in Singapore, at 11d per lb.

Spices.—At the sales on Wednesday nutmegs went at full rates to a further slight advance. 80 cases Penang chiefly sold: 68's to 64's, 3s 9d to 4s 1d; 78's to 70's, 3s 3d to 3s 6d; 82's, 3s 3d; 126's to 108's, 2s 4½d to 3s. 15 cases Penang mace obtained high rates; middling to good, 4s 4d to 4s 6d. 3 casks ordinary Java kind, 4s 2d. 200 md's Zanzibar cloves brought 3¾d; one lot 3¾d for good. 80 bags damaged Amboyna, 2¾d to 3¼d. 264 bags pimento, wind rather damaged, and there is more remaining unsold, at 2¾d to 2¾d. 670 bags cinnamon chips, 5¾d to 5¾d; bark, 3d to 3¾d per lb. 300 barrels, &c., Jamaica ginger were steadily at 45s to 60s for low to good ordinary. 257 cases Cochin, middling part ordinary, 50s to 57s; ordinary rough, 44s to 46s. 282 bags dark Malabar sold at 42s 6d to 47s per cwt.

Saltpetre.—A very active demand has prevailed during the week, speculative as well as for consumption, and the latest rules offered show 1s to 2s per cwt rise. About 12,000 bags have changed hands on the spot up to 31s to 31s 3d for good to fine Bengal: refraction, 6 to 9 lbs. About 5,000 tons to arrive, the latest prices being 28s 9d to 31s per cwt, according to condition.

Imports and Deliveries of Saltpetre to Sept. 23, with Stocks on hand.

	1871.	1870.	1869.	1868.
Imports.....tons	9000 ...	7000 ...	7000 ...	5000
Total delivered	9400 ...	10000 ...	7000 ...	7000
Stock	2000 ...	1000 ...	4000 ...	6250

Deliveries last week 350 tons.

Indigo.—Declarations for the next sale now reach 10,800 chests. The market remains firm.

Cochineal.—The market is unchanged. The deliveries have been increased more than 50 per cent. upon last year's, and the stock, which has gradually fallen off for some time past, is now less 1,700 serons.

Other Dyestuffs Generally.—The principal feature of the week has been the improved demand for gambier at former prices. Sales include block at 17s 9d to 17s landed and 16s 7½d, ex ship, "with all faults." Cutch, 22s to 22s 6d; present value, 24s per cwt. Catch is rather firmer at 21s to 22s. 60 bales Bengal safflower were taken in. Turmeric is inactive with limited transactions in Bengal.

Shellac.—300 chests sold at 6l 17s 6d per cwt for good second orange.

Metals.—The further advance upon the Bank rate has not had much effect upon these markets. At the sale of the Netherlands Trading Company yesterday, 9,000 slabs went at rather higher prices, up to 2s advance, the average for Banca being equal to about 1l 7s more. The market rather improved upon the result being known. Straits sold at 104l; Billiton, 103l 10s, and Singapore and Banca 103l. Pig iron 5d to 6d higher. The prime sections in good demand. Spelter has been steady. Sales of Silesian at 14l 5s for continent. Copper has declined 10s to 20s for foreign production. Chili &c., 60l 10s to 61l, according to quality. Wallaroo, 70l to 70l 5s. There is not much doing in Straits and prices are easier. Yesterday a slight reduction occurred in Scotch pig iron, the only market where decided money has caused weakness. The latest sales were at 60s 7½d per ton, cash, with a quiet market.

Jute.—The market is without quotation, and the trade seem indisposed to operate freely, nothing at the very large supplies afloat. Transactions on the spot and to arrive have been very moderate. Trade in Dundee remains quiet.

Manila Hemp.—At auction 1,250 bales were held for high prices for the season. The damaged sold from 47s to 51l 10s. By private contract several parcels sold at prices ranging from 44s 10s to 52l for brown to superior current quality. Fine current, clean, 52l to 52l 10s.

Linseed.—The business during the past week has been upon a large scale at advancing prices. Numerous cargoes of Black Sea have sold at 63s to 63s, and latterly at 63s 6d to 64s. Some important contracts have been made in Calcutta afloat at 62s 3d to 63s. Bombay, 9 months, at 63s per quarter.

Oils.—Fish oils attract little attention, and prices are the same as last quoted. Pale seal, 33l. Sperm unchanged per ton for seasonal. Olive oils meet without change. A cargo of Gallipoli sold, no price given. Transactions in the spot have been limited. Cocoanut is rather lower, selling at 34l for Ceylon afloat. The deliveries keep large, retail sales of Cochin at last week's prices. A better demand for palm at 32l to 37l. Linseed oil steady, on the spot at 34l. A good business for delivery in the next six or seven months, viz., 33l 10s, October to December, and 33l, January to April. English brown rape steady, at 43l 10s to 44l per ton, spot and for delivery.

Petroleum is quiet, at 1s 6½d to 1s 6¾d, and 1s 6¼d per gallon for delivery to the end of the year.

Turpentine.—Spirits dull, at 43l for American.

Tallow.—Since last Friday Russian has advanced 6d to 1s, owing to expected short shipments, and would probably have ruled even higher but for the good supply of Australian. The market is, however, very firm, with a good demand. Petersburg, old, 45s 6d; new, 46s 3d; October to December, 46s to 46s 3d; December only, 46s 6d; March, 47s to 47s 6d per cwt.

Particulars of Tallow—Monday, Sept. 25 1871.

POSTSCRIPT. Friday Evening.

Sugar.—The market is firmer. Sales of West India, 1,284 casks; for the week 5,805 casks, at 6d per cwt recovery. A few lots of crystallised yellow and white brought 36s 6d to 38s, being dearer. 2,069 bags Bengal by auction part sold at previous quotations for soft brown and yellow sorts. 350 casks low brown part sold at 22s to 24s. By private contract further business in Manila, including 12,000 bags Zoba, at 22s to 26s; 19,000 bags clayed, at 26s. 1,000 tons Ilo Ilo to arrive at 23s.

Copper.—The public sales have comprised 389 casks, 38 barrels, 281 bags plantation Ceylon. 310 cases 106 bags East India sold without further change in value. 1,684 bags Porto Rico were bought in at 68s to 68s.

Rice firm, and in good demand.

Pepper.—Further business at the advance already quoted.

Saltpetre.—50 tons to arrive at 30s 6d per cwt.

Shellac.—133 cases part sold at 7l 5s to 7l 7s 6d for good orange.

Turmeric.—2,776 bags Bengal sold at 18s to 18s 6d per cwt.

Iron.—Scotch pig advanced to 60s 6d per ton, cash.

Oils.—Colonial sperm by auction was taken in at 81l. East India fish at 29l to 30l per tun. 606 casks of cocoa-nut part sold. Ceylon, 35l 15s to 38s; Cochin, 51l; Sydney, 34l 5s to 37l 5s. 650 casks palm partly sold at 31l to 33l 15s for low qualities. Lagos taken in at 37l per ton.

Tallow.—Town advanced to 47s 6d. Petersburg now, 46s 6d, spot; 46s 9d, March. The public sales went 1s to 1s 6d dearer. 2,145 casks Australian all sold; mutton at 45s 6d to 46s 3d; beef, 44s to 45s 6d; and inferior, 37s 6d to 40s 6d; of South American, 100 pipes middling mutton realised 44s per cwt.

ADDITIONAL NOTICES.

Dry Fruit.—Currants are better, and a large trade doing in all ordinary. Valencias also are firmer, and large quantities are selling. The continental houses are buyers, at a slight reduction. Sultanas are firm, with a slight tendency to advance. New Turkey figs sell well if in good condition. Muscatels are dear in price, but in condition good say 125s to 150s.

English Wool.—Market quiet, but very little alteration in prices.

Colonial Wool.—The sales progress very steadily, with great spirit.

Flax.—Market firm.

Hemp.—Market for Russian firm; Manila also very firm. A large business done for consumption, and 50l paid for fair current.

Silk.—Rather more business doing the last few days; prices a shade easier.

Seeds.—The seed trade rules steady for all varieties.

Tobacco.—The market continues very quiet, waiting the sampling of the new tobacco. Some parcels of Turkey have arrived, for the bright portion of which full prices have been obtained. There is an improved inquiry for Manila.

Leather.—There has been a good business done in the leather trade during the past week. At Leadenhall, on Tuesday, there was a moderate supply of fresh leather, and a good demand for English butts, 24lb. and upwards. Crop hides of all weights, good English shoulders, dressing hides, shaved hides, and calfskins of medium and heavy averages. There is no alteration to quote in prices.

Metals.—The course of business has been heavy, suffering more or less from the disturbance of the money market in nearly all branches. Copper is quiet, with slightly easier prices. Tin is rather firmer in consequence of the high figure ruling at the Dutch sale on 28th inst. Iron, spelter, lead and tin plates all steady, but quiet.

METROPOLITAN CATTLE MARKET.

Monday, Sept 25.—The total imports of foreign stock into London last week amounted to 17,875 head. In the corresponding week in 1870, we received 12,029; in 1869, 13,702; in 1868, 18,233; and in 1867, 14,765 head.

The feature in the cattle trade to-day has been the heavy arrival of foreign beasts in improved condition. The demand for them has been to a moderate extent, and the best breeds have been disposed of at 5s 2d to 5s 6d per 8 lbs. From our own grazing districts the receipts have also been more extensive. The choicest descriptions have occasionally made 5s 10d, but 5s 8d has been the general top quotations, whilst many fair middling beasts have been disposed of at 5s 2d per 8 lbs. With sheep the market has been only moderately supplied. Small choice animals have been in request at full prices, the heavy Downs and half-breds selling at 7s to 7s 3d per 8 lbs, but heavy sheep have been dull and drooping in value. Calves have changed hands to a moderate extent on former terms. Pigs have been quiet, at the rate previously current.

SUPPLIES ON SALE.

	Sept. 26, 1870.	Sept. 25, 1871.
Beasts	3,860	5,520
Sheep	19,860	22,520

Veal	4	8		5	4	Small pork	4	8		5	2

HOP MARKET.

BOROUGH, Friday, Sept. 29.—Hops of the new growth have continued in demand, and prices have in some instances further advanced. For yearlings also a good inquiry has prevailed at prices tending upwards. Mid and East Kents, 9*l* to 12*l* 12s; Weald, 8*l* 10s to 10*l* 10s; Sussex, 7*l* 5s to 8*l* 12s; Farnham and country, 11*l* to 15*l*. Yearlings—Mid and East Kents, 60s to 120s; Weald of Kents, 60s to 115s; Sussex, 60s to 100s; Farnham and country, 90s to 120s. Olds, 20s to 30s per cwt.

POTATO MARKETS.

BOROUGH AND SPITALFIELDS, Friday, Sept. 29.—A moderate supply of potatoes has been on the stands. The trade has been firmer at our quotations:—Regents, 60s to 75s; shaws, 55s to 65s; kidneys, 100s to 120s; rocks, 55s to 60s per ton.

LIVERPOOL MARKETS.

WOOL.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 29.—The public sales of sundry kinds of foreign, held here from the 26th to 29th inst., have been to a great extent a failure; the unusually large quantity of Levant wools pressed upon the market proving to be too much to be absorbed by the trade; consequently, of 24,814 bales catalogued, only about one-fourth could be disposed of, and this at some reduction from late current rates.

CORN.

(FROM OUR OWN CORRESPONDENT.)

FRIDAY, Sept. 29.—Sellers were firm in demanding an advance of 3d for red American spring, and 1d to 2d per cental for white wheat. Millers, however, complied reluctantly with the additional requirements, and only a moderate business was done in any description. Red American winter made slowly an improvement of 2d per cental on the week; flour, 6d per barrel and 1st per sack dearer. Beans, 6d per qr higher. Indian corn met a fair consumptive sale, at an advance of 1s 3d to 1s 6d per qr.

WAKEFIELD, Friday, Sept. 29.—There was a better demand for wheat, and all dry parcels were noted fully 1s per qr dearer than last Friday. Other sorts were neglected. Fine barley was fully as dear, but secondary qualities were rather cheaper. Other articles without alteration.

The Gazette.

TUESDAY, Sept. 26.

BANKRUPTS.

John Joseph Bell, Cambridge road, Hammersmith, and Henry Harris, Hanover street, Pimlico, builders.
Walter Alfred Blake, Grange road, Bermondsey, ink manufacturer.
John Thomas Coling, Great Russell street, Bloomsbury, wine merchant.
